Beautiful Lawns

What can I do to make a green velvety lawn?

This, in some form or other, is the question that is asked by 90 per cent of all who take an interest in their gardens and wish to possess a lawn of satisfactory appearance. It is the common question, too, that is asked by everyone as soon as he begins to take an interest in the grounds surrounding his home. Although there are many things that enter into the making of a good lawn, **THE MOST ESSENTIAL IS SUITABLE SEED**, for without good seed all your labor is wasted. **THE ANSWER IS BELOW.**

LILLY'S

Imported Lawn Seed

This mixture is composed of the very finest growing grasses which have been carefully chosen to suit the climatic and soil conditions on the Pacific Coast and will produce a firm, velvety, rich green turf of uniform color, which will remain green all the year.

It is the result of many years' practical experience and the best that money can buy.

Price, 1 lb., 50c; 4-lb. package, \$1.80. (Subject to change.) Postage additional.

LILLY'S

Nonpareil Lawn Seed

Standard for the Northwest

Nonpareil Lawn Grass Seed is a mixture of many suitable hardy grasses; scientifically selected to produce a green lawn all the year, and form a thick, matted turf with roots reaching far into the ground to withstand drought and prevent heaving in winter. Especially adapted to the Pacific Coast. It contains White Clover to make a quick showing and act as a nurse crop for the grasses.

The grasses are not so fine as those in our Imported Lawn Grass Mixture, but will produce a splendid lawn with less care, and is recommended where endurance is desired. One pound of seed is sufficient for about three hundred square feet of new lawn, or to renew about six hundred square feet of old lawn.

Price, 1 lb., 45c; 5 lbs. or more, 40c per lb. (Subject to change.) Postage additional.

Prices on this List are for mail orders or f. o. b. our Seattle Plant. Extra charge made for city deliveries. While we (The Chas. H. Lilly Co.) exercise care to have all seeds pure and true to name, we do not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms we are to be at once advised, and money paid for same will be promptly refunded.

THE CHAS. H. LILLY CO. SEATTLE

Prices do not include transportation charges. If goods are to be shipped to a station at which there is no agent, or by parcel post, remittance must include a sufficient amount to prepay charges.

Every Garden Means A Home

www.libtool.com.cn

NOBODY will take exception to the little maxim which adorns our title; but how many, agreeing therewith fully and completely, will still fail to see how inseparable are the garden and the home, not only in the abstract concept but in the actual fact? Why is it that there is still so much ugliness all about us, despite the great effort that has been made to do something towards creating beauty? Is it not because this unity is unrecognized?

EVERY HOME means definite relation, in every part and detail, with its garden and the outdoors. This is what we have yet to learn and to be governed by—that the house reacts in appearance, and in effect too, upon the garden; and the garden likewise cannot be dissassociated from the house and other buildings. They are all members of one body, and they must bear everywhere evidences of this close relationship and interrelationship. Especially must these evidences be developed where indoors and outdoors come together, as in porches, galleries, loggias on terraces, and at wall openings, whether these are for windows or doors. They are details to be sure. But who does not know that attention to details is the thing that distinguishes between the commonplace and the fine and finished.

Good Seeds Essential

The initial cost of seeds of any kind is infinitesimal comparatively with the anticipated results. Cheap seeds of unknown origin only lead to disappointment and failure which is often not realized until it is too late to make a second seeding. It is not what you pay for seeds but what you get for what you pay that counts.

Since 1885

The name **LILLY'S** has stood for all that is best in seeds for Farm and Garden. Careful selection and growth has earned for them an enviable reputation in the Northwest and their superiority is freely acknowledged.

SO GOOD THEY CANNOT BE DUPLICATED.
SO POPULAR THEY ARE WIDELY IMITATED.
THE **LILLY'S** NAME ON PACKAGE OR SACK DISTINGUISHES THE LEADER FROM ITS FOLLOWERS.

Producer—
We need more

GROW VEGETABLES—
GROW MORE VEGETABLES—
GROW STILL MORE VEGETABLES!

THE GARDEN, made by one's own hands, is always the best garden because it is part of oneself. A garden made by another may interest, but it is another person's individuality. This applies with special force to Vegetables. Those grown at home are fresher, crisper and taste altogether DIFFERENT from the much handled and frequently stale products sold in the City. Besides, the hygienic value of fresh Vegetables is beyond question; their value to the family cannot be estimated in terms of money.

LILLY'S Service

The Seed business is maintained entirely on confidence, it being impossible for the most advanced expert to determine the quality and purity of strain by mere inspection of the seed—You have to trust your seedsman to sell you seeds which have been carefully selected and grown. Quality in seeds means inbred characteristics. Nearly half a million customers have evidenced their confidence in *Lilly's* Seeds by their continued patronage year after year. There are other seeds at other prices but none superior to *Lilly's*—they grow!

About Varieties

Only those varieties are offered in this catalog which our many years practical experience as growers has taught us are best suited to our soil and climatic conditions. It is obviously to the planter's advantage to recognize the superiority of *Lilly's* Tested Seeds as compared with others which may be entirely unsuited to North Western conditions.

Asparagus

One ounce of seed will produce about 500 plants

Columbia Mammoth Giant Argenteuil

A superior variety of this delicious early spring vegetable, which should have a place in every home garden. Of exceptionally large size, white, tender, and unexcelled in flavor.

The popular French variety, producing large, thick green stalks, sometimes nearly an inch in diameter with few scales; the stalks retain their thickness completely up to the top and have close round heads.

Pkt. **5c**, oz. **10c**, $\frac{1}{4}$ lb. **30c**. Postpaid Pkt. **5c**, oz. **10c**, $\frac{1}{4}$ lb. **30c**. Postpaid

Palmetto

A very early and prolific variety, producing an abundance of very large deep green shoots of the best quality with a distinctly pointed tip.

Pkt. **5c**, oz. **10c**, $\frac{1}{4}$ lb. **30c**, Postpaid

Artichoke

Large French This perennial plant resembles a mammoth thistle. The edible portion is the immature flower heads, which are boiled and served with butter dressing. The young suckers which spring up around the bottom of the plant are also used, served like asparagus. The flower heads are not produced until the second season. Distinctive from the Jerusalem Artichoke, the edible portion of which is the tubers, which are listed in Farm Seed Section of this catalog.

Pkt. **10c**, oz. **\$1.00**, $\frac{1}{4}$ lb. **\$3.25**, Postpaid

Columbia Mammoth

Bush Beans

JILLY'S Jones' Stringless

A Delicious Yellow Podded, Dwarf Variety

A comparatively new variety, very popular with many of our customers. The pods are a beautiful waxy yellow, very large and nearly straight, round, plump, full, very brittle, stringless and without fiber. In flavor and quality they are unexcelled. The ripe dry seeds are white and are excellent for shelled beans. The plants are of medium size, thick stemmed, erect, without runners, early and productive.

Pkt. **15c**, 1 lb. **35c**, 10 lbs. **\$3.00**, Postage extra.

JILLY'S Golden Jersey Wax Yellow Podded Bush Bean

An improved strain of the old standard Golden Wax which has been so universally grown in all sections of the country for many years. The plants are small, hardy, very erect, vigorous, thick stemmed, without runners, early and productive. The pods are rich golden yellow, broad and thick, solid fleshed, of splendid quality, tender, brittle and stringless.

Pkt. **15c**, 1 lb. **35c**, 10 lbs. **\$3.00**, Postage extra.

Golden Wax

Very popular for both the home garden and for market. The pods are of medium length, broad, flat, golden yellow, very fleshy, wax like and stringless. The plants are erect, compact, and produce early and abundantly. The seeds are of medium size, oval, white, mottled with red.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

Davis White Kidney Wax

A handsome wax podded variety, very popular for shipping. The plants are very hardy, productive and medium early. The pods are light yellow, straight, remarkably long, crisp and tender. The seed is medium size, kidney shaped and clear white. The dried beans are excellent for baking.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

Prolific Black Wax

An improved strain of black wax and is an exceptionally productive dwarf, wax-podded variety; hardy, reliable and of the best quality. The pods are of medium size, curved, cylindrical, fleshy, and of light golden color. The seeds are small, oblong and jet black.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

Refugee, or 1000 to 1

A very productive, hardy, vigorous late sort, much in favor for canning. Pods 5 to 5½ inches long, somewhat slender, round and slightly curved; fine grained and good quality.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

Canadian Wonder

An exceptionally hardy, rapid growing variety and very prolific. Pods, long, green, fleshy and of excellent quality.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

Broad Windsor

The old English "Broad Bean"—largest and best of its class.

Pkt. **15c**, 1 lb. **20c**, 10 lbs. **\$1.75**, Postage extra.

Wardwell's Kidney Wax

A standard variety maturing a little later than Golden Wax. Yields a large crop of long nearly straight pods, light golden color, handsome pods, about 6 inches long, of good quality very extensively used for snaps for the home garden. The plants are strong growing and bear their long pod well up from the ground. Leaves are large, broad and slightly ruffled.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

Long Yellow Sixweeks

A variety much used for the home garden and the market. The plants are heavy, hardy, large, vigorous, erect and very productive. Long pods about 6 inches. Straight, flat, handsome, rather light green. Giant early maturing sort.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.50**, Postage extra.

The best is that which renders the most service—not cheapest nor yet the dearest.

JILLY'S

Golden Jersey Wax

Kentucky Wonder

Bush Beans

Lilly's Longfellow

Longfellow is an extra early green podded snap bean, producing splendid crops of very long, round, straight, solid, fleshy pods, which are deliciously tender and brittle. The flavor is excellent. The plants are robust, without runners, and every productive. Lilly's select stock is sold in sealed packages only.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Dwarf Horticultural

An early green podded bush bean, splendid for either snap or green shelled beans; the dried beans may also be used for baking or soup. The pods are of medium length, slightly curved and when nearly developed are freely splashed with bright red. The plants are erect, compact, without runners, and fairly productive.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Burpee's Bush Lima

The most generally grown bush lima bean, growing about twenty inches high and bearing exceptionally large pods and beans of fine quality. Medium early.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Burpee's Stringless

A very early, hardy green podded bean of excellent quality. The pods are round, straight, about five inches long, very meaty and entirely stringless.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Pole Beans

One pound will plant 125 hills

Lilly's Carmine Pole

The Best Pole Bean for the Northwest

The most attractive pole bean for snap, green, shell or dry shell beans, for home or market. The pods are brilliantly splashed with bright carmine on a greenish yellow background. very long and flat, generally straight, surface smooth, very brittle, entirely stringless, without fibre. Free from anthracnose. Sold only in sealed packages. Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Kentucky Wonder

One of the best early pole snap beans for home or market. The snap pods are green, with wrinkled surface, very long, curved, extremely brittle, without fibre.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Lazy Wife Pole

One of the most popular kidney pole varieties, and the best late pole bean. Of superior quality as snaps, and excellent for green or dry shell beans.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

King of the Garden or Large White Lima

The best pole Lima bean, but not so well adapted to the Northwest as the bush varieties. Unsurpassed in productiveness; large, handsome pods and seeds.

Pkt. 15c, 1 lb. 35c, 10 lbs. \$3.00, Postage extra.

Scarlet Runner

Popular for both ornamental and culinary purposes. Grows about ten feet high, bearing large scarlet flowers followed by large greenpodded beans.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Lady Washington Field Bean

An improvement over the old Navy Beans; is earlier, larger and more productive. Especially adapted to the west.

Pkt. 15c, 1 lb. 20c, 10 lbs. \$1.75, Postage extra.

Broccoli

Large White French

The heads resemble cauliflower, and it is used in the same manner, but is hardier. Pkt. 5c, Oz. 60c, ¼ lb. \$2.00, Postpaid

St. Valentine

The finest quality of its class, producing firm heads very early. Pkt. 5c, Oz. \$1.25, ¼ lb. \$4.00, Postpaid.

Lilly's Small White Pole Lima

The only Lima which is certain, to reach maturity here. Excellent for snap or green shell beans. Pods are six to seven inches long and contain five large, flat beans. Similar to Scarlet Runners, excepting that flowers and beans are white.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Horticultural or Speckled Cranberry

The best of the horticultural varieties for general use. Equal to Lazy Wife as a general purpose late snap and green shell pole bean for home or market.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.50, Postage extra.

Small White Navy

A splendid field variety and excellent for baking.

Pkt. 15c, 1 lb. 20c, 10 lbs. \$1.75, Postage extra.

Brussel Sprouts Dwarf Improved

The heads or sprouts are formed on the stalk of the plant, are one to two inches in diameter and resemble miniature cabbages.

Pkt. 5c, Oz. 40c, ¼ lb. 1.25, Postpaid.

Beet

LILLY'S Crimson Globe

The finest of all for the home garden, also popular with market gardeners. The beet is nearly globular, slightly elongated, of medium size, about three inches in diameter with small tap root. The flesh is deep crimson, beautifully ringed or zoned, and is free from stringiness or woodiness. Our seed is specially grown from the choicest strain, and is sold in sealed packages only.

Pkt. 10c, Oz. 20c, $\frac{1}{4}$ lb. 50c, Postpaid.

LILLY'S Crosby's Egyptian

An improvement over the old Extra-Early Egyptian. It is fully as early as the old variety, and excels it in all other respects, being larger, smoother, thicker, and of much finer quality. The color is rich vermilion, slightly zoned; it is fine grained, tender and sweet, and does not become woody or hard. Sold only in sealed packages.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 40c, Postpaid.

Detroit Dark Red

Considered to be the best beet for the market and home garden, and on account of its uniformly deep rich color the most desirable for canning. The leaves are dark green shaded with red. The roots are medium-sized, globular or nearly round, very smooth and of dark red blood color. The flesh is deep vermilion-red, zoned with a lighter shade of the same color.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 35c, Postpaid.

Early Egyptian

An extra-early variety, suitable for forcing and early garden culture. The beets are small and flattened; dark red; sweet and tender.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 35c, Postpaid.

Early Blood Turnip

A standard medium variety of excellent quality; also good for summer and fall use. The flesh is deep red, zoned with lighter shade; sweet, crisp and tender, nearly round.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 35c, Postpaid.

Long Smooth Blood

A standard long late variety—roots 12 to 14 inches. Flesh deep purplish red; good quality and excellent keeper.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 35c, Postpaid.

Eclipse Blood Turnip

Very early, of uniform, globular shape, deep red color, fine grained, tender and sweet. Popular for both market and home garden.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 35c, Postpaid.

Swiss Chard (SPINACH OR SEA KALE BEET)

Lucullus is the newest, largest and best variety of Swiss Chard. Grown for its large, tender succulent leaves, which make the most delicious greens, or the thick fleshy leafstalks, which are cooked and served like asparagus. The seed is planted in the spring the same as beets, and tops are cut off as wanted during the summer, fall and following spring.

Pkt. 10c, Oz. 20c, $\frac{1}{4}$ lb. 50c, Postpaid.

LILLY'S
Giant
Lucullus

An ounce will sow 50 feet of drill, 5 to 6 lbs. to the acre

LILLY'S
Crimson
Globe

MARKET GARDENERS and others requiring seeds in very large quantities, please ask for special prices.

LILLY'S
Giant
Lucullus

SWISS CHARD

Large Ribbed White

May be used as a salad or cooked as greens. Resembles an ornamental beet top but has no edible root. Used for greens for chickens by cutting the stem and leaf which are also very ornamental.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

LILLY'S Puget Sound Cabbage Seed

CABBAGE SEED is one of our specialties, and we produce a quality unexcelled in America. The Puget Sound country is one of the very few localities in the United States where Cabbage seed of the highest quality is produced. Our Puget Sound grown seed will produce a greater percentage of large, firm heads than any other stock to be had; it has become noted all over the country, and we supply wholesale seedsmen in all parts of North America, European and other countries abroad as well as our own local trade. Our cabbage seed, being grown and acclimated in this country, is especially adapted to the Northwest.

One ounce of seed should produce 1500 to 2000 plants

All Head Early

A large heading early variety of good quality. May be planted late and used in fall and early winter. The plants are compact, with few outer leaves. Stems are short. Heads are large, solid, and flat, but very deep. Remarkably free from "spreading" leaves thus permitting close planting and increased yield per acre.

Pkt. 5c, Oz. 35c, ¼ lb. \$1.35, Postpaid

LILLY'S Early Jersey Wakefield

An Improved Strain of the Standard Extra Early and Popular Variety

This old standard variety is more generally grown and one of the most popular extra early cabbages. Equally popular for either the home garden or for market. The heads are pyramidal in form, pointed at the top, with but few outside leaves, are uniformly solid and of fine quality and flavor. The plants are extremely hardy, and on the Pacific Coast the seed is sown in fall and the plants wintered over in the open ground. Our seed is grown in the Puget Sound country and is a particularly fine strain.

Pkt. 5c, Oz. 35c, ¼ lb. \$1.35, Postpaid

Early Jersey Wakefield

First Early Varieties

LILLY'S Copenhagen Market

A wonderful cabbage. Although it is very early, the round, solid heads grow to very large size, 10 to 12 pounds, and are produced on short stems and have few outer leaves. The plants are hardy, sturdy, and may be depended upon to produce solid heads at an early season. Our seed is grown in the Puget Sound country, from seed stock imported direct from Denmark.

Pkt. 10c, Oz. 50c, ¼ lb. \$1.50 Postpaid

Early Winnigstadt

An excellent variety, but not so early as Early Jersey Wakefield. The heads are similar in form and size, but are more sharply pointed; very hard and the leaves are tightly folded.

Pkt. 5c, Oz. 35c, ¼ lb. \$1.35, Postpaid

Charleston Wakefield

The heads are very similar to Early Jersey Wakefield in form, but are larger and a few days later. They are of the same fine quality. This variety is a favorite with market gardeners.

Pkt. 5c, Oz. 35c, ¼ lb. \$1.35, Postpaid

Cabbage

Second Early Varieties

LILLY'S Glory

A Splendid Second Early Variety:
Round Solid Heads

Although this is very early for a round-headed cabbage, it is a splendid keeper and is excellent for winter use. The heads are of good size, almost perfectly round, extremely solid and heavy, deliciously tender and of the finest quality. The plants are of vigorous growth and are sure heading. Our seed is grown in the Puget Sound country, famous for producing the best cabbage seed.

Pkt. 10c, Oz. 45c, $\frac{1}{4}$ lb. \$1.50, Postpaid.

LILLY'S All Seasons, or Succession

One of the Most Satisfactory Second Early
Cabbages for General Use

A very desirable second early or intermediate season cabbage. As its name implies, it is adapted for either summer, fall, or winter use. The heads become solid long before they are fully grown, and may be used at that time or during the long season until they are mature. It is not liable to split. The heads are very large, nearly round, slightly flattened, very solid and of excellent quality. This variety is especially adapted to the Pacific Coast, and makes a splendid showing in our seed fields. Our seed is grown in the Puget Sound country, and is of exceptionally fine quality.

Pkt. 5c, Oz. 45c, $\frac{1}{4}$ lb. \$1.50, Postpaid.

Early Flat Dutch

A valuable second early variety producing very large, compact, flattened heads of good quality; sometimes nearly as large as Late Flat Dutch, which they resemble in appearance.

Pkt. 5c, Oz. 35c, $\frac{1}{4}$ lb. \$1.25, Postpaid.

Fottler's Brunswick

One of the best second early or intermediate cabbages for fall use. The plants have very short stems, large leaves, and are very compact. The heads are large, flat, solid and of fine quality.

Pkt. 5c, Oz. 35c, $\frac{1}{4}$ lb. \$1.25, Postpaid.

The Joys of Gardening

How many have experienced the joy and satisfaction that comes from working in the soil? How many realize what it means after the day's work is over to take a hoe or some other garden tool, and feel the thrill that comes from stirring the soil and planting the seed? Gardening is natural exercise and brings practically all muscles into play. You forget the office or factory when digging in the earth. In preparing and planting your garden, you cannot help feeling a sort of partnership with the soil. Who doesn't like to stir the warm, mellow earth in the spring when it is time to plant the seed? No home ground or home is complete without a garden, and those who have never planted vegetables or flowers have missed much.

Remember it's always the quality that determines the price. Plant Lilly's Seeds.

It makes all the difference in the world whose seeds you plant, and all that difference is in favor of

LILLY'S
Western America's Best Seeds

LILLY'S
Danish
Ballhead

PeTsay Cabbage

Cabbage

Late and Savoy Varieties

LILLY'S Danish Ballhead

Unsurpassed for Winter Use

A medium or late variety, one of the very best keepers, and excellent for late winter or spring shipping. The heads are round, of medium size, very solid and hard, and of good quality. Vigorous, compact, exceedingly hardy, and reliable. Our seed is grown on Puget Sound with special care from carefully selected heads.

Pkt. **10c**, Oz. **50c**,
¼ lb. **\$1.50**, Postpaid.

Large Late Drumhead

A favorite winter cabbage for shipping. The heads are large, solid and of good texture, flattened on top but very deep. Can be kept in good condition until late in spring.

Pkt. **5c**, Oz. **35c**, ¼ lb. **\$1.35**, Postpaid.

Red Dutch

A popular hard headed red cabbage for pickling, etc. A good keeper. Rather small but of excellent quality and flavor.

Pkt. **5c**, Oz. **40c**, ¼ lb. **\$1.40**, Postpaid.

Drumhead Savoy

The best of the Savoy or crumpled leaved cabbages, producing large, solid heads of the finest quality and with the rich flavor of cauliflower. The plants are strong and vigorous.

Pkt. **5c**, Oz. **40c**, ¼ lb. **\$1.40**, Postpaid.

Premium Late Flat Dutch

A popular late variety; comparatively slow growing but sure heading. The plants are exceptionally vigorous, with very large, broad, spreading outer leaves. The heads are very large, flat, but deep. An excellent keeper.

Pkt. **5c**, Oz. **40c**,
¼ lb. **\$1.40**, Postpaid.

The Quality

of the seed you plant will be making your garden's success or failure months after the cost is forgotten.

Surehead

One of the most reliable late or main crop cabbages; very hardy and exceptionally sure heading. The heads are large, broad, thick, somewhat flattened, compact, very solid and of excellent quality.

Pkt. **5c**, Oz. **35c**, ¼ lb. **\$1.35**, Postpaid.

Autumn King

A good late variety requiring a long season for growth. The heads are very large, solid and of good quality. An excellent winter keeper and shipper.

Pkt. **5c**, Oz. **40c**, ¼ lb. **\$1.40**, Postpaid.

PeTsay or Celery Cabbage

A wonderful salad plant growing 15 or 16 inches high somewhat resembling Cos Lettuce or similar to Swiss Chard. The hearts blanch to a crystalline white; whiter than lettuce and more beautiful than cabbage. Should be sown in July.

Pkt. **5c**; Oz. **40c**, ¼ lb. **\$1.40**, Postpaid.

LILLY'S
1921
Annual

Carrot

One ounce of seed sufficient for about 125 feet of drill, or 4 pounds per acre

JILLY'S Golden Half Long

Finest Main Crop Carrot

By far the best carrot for home use and for market and by many it is preferred for stock feeding, for although it is not so large as the stock carrots, the yield is almost as great and the quality is superior.

Carrots should be more generally grown, both for table and stock. They are a delicious and healthful vegetable, easy to grow and are in perfect condition at any time during their growth from the time they are the size of a lea dpencl until long after they are matured. On the Pacific Coast they may be left in the ground during the winter and pulled as wanted for use. Our climate and soil are especially adapted to growing them. Sold in sealed packages only.

Pkt. **10c**, Oz. **20c**, ¼ lb. **45c**, 1 lb. **\$1.25**, Postpaid.

Danver's Half Long

A standard half long orange-colored carrot grown largely on account of its great productiveness and adaptability to all kinds of soil. It is a desirable second-early carrot for the home garden and is also popular for field culture. The flesh is deep orange, tender and of good quality. Although the roots of this variety at maturity are comparatively short, they often produce as large bulk as the longer stock sorts, and they are more easily harvested.

Pkt. **5c**, Oz. **20c**, ¼ lb. **45c**, 1 lb. **\$1.25**, Postpaid.

Chantenay or Model

An excellent stump-rooted variety about six inches long, very broad at the shoulder and tapering to a blunt point, free from core, fine grained and tender; orange-red; medium early.

Pkt. **5c**, Oz. **25c**, ¼ lb. **45c**, 1 lb. **\$1.25**, Postpaid.

Long Orange Improved

This improved strain is medium to late maturing and is suitable for either table use or stock food. The roots are very deep, orange, long and comparatively thick, often twelve inches long and three inches in diameter at the crown, tapering regularly to a point. The tops are rather large; it is very productive and when grown in light, deep rich soil the roots are straight and uniform. When of a size suitable for the table the roots are tender and of good quality.

Pkt. **5c**, Oz. **20c**, ¼ lb. **40c**, 1 lb. **1.00**, Postpaid.

Short Horn

Early Scarlet Horn or

French Forcing

One of the earliest varieties in cultivation and very desirable for forcing. The tops are very small; the roots are reddish orange and nearly round when forced quickly in rich, well prepared soil, but are somewhat longer when grown outdoors. When fully matured the roots are about two to two and one-half inches long, but they should be used before fully grown, while young and tender.

Pkt. **5c**, Oz. **20c**, ¼ lb. **45c**,

1 lb. **\$1.25**, Postpaid.

Oxheart, or Guerande

Especially desirable on shallow or hard soil where longer rooted varieties would not thrive. The tops are small. The mature roots are about five inches long, very thick, ending abruptly in a small taproot. The flesh is bright orange, fine grained and sweet. It is medium early, and is desirable for table use, when mature they are excellent for stock.

Pkt. **5c**, Oz. **20c**, ¼ lb. **40c**, 1 lb. **\$1.00**, Postpaid.

Varieties Recommended for Stock Feeding

These keep well when stored for winter use, and form an extremely wholesome addition to the winter rations of stock when fed in conjunction with corn and dry fodder. The rich coloring of the deep orange-colored sorts is esteemed also as imparting a richer coloring to milk and butter during winter months.

Large White Mastodon

The most popular white carrot for stock feeding on account of its immense size, productiveness and being short and easy to harvest. It sometimes yields as much as 25 tons per acre. Not suitable for table use. A more complete description of this variety will be found in Farm Seed Section of this catalog. Sold only in sealed packages.

Pkt. **5c**, Oz. **15c**, ¼ lb. **35c**, 1 lb. **95c**, Postpaid.

White Belgian

A large and very productive white carrot, recommended for stock food only. Very similar to improved short white.

Pkt. **5c**, Oz. **15c**, ¼ lb. **30c**, 1 lb. **90c**, Postpaid.

Improved Short White

A desirable stock carrot on account of its great productiveness and the ease with which it can be harvested. The roots are half long, seven to nine inches in length, smooth, very heavy at the shoulder, tapering to the point. The color is white with light green crown.

Pkt. **5c**, Oz. **15c**, ¼ lb. **30c**, 1 lb. **90c**, Postpaid.

Danver's
Half
Long

Cauliflower

One ounce should produce about 3000 plants

Cauliflower is grown in the same manner as Cabbage, usually as a late fall crop, but when started early in the spring, excellent heads, can be grown of the dwarf early varieties. To make the best and largest heads the plants need cool, moist weather, well-enriched soils and thorough cultivation. The Cauliflower is highly esteemed for the mild, delicate flavor and extreme tenderness of the solid white heads.

www.libtool.com.cn

Danish Dry-Weather

Danish Dry Weather Cauliflower is especially adapted for growing in dry localities where other varieties fail to produce good heads, but is also an excellent variety for more favorable conditions.

It is not as early as Early Alba and is not suitable for forcing, but the heads are large, solid, pure white, of splendid quality, and for main crop it is excelled by none, as it is the surest header known and is therefore the most profitable for the market gardener. It will make a good crop in dry climates where it has heretofore been considered impossible to grow good cauliflower. Sold in sealed packages only.

Pkt. 25,, $\frac{1}{4}$ Oz. \$1.00, 1 Oz. \$3.50, Postpaid.

IT'S A FACT

that the consumer pays at least twice the prices the raiser receives for his garden and farm products. Realizing this, it is surely a great incentive to become both producer and consumer. In addition to the saving in dollars and cents, there is the pleasure of enjoying fresh, palatable vegetables of a quality not attained elsewhere.

Lilly's Early Alba

An Unequaled Variety for Early or Main Crop, for Home or for Market

Early Alba is by far the best cauliflower grown, either for early or late, for home use or for market, for forcing or for outdoor culture. It is the largest early cauliflower, and is equally good for either extra early or for main crop. It is a sure producer of large, solid compact snow-white heads of unequalled quality, flavor and beauty. Lilly's Early Alba cauliflower seed is sold only in sealed packages.

Pkt. 25c, $\frac{1}{4}$ Oz. \$1.10,
1 Oz. \$4.20, Postpaid.

Snowball

A standard early variety, excellent for forcing, early outdoor culture, or for main crop. The plants are compact, with few outside leaves and may be planted closely. The heads are of medium size, solid, compact, round, white and of good quality.

Pkt. 10c, $\frac{1}{4}$ Oz. \$1.00, 1 Oz. \$3.50, Postpaid

Large Late Algiers

A valuable late sort, sure to head, of excellent quality and popular with market gardeners. The plant is large but of upright growth, the leaves protecting the heads, so that they are uninjured by frost that would ruin other varieties.

Pkt. 10c. $\frac{1}{4}$ Oz. 60c, 1 Oz. \$2.00, Postpaid.

Veitch's Autumn Giant

A large late cauliflower, producing quite compact white heads. The large late varieties are not nearly so reliable as the earlier Erfurt type. Known on the Pacific coast under the name of *California Wonder*.

Pkt. 10c, $\frac{1}{4}$ Oz. 40c, 1 Oz. \$1.50, Postpaid.

Celery

One ounce will produce about 3000 plants; one pound will produce plants for one acre

LILLY'S Paris Golden Yellow

The plants are of compact semi dwarf habit and form numerous stalks. They are heavily ribbed, of golden yellow color—very crisp and tender. Leads all the self blanching varieties for earliness and productiveness. This is the variety so extensively grown in California for supplying the Northern Markets in the early season before the home products are ready. Altogether a very desirable sort to grow. The Standard Celery for early use. Pkt. 10c, Oz. 45c, ¼ lb. \$1.40, Postpaid.

Silver Plume

A handsome early variety, popular with market gardeners on account of its very attractive appearance and requiring a very short time for blanching. The plants are of medium size, and the foliage forms beautiful silver-white plumes, so aptly suggested in the name. As the plants mature, the inner stems and leaves naturally turn white. The stalks are thick and heavy, with pure white hearts; brittle, crisp and tender; free from stringiness and unexcelled in flavor. Pkt. 5c, Oz. 25c, ¼ lb. 90c, Postpaid.

Giant White Winter

Giant White is unequalled as a late winter celery. Like other winter varieties, it is not self-blanching, and must be blanched by banking with earth or with boards. On the Pacific Coast it may be left in the garden until wanted and will be fit for use as late as March or April. This variety is unexcelled in keeping qualities; grows very tall, but with large, white stalks, very brittle, and the flavor is delicious. Pkt. 5c, Oz. 30c, ¼ lb. 90c, Postpaid.

Giant White Solid

An excellent late fall and winter variety of immense size and good quality. Vigorous with fleshy, solid, tender stalks which in blanching become yellow-white. Pkt. 5c, Oz. 30c, ¼ lb. 90c, Postpaid.

Golden Self-Blanching

A good standard early variety; blanching easily. The heart is rich golden yellow; the outer leaves yellow. Pkt. 5c, Oz. 45c, ¼ lb. \$1.40, Postpaid.

Chervil

Curled. Very finely curled, resembling parsley; used in soups and salads.

Pkt. 5c, Oz. 25c, ¼ lb. 90c, Postpaid

Chives

Usually grown as an edging and has a mild flavor of young onions. The leaves are used in soups and salads for seasoning.

Pkt. 10c, Oz. 50c, ¼ lb. \$2.00, Postpaid.

Collards

Georgia. A loose form of cabbage grown in the South for greens. Not adapted to the North.

Pkt. 5c, Oz. 20c, ¼ lb. 60c, Postpaid

Chicory

Large Rooted. Used as a substitute for coffee; and the young blanched shoots for salad.

Pkt. 5c, Oz. 40c, ¼ lb. \$1.40, Postpaid.

Celeriac or Turnip-rooted Celery

Large Prague. Large, round, smooth, turnip-like roots; used for flavoring soups or as a salad.

Pkt. 5c, Oz. 25c,

¼ lb. 75c, Postpaid.

Sweet Corn

One pound of seed is sufficient for about two hundred hills;
fifteen pounds for an acre

Lilly's Golden Giant

A Brand New Early Variety

One of the most perfect Sweet Corns ever introduced. Offered last season for the first time it has more than justified the claims we made for it and we confidently recommend it to every gardener who is looking for the finest type of Early Sweet Corn. Produces ears nine inches long with kernels of a deep golden yellow of exquisite flavor. Equal in every respect to Golden Bantam with the added advantage of larger ears very compactly filled. This excellent variety is Washington grown and therefore thoroughly acclimated—a point strongly in its favor. A trial will convince the most critical gardener that Golden Giant is destined to become very popular. Every Western planter will be pleased with the distinctive features of this Corn. It is very hardy and may be planted early. We advise you to mail order on receipt of this catalog to avoid disappointment as we are receiving enquiries before going to press with our book.

Pkt. **20c**, 1 lb. **40c**, 10 lbs. **\$3.75**, Postage additional.
(See also page 4 of cover).

Stowell's Evergreen

An old and popular late sweet corn. The stalks grow about seven feet high and are very productive. The ears are seven to eight inches long, and the kernels are white, very tender and sugary, and remain a long time in condition for use.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage additional.

Peep o' Day

One of the very earliest varieties. The ears are about five inches long, the kernels large, white and tender. The stalks are dwarf, only about four feet high, and usually bear two ears each.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage additional.

Early Minnesota

A standard second early variety. The stalks grow about six feet high. The ears are about eight inches long, eight to ten rowed, and the kernels are very broad, white, sweet and tender.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage additional.

Black Mexican

This sweet corn, when young, cooks remarkably white, but the ripe grain is black. It is an excellent late variety. The stalks grow about six feet high, and the ears about eight inches long. The kernels are tender, sweet and delicious.

Pkt. **15c**; 1 lb. **35c**, 10 lbs. **\$3.00**, Postage additional.

Country Gentleman

A splendid late variety. The small, white cob is densely crowded with irregular rows of long, slender, white kernels of excellent quality.

Pkt. **15c**, 1 lb. **35c**, 10 lbs. **\$3.00**, Postage additional.

Early White Cob Cory

A very early sweet corn. The plants are dwarf, and usually bear two ears each. The ears are six to seven inches long, and the kernels are milky white, sweet and of good quality.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage additional.

LILLYS Golden Bantam

THE SWEETEST AND MOST DELICIOUS EARLY SWEET CORN

Golden Bantam is one of the sweetest and most deliciously flavored sweet corns that has ever been grown, and has no superior for the home garden or early market. In earliness it is excelled only by "Jack Frost," and in flavor it is surpassed by none. The ears are short, six to eight inches long, thick, and compactly filled with very large, plump, creamy yellow kernels, which become golden yellow as they ripen. The stalks are of medium height, sturdy and very productive, bearing two ears each. It is one of the hardiest varieties, may be planted early, and is especially adapted to the Northwest. Golden Bantam is extra early and plantings can be made a week or ten days earlier than with the less hardy varieties of White Sweet Corn. Sold only in sealed packages.

Pkt. 15c, 1 lb. 30c, 10 lb. \$2.75, Postage additional.

LILLYS Metropolitan

THE LARGEST EARLY SWEET CORN

Metropolitan is a great favorite in the Northwest, where few of the larger varieties can be depended upon. The ears are about eight inches long, and are well filled with ten to twelve rows of large, sweet kernels. It is a little later than Jack Frost and Golden Bantam, but earlier than other large varieties. The plants are tall and bear two or three ears each.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.75, Postage additional.

LILLYS Jack Frost

THE EARLIEST

This is the earliest variety of sweet corn, and is peculiarly adapted to the Pacific Coast. The ears are small, about five inches long, and are well filled with large white kernels of delicate flavor and melting tenderness. It remains tender and fit for use longer than other varieties. The plant is dwarf, and each stalk bears two or more ears. Sold in sealed packages only.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.75, Postage additional.

Early Evergreen

Has ears fully as large as those of Stowell's and is about five days earlier. Its most valuable feature, is the extreme paper whiteness of the grains, which makes not only a more attractive ear when served on the table, but is most important for the canner. It retains its whiteness when put up in cans.

Pkt. 15c, 1 lb. 30c, 10 lbs. \$2.75, Postage additional.

A Good
Pointer
About
Picking

To have the finest sweet corn, it must be picked in just the right condition, that is, when the skin of the grain breaks at the slightest puncture, and plantings should be made frequently enough always to have a supply at this stage. The quality will be inferior if it is either a few days too old or too young.

HOW TO GROW CORN

Sweet Corn should be planted as soon as the soil is thoroughly warmed in spring, and successive plantings should be made at intervals of two weeks; or early, medium and late varieties planted; for succession. It is very sensitive to frost, and early plantings may be killed, but it is neither much trouble nor expense to replant. If the early plantings are not killed the result will be worth taking a chance for.

In our cool climate west of the Cascade Mountains, to grow corn successfully, a rich, light, warm soil must be selected, and it must be highly cultivated and fertilized. Light applications of nitrate of soda or nitrate of lime early in the growing season will help to give it a good start.

The seed may be planted in drills three feet apart and the plants thinned to a single stalk every foot in the rows, or five or six kernels may be planted in hills three feet apart each way and thinned to three plants in each hill.

Large quantities of commercial fertilizers should be used, with potash and phosphoric acid predominating. Nitrates should be used early in the season only, as they tend to retard maturity. Cultivation should be frequent and thorough, and, especially after spring rains have ceased, should be shallow.

One pound of seed is sufficient for about two hundred hills; fifteen pounds for an acre.

LILLY'S Crop Book is a
valuable garden
guide. Free to
customers on request.

LILLY'S Pride of the Pacific

A highly improved strain of the White Spine family, brought to its present state of perfection by the most careful methods of selection and cultivation. One of the best varieties for greenhouse culture. Unsurpassed for growing outdoors, either for market or home use. The hardy, vigorous vines produce immense crops of smooth, rich, deep green fruit, large, symmetrical and very uniform. It is ideal for slicing, the flesh being sparkling white, crisp, tender, and of a delicious flavor.

LILLY'S Pickling

Unequaled for Large or Small Pickles

The young cucumbers are thickly set with small spines, and possess the distinctly roughened surface so much desired for small pickles. The full grown fruits are nine to ten inches long and two and one-half inches in diameter; of good shape, fine quality and flavor, good for slicing. The vines are hardy, exceedingly prolific, and continue to bear longer than most sorts. Sold only in sealed packages.

Pkt. 10c, Oz. 15c, $\frac{1}{4}$ lb. 50c, Postpaid.

White Spine Improved

One of the best sorts for table use. The vines are vigorous, fruiting early and abundantly. The fruits are uniformly straight, dark green, fairly covered with white spines, and when mature are usually about seven inches in length. The flesh is crisp, tender, and of excellent quality.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Long Green

The fruits are long, firm and crisp; excellent for slicing, or when small they are good for pickling. The vines are sturdy and very productive. The fruits are uniform in size and shape, slender, often a foot long, and very dark green. The best variety for sweet pickles.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Lilly's Improved Telegraph FOR FRAME CULTURE

The finest type of this celebrated cucumber for market growing. The quality and beauty of the fruit is of the highest—skin smooth, deep in color and the fruit remains stiff after cutting; produces 3 to 4 cucumbers to a joint. A long fruit, 18 to 20 inches with short handle.

Per Packet 25c, Postpaid.

Pkt. 10c, Oz. 15c, $\frac{1}{4}$ lb. 50c, Postpaid.

Davis Perfect

A Splendid Extra Early Cucumber

This variety grows nine to twelve inches long, and perfect in shape, color, quality and flavor. It is very early, and when grown outdoors so closely resembles hothouse fruit that it often brings the same fancy prices. The glossy dark green color is maintained almost to maturity, and it retains its color and freshness longer than other varieties, making it splendid for market. Lilly's Select Stock is sold in sealed packages only.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 50c, Postpaid.

Early Cluster

An early and very productive variety. The vines are hardy and very vigorous, bearing fruits in clusters of two or three. The fruits are short, thick, bright green, crisp and tender. Used for both pickling and slicing.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Early Frame, or Short Green

An early bright cucumber of medium size, extensively used for slicing and pickling. The vines are vigorous and productive. The fruits are bright green, crisp and tender.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Boston Pickling

A very productive variety; extensively grown for pickles. The fruits are bright green, of medium size, smooth and symmetrical. The flesh is crisp and tender.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Lemon Cucumber

Resembles a lemon in shape, size and color and has a flavor distinctive and superior to any other variety. It lacks the bitterness of the common cucumber. Very prolific. Can be eaten freely without harmful results.

Pkt. 5c, Oz. 20, $\frac{1}{4}$ lb. 55c, Postpaid.

Corn Salad

Large Headed Feticus or Lamb's Lettuce

A small, quick growing salad plant, for late fall, winter and spring use. The leaves are used as a substitute for lettuce and spinach.

Pkt. 5c, Oz. 25c, ¼ lb. 75c, Postpaid.

Cress

Curled or Pepper Grass

The leaves are frilled and curled, crisp and pungent, and are used in salads and for garnishing meats.

Pkt. 5c, Oz. 20c, Postpaid.

Water Cress

A distinct variety of cress with small oval leaves, which are used for salad. It must be grown in shallow water and the seed is scattered along the banks of streams or ponds.

Pkt. 10c, Oz. 60c, Postpaid.

Endive

JILLY'S Broad Leaved Batavian
(Escarolle)

Specially Adapted to the Pacific Coast

Endive is an excellent salad vegetable, used similar to lettuce, or it may be cooked as greens, and in our mild climate on the Pacific Coast it may be had at all seasons of the year. Not as generally known in the home garden as it deserves to be.

Batavian Broad Leaved is especially adapted to our climate, and may be left in the garden during the winter. The leaves are broad, twisted and waved, deep green, with thick, white midribs. The inner leaves form a clustering head which blanches to a beautiful creamy white and is crisp and tender.

Pkt. 10c, Oz. 15c, ¼ lb. 45c, Postpaid.

Green Curled Endive

A hardy, vigorous variety, bright, deep green leaves usually tinged with rose, blanching to a deep cream color.

Pkt. 5c, Oz. 15c, ¼ lb. 45c, Postpaid.

Egg Plant

New York Improved

Very productive, the plants bearing six to eight fruits each. The fruits are large, nearly round, dark purple, free of thorns and of excellent quality.

Pkt. 5c, Oz. 50c, ¼ lb. \$1.85, Postpaid.

Black Pekin

An early variety with fruits nearly as large as the later sorts. The fruit is nearly round, the skin smooth, black and glossy.

Pkt. 5c, Oz. 50c, ¼ lb. \$1.85, Postpaid.

Kohl-Rabi

Early White Vienna

A turnip-like bulb, formed above ground, combining somewhat the flavor of turnips and cabbage. Large enough to be used in ten or twelve weeks from time of sowing.

Pkt. 5c, Oz. 25c, ¼ lb. 75c, Postpaid.

Leek

Large American Flag

The leek belongs to the onion family, and is a good fall and winter substitute for green onions.

Pkt. 5c, Oz. 30c,
¼ lb. 85c, Postpaid.

Musselburg

An improved variety growing to a very large size, with broad leaves spreading like a fan.

Pkt. 5c, Oz. 30c,
¼ lb. 85c, Postpaid.

Kohl-Rabi

Early White Vienna

Lettuce One ounce of seed
for 400 feet of drill

LILLY'S Delicious

An Extra Early Head Lettuce

Very early, forming handsome, compact, firm heads of medium size of the finest quality, earlier than any other. The color is a light yellowish-green, the outer leaves slightly tinged with brown, the inside blanching to a rich golden yellow. The thick leaves are tender and have a delicious, rich, buttery flavor. Although generally used for early outdoor culture, it is excellent for forcing and for succession during the summer. The heads are round, solid, and stand shipping well. Sold only in sealed packages.

Pkt. **10c**, Oz. **25c**, $\frac{1}{4}$ lb. **70c**, Postpaid.

LILLY'S Forcing

Excellent for Extra Early Out Door Culture For forcing in greenhouse or cold frames, or for extra early outdoor culture, this variety has no superior. The plant grows upright, does not form heads, but makes a quick growth of large, thin, light green leaves, finely curled, crimped, and savoyed. It remains in condition for cutting for a considerable time, and stands shipping better than most varieties.

Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **50c**, Postpaid.

LILLY'S Nonpareil Hanson Head

A splendid head lettuce for either market or home use for late summer. The plant is compact, and forms large, solid, cabbage-like heads of fine quality and flavor. The leaves are bright yellowish-green; broad, crumpled, and frilled at the edges; and with distinctive midrib. Inner leaves are white, very crisp, and sweet.

Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **50c**, Postpaid.

Boston Market or Tennis Ball

A popular, small, compact head variety, good for forcing or for early outdoor culture. It is hardy; the heads are solid, and the leaves are dull green in color, crisp, and of good flavor. This is the white seeded sort.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Prizehead

A large clustering, non-heading lettuce, easy to grow and an excellent variety for the home garden, but not recommended for market, as it is too tender to stand shipping and handling. The leaves are bright green tinged with red; crisp, tender and sweet.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

May King

This is a very hardy variety of early head lettuce and will stand much cold, damp weather. It may be planted under glass or outdoors, and in either case will produce fine heads much sooner than most other varieties.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Big Boston

A fine forcing variety, producing heads of very large size, often measuring ten to twelve inches in diameter. It succeeds better in cooler temperatures than most strains. Heads well in the open ground during the cool weather of spring or fall. One of the most widely grown of all American varieties.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Lettuce

JILLY'S New York or Wonderful A Mammoth New Head Lettuce

A new and very popular variety, thriving in all sections and during all seasons. A crisp cabbage-headed lettuce, extremely large, sometimes fifteen inches in diameter and weighing two or three pounds. It is deep rooting, stands heat well, is slow to run to seed, and especially adapted for growing during the summer months. It is a sure header under the most trying conditions. The interior is beautifully blanched, creamy white, crisp, tender and delicious. Especially recommended as a standard, main crop, hot-weather lettuce. Very popular with market gardeners, and is equally good for home use. Not recommended for forcing. As we usually have a heavy demand for this variety we recommend early ordering. Sold in sealed packages only.

Pkt. 10c, Oz. 40c, $\frac{1}{4}$ lb. \$1.25, Postpaid.

JILLY'S WONDERFUL

Grand Rapids

Early Curled Simpson

A standard variety for forcing or for very early outdoor culture. The leaves, in loose clusters, are light green in color, slightly frilled and much blistered, are crisp, tender and sweet. Especially adapted for sowing thickly and cutting while the plants are young.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Grand Rapids

A very popular loose leaved variety for greenhouse forcing. It grows quickly, is hardy, not liable to rot, remains in condition for cutting for several days, and stands shipping better than most sorts.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

Kale or Borecole

A grand variety of green curled winter kale, and is most desirable on account of its hardiness, excellent quality and beautiful appearance. Of medium height, the leaves are so finely fringed and curled as to resemble parsley, and it is of a beautiful rich, emerald green color. It is hardy; on the Pacific Coast it is seldom injured by freezing, in fact is improved by frost, and may be cut and used at any time during the winter.

Pkt. 10c, Oz. 25c, $\frac{1}{4}$ lb. 75c, Postpaid.

Tall Scotch

Grows three to four feet high, bearing long, plume-like light green leaves, which are deeply cut and finely curled at the edges. Very ornamental, and sufficiently hardy to resist frost.

Pkt. 5c, Oz. 20c, $\frac{1}{4}$ lb. 60c, Postpaid.

Dwarf Green Curled

A very hardy and vigorous variety of dwarf, spreading habit. The large green leaves have a bluish tinge or bloom, are comparatively plain in the center, but are cut and frilled at the edges.

Pkt. 5c, Oz. 20c, $\frac{1}{4}$ lb. 60c, Postpaid.

Los Angeles Market

One of the most reliable, sure-heading sorts; heads globular, large and late; leaves large and very broad, borders finely frilled; color clear light green. A fine variety for midsummer planting outside, as it withstands the hot season and is a slow seeder.

Pkt. 5c, Oz. 40c, $\frac{1}{4}$ lb. \$1.25, Postpaid.

Paris White Cos

Grows to very large size. The inner leaves blanch readily and are of fine flavor. One of the most popular market sorts; also called White Paris Self-Folding Cos or Trianon Cos.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 45c, Postpaid.

HEALTH HINT

As a health food Lettuce has no superior. After the winter season, when we all eat too much meat and starch foods, lettuce comes like a prescription from a well advised doctor. Sown every week or ten days up to the end of July will ensure a continuous supply of fresh, crisp, tender lettuce all season.

JILLY'S EMERALD ISLE

Pollock 10-25

Musk Melon

LILLYS Pollock 10-25

Salmon Tint

The latest and positively the most successful of any Musk Melon introduced to date. It is not an untried variety but one that has proved its merit which distinguishes it as the most popular melon with growers everywhere. It is a re-selection from the Pollock No. 25 and supercedes that excellent sort by reason of its long distance shipping qualities. An early melon of the solid netted type, very small seed cavity with thick luscious flesh of genuine salmon tint shading to green near the rind. A prolific yielder and is admittedly the finest salmon-fleshed melon ever introduced. We strongly recommend a trial.

Pkt. 10c, Oz. 25c, $\frac{1}{4}$ lb. 75c, Postpaid.

Burrell's Gem

A very popular variety in this locality. The skin is rather dark green; the rind is thin, and flesh very thick, salmon colored, of a most delicious, juicy flavor.

Pkt. 5c, Oz. 20c, $\frac{1}{4}$ lb. 45c, Postpaid.

Rocky Ford or Netted Gem

Very popular for market and the home garden. It is medium early; the fruits are oval, slightly ribbed and densely covered with fine netting. The flesh is green, very sweet and highly flavored.

Pkt. 5c, Oz. 20c, $\frac{1}{4}$ lb. 40c, Postpaid.

Osage or Miller's Cream

Medium early, large and nearly round. The skin is deep green, free from netting, heavily ribbed and light green bands between the ribs. The flesh is very thick, orange colored, firm

and of fine quality. Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 40c, Postpaid.

Nutmeg

A well-known old variety. The fruits are round, about seven inches in diameter, well ribbed, heavily netted. The flesh is pale green, sweet and melting.

Pkt. 5c, Oz. 15c, $\frac{1}{4}$ lb. 40c, Postpaid

Honey Dew

Fruits with smooth, almost white rind, measuring about six inches in diameter by seven to eight inches long. The green flesh is thick and is of a peculiar sweet flavor. To have the melons in the best condition gather as soon as they slip from the vine and store in a cool place for two or three days.

Pkt. 5c, Oz. 25c, $\frac{1}{4}$ lb. 75c, Postpaid.

Mushroom Spawn

Is produced by a new system of selection and inoculation. The pure cultures are taken direct from selected specimens and produce mushrooms of the finest quality of uniform variety and color. We can furnish either the White, Cream-White or Brown varieties. In bricks weighing about one and one-quarter pounds. One brick is sufficient to spawn nine square feet of bed.

Brick 30c, 10 Bricks \$2.75, Postage extra.

Ask for leaflet on Mushroom Culture—FREE on request.

Honey Dew

LILLYS Improved Rocky Ford

The Rocky Ford is the delicious little cantaloupe served in the best restaurants and hotels. It is small, about five inches in diameter, oval in form, and the skin is rich greenish-gold covered with a beautiful yellow netting. The flesh is light green, very deep, ripening clear to the rind, very solid and with a very small seed cavity.

Pkt. 10c, Oz. 20c, $\frac{1}{4}$ lb. 45c, Postpaid.

Extra Early Hackensack

A popular variety. The fruits are round, about seven inches in diameter, well ribbed and heavily netted. The flesh is pale green, sweet and melting.

Pkt. 5c, Oz. 20c, $\frac{1}{4}$ lb. 40c, Postpaid.

Water Melon One ounce of seed will plant 30 hills

JILLY'S King and Queen

Best Early Variety for Market

The fruit is of uniform medium size; round, smooth and of fine appearance. It is very early and yields prodigiously. The flesh is a beautiful bright red, crisp and of delicate texture, granulated, cool and sparkling. It has very few seeds, the heart is solid, and the fine quality is sustained clear to the rind. Sold in sealed packages only.

Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

King and Queen

Georgia Rattlesnake

Very large and long, suitable for warm localities. The skin is light green, distinctly striped and blotched with a darker shade. The flesh is bright scarlet, tender and sweet.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Cole's Early

One of the easiest varieties to grow; very early and adapted to conditions in the northwest. A good shipper and excellent for market; also a good variety for the home garden. It is not large but is very productive; nearly round; the rind is very thin, and the deep red flesh is of excellent quality.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Cole's Early

Kleckly Sweet or Monte Christo

An excellent variety for home use, but the rind is too thin to stand shipping long distances. It is of medium size; oval; dark green, slightly mottled. The flesh is bright red and exceedingly sweet.

Pkt. **5c**, oz. **20c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

JILLY'S Sweet as Honey

Unequaled for Home Use in the Northwest

This is the best and most delicious of all early watermelons for the Northwest. It is medium in size, oblong in form, and the skin is a rich dark green. The flesh is bright scarlet clear to the rind, and entirely free from stringiness. The seeds lie close to the rind, leaving a very large solid core, lusciously sweet, crisp and melting.

Sold in sealed packages only.
Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Florida Favorite

Florida Favorite

Very large and of excellent quality. The fruits are long, dark green, irregularly striped and mottled. The flesh is deep red, very sweet and tender. Seed nearly white.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Tom Watson

Probably the best shipping melon, and one of the best main crop sorts; grows a very large size. Fruit large and long in shape, colored a medium green with a light tracing of a darker shade, flesh rich red and of good quality; seeds white.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Georgia Rattlesnake

Citron—Red Seeded

Small round melons, used exclusively for preserves or pickles; not suitable for eating. The skin is dark green, distinctly striped and marbled with light green. The flesh is white, matures late in the fall and may be kept for a long time.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Tom Watson

No fruit is so easily grown or more delicious to eat than good Water Melon. We take every precaution to have varieties true to type.

MUSTARD Southern Curled

Hardy and vigorous, with large light green leaves, crimped and frilled at the edges. Excellent while young for salads and garnishing. Seed is dark brown and small. Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **35c**, Postpaid.

White English

Leaves are dark green, small, smooth, and deeply cut; mild and tender when young. The seeds are large and light yellow. Pkt. **5c**, Oz. **10c**, $\frac{1}{4}$ lb. **30c**, Postpaid.

OKRA or GUMBO Dwarf Green

Grown for its green pods, which are used in soups, stews, etc., to which they impart a rich flavor and are considered very nutritious. Produces an abundance of long, slender, pale green pods, which are very tender when young.

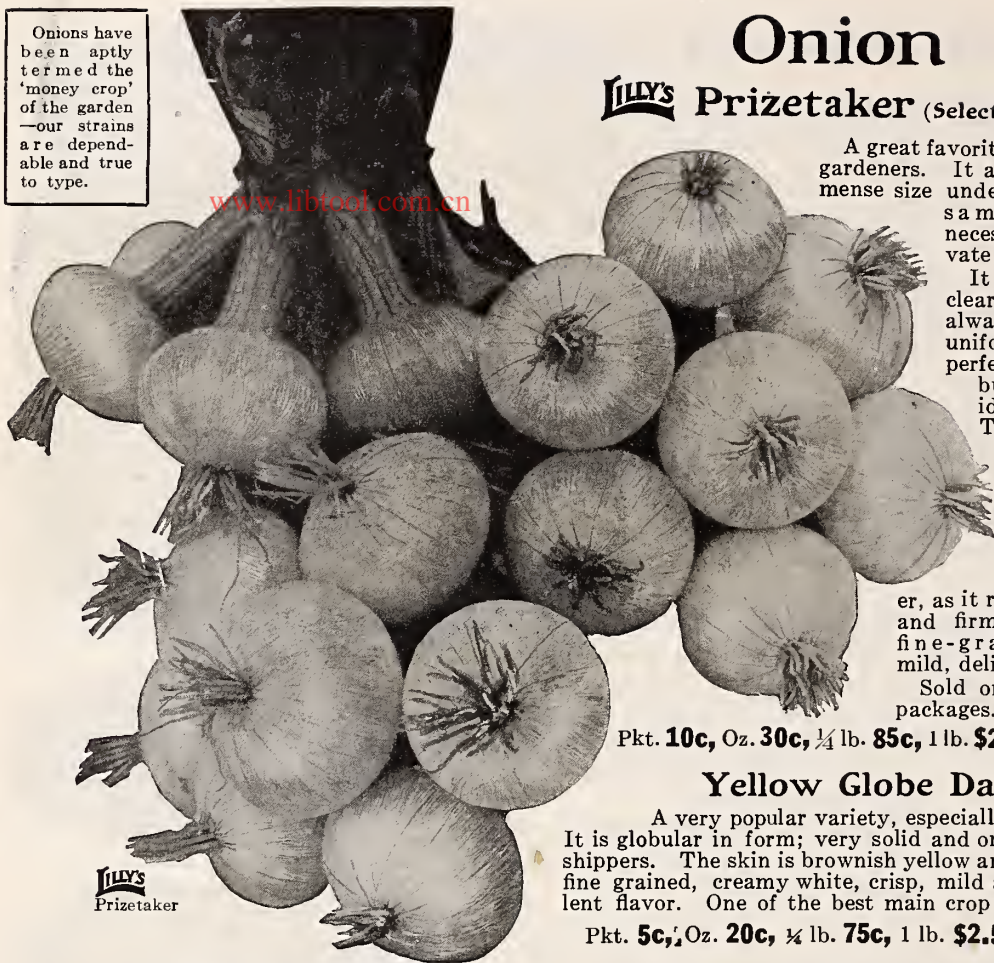

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **30c**, Postpaid.

Grow A Garden

FOOD is the world's greatest problem and the only practical individual solution to the vexed question of H. C. of L. is to grow your own vegetables. You'll like them better and if you don't grow them yourself, you will probably have to go without them. Order seeds NOW—**JILLY'S**

Onions have been aptly termed the 'money crop' of the garden—our strains are dependable and true to type.

www.libtool.com.cn

Onion

JILLY'S Prizetaker (Select Stock)

A great favorite with market gardeners. It attains its immense size under exactly the same conditions necessary to cultivate other sorts.

It is a bright clear straw color; always grows to a uniform and most perfect shape. The

bulb is very solid and heavy.

The flesh is crisp, white and of delicious quality. It is very hardy and a good winter keeper,

as it ripens up hard and firm. It is very fine-grained and of mild, delicate flavor.

Sold only in sealed packages.

Pkt. **10c**, Oz. **30c**, $\frac{1}{4}$ lb. **85c**, 1 lb. **\$2.75**, Postpaid

Yellow Globe Danvers

A very popular variety, especially for market. It is globular in form; very solid and one of the best shippers. The skin is brownish yellow and the flesh is fine grained, creamy white, crisp, mild and of excellent flavor. One of the best main crop varieties.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **75c**, 1 lb. **\$2.50**, Postpaid.

Yellow Flat Danvers

Very similar to Yellow Globe Danvers, except in shape. It is early, very productive and reliable. The form is round, flattened with small neck. The skin is thin and pale yellow and the flesh is white and mild.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**, 1 lb. **\$2.00**, Postpaid.

Large Red Wethersfield

A very large onion flattened in shape and with skin of a purplish red color, and flesh purplish white; rather strong flavored, but good and an excellent keeper.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **70c**, 1 lb. **\$2.25** Postpaid.

Australian Brown

An early onion of medium size and nearly globular shape, a sure keeper. The skin is a bright brown and the flesh is white, crisp, extremely solid, and of a sweet, mild flavor.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**, 1 lb. **\$2.00**, Postpaid.

Southport White Globe

The mild flavor of this wonderful variety is famed the world over. It will average from 2 to 2½ inches in diameter and produces large yield. The flesh is fine grained, crisp and of a very fine flavor and snowy white in color.

Pkt. **5c**, Oz. **30c**, $\frac{1}{4}$ lb. **85c**, 1 lb. **\$3.00**, Postpaid.

JILLY'S White Queen (For Pickles and Early Green Onions)

This small white onion is used for pickling, and is also a favorite for green onions in the market garden and home garden, as it produces green onions almost as early as they can be produced from sets. They are extra early, very small, round, not necky, handsome, and very hard and crisp. The color is a beautiful waxy white, and flavor is deliciously mild. Sold in sealed packages only.

Pkt. **10c**, Oz. **50c**, $\frac{1}{4}$ lb. **\$1.60**, 1 lb. **\$5.00** Postpaid.

Onion One ounce of seed
will sow 300 feet

JILLY'S Longkeeper

Longkeeper, as the name implies, has marvelous keeping qualities which in addition to its splendid appearance, fine quality and flavor, and phenomenal yield, makes it the most popular and profitable for the market. It is also unexcelled for home use, as the bulbs form early and they may be used all summer. It is globular in form; of an attractive brownish yellow color, mild and of delicious flavor. The neck is very small, and the tops die down entirely; of medium size, uniform, very solid and heavy, and produces immense crops. Sold only in sealed packages.

Pkt. **10c**, Oz. **30c**, $\frac{1}{4}$ lb. **90c**, 1 lb. **\$3.00**
Postpaid.

CROP BOOK
will be mailed
free to custom-
ers on request.

JILLY'S Western Wethersfield

An improved strain of Western Wethersfield, acclimated to the Pacific Coast. It is flattened like the Red Wethersfield, is very large, and our selected seed produces large crops, free from necky or misshapen bulbs. The color is a rich dark red; flesh is a sparkling purplish white, and the flavor is good. Highly recommended for those who wish a large red onion. Sold in sealed packages only.

Pkt. **10c**, Oz. **30c**, $\frac{1}{4}$ lb. **90c**, 1 lb. **\$3.00**, Postpaid.

White Portugal or Silverskin

A very popular medium white onion, much used for green onions, pickles and for fall and winter planting. The bulbs grow to good size, ripening early and quite evenly, are silvery white, nearly round when of bunching size, but flattened when mature. The flesh is mild and of splendid quality. Pkt. **10c**, Oz. **30c**, $\frac{1}{4}$ lb. **90c**, 1 lb. **\$2.75**, Postpaid.

Oregon Yellow Danvers

A type developed in Oregon where it is very popular, in fact, it is considered by many the standard market variety in that State. The bulbs ripen up hard and early; are good keepers; an excellent sort for table or market. It has the thin brownish yellow skin of the Danver types with firm, white, fine grained flesh which is mild in flavor. Bulbs grow uniformly large, half globe shape with small neck.

Pkt. **10c**, Oz. **25c**, $\frac{1}{4}$ lb. **80c**, 1 lb. **\$2.65** Postpaid.

HINTS ON ONION CULTURE

Onions require a well-drained loam. The land should be very rich and it is necessary that it should have raised a hoed crop the previous season. It is a mistake to attempt to grow onions on weedy or rundown land. To get the best results a heavy top dressing of well-rotted barnyard manure should be well worked into the soil. After this a complete commercial fertilizer containing a large proportion of potash should be used. This should be sown broadcast at the rate of 1,000 pounds per acre. If the land has been in a high state of cultivation the commercial fertilizer may replace the barnyard manure. It costs no more to cultivate a crop that yields 800 bushels per acre than it does to cultivate a crop that yields only 300 bushels. When land is in good condition onions may be grown on it from year to year. Seed should be sown as early in the spring as the land can be worked. If intended for hand cultivation, sow in rows 12 to 14 inches apart, and if for horse cultivation about 30 inches apart. It requires about four pounds of seed per acre.

Onions
growing
for seed

Onion Sets

WHY THEY ARE PLANTED

Onion Sets are now an established and recognized factor in onion production. The reasons for this general use are easily understood. (1) The first saving is in labor, being much less than when seed is sown. (2) Owing to quick growth the danger of loss of crop from insect pests is practically eliminated. (3) Onion Sets produce bulbs in one-half the time that is required by raising from seed. The majority of gardeners realize the great advantages to be derived from adopting this easy common sense method of obtaining early onions for table use. The grower is also able to crop much earlier.

LILLY'S ONION SETS are northern grown, hardy, handsome, small and of uniform size. We grow only the most suitable varieties which have proven to give best results in our section. These sets if planted very early will produce green onions early in summer, much earlier than they can be produced from seed. They will also produce mature onions, but for that purpose seed is generally planted. 1 lb. **25c**, 10 lbs. **20c** Per lb.

Garlic (Selected Sets)

A perennial bulbous plant of the onion family, highly esteemed for flavoring soups, stews, etc. Cultivation the same as Onion Sets. Write for prices.

Garlic (Seed)

In response to considerable demand we offer choice seed: Pkt. **5c**, Oz **25c**, $\frac{1}{4}$ lb. **25c**, 1 lb. **52.25** Cultivation the same as onion seed.

Where Our Seeds Are Tested

Hollow Crown Parsnip

A standard and excellent variety. The roots are long, with smooth, white skin, uniform in shape, tender and of good quality. This variety is distinguishable by the leaves growing from the depression in the crown.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Long White Dutch

A popular variety with many gardeners. It grows smooth, long roots of excellent quality and is preferred in some sections to other sorts.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Parsley

Champion Moss Curled

A beautiful plant, and excellent for garnishing and for flavoring soups and stews. This is a hardy, vigorous, compact growing variety, with very attractive, deep green foliage, and is most popular for both home and market. The leaves are very finely cut and are so closely curled as to resemble moss.

Pkt. **5c**, Oz. **10c**, $\frac{1}{4}$ lb. **35c**, Postpaid.

IF ONION SETS are to be shipped by parcel post, postage will be additional at regular rates. Please write for prices on large quantities.

Parsnip

LILLY'S Palo Alto

The flesh is white and of fine texture, tender, free from core and stringiness, and of superior flavor, sweet and rich. It is very hardy, and may be left in the ground all winter, or until wanted for use. Frost improves the quality and flavor. If grown in favorable soil, the roots are smooth, well rounded and tapering. They are heavy at the shoulder, and are half-long, rendering them easy to harvest. It yields immense crops, and in addition to being a delicious winter vegetable, it is an excellent stock food.

Pkt. **10c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid

Champion Moss Curled

Pepper

Peppers are not a very certain crop west of the Cascade Mountains, and we recommend that the plants be started in berry boxes or on inverted sods. In warmer climates the plants may be started under glass the same as tomatoes. They should not be planted outdoors until very late in spring, after the weather and soil are thoroughly warmed.

Large Bell or Bull Nose

The plants are vigorous, compact, and very productive, ripening their crop early and uniformly. The fruits are large, with thick, mild flesh of fine quality for use in salads or for stuffing. The color is deep green while young, bright crimson when ripe.

Pkt. 5c, Oz. 70c, ¼ lb. \$2.00, Postpaid.

Long Red Cayenne

The true Cayenne, hot and pungent. Medium early, bearing slender, twisted pods about four inches long. Deep green while young, bright red when ripe.

Pkt. 5c, Oz. 70c, ¼ lb. \$2.00, Postpaid.

Pimiento

This new pepper is very mild with thick, heavy flesh and has a delicate flavor. Of good shape, being of medium length and smooth. Delicious when used in salads or creamed like onions. Very prolific and a good shipper.

Pkt. 5c, Oz. 75c, ¼ lb. \$2.25, Postpaid.

Chinese Giant

Its mammoth size, splendid shape, beautifully rich, glossy-red flesh and mild flavor, all lead us to recommend it. Its strong bushy plants are heavily loaded with large fruits, which are produced throughout the season. A very unusual variety worthy of the highest recommendation.

Pkt. 5c, Oz. 80c, ¼ lb. \$2.40, Postpaid.

Ruby King

Fruit of a bright red color six to seven inches long by about four inches through. Remarkably pleasant and mild in flavor, and can be eaten sliced with vinegar, like tomatoes. The best for making mangoes.

Pkt. 5c, Oz. 80c, ¼ lb. \$2.40, Postpaid.

Pumpkin

Sugar or Sweet Pie

The best variety for making pies. The vines are very productive. The fruits are round, somewhat flattened, and of a deep orange color. The flesh is a rich yellow, thick and meaty.

Pkt. 5c, Oz. 20c, ¼ lb. 45c, Postpaid.

Connecticut Field

A large, productive, orange colored field pumpkin, usually grown for stock, but good for pies.

Pkt. 5c, Oz. 20c, ¼ lb. 45c, Postpaid.

Jumbo or King of Mammoth

The largest pumpkin grown, sometimes weighing more than two hundred pounds. The skin is salmon-orange, and the flesh is bright yellow, very thick, and of excellent quality for pies as well as for stock.

Pkt. 5c, Oz. 20c, ¼ lb. 50c, Postpaid.

Large Cheese

A large variety, producing pumpkins in abundance. Has thick meat of fine quality. Very suitable for canner's use.

Pkt. 5c, Oz. 20c, ¼ lb. 45c, Postpaid.

Rhubarb or Pie Plant

The largest and finest cooking variety. It is vigorous and very productive of thick, red stalks of fine quality, juicy and rich.

Pkt. 5c, Oz. 20c, ¼ Oz. 50c, Postpaid.

Mammoth Victoria

Salsify or Vegetable Oyster

Salsify

or

Vegetable Oyster

Mammoth

or

Sandwich Island

A very desirable winter vegetable; palatable, nutritious, and may be served in a variety of ways. This is the most popular variety, growing twice the size of any other. Mild and delicately flavored.

Pkt. 5c, Oz. 25c,
¼ lb. 75c, Postpaid.

Connecticut Field Pumpkin

Peas Early Varieties

One pound of seed for 50 feet of drill

Peas from any one planting will remain in the best condition for use only for a comparatively short time. To have a constant supply throughout the season, a succession of plantings should be made.

The dwarf varieties do not bear as heavily nor for as long a period as the climbing sorts, but for small gardens they have the advantage that they are economical in space and do not require support. Consequently they are grown almost exclusively by many Western gardeners. One or two dwarf sorts sown every ten days or two weeks will maintain a supply.

LILLY'S Washington Wonder

Favorite Extra Early Dwarf Wrinkled

An old favorite, and a splendid extra early dwarf pea. It grows only about sixteen inches high, and requires no support. It is quite prolific, and produces a good crop of well filled pods containing six to nine good-sized wrinkled peas of excellent flavor. It is sufficiently hardy to be sown in the fall on the Pacific Coast, thereby producing peas several weeks earlier than spring sown seed. It is as early as the extra smooth varieties, and very much superior in quality and flavor.

Pkt. 15c, 1 lb. 35c, 10 lbs. \$3.00, Postage extra.

LILLY'S World's Record

An Excellent Early Wrinkled Variety

World's Record is an English variety which has proved to be perfectly adapted to the Northwest. Our seed has been grown in this locality for several seasons, and is thoroughly acclimated. The vines are semi-dwarf, growing about three feet high, and the yield, size and quality of the peas is wonderful considering its extreme earliness. The pods are large, dark green, of the Gradus type, and are filled with eight or ten large wrinkled peas, sweet and of fine flavor.

Pkt. 15c, 1 lb. 35c, 10 lbs. \$3.00, Postage extra.

LILLY'S Gradus or Prosperity

Best Extra Early Wrinkled Pea

This grand extra early pea has no superior and few if any equals. It is practically as early as the small, round, hard, smooth peas commonly grown for extra early, and it is so much better in every other way that it is fast displacing them for first early crop. It is equal in quality to most of the late varieties, and many of our customers use it exclusively, sowing in succession for early, medium and late.

The vine is vigorous, robust, heavy stemmed, and grows only two and one-half to three feet high. The pods are large and are filled with six to ten very large, wrinkled, marrow peas of the most delicious flavor as large, as sweet, and as tender as the finest late peas. Our seed is grown from the original strain, acclimated in the Northwest.

Pkt. 15c, 1 lb. 35c, 10 lbs. \$3.00, Postage extra.

Blue Bantam

A New First Early Dwarf Wrinkled Pea

The raisers claim that this variety is unequalled for combination of extreme earliness, superb quality, and unusual productiveness. The dwarf vigorous vines average fifteen inches in height and carry really enormous crops of large, deep bluish-green pods. The pods measure four to four and one-half inches long and are tightly packed with eight to ten large, deep bluish-green peas of most luscious flavor. It has jumped into first place among the Dwarf Early peas and we certainly recommend a trial.

Pkt. 15c, 1 lb. 40c, 10 lbs. \$3.75, Postage extra.

BE SURE YOU PLANT LILLY'S

PUGET
SOUND
PEAS

are the finest in the world. We grow many hundreds of acres annually for our home and export trade. All the varieties offered are produce of our own crops grown in Washington and are thoroughly re-cleaned to remove all impurities.

Peas Early Varieties

JILLY'S Thomas Laxton

Extra Early and Fine Quality

Thomas Laxton Peas are very similar to Gradus in every way except the shape of the pods, the ends of which are square, and the pods and vines are a darker green. It is nearly or quite as early as Gradus, and the large wrinkled, dark green peas are sweet, tender, delicious, and unexcelled in quality by any of the late varieties. The vines grow about three feet high.

Pkt. **15c**, 1 lb. **35c**, 10 lbs. **\$3.00**, Postage extra.

JILLY'S Superb

Very Productive

One of the best of the new English varieties. An exceptionally early, productive and handsome pea. Height 16 inches. Vine and foliage moderately heavy, medium green; pods deep green, 4 inches long, semi-broad, pointed and well filled with 8 to 9 very large and very dark green peas. Fully as early as Laxtonian and more productive; seed blue, semi-wrinkled.

Pkt. **15c**, 1 lb. **40c**, 10 lbs. **\$3.75**, Postage extra.

Laxtonian

One of the Leading Dwarfs

A large podded, dwarf variety on the order of Gradus, though more dwarf and a little earlier. Height 1½ feet; pods and vine dark green; pods 3¾ inches long, straight and pointed, containing 6 to 8 large, dark green peas.

Pkt. **15c**, 1 lb. **40c**, 10 lbs. **\$3.75**, Postage extra.

American Wonder

Very early, and of dwarf compact growth, about twelve inches high. Very popular with those who object to making a support for the vines. The pods are about three inches long, straight, round, blunt at the ends, and light green. The peas are of medium size, wrinkled, and of fine quality.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

Nott's Excelsior

A dwarf, early variety, about fourteen inches high, and quite productive. The pods are three inches long, round and blunt at the ends. The pods are of medium size, green, wrinkled.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

Little Gem

A medium early dwarf variety, growing about fifteen to twenty inches high, robust, branching, and productive. The pods are about three inches long, well filled with medium-sized, green, wrinkled peas.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

Alaska, or Earliest of All

A well-known, smooth seeded, extra early variety, extensively used by canners. The vines are strong and vigorous, two feet high, and of light green color. The pods are about three inches long, and are well filled with round, blue peas, slightly pitted.

Pkt. **15c**, 1 lb. **25c**, 10 lbs. **\$2.00**, Postage extra.

JILLY'S
Thomas
Laxton

Nott's Excelsior

Peas Main Crop and Late Varieties

LILLY'S Tall Telephone

The Market Gardener's favorite

The old standard market gardener's main crop, large podded pea. Vine and foliage strong and heavy, medium green. Grows four to five feet high, and bears an abundance of long, straight, pointed pods filled with large peas of a rich, sugard flavor. Main crop, very productive.

Pkt. **15c**, 1 lb. **35c**, 10 lbs. **\$3.00**, Postage extra.

LILLY'S Dwarf Telephone

An Excellent Late Dwarf Pea

An improvement on the old Daisy, having larger and darker green pods. Height $2\frac{1}{2}$ feet, vine and foliage dark green and exceptionally stout; pods dark green, $4\frac{1}{2}$ inches long, straight and pointed; containing 8 to 9 dark green peas of the best quality.

Pkt. **15c**, 1 lb. **35c**, 10 lbs. **\$3.00**, Postage extra.

LILLY'S Lincoln

A Dwarf Main Crop Pea of Fine Quality

A splendid dwarf main crop pea. The variety originated in England, but our seed is grown and acclimated in the Northwest. The vines grow about two feet high, making it popular with those who dislike the labor of making a support for them. The peas are of medium size, curved and pointed, and are well filled with good-sized wrinkled peas, very sweet and of excellent quality.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**

Postage extra.

Quite Content

A Giant Podded Main Crop Marrowfat

A tall-growing late or main crop variety, five to six feet high, bearing exceedingly large pods in pairs. The peas are large, wrinkled and of good quality.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

Dwarf Grey Sugar

Luscious in Flavor

An edible pod pea growing about two feet in height. Pods very delicious when cooked same as green or wax beans.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

Swedish Sugar

A tall edible pod pea of decided merit. Excellent eating both as pod and shell peas. Sweet in flavor. Grows 6 to 7 feet high. Our stock is true.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

www.jibtool.com.cn

LILLY'S
Tall
Telephone

Alderman

Large Podded, Fine Flavor

A splendid new large podded main crop pea, growing about five feet high. The pods are larger than the Telephone, are dark green, and are well filled with large wrinkled peas of fine flavor.

Pkt. **15c**, 1 lb. **30c**, 10 lbs. **\$2.75**, Postage extra.

Prizewinner

Yields Abundantly

A good second early or main crop variety. The vines grow about three feet high, and bear abundantly; very large, deep green, slightly curved, pointed pods, well filled with large, wrinkled peas of exceptionally fine flavor.

Pkt. **15c**, 1 lb. **25c**, 10 lbs. **\$2.25**, Postage extra

After Thirty-six Years

It has taken thirty-six years to make the LILLY name what it is today.

Such an achievement is not to be attained in a single year—scarcely in a decade.

No matter how sincere the desire, no matter how complete the equipment, no matter how capable the executive minds, time is indispensable.

It must be a growth, an unfoldment, nourished by the highest ideals.

THE LILLY NAME TODAY is a synonym for Seed Service and Satisfaction—a guarantee of integrity and authenticity of treatment.

Seed Potatoes

Early Rose

This old standard early potato is one of the best early varieties. Early Rose is too well known to require much description. It is of good size, oblong, the skin has a rosy blush and the flesh is white.

Earliest of All

Earliest of All has frequently made the best showing of any of the early varieties in our trial grounds. It is about two weeks earlier and more productive than many other varieties. It is a round, white potato, very similar to Irish Cobbler, is uniform in size and shape, smooth, and of fine quality.

Irish Cobbler

A splendid extra early variety, and one of the best for early market. The tubers are very handsome, almost round, larger than most other early potatoes, and uniform in size and shape, producing very few small potatoes. The skin is creamy white sometimes slightly netted.

MAIL
ORDER
EARLY

Notice

It sometimes happens stocks become exhausted earlier than we anticipated, it being impossible to foresee in advance of planting season what the demand will be. Moreover, crops vary considerably in regard to quantity and quality which increases the difficulty of providing suitable seed of any particular variety. We, therefore, request customers to name a second or even third choice when ordering. In the event of our being sold out of the particular variety ordered we will substitute the nearest similar variety unless specific instructions to the contrary accompany the order. All orders received for potatoes are filled in strict rotation.

Gold Coin

A first-class main crop variety which, although of comparatively recent introduction, has rapidly come to the front. Grows to a large size—vines strong and vigorous. Very productive. The tubers are white tinged with pink of fine cooking and eating quality.

Other Varieties

In addition to the above we expect to purchase from reliable growers such varieties as Burbank, Netted Gem, American Wonder, Early Ohio, Beauty of Hebron, Early Puritan and others. Such good varieties as we can purchase will be listed in price list supplements which we will issue from time to time, and which we will gladly mail to you on request.

Bovee

One of the best varieties, and very productive. It yields a very large percentage of perfectly formed tubers of good size. The tops are short and compact and the potatoes are set close in the hill. The skin is pink or flesh color; the flesh is white and of good quality.

Up-to-Date

This new main crop potato excels any other late variety. It is a remarkably heavy cropper, exceedingly vigorous and free from disease. The tubers are slightly oblong, flattened, grow to a uniform size, are very attractive, with few and exceedingly shallow eyes. The skin and flesh are white, and the cooking qualities are of the very best.

Jerusalem Artichokes

These are quite distinct from the Green Globe Artichoke listed in the Vegetable Seed Section of this catalog. The tubers resemble potatoes, but, although by some they are considered a great delicacy, in this country they are used mostly for hog food. They are easy to grow, and are one of the best and cheapest foods for hogs. They should be planted and cultivated the same as potatoes, and will produce immense crops, but they are very hardy and persistent, and are often planted on new land and the hogs allowed to harvest them, at the same time subduing the land.

Price, subject to change. See supplement following page 48 or write for quotations.

JILLY'S
Crimson Giant

JILLY'S Earliest of All

A Delicious Early Breakfast Radish

A very superior extra early turnip-shaped radish, equally good for forcing or early outdoor culture. It is small, very uniform, round, and the color is bright scarlet with an attractive white tip and a very small tap-root. The flesh is sparkling white, mild, crisp and tender.

Pkt. **10c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Early Scarlet Turnip (White Tip)

Also Known as Rosy Gem

A very popular extra early turnip-shaped radish. The roots are bright scarlet; with a distinct white tip. The flesh is white and of good quality.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

JILLY'S
Earliest of All

Radish

JILLY'S Crimson Giant

King of all Early Radishes

Crimson Giant is double the size of any other variety of the early turnip-shaped type, but does not become hollow or pithy, the flesh remaining white, solid, crisp, tender and juicy and of the mildest flavor. It is equally suitable for early planting outdoors, and for succession. The texture and flavor is unequalled.

Pkt. **10c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, Postpaid.

Early Scarlet Turnip

A standard variety for early outdoor planting for home or market. The roots are small, round and deep scarlet. The flesh is white and of good quality.

Pkt. **5c**, Oz. **15c**,
 $\frac{1}{4}$ lb. **40c**, Postpaid.

Early
Scarlet
Turnip

**WE GIVE
quick service.
Mail your
order early**

French Breakfast

A quick-growing, small, olive-shaped radish. The color is deep rose-scarlet except a little clear white about the tip. Excellent for forcing or for the home garden. Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

China Rose Winter

A splendid long white variety for growing during the summer months. The roots, when mature, are four to six inches long, thick at the shoulder, somewhat tapering.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**,
Postpaid.

White Strasburg

An excellent winter radish. The roots grow about five inches long and two inches in diameter. The flesh is white, firm, crisp and pungent. Seed should be sown late in summer.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**,
Postpaid.

Round Black Spanish

A popular winter radish. The roots are round, sometimes top-shaped, three or four inches in diameter. The skin is black; the flesh white, very compact, decidedly pungent but well flavored. Keeps well.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Long Bright Scarlet

An excellent early long red radish. The roots are smooth, slender, about six inches long, uniform in shape, and very attractive.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Radish

LILLY'S White Icicle

An Early Long White Radish

The finest early long white radish. It is ready for use nearly as early as the early ~~turnip-shaped varieties~~, and remains in good condition longer than any other early variety. The tops are very small, and the roots are long, slender, pure white and very attractive. The flesh is crisp, tender, sweet and delicious, and remains in that condition until the roots have attained large size. Sold only in sealed packages. Pkt. 5c, oz. 20c, ¼ lb. 50c, Postpaid.

Half Long Deep Scarlet

A valuable variety for forcing. Very popular in the South. The Radishes are of slightly larger diameter and most brilliant-scarlet coloring. Flesh purest white, crisp and juicy.

Pkt. 5c, Oz. 15c, ¼ lb. 45c, Postpaid.

RADISH is a hardy, quick-growing crop, and the seed may be sown as soon as the ground can be worked properly in early spring, and for succession at intervals of ten days or two weeks as long as wanted. The soil should be very rich, light and warm. To make them crisp and brittle they must be grown quickly, and for that purpose one or two applications of nitrate of soda will be very beneficial.

The seed may be sown in drills a foot apart and the plants thinned to about two inches, or the seed may be mixed with seeds of slower growing crops such as lettuce, carrots, parsnips, etc., and the radishes will be used before the other crops need the space.

Winter radishes are grown the same as turnips, and the seed should be sown in the latter part of July or any time in August.

Radishes are very subject to root maggots, and the only practical cure yet invented is to apply LILLY'S MAGGOTBAIT, further particulars of which are given on later LILLY'S pages of this catalog.

Spinach

LILLY'S Mammoth Victoria

A very superior variety. It is especially good for early spring and successive plantings for summer use, but is also an excellent variety for fall planting for winter and early spring use. It is a long-standing variety, very slow in going to seed.

Pkt. 10c, Oz. 15c, ¼ lb. 35c, Postpaid.

Viroflay

Has very large, thick, dark green leaves. A favorite with market gardeners for either fall or spring sowing.

Pkt. 5c, Oz. 10c, ¼ lb. 30c, Postpaid.

Bloomsdale Savoy Leaved

A very early variety, hardy, and suitable for early spring use. The leaves are large, round and thick, very much savoyed.

Pkt. 5c, Oz. 10c, ¼ lb. 30c, Postpaid.

Thick Leaved Improved

For either fall or spring sowing. Produces large, thick, bright green, crumpled leaves of excellent quality. Slow in running to seed.

Pkt. 5c, Oz. 10c, ¼ lb. 30c, Postpaid.

Prickly Winter

A standard market gardeners' variety for fall sowing. The leaves are bright green, large, smooth, and shaped like an arrow head.

Pkt. 5c, Oz. 10c, ¼ lb. 30c, Postpaid.

NEW ZEALAND SPINACH

The stems and leaves are soft, thick, fleshy, and of a crystalline appearance. Started early in spring, the plants will resist heat and make a strong growth during the summer. Pick off the leaves from the stem, cooking them only, and you will have delicious greens all summer long.

Pkt. 10c, Oz. 20c, ¼ lb. 50c, Postpaid.

LILLY'S CROP BOOK is a practical help to every gardener. It is free with orders on request.

THE GARDEN

is art and the plants are in part the objects through which this art finds expression.

Squash

Summer Varieties

Early Summer Crookneck

Early and Productive

A popular early bush variety. The fruits are of the well known crook-neck form, deep yellow, densely warted, and of good quality and flavor.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

White Bush Scallop

An early bush squash; large, often twelve inches in diameter; flattened; scalloped around the edges; and of a clear, waxy white.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

English Vegetable Marrow

Very popular in England and can be grown equally well here; they should be eaten when less than half grown, at which time the flesh is very tender and may be cooked like other squash or fried like eggplant. Oblong in shape, color creamy-white.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, Postpaid.

Winter Varieties

Lilly's Hubbard

Unequaled for Winter Use

An improved strain of the true Hubbard, which is still unexcelled. The vines are strong, vigorous and productive. The fruits are large, and the shell is dark green, extremely hard, and densely warted. The flesh is golden-yellow, thick, fine grained, dry, sweet, and no other squash can compare with it in flavor. It is unequalled as a winter keeper and shipper.

Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**, Postpaid.

Mammoth Chili

The largest of all squashes. The fruits are smooth; oblong, flattened at the ends, and orange color. The flesh is fine grained, sweet and good for pies; also good for stock food.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**,
Postpaid.

Lilly's Delicata

For Summer or Winter

Delicata is the earliest vine squash, maturing nearly as early as the bush varieties, and is of very superior quality. Being a hybrid, it varies considerably in form and color, but the quality is uniformly good. It is as dry, sweet and deliciously flavored, and if properly stored will keep nearly as long. The fruits are small, and the flesh is rich, dry and mealy.

Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**, Postpaid.

Boston Marrow

Produces Large Oval Fruit

A very popular vine squash for fall and winter use. The fruits are of medium size, oval shape and orange color. The flesh is rich salmon-yellow, fine grained and of excellent flavor.

Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**,
Postpaid.

Sibley or Pikes Peak

We offer this variety in response to active demand during last season. It grows a smooth shell of thin pale green color; the flesh is thick, solid and deep orange color; very dry, fine grained with a delicate flavor.

Pkt. **5c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**,
Postpaid.

Lilly's CROP BOOK

gives valuable cultural hints—ask for a copy when mailing your order—it is free.

Tomato

One oz. of seed should produce 2000 plants

JILLY'S Puget Sound Special A Splendid Extra Early Tomato

Puget Sound Special is decidedly the best tomato that may be depended upon to mature west of the Cascade Mountains. It is equalled in earliness only by Earliana, sometimes producing ripe fruit as early as July 4th. The flesh is solid, meaty, and of delicious flavor, with few seeds and no hard core. It is a heavy yielder of splendid firm fruits, which are of good shape and rich red color. For the Pacific Coast it is the best for either early or late; also excellent for hot-house culture.

Pkt. **10c**, Oz. **50c**, ¼ lb. **\$1.50**, Postpaid.

JILLY'S Earliana

This is one of the earliest varieties grown and the quality is excellent. It produces large clusters of medium size, deep red fruit, uniform in size and of good shape, very solid and of fine flavor. It is a popular variety for greenhouse forcing.

Pkt. **5c**, Oz. **40c**, ¼ lb. **\$1.30**, Postpaid

JILLY'S Puget Sound Forcing Best Variety For Greenhouse Culture

A prolific bearer, and most of the fruit is borne close to the main stalk, allowing close pruning. The fruit is of medium size, excellent shape for an early tomato, and of splendid quality. The flesh is firm and meaty, deep red, and of fine flavor.

Pkt. **5c**, Oz. **50c**, ¼ lb. **\$1.50**, Postpaid.

	Postpaid		
	Pkt.	Oz.	¼ lb.
LIVINGSTON'S CORELESS A medium large late tomato. In shape it is almost perfectly globular, with little or no depression at the stem end. There is no hard core and the seed cells are surrounded by bright red, heavy, meaty delicious flesh.	5c	45c	\$1.35
PONDEROSA Ponderosa is massive in size. Of good form, smooth, free from wrinkles and does not crack. The flesh is solid and meaty, almost seedless and of delicious flavor. Our seed is carefully grown from selected stock.	5c	50c	1.50
DWARF CHAMPION A dwarf, compact, second early variety, growing only about two feet high and requiring no stake; vigorous and productive. The fruits are of medium size, smooth and of good quality.	5c	45c	1.35
EARLY MICHIGAN A popular second early variety of good quality. The vines are vigorous and productive. The fruits of medium size, crimson-scarlet color.	5c	40c	1.20
NEW STONE A very large and solid main crop or late tomato. The vines are very large, vigorous and very productive. The fruits are bright, deep scarlet, oval, exceptionally smooth and uniform in size, and of excellent quality. A splendid shipper.	5c	40c	1.20
ACME An old, well known variety, popular for home use. The fruits are ripened evenly and medium early; of medium size, purplish pink, round, smooth and free from cracks. The flesh is solid and of good quality and flavor.	5c	40c	1.20
CHALK'S EARLY JEWEL An exceptionally fine early variety, about ten days later than Earliana; fruit uniformly smooth, round and solid; color crimson; a good canning sort for the North.	5c	40c	1.20
GOLDEN HUSK Greatly in demand for use as a preserve. The fruits are enclosed in a husk or calyx which grow about half an inch in diameter and are of very sweet flavor.	5c	60c	1.75
RED CHERRY The fruits are very small, less than one inch in diameter and are used for preserves and pickles. They are perfectly round, smooth and of bright color.	5c	50c	1.50
RED PEAR Used for preserves and to make "tomato figs." The fruits are small, pear-shaped, bright red and of delicious flavor.	5c	60c	1.75
YELLOW PEAR The fruits are similar to red in shape and size, but are a rich clear yellow color.	5c	60c	1.75
YELLOW PLUM Fruits are plum-shaped, clear, deep yellow color; and the flesh is yellow and finely flavored. Used for preserves.	5c	60c	1.75

Tobacco

Connecticut Seed Leaf

A hardy variety, adapted to growing in the Northwest.

Pkt. **5c**; Oz. **50c**, ¼ lb. **\$1.50**, Postpaid.

Havana

The leaf is very thin and of fine texture. Much used for cigar wrappers.

Pkt. **5c**, Oz. **60c**, ¼ lb. **\$1.80**, Postpaid.

Remember

Pruning increases the size of the fruits, and permits the sunlight to reach the blossoms.

Snowball

Turnip

JILLY'S Snowball

This delicious turnip is the best early variety grown. Under favorable conditions is ready for use six weeks after the seed is sown. It is small, uniform in size and shape, and almost perfectly globular. The skin is smooth, white and thin; flesh is pure, sparkling white, sweet, tender, crisp and delicious. Pkt. **10c**, oz. **20c**, $\frac{1}{4}$ lb. **50c**, 1 lb. **\$1.35**, Postpaid.

JILLY'S Early White Milan

An excellent table turnip adapted for very early spring planting. The flesh is fine-grained, tender and of a mild, sweet flavor. Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**, 1 lb. **\$1.75**, Postpaid.

JILLY'S Petrowski A FAVORITE IN ALASKA

This new early yellow turnip was imported from Finland. The following is description by Prof. C. C. Georgeson, special agent in charge of Alaska investigations: "Turnip of medium size; top short, spreading so that lower leaves generally lie on the ground. Flesh yellow, tender, very pleasant. Shape rounded, almost spherical; quite uniform in size and shape. Medium early. An excellent keeper and altogether the best turnip we have ever tried in Alaska." Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **60c**, 1 lb. **\$1.75**, Postpaid.

Cowhorn

Grows very long. Very popular for stock. The flesh is fine grained and of good flavor. It grows very quickly. Well adapted for fall and early winter use. Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, 1 lb. **\$1.00**, Postpaid.

Yellow Aberdeen

A large-sized, round, late-maturing, long-keeping, yellow-fleshed turnip. Hardy, productive and valuable for stock feeding. The roots are yellow with purple top. Flesh pale yellow, firm, tender and sweet. Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **45c**, 1 lb. **\$1.25**, Postpaid.

Rutabaga

JILLY'S King of Swedes

The best and most satisfactory rutabaga for either table or stock. Wonderfully productive, large, of good shape, and a splendid keeper. The flesh is rich, yellow and of finest quality. Pkt. **10c**, Oz. **20c**, $\frac{1}{4}$ lb. **45c**, 1 lb. **\$1.25**, Postpaid.

American Purple-Top

One of the most popular varieties for table or stock. Very hardy and productive; flesh is yellow, solid and sweet. Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, 1 lb. **\$1.20**, Postpaid.

Bangholm

Very large in size. Skin yellow with purple top. Flesh nice yellowish color, fine in texture, firm, solid and mild in flavor. Pkt. **5c**, Oz. **15c**, $\frac{1}{4}$ lb. **40c**, 1 lb. **\$1.25**, Postpaid.

Beautify Your Garden

"..... to be satisfied with your possessions but not contented with yourself until you have made the best of them."
—Van Dyke

ART for art's sake is a poor enough philosophy, but art for beauty's sake, and beauty for beauty's sake are the food of the spirit whereon it shall wax strong and fine and come to full perfection. And nowhere does beauty wait so eager to reveal itself and so eager to instruct and educate as in a garden. Here any one who seeks may find, whether the scene of their efforts covers a mountain and a valley in extent or is confined to the little square of a town dooryard. Moreover, each one who has found has something to offer all the rest, regardless of their field of search; for the beauty that lies in any garden always has something to suggest to another gardener.

JILLY'S
Flower Seeds

Beautify the Home

Sweet
Alyssum

The dainty
border plant.

In the following descriptions we show the height, color and season of blooming. We have also classed the plants as Annuals, Biennials, and Perennials, dividing these into Tender, Half-Hardy and Hardy. These descriptions are important to those who are not familiar with the plants, and will assist in choosing those most suitable.

Hardy Annuals may be sown outdoors in the fall or early spring, preferably fall. They bloom the following summer, and then die. Half-Hardy Annuals require an even temperature of at least sixty degrees to germinate the seed, and will not stand frost. For early blooms the plants must be started under glass or in the house, and not planted outdoors until danger of frost is past.

Tender Annuals must be grown in pots in a greenhouse or in the house, and exposed outdoors only during the most favorable weather.

Biennials are best sown outdoors in September, and will bloom the following summer, after which they will die. If sown in spring they will not bloom until the next year.

Hardy Perennials seldom bloom the first year, but usually bloom the second and many succeeding years. They may be sown in spring, but are best sown outdoors in September.

Half-Hardy Perennials require some protection during cold winter weather. The seed should be sown in boxes or pots, or outdoors late in spring.

Tender Perennials require protection during the greater part of the year.

The seed bed for flowers should be carefully prepared. The soil should be rich, consisting of a good proportion of sand and leaf mold, and should be very finely pulverized. The smaller seeds should be covered very lightly by sifting fine dirt over them, just enough to hide them. Water should be applied in a fine spray, and not too much of it. Most plants are best started under glass or in the house and transplanted when large enough.

A FLOWER GARDEN should have some protection on the north, if early flowers are desired. A southern or eastern exposure will permit the garden to get the benefit of the strong morning sunlight, which is so beneficial to plants. For a large amount of flowers in midsummer and the early beautification of a new place annual flowers will prove most satisfactory. Hardy perennials are deservedly popular, as they need little attention from year to year, but most of them are best fitted as background plants.

Spencer Sweet Peas

LILLY'S Choice Varieties Make the Garden Gay

Sweet Peas, the most beautiful of the hardy climbing annuals, are very easy to grow, and thrive under ordinary garden conditions with very little care, but a little extra attention will be amply repaid in larger earlier blooms and brighter colors. The climate of the Pacific Coast is ideal for their best development, and in no other locality will they produce blooms in such wonderful profusion and perfection.

On the Pacific Coast, where the ground does not freeze to any depth, the best time to plant is in November. They will apparently make very little growth during the winter, and it is better if the tops do not show above the ground until spring, but they will make a remarkable amount of root growth which will induce a strong growth of vines very early in spring, producing better blooms and much earlier than if planted in spring. They may, however, be planted in February, March or April, and will do very well.

LILLY'S Mixed Spencer

A Superb Mixture of Best Giant Waved Varieties

This splendid mixture contains nearly all varieties of the Spencer type and is designed for those who wish all colors, shades and tints but do not care to keep them separate or to go to the expense of purchasing each of the many varieties.

No. 1007, Pkt. 10c, Oz. 25c, ¼ lb. 75c, 1 lb. \$2.50, Postpaid.

Mrs. Routzahn

A beautiful blending of straw-color tinted with blush-pink and shading to apricot and rose at the edges. One of the finest. No. 1011.....Pkt., 10c; Oz., 35c; Postpaid.

Margaret Madison

A charming, clear, azure-blue, self colored. An improved strain; large flowered and one of the most beautiful Spencers. No. 1048.....Pkt., 10c; Oz., 50c; Postpaid.

Margaret Atlee

One of the most magnificent. Of immense size, with large wavy wings, well poised and few stems bear less than four blossoms. The color is very attractive, a rosy salmon-pink on a creamy buff ground. No. 1043.....Pkt., 10c; Oz., 50c; Postpaid.

Countess Spencer

The original of the Spencer Type, and still one of the best. The color is a beautiful clear pink. No. 949.....Pkt., 10c; Oz., 40c; Postpaid.

Dobbie's Cream

A deep large cream-color; and fine. The best Spencer of this color. No. 1042.....Pkt., 10c; Oz., 40c; Postpaid.

Florence Morse

Large wavy flowers of soft blush-pink flushed towards the edge with deeper pink.

No. 1014.....Pkt., 10c; Oz., 40c; Postpaid.

Vermillion Brilliant

A brilliant scarlet Spencer of splendid form. The standard is very bold and beautifully waved. On account of its brightness this is a very telling color and should be in every collection.

No. 1046.....Pkt., 10c; Oz., 40c; Postpaid.

Dainty

Very large, splendidly formed flowers of blush-white distinctly picotee edged with rose-pink. A beautiful Sweet Pea of splendid Spencer form.

No. 1008.....Pkt., 10c; Oz., 40c; Postpaid.

Primrose

The best of its class. Clear primrose of the best Spencer form. The flowers are large and beautifully waved.

No. 1002.....Pkt., 10c; Oz., 40c; Postpaid.

Margaret
Madison

Spencer, or Orchid Flowered

Are the most highly improved type of Sweet Peas. The plants grow six to ten feet high, the stems are a foot or more in length, bearing 3 or 4 magnificent flowers. Many of the flowers are two and one-half inches across, and are beautifully formed, daintily waved and fluted.

Spencer Sweet Peas

Royal Purple

Considered to be the best purple Spencer. The color deepens and improves as the flowers age. A strong grower, very floriferous and excellent for exhibition.

No. 1113.....Pkt., 10c; Oz., 55c; Postpaid.

Blanche Ferry

Standard bright carmine rose, wings white hinged with pink. Medium size, open form. An old popular and vigorous variety.

No. 1114.....Pkt., 10c; Oz., 50c; Postpaid.

Fiery Cross

An entirely new shade of red and easily the most brilliant red Spencer. The shade of red is hard to describe. A bright red-orange cerise with some salmon in it might convey the idea.

No. 1072.....Pkt., 10c; Oz., 50c; Postpaid.

King White

The king of all white Sweet Peas because of the perfection of the flower in every detail—form, size, waviness and glistening immaculate whiteness. No. 1041.Pkt., 10c; Oz., 50c; Postpaid.

Thomas Stevenson

Large and brilliant effective flowers, fiery red orange. Practically sunproof. A grand Spencer.

No. 1044.....Pkt., 10c; Oz., 45c; Postpaid.

White

The flowers are very large, white and of magnificent Spencer waved form. The stems are long and generally carry four blossoms.

No. 1001.....Pkt., 10c; Oz., 35c; Postpaid.

King Edward

The best pure red Spencer. It is very large, with open form, immense wings, and beautifully waved. The color is rich crimson scarlet.

No. 1009.....Pkt., 10c; Oz., 35c; Postpaid.

Illuminator

A glorious orange-salmon Spencer of striking color and magnificent form and size. No. 1045.Pkt., 10c; Oz., 50c; Postpaid.

Wedgewood

A clear light silvery-blue, with just a suggestion of mauve in the banner. An improved large flowering strain and the best variety of its color.

No. 1049.....Pkt., 10c; Oz., 50c; Postpaid.

George Herbert

A large and beautiful Spencer. The color is rose-crimson suffused with magenta and showing veins in the wings.

No. 1003.....Pkt., 10c; Oz., 35c; Postpaid.

Asta Ohn

The best Lavender Spencer. The flowers are very large and beautifully waved. The color is a beautiful soft pinkish lavender.

No. 1005.....Pkt., 10c; Oz., 40c; Postpaid.

Othello

Of immense size with large drooping wings. The color is a very dark rich maroon. The best very dark colored Sweet Pea.

No. 1047.....Pkt., 10c; Oz., 40c; Postpaid.

Flora Norton

Flowers of medium size, but very nicely waved, and produced profusely. The color is a beautiful pale blue.

No. 1006.....Pkt., 10c; Oz., 35c; Postpaid.

Senator

A very large and attractive Spencer; chocolate and seal brown striped, flaked and mottled on ivory white. Very distinct and novel and one of the very largest in size.

No. 1051.....Pkt., 10c; Oz., 35c; Postpaid.

America

Striped and flaked brilliant carmine-red over white. Very large flowers of splendid form and striking color.

No. 1024.....Pkt., 10c; Oz., 40c; Postpaid.

Apple Blossom

A very large bold flower of best Spencer form. The standard is very bright rose, wings primrose with a flush of rose tint. Very robust and profuse flowering.

No. 1050.....Pkt., 10c; Oz., 40c; Postpaid.

"Flowers are the beautiful hieroglyphics of Nature, by which she indicates how much she loves us."

—GOETHE

Sweet Peas

Lilly's Selected Grandifloras The Best That Grows

The Standard, or Grandiflora type Sweet Peas, includes some splendid varieties and beautiful colors, and they bloom lavishly during the entire season, but the Spencer (or waved) types have now gained such popularity that they are slowly but, nevertheless, surely taking precedence over the grandifloras. The varieties we offer are, in our opinion, the best sorts to grow and will please those who still have preference for the grandiflora types.

Lilly's Royal Mixed

A Fine Mixture of Grandiflora Varieties

There are many enthusiastic lovers of gardens who wish to obtain a continuous and varied supply of bloom throughout the summer months, who find it so rethaw expensive to purchase all the named varieties of their own choice, and it is to these customers Lilly's Royal mixed will appeal. Included in this mixture are the best of all varieties and colors of Grandiflora Type Sweet Peas. Every seed is of some worthy variety and will product a satisfactory blossom. No. 958.....Pkt. 10c, Oz. 20c, ¼ lb. 40c, 1 lb. \$1.25, Postpaid.

America

No. 364
Very attractive and unique. Crimson-scarlet striped on white.

Black Knight

No. 365
One of the darkest colored Sweet Peas, a glossy deep maroon, almost black.

Blanche Ferry

No. 964
Standard bright carmine-rose, wings white tinged with pink; open form.

Dorothy Eckford

No. 969
Large, pure white flowers of semi-hooded form. The best white.

King Edward VII

No. 954
Large; open form; bright red. Best of the pure red Grandifloras.

Lady Grisell Hamilton

No. 465
Soft lavender tinted with mauve in the standard. Hooded form.

Hon. Mrs. E. Kenyon

No. 976
Dark navy blue. The best of the color.

Lord Nelson

No. 1039
Exquisite clear, light pink; hooded form.

Prima Donna

No. 1040
Light primrose; large, semi-hooded form.

Prices: Any of the above Grandiflora Type: Pkt., 10c; Oz., 20c; ¼ lb., 60c; lb., \$1.75; Postpaid.

Lilly's FLOWER SEEDS help to make Western Homes brighter and in closer concord with Nature at its best

Asters

No home is complete without Asters, Nasturtiums and Sweet Peas. Lilly's choice varieties of Asters produce magnificent blooms of this popular Annual.

They require only ordinary care and good garden soil, but respond liberally to a little extra attention. They are exceedingly productive, and the delicate colors, long season of bloom, and vigor of the plants make them indispensable in the garden.

Lilly's Crego Giant Largest and Most Beautiful

These are the finest and largest of all Comet Asters. The flowers are immense, often five inches or more in diameter, and are composed of long, wavy, twisted petals gracefully formed into loose, yet densely double, half globes, equaling some of the finer Chrysanthemums.

The plants are of luxuriant, branching growth, two feet tall, and bearing twenty to thirty of these magnificent flowers on very long stems, which gives them added value for cutting. They keep in good condition longer than other varieties.

Perennial Asters (Michaelmas Daisy)

Michaelmas Daisies fill a most important place in all hardy flower gardens, lighting up the borders and shrubberies with their masses and clouds of dainty and brightly colored blossoms throughout the autumn months. Especially useful for cutting. A hardy perennial.

No. 1081. Michaelmas Daisy.....Pkt., 10c

Asters

LILLY'S Giant Branching

A Beautiful Late Flowering Variety

Splendid late-flowering branching Asters. They begin blooming about the first of September and continue to bloom profusely until killed by freezing weather. The plants are strong, branching freely and grow eighteen inches to two feet high. The flowers are large, very double, and are borne on long stems. This variety is especially valuable for bedding.

	Per Pkt.

No. 939. Giant Branching, Mixed.....	10c

LILLY'S Mixed Asters

A fine mixture of many of the best varieties of annual Asters, producing a great variety of splendid forms and colors.

No. 900. Mixed.....	Pkt., 10c; Oz., 70c
---------------------	---------------------

Alyssum (Sweet Alyssum)

Unexcelled for borders, beds, baskets, pots, rockeries, and for cutting. It is a hardy annual, grows about nine inches high and is covered with spikes of small white flowers during the summer and fall. It may also be grown in pots in the house during winter, where the exquisite fragrance is very pleasing.

No. 2. Alyssum Benthami.....	Pkt., 10c; Oz., 30c; Postpaid.
------------------------------	--------------------------------

Ageratum (Floss Flower)

One of the very best bedding plants. It is a hardy annual of easy culture. The plants are neat, erect and bushy, six to eight inches tall, and should be planted eight to twelve inches apart. The pretty brush-like flowers are borne in clusters. Splendid for blue effects in the garden. No. 439. Little Dorrit. The plant is six inches tall and a foot wide and is a perfect mass of blue flowers all summer.

No. 101. Ageratum Mexicanum, Mixed. About eight inches high of free branching habit.....	Pkt., 10c; Oz., 30c; Postpaid.
--	--------------------------------

Arabis (Rock Cross)

Excellent for rockeries or edgings. Grows about six inches high and a foot in diameter, covered with pure white flowers very early in spring. A hardy perennial, easy to grow, blooming the second year from seed.

No. 1035. Arabis Alpina.....	Pkt., 10c; Postpaid.
------------------------------	----------------------

Antirrhinum (Snap Dragon)

Usually effective bedding displays are made with these unique, bright colored plants. They are half-hardy perennials, but as they bloom the first year from seed, are generally grown as annuals. No. 921. Black Prince. Dark crimson flowers and very dark foliage. Grows about eighteen inches high.....

No. 4. Tall Snapdragon, Mixed. A mixture of good tall varieties, growing three feet high. All colors.....	Pkt., 10c; Postpaid.
---	----------------------

No. 104. Dwarf Snapdragons, Mixed. Best of the dwarf varieties, all colors mixed. Grows about eight inches high.....	Pkt., 10c; Postpaid.
--	----------------------

No. 1073. Golden King. A splendid yellow snapdragon; three feet high.....	Pkt., 10c; Postpaid.
---	----------------------

No. 1074. Delicata. A beautiful pink; three feet high.....	Pkt., 10c; Postpaid.
--	----------------------

No. 1075. Apple Blossom. A charming pink shade on a white ground, with a white throat. Three feet.....	Pkt., 10c; Postpaid.
--	----------------------

No. 1076. Brilliant Scarlet. A very effective red. Three feet high.....	Pkt., 10c; Postpaid.
---	----------------------

Balsam (Lady Slipper)

A fine old-fashioned garden favorite. It is a half-hardy annual, and for early blooms the seed should be sown under glass in March; or it may be sown outdoors in May. The plants do best in full exposure to the hot sun, with rich soil and plenty of water. They grow one and one-half to two feet high. Transplanting will improve the shape of the plants. They should be set a foot apart.

No. 141. Double Balsam, Mixed.....	Pkt., 10c; Postpaid.
------------------------------------	----------------------

Bellis Perennis (Double Daisy)

Excellent border plants, six to eight inches high, bearing charming double flowers from April to June. It is a hardy perennial, but will bloom the following summer if the seed is sown in fall or early spring.

No. 13. Bellis Perennis, Mixed.....	Pkt., 10c; Postpaid.
-------------------------------------	----------------------

Calendula (Pot Marigold)

One of the best and showiest free-flowering hardy annuals. Of the easiest culture, thrives in almost any kind of soil, grows about one foot high, and produces an abundance of large, bright colored flowers in various shades of yellow from early summer until killed by frost. Excellent for beds and borders; also valuable for pot culture.

No. 117. Mixed colors.....	Pkt., 10c; Postpaid.
----------------------------	----------------------

LILLY'S
CROP BOOK

Antirrhinum

Chrysanthemum

The hardy annual Chrysanthemums are quite distinct from the Oriental Chrysanthemums grown in greenhouses and conservatories. These showy garden annuals form compact bushes about eighteen inches high and bear an abundance of attractive flowers which are very desirable for cutting.

No. 1058. Coronarium, Double, Mixed.....Pkt., 10c; Postpaid.

Cineraria

Magnificent tender perennials, grown mainly in conservatories, window gardens or greenhouses. The flowers measure two or three inches in diameter and cover the plant with a sheet of bloom. The colors are white, blue, violet and crimson shades.

No. 19. Cineraria Hybrida, Mixed.....Pkt., 10c; Postpaid.

Cosmos

One of the notable fall flowers. The plants grow four to six feet tall and bear a multitude of beautiful, large, single flowers in pure white, pink and crimson. Hardy annuals.

No. 282. Mixed Cosmos.....Pkt., 10c; Postpaid.
 No. 1032. White.....Pkt., 10c; Postpaid.
 No. 1033. Pink.....Pkt., 10c; Postpaid.
 No. 1034. Red.....Pkt., 10c; Postpaid.

Cosmos

Carnation

(Dianthus)

These splendid half-hardy perennials are used for greenhouse florists' trade in winter and for garden decoration and cut flowers in summer. They are general favorites on account of their delicate fragrance and richness of color. The Marguerites are most popular for outdoor culture. From plants started early under glass or in the house blooms may be had the first summer or fall.

No. 16. Mixed Double Carnations.....Pkt., 10c
 No. 402. Marguerite, White. Strong growers; free flowering; especially desirable for garden culture.....Pkt., 10c; Postpaid.

No. 284. Marguerite, Mixed.....Pkt., 10c; Postpaid.
 No. 161. Grenada. A beautiful, early, dwarf variety. Sweet scented, double scarlet flowers.....Pkt., 10c; Postpaid.

Centaurea

(Corn Flower. Bachelor's Button. Sweet Sultan)

Among the most attractive and graceful of the old-fashioned flowers. They are hardy annuals of simple culture. There are several varieties, all growing one to two feet high, and are excellent for beds, borders, and for cut flowers.

No. 923. Dwarf Victoria. A dwarf, double, Bachelor's Button. The plants are only about nine inches high, bear a profusion of large, blue, double flowers, and are excellent for pots and edgings.....Pkt., 10c; Postpaid.

No. 1085. Blue Emperor. Tall, single Bachelor's Button or Cornflower, growing two feet high.....Pkt., 10c; Postpaid.

No. 225. Cornflower. The old-fashioned Bachelor's Button, Cornflower, Ragged Sailor, or Bluebottle.....Pkt., 10c; Postpaid.

No. 1016. Giant Sweet Sultan (Imperialis). The finest of all Sweet Sultans for cutting, lasting a long time in water. Beautiful, artistic, sweet scented flowers borne on long, strong stems. Mixed colors.....Pkt., 10c; Postpaid.

Calliopsis

One of the showiest and most easily grown hardy annuals. The plants form perfect little bushes one to two feet high and literally massed with bloom. Excellent for massing and cut flowers. The flowers are in various shades of yellow, brown and maroon. It is best to sow the seed where the plants are to grow, thinning to a foot apart.

No. 116. Calliopsis, Mixed colors.....Pkt., 10c

Canary-Bird Vine

(Tropaeolum Canariense)

A pretty, rapid-growing, half-hardy, annual climber, attaining a height of ten to fifteen feet, and bearing little canary-yellow flowers resembling a bird with wings half expanded.

No. 148. Canary Bird Vine.....Pkt., 10c

Celosia (Cockscomb)

Odd, picturesque plants, bearing bright colored flowers of plumes resembling a cock's comb. Hardy annuals; fine for massing or border work.

No. 17. Celosia Cristata. About one foot high, bearing large, highly colored combs. Mixed colors.....Pkt., 10c; Postpaid.

No. 119. Celosia Pyramidalis Plumosa. Large flowered, feathered. Mixed colors.....Pkt., 10c; Postpaid.

Cobaea Scandens

(Cup and Saucer Vine)

A half-hardy climbing perennial, generally treated as an annual, attaining a height of twenty to thirty feet the first season. It has large leaves and large trumpet shaped flowers which are green at first, turning to bright purplish-blue.

No. 120. Cobaea Scandens.....Pkt., 10c; Postpaid.

Make Sturdier Plants
and Larger Flowers

Daisy

(*Chrysanthemum leucanthemum*)

This splendid hardy perennial is a great favorite for bedding and cut flowers. The plants grow two and one-half feet in height and bear magnificent single white flowers with yellow centers on stems eighteen inches or more in length.

No. 1004. Shasta Daisy.....Pkt., 10c; Postpaid.

Eschscholtzia

(California Poppy)

The state flower of California, and a hardy annual of striking character, both in form and color; bright, rich, orange-yellow. The plants grow about one and one-half feet in height, with attractive silvery foliage, branching freely and producing large, poppy-like flowers lavishly from spring until late fall. They are most effective when grown in beds of considerable size, over which the seed may be thinly sown broadcast and lightly raked in. It is very hardy and the seed may be sown almost any time and in any manner. From seed sown in fall or early spring blooms will be had the following summer.

No. 192. True California Poppy. Orange-yellow.....Pkt., 10c; Oz., 25c; Postpaid

No. 1089. Special Mixed Eschscholtzia. All colors.....Pkt., 10c; Oz., 50c; Postpaid.

Gaillardia

A* shown hardy annual of the easiest culture. The plants grow in compact, bushy form, about one foot high and the same in breadth, bearing freely until late in fall, large, brilliant flowers in red and yellow blended and shaded, on long slender stems. Splendid for borders and cut flowers.

No. 444. Single Annual Gaillardia, Mixed colors.....Pkt., 10c; Postpaid.

Echinocystis

(Wild Cucumber)

One of the quickest growing hardy annual vines. The foliage is dense, and it is one of the best vines for covering trellises, tree trunks, fences, or any place where a quick but not permanent growth is desired. A profusion of fragrant white flowers is followed by an abundance of ornamental prickly seed pods.

No. 995. Wild Cucumber.....Pkt., 10c; Postpaid.

Candytuft

(Iberis)

The annual Candytufts are hardy and of the easiest culture, and are great favorites for beds and borders. The improved varieties are splendid for pots and for cutting. By sowing the seed outdoors in fall, again in spring, and at intervals during the summer, the blooms may be had continuously from early spring until winter. To produce the finest spikes the plants should be transplanted.

No. 922. Empress. A grand variety, producing large spikes of bloom resembling a white Hyacinth. The spikes often measure seven inches long by two and one-quarter inches in diameter. The plant is about twelve inches high.....Pkt. 10c; Oz., 45c; Postpaid.

No. 39. White Rocket. Good spikes of pure white flowers.....Pkt., 10c; Oz., 25c; Postpaid.

Gardening means making gardens in the widest application of the word. By gardening we mean indeed ALL that goes into the embellishment of the surroundings of the home—that contributes to the use and the enjoyment of outdoors as part of the home.

Digitalis

(Foxglove)

Hardy perennials, blooming the second year from seed, and especially adapted to this locality. They grow three to five feet tall and produce freely long spikes of Gloxinia-like flowers in various colors. Splendid for permanent beds, masses and backgrounds. Thrives best in a cool, shady location.

No. 165. Mixed Foxglove.....Pkt., 10c; Postpaid.

No. 1086. White Gloxinia-Flowered Foxglove.....Pkt., 10c; Postpaid.

No. 1087. Pink Gloxinia-Flowered Foxglove.....Pkt., 10c; Postpaid.

No. 1088. Grandiflora Foxglove, Bright Yellow.....Pkt., 10c; Postpaid.

Lupins

Ornamental, free flowering, hardy annuals, growing two to three feet high, bearing richly colored pea-shaped flowers on long, graceful spikes.
 No. 46. Mixed colors.....Pkt., 10c; Postpaid.

Campanula (Canterbury Bells. Bell Flower)

Very ornamental garden plants of the easiest culture. They are hardy biennials flowering the second year from seed, 2½ feet high, producing large bell-shaped flowers of beautiful colors during early summer.

- No. 15. Single, Mixed colors.....Pkt., Postpaid 10c
- No. 157. Double, Mixed colors.....10c
- No. 1082. Single, White.....10c
- No. 1083. Single, Blue.....10c
- No. 1084. Single, Pink.....10c

Gypsophila (Baby's Breath)

Very pretty free-flowering plants. There are both annual and perennial varieties which are graceful and delicate, and of special value for mixing with other flowers in bouquets.

- No. 925. Snowflake. (Gypsophila elegans alba pura.) An improved large-flowering hardy annual variety, producing graceful sprays of pure white blossoms. Grows about two feet high.....Pkt., 10c; Postpaid.
- No. 1090. Gypsophila Elegans Rosea. Soft pink. Hardy annual; two feet high.....Pkt., 10c; Postpaid.
- No. 918. Gypsophila Paniculata. Hardy perennial. White. Two feet high.....Pkt., 10c; Postpaid.

Hollyhock

One of the most majestic of hardy plants, and unequalled for planting among shrubbery or for backgrounds for other plants. They grow six to ten feet high and bloom for a long period. The tip may be pinched off when they reach the desired height, thus inducing development of branches and forming a bush.

- No. 961. Lilly's Annual Everblooming Hollyhock. This splendid variety is a hardy annual, and if planted early will begin blooming in July or August. The diversity of forms and colors among flowers affords many delightful surprises. Some of the flowers will be densely double, others semi-double, and others single, all being of the most beautiful colors and shades.....Pkt., 10c; Postpaid.
- No. 37. Double Hollyhocks, Mixed. The best double perennial hollyhocks in mixed colors.....Pkt., 10c; Postpaid.
- No. 1091. Blood Red, Double, Perennial.....Per Pkt. 10c
- No. 1092. Pink, Double, Perennial.....10c
- No. 1093. Black, Double, Perennial.....10c
- No. 1094. White, Double, Perennial.....10c
- No. 1095. Yellow, Double, Perennial.....10c

Ipomea (Moon Flower Vine. Evening Glory)

The most rapid growing of flowering half-hardy annuals, producing a dense mass of heart-shaped leaves which form a background for a great profusion of beautiful large flowers which open at sunset and close the next morning.

- No. 959. Evening Glory. (Ipomoea Bona Nox.) Large rosy-lilac flowers which open in the evening.....Pkt., 10c; Postpaid.
- No. 1056. Moon Flower Vine. (Ipomoea Mexicana Grandiflora Alba.) Covered with large white flowers evenings and cloudy days....Pkt., 10c; Postpaid.

Lobelia

Pleasing half hardy annuals growing four to six inches high literally covered with small, bright flowers during the entire season.

- No. 195. Emperor William. A very dwarf, compact variety, covered with white, blue-margined flowers from June to November.....Pkt., 10c; Postpaid.
- No. 1096. Sapphire. A trailing variety, bearing very large deep blue flowers with a pure white eye.....Pkt., 10c; Postpaid.
- No. 196. Crystal Palace. Compact plants, dark foliage, and rich deep blue flowers.....Pkt., 10c; Postpaid.
- No. 304. Erinus Hamburgia. A trailing Lobelia, for hanging baskets or window boxes. Large dark blue flowers.....Pkt., 10c; Postpaid.

Forget-Me-Not

Marigold

(Tagetes)

Marigolds are favorite free-flowering hardy annuals of easy culture. The African varieties grow two to three feet tall, bear large yellow or orange-colored flowers, and are adapted for large beds or mixed borders. The French varieties are dwarfed in growth, with beautiful striped flowers three or four inches in diameter, and are better suited for bedding and pot culture. They succeed best in light soil with full exposure to the sun. Either variety is splendid for cut flowers.

No. 409. Tall Double African. About two feet high with flowers three or four inches in diameter in shades of yellow and orange.....

Pkt., 10c; Postpaid.

No. 410. Tall Double French. The plants grow about one and one-half feet high. The colors and markings of the large double flower, are very interesting, some being elegantly striped and spotted.....

Pkt., 10c; Postpaid.

No. 146. Dwarf Double French. One foot high, with large flowers in mixed colors.....

Pkt., 10c; Postpaid.

Myosotis

(Forget-Me-Not)

Hardy perennials and annuals, growing six to twelve inches high, bearing pretty little star-like flowers in clusters on long stems. The plant thrives best in a cool, moist location, and blooms the first year from seed if sown early.

No. 310. Lilly's Victoria Dwarf. A very beautiful hardy biennial variety; of dwarf, bushy habit, bearing large clusters of the brightest azure-blue flowers on long, graceful stems, rendering them splendid for cutting.....

Pkt., 10c; Postpaid.

No. 1054. Myosotis Palustris. The true Forget-Me-Not. A hardy perennial of strong, sturdy growth, with beautiful clear blue flowers.....Pkt., 10c; Postpaid.

Mignonette

No garden is complete without this old-favorite, sweet scented hardy annual. The plants grow a foot or more in height, bearing pyramidal-shaped flower spikes about six inches long, made up of thickly set florets which are excellent for cutting.

No. 139. Reseda Odorata. The old-fashioned Sweet ceedingly fragrant. Valuable for bedding borders, or also for pot culture. Mignonette.....Pkt., 10c; Oz., 20c; Postpaid.

Mirabilis

(Marvel of Peru. Four O'Clock)

A perennial in warm climates, but generally grown as a half-hardy annual in this locality. The plant is two feet high, erect and bushy, bearing throughout the summer hundreds of large white, yellow, crimson and striped flowers. The flowers are shaped like the Morning Glory, and open late in the afternoon.

No. 51. Mirabilis Jalapa.....Pkt., 10c; Postpaid.

Morning Glory

Well known hardy clinging annuals, growing about fifteen feet high and bearing pretty flowers in a variety of colors and tints, fully expanded only in the morning

No. 600. Imperial Japanese Giant Morning Glory. Of remarkable size. The vines present a beautiful wall of luxuriant foliage thickly covered with flowers three to four inches in diameter and in a great variety of shades and markings.....Pkt., 10c; Postpaid.

No. 41. Convolvulus Major. The old fashioned Morning Glory. Makes a growth of ten to twelve feet. Mixed colors.....Pkt., 10c; Postpaid.

Nigella (Love-in-a-Mist— Devil-in-a-Bush)

Lovely hardy annuals, growing in oval bush form about one foot in height. In the finely cut fern-like green foliage nestle numerous large double flowers of light blue and white.

No. 248. Nigella Damascena.....Pkt., 10c; Postpaid.

Shirley Poppy

A garden to fulfill all its requirements should appeal to the mind—the heart and to the imagination.

Petunia

Petunias are half-hardy annuals, and the single varieties are easy to grow, requiring only good soil and a sunny location. They commence flowering early and continue throughout the season.

No. 61. Choice Single. A choice mixture of fine single varieties and colors.....Pkt., 10c; Postpaid.

Poppy

FLANDER'S POPPY

No. 1114. This is the well known Poppy of "Flanders' Fields" so often mentioned in songs and stories of the great war. Profusely blooming medium sized flowers, bright scarlet in color. Very showy when planted in masses. A bed of these Poppies forms a glowing memorial to our heroes.

Pkt., 10c; 1/8 Oz., 25c; Oz., \$1.50.

No. 314. Shirley Poppy. A charming hardy annual with large fluted and crinkled flowers in a variety of forms and colors.....Pkt., 10c; Postpaid.

No. 58. Unbrosom Poppy. Rich vermilion flowers with a black spot on each petal. Hardy annual.....Pkt., 10c; Postpaid.

No. 341. Iceland Poppy. This is a hardy perennial, but will bloom the first year from seed. It bears a profusion of graceful, delicate, single flowers with petals like tissue paper. Mixed colors.....Pkt., 10c; Postpaid.

No. 1030. Oriental Poppy, Mixed Hybrids. Hardy perennials, producing immense flowers in gorgeous colors.....Pkt., 10c; Postpaid.

No. 351. Mixed Poppies. A choice mixture of hardy annual varieties.....Pkt., 10c; Postpaid.

JILLY'S Nasturtiums

Finest Giant Flowering Varieties

Nasturtiums are among the most satisfactory and easily grown annuals, and there is nothing more pleasing than the harmonious blending of the various shades of green, yellow, brown and red in a bed or border of the dwarfs or a trellis or wall covered with the climbers.

JILLY'S Dwarf Mixed

The choicest standard dwarf varieties and colors mixed. Splendid for beds and borders.

No. 87.....Pkt., 10c; Oz., 20c; ¼ lb., 50c; lb., \$1.50

JILLY'S Tall Mixed

A splendid mixture of the best tall varieties, including all harmonizing colors.

No. 262.....Pkt., 10c; Oz., 20c; ¼ lb., 50c; lb., \$1.50

Tall, or Climbing

The tall, climbing, or trailing Nasturtiums, grow six to ten feet high, bloom profusely during the entire summer and fall, and are splendid for covering trellises, fences, rockeries, etc.

No. 1059. Chameleon. Quite unique, each plant bearing flowers of a great variety of colors and markings.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1061. Vesuvius. Salmon-rose; dark foliage; an excellent variety.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1062. Tall Ivy Leaved Nasturtium, Mixed. The leaves resemble English Ivy. The flowers are of a distinct form and in a great variety of colors.....

Pkt., 10c; Oz., 30c; Postpaid.

No. 1060. King Theodore. Very deep crimson, nearly black; dark foliage.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 906. Pearl. Cream white, or primrose.....

Pkt., 10c; Oz., 25c; Postpaid.

Lobb's Tall

Lobb's Nasturtiums are remarkable for the intensely brilliant colors of the flowers, which are slightly smaller than those of other climbing varieties.

No. 1064. Black Prince. Velvety black flowers; dark foliage.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1098. Queen Alexandria. Variegated leaves; flowers blood red, marbled and mottled.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1099. Cardinal. Scarlet flowers; dark foliage.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1100. Emma Alida. Dark ivy-leaved foliage, with golden-yellow, orange and deep scarlet lacinated flowers.....

Pkt., 10c; Oz., 30c; Postpaid.

No. 1101. Flamingo. A beautiful new variety with magnificent lacinated orange flowers.....

Pkt., 10c; Oz., 30c; Postpaid.

Dwarf, or Bedding

These dwarf or Tom Thumb varieties form sturdy little bushes completely covered with large, brilliant flowers during the entire season, making a beautiful display in beds or borders.

No. 1068. King Theodore. Velvety red flowers; dark foliage.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1070. Prince Henry. Light yellow marbled with scarlet.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 929. Queen of Tom Thumb. Rich, bright crimson flowers forming a pretty contrast to the silver variegated foliage. Splendid for bedding or pots.....

Pkt., 10c; Oz., 30c; Postpaid.

No. 907. Dwarf Vesuvius. Deep salmon-rose; a beautiful shade.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1112. Lady Bird. Orange, striped with bright scarlet.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 264. Empress of India. Fiery crimson flowers; compact plant with very dark foliage.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 911. Dwarf Chameleon. All colors borne on each plant.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1071. Dwarf Ivy Leaved Nasturtium, Mixed. Deep green leaves of distinctive ivy form; flowers beautifully fringed.....

Pkt., 10c; Oz., 30c; Postpaid.

No. 1067. Golden King. Rich golden-yellow.....

Pkt., 10c; Oz., 25c; Postpaid.

No. 1069. Crystal Palace Gem. Sulphur-yellow spotted with crimson.....

Pkt., 10c; Oz., 25c; Postpaid.

Choicest Varieties

Magnificent and Continuous Blooms

No home in the Pacific Northwest is complete without a bed of Pansies, for our cool, moist climate is ideal for these beautiful flowers, and in no other locality do they produce such splendid blooms and so continuously from early spring until winter. The Pansy is a hardy perennial, thriving best in a cool, moist location. The largest blooms are produced during the cool months in spring and fall; during the warm summer months the blooms will be small. Abundant irrigation will produce larger flowers during the summer, but care must be taken that the water is warm, for the plants cannot stand the shock of cold water. For early spring bloom the seed may be sown outdoors about the first of September. Spring sown seed will produce blooms the following fall. The plants will produce better blooms if transplanted two or three times.

Portulaca

(Sun Plant)

A brilliant hardy annual, growing about six inches high, and thriving in warm, dry, sunny situations. Excellent for low beds, borders, and for sowing on exposed banks where other flowers would not thrive.

- | | |
|-----------------------------------|--------------------------------|
| No. 69. Single, Mixed colors..... | Pkt., 10c; Oz., 60c; Postpaid. |
| No. 70. Double, Mixed..... | Pkt., 10c; Postpaid. |

Primrose

(Primula)

Primroses are among the most charming of perennials for winter and spring decoration in the house and conservatory.

No. 75. Primula Veris. A beautiful hardy perennial, growing six inches high, and bearing clusters of fragrant flowers in various colors.....

- | |
|----------------------|
| Pkt., 10c; Postpaid. |
|----------------------|

Salpiglossis

(Painted Tongue)

A great favorite among the half-hardy annuals because of its easy culture and beautiful petunia-shaped flowers, which are produced from early summer until late fall. Three feet high.

- | | |
|----------------------------|----------------------|
| No. 406. Mixed colors..... | Pkt., 10c; Postpaid. |
|----------------------------|----------------------|

Pinks

(May Pinks, Dianthus)

The old-fashioned single flowered garden or border pink. They are hardy annuals, and will flower the first season from seed sown outdoors early in spring. Height, one foot.

- | | |
|-------------------------|----------------------|
| No. 288. May Pinks..... | Pkt., 10c; Postpaid. |
|-------------------------|----------------------|

Pyrethrum

(Golden Feather)

One of the best plants for edging, grown for its beautiful yellow foliage. It is a hardy perennial, but is generally grown as an annual. Six inches high.

- | | |
|--|----------------------|
| No. 76. Pyrethrum Parthenifolium Aureum..... | Pkt., 10c; Postpaid. |
|--|----------------------|

Ricinus

(Castor Oil Bean)

Ornamental half-hardy annual foliage plants of luxuriant and rapid growth, attaining a height of six to twelve feet, with brilliantly colored fruit, producing a tropical effect. Fine for massing or for center for beds.

- | | |
|-------------------------------|----------------------|
| No. 140. Castor Oil Bean..... | Pkt., 10c; Postpaid. |
|-------------------------------|----------------------|

Phlox

Phloxes produce immense trusses of brilliant flowers of a great variety of colors and shades throughout the summer. They are easy to grow, and thrive in most any kind of soil if given a sunny position. The seed may be sown outdoors early in spring, and in a few weeks the plants will be covered with blooms.

No. 919. Lilly's Large Flowering Phlox. (Phlox Drummondii Grandiflora.) This is the finest type, having the largest heads of bloom and the largest individual flowers. This mixture contains **Valley the most beautiful colors** and shades. Fifteen inches high.....Pkt., 10c; Postpaid.

No. 67. Phlox Drummondii, Mixed. Flowers not so large as those of the grandiflora type, but just as bright and free blooming. Fifteen inches high.....Pkt., 10c; Postpaid.

Stocks

For brilliancy, diversity of colors, fragrance and profusion and duration of bloom they are unsurpassed. The Ten Weeks Stocks are annuals, and from seed started indoors in March or April blooms will be had in July.

No. 84. Large Flowering Dwarf Ten Weeks Stocks, Mixed Colors. Half-hardy annual, one foot high.....Pkt., 10c; Postpaid.

No. 1107. Large Flowering Dwarf Ten Weeks Stocks, White.....Pkt., 10c; Postpaid.

No. 1108. Large Flowering Dwarf Ten Weeks Stocks, Flesh-pink.....Pkt., 10c; Postpaid.

No. 1109. Large Flowering Dwarf Ten Weeks Stocks, Crimson.....Pkt., 10c; Postpaid.

No. 1110. Large Flowering Dwarf Ten Weeks Stocks, Light Blue.....Pkt., 10c; Postpaid.

No. 1111. LILLY'S SPECIAL MIXTURE ANNUAL STOCKS. Choicest varieties and colors of annual Stocks.....Pkt., 10c; Postpaid.

Sunflower

(Helianthus)

These hardy annuals are splendid for backgrounds, or even for bedding, and must not be confused with the common Sunflower. This is a very double variety, growing about four feet high.

No. 128. Dwarf Double Sunflower....Pkt., 10c; Postpaid.

Zinnia

Salvia

(Flowering Sage)

Half-hardy perennials, blooming the first year from seed if sown early. The plant grows three feet high and bears profusely during the summer and fall very fragrant flowers in drooping spikes of the most intense glistening scarlet. Splendid in working out color schemes if properly used.

No. 920. Salvia Splendens.....Pkt., 10c; Postpaid.

Sweet William

(Dianthus barbatus)

As a border plant it has few equals, being very showy. An old-fashioned plant producing clusters of gorgeously colored flowers of great fragrance. It is a hardy perennial, but blooms the first year from seed. It grows about eighteen inches high, and is excellent for beds and borders. Our mixture contains quite an assortment of colors.

No. 26. Purple, Mixed.....Pkt., 10c; Postpaid.

No. 27. Double, Mixed.....Pkt., 10c; Postpaid.

Violets

These little favorites are deliciously fragrant and are fine for borders and for cutting. They are perennials, quite hardy, but the plants are somewhat difficult to grow from seed.

No. 319. Large Single Violet.....Pkt., 10c; Postpaid.

No. 1106. Viola Cornuta; Tufted Pansy Violets; Mixed colors.....Pkt., 10c; Postpaid.

Verbena

One of the dear old flowers that will always be popular both in the garden and house. Verbenas are low-growing, creeping, half-hardy perennials, blooming the first year from seed, and generally treated as annuals. They are splendid for beds, borders, rockeries, hanging baskets and window boxes. Fewer plants are better liked and give greater satisfaction.

No. 88. Giant Hybrid, Mixed. A splendid mixture of large flowering varieties; all colors.....Pkt., 10c; Postpaid.

Wallflower

An old European favorite deserving of more appreciation than is shown it in America. It is especially adapted to the Pacific Coast where it is entirely hardy, although it must be protected during the winter in colder climates. It is a perennial, grows about eighteen inches high, is bushy, and very early in spring bears spikes of deliciously fragrant flowers in bright colors.

No. 98. Double.....Pkt., 10c; Postpaid.

No. 99. Single.....Pkt., 10c; Postpaid.

Zinnia

Flowers throughout the entire summer and early fall. This half-hardy annual has been greatly improved and produces a profusion of large double flowers, excellent for bedding and for bouquets. The plants form handsome compact bushes two feet high covered with large flowers of a great variety of colors and shades. They commence blooming early in summer and continue until killed by frost. The Zinnia is a very free grower and of robust habit. Does well under almost any conditions.

No. 933. Giant Mixed. A choice mixture, including the best and largest types, producing plants of handsome, compact form, and immense perfectly formed, double flowers in brilliant mixed colors.....Pkt., 10c; Postpaid.

No. 100. Mixed. A splendid mixture of good varieties and colors.....Pkt., 10c; Postpaid.

Wild Flower Garden

There are few things more pleasing than a wild-flower garden hidden away in some secluded spot or among shrubbery. This mixture is ideal for the purpose, being composed of such hardy annuals as will require little care beyond scattering the seed, and will produce a great profusion and variety of pretty flowers.

No. 438. Wild Flower Garden.....Pkt., 10c; Oz., 25c; lb., \$2.00; Postpaid.

Flowering Plants

In season we carry a large and varied stock at our Seattle, Portland and Yakima Stores of PANSIES, ASTERS, LOBELIA, CANDYTUFT, ANTIRRHINUM, STOCKS, etc., all strong plants. Those interested in choice DAHLIAS please ask for special catalog.

Tested Field Seeds—They Grow

LAND without population is a wilderness, and population without land is a mob. The United States has many social, political, and economic questions, some old, some new, to settle in the near future; but none so fundamental as the true relation of the land to the national life. A prosperous agricultural interest is to a nation what good digestion is to a man. The farm is the basis of all industry. The soil is the only resource that renews itself continually after having produced value. It is strange that almost all countries, including our own, should, until taught by approaching misfortune, fail to realize the primary and indispensable place of agriculture in sound national development... It is but recently that there has been revived somewhat in this country a sense of the dependence of all progress, of national prosperity, and individual existence upon the land and its proper care.—James J. Hill.

ALFALFA ADDS
NITROGEN TO THE SOIL

Alfalfa (Medicago sativa) The Greatest Forage Plant

ALFALFA WILL GROW
TWO CROPS A YEAR

Lilly's Best

These two words carry a significance which is now recognized in the West as the highest quality obtainable in seeds. Whenever you buy seeds of the "L. B." brand you know you are getting the best.

Recleaned and Tested, free from Dodder and other noxious weed seeds.

99½ Per Cent Pure

Lilly's Best Alfalfa Seed is the acme of perfection. It never tests less than 99½% pure, is free from dodder and other noxious weed seeds, and consists only of big, plump seeds; all small and shrunken seeds having been removed. To maintain this high standard requires that the greatest care be exercised in growing and harvesting the seed. It is never grown in localities infested with dodder. We have the most perfect seed cleaning machinery in the West, and the seed is cleaned until it is practically perfect.

The Pure Seed Law requires 96% purity, but that is too liberal, for it is unsafe to sow the 4% of weed seed which the law allows. When purchasing seed, the price should be only a secondary consideration. At the most, only a few cents per acre could be saved, and seed containing weed seeds is expensive at any price. None but the very best tested seed should be sown.

Alfalfa seed is generally sown at the rate of eight to twelve pounds per acre.

Price subject to change; see supplement following page 48.

Use "FARMOGERM" for Alfalfa—it insures success. See page 63

Turkestan, or Dry Land

(Medicago Turkestanica)

This variety comes from central Asia and has been grown successfully for many years in the West; is very hardy, and adapted to very dry and unirrigated land. In all other respects it is almost identical with Medicago Sativa. The seed should be sown rather thickly, fifteen to twenty pounds per acre.

Price subject to change; see supplement following page 48.

Grimm

(Medicago media)

Undoubtedly this variety has in recent years attracted the attention of Alfalfa growers more than any other variety. The origin of this type is the result of cross hybridizing of the blue flowered species with the yellow flowered. Grimm belongs to the "variegated" class and has a more branching root system which may possibly account for it being harder than the "blue flowered" (Medicago sativa) varieties.

Extract from United States Government Bulletin No. 209:

"The Grimm alfalfa is much harder than the ordinary kinds obtained from Kansas, Utah and elsewhere, and there is even strong reason to believe that it is the hardiest known form of the cultivated plant. It not only endures extremely low temperatures with or without snow and other adverse conditions, but it can be cut with greater safety late in the fall and will bear more abuse in the way of pasturage than any other plant. There is some disagreement among investigators as to how Grimm alfalfa obtained its hardiness, but there is no difference of opinion that it is hardy."

Price subject to change; see supplement following page 48.

Read This

Last Spring we bought 200 pounds of your best Alfalfa Seed from your Wapato House and secured the best stand of any under the project. We sowed 15 pounds per acre and found that its high germinating power really made this too much.

WILLOUGHBY RANCH COMPANY,

Richland, Washington.

August, 19, 1920.

A fine crop of Alfalfa from Lilly's Seeds

Clover

LILLY'S Red (Trifolium pratense) — 99 Per Cent Pure

Red Clover is an important crop in all parts of the country, and is especially valuable west of the Cascade Mountains, where Alfalfa cannot be grown very successfully. In addition to being a very valuable hay, silage, and forage crop, it is of great value for fertilizing and improving the soil, either when plowed under or removed from the field. It is a legume, and draws nitrogen from the air and distributes it in the soil. Red Clover seed is generally sown at the rate of eight to twelve pounds per acre. Lilly's Best Red Clover Seed is guaranteed to test not less than 99% pure, and we make it as much better as possible, usually as high as 99½% pure. This state of purity is seldom equalled, and would be impossible without our splendid seed cleaning machinery. The Pure Seed Law requires only 92% purity, and that is considered very good seed, but it allows more than a pound of weed seeds to each acre, and such seed should never be sown when better seed can be procured. For prices see supplement following page 48.

**OUR
CLOVER SEEDS
GROW**

Mammoth Red (Trifolium medium)

This is a very valuable crop for Western Washington where the ground is gravelly, high, or very light soil, as it makes a satisfactory growth and good crop where medium Clover will not produce a paying crop. It should, however, be avoided on heavy soils as it makes too rank a growth and if the soil is heavy it makes coarse hay. Sow at the rate of eight to twelve pounds per acre. Mammoth Clover has the added advantage of being ready to cut for hay at a time of year when Western Washington is sure of good haying weather. For prices see supplement following page 48.

LILLY'S Alsike (Trifolium hybridum) — 99 Per Cent Pure Suitable for Cold, Wet Land

Alsike Clover thrives on almost any kind of soil, but is especially useful on land that is too wet and cold for Red Clover. It makes a good quality of hay, and may be sown with timothy, as it matures at the same time. It is also good in pasture mixtures for wet land.

We have a second grade, better than is required by the Pure Seed Law, but the difference in price does not warrant the use of any but Lilly's Best. Six to eight pounds of seed is sufficient for an acre.

For prices see supplement following page 48.

LILLY'S White (Trifolium repens) — 98 Per Cent Pure Only the Very Best is Fit for Lawns

For lawns, especially, none but the very best White Clover seed obtainable should be sown, as ordinary seed is very liable to contain sorrel. Lilly's Best White Clover is grown on land free from noxious weeds, is thoroughly re-cleaned, and is as near perfect as it can be produced. It is guaranteed to test not less than 97% pure, and is usually better. This is a very high degree of purity, as White Clover seed is difficult to clean. Any seed that tests less than 97% pure is branded Choice. Our Choice grade is always better than is required by the Pure Seed Law, but we do not recommend it for lawns. For lawns sow twenty-five pounds or more per acre; for pasture, six to eight pounds mixed with grass seeds.

For prices see supplement following page 48.

Crimson Clover (Trifolium incarnatum)

Crimson Clover is an annual useful principally as a cover crop or to plow under for green manure. It is grown quite extensively in the South, but it is not specially recommended for the Northwest. Ten to fifteen pounds of seed is sown to the acre. For prices see supplement following page 48.

Sweet Clover

White Blossom (*Melilotus alba*). Bokhara, or White Sweet Clover, was formerly grown almost exclusively for bee pasture, but recently it has become quite popular for hay and pasture. It has a bitter taste, and stock must develop a taste for it, but they soon learn to like it. It is a biennial, and unless it reseeds itself, must be seeded every second year. It makes a wonderful growth the second season, and the plants resemble Alfalfa in appearance. It is a legume, and has great fertilizing value. Seed is sown at the rate of twenty pounds per acre. The soil should be very firm.

For prices see supplement following page 48.

An ANNUAL White Blossom variety was discovered at the Iowa Experiment Station recently which is stated to yield remarkably heavy in a very short period from sowing. It is, however, not yet available in commercial quantities.

Yellow Blossom (*Melilotus indica*). Yellow Blossom Sweet Clover is an annual. The plants are low-growing, erect, and early flowering. For prices see supplement following page 48.

Timothy

(*Phleum pratense*)

Conceded to be one of the most valuable grasses of great nutritive value and very productive. The seeds being very small and produced in great abundance, its cost is the most economical of any grass.

99½ Per Cent Pure

www.fibtool.com.cn

Lilly's Best is the Purest Seed Obtainable

Timothy Seed is one of our specialties, and it will be very nearly impossible to produce better seed than Lilly's Best. The seed is grown in Idaho on land that is free from weeds, and, with our splendid seed cleaning equipment, all small and light seed, as well as all foreign matter is removed. None testing less than 99½% pure is branded Lilly's Best. The Pure Seed Law requires only 96% purity.

Timothy is the standard grass for hay in all parts of the country, and although there may be other grasses equally as good or better for home use, it is demanded by the markets, and brings the highest price. The seed is sown at the rate of ten to fifteen pounds per acre. We have a second grade, Choice Timothy, but especially recommend Lilly's Best.

Price subject to change; see supplement following page 48.

Lilly's Kentucky Blue Grass

(*Poa pratensis*)

Kentucky Blue Grass is a true perennial, lasting indefinitely. Its densely creeping root stocks, spreading habit, even growth, fine texture and rich green color renders it one of the finest grasses for lawns and pastures. It starts very early in spring, and on the Pacific Coast remains green practically all the year.

Our seed is imported direct from the most reliable growers in Kentucky. It is free from Canadian Blue Grass and other foreign seeds, is carefully re-cleaned, and is the best seed obtainable. Sow at the rate of fifteen to twenty pounds per acre. For lawns sow one pound to each four hundred square feet. For pasture it is mixed with other grasses.

Price subject to change; see supplement following page 48.

Lilly's Red Top

(*Agrostis vulgaris*)

Red Top, or Herd's Grass, is valuable in wet places where other grasses will not thrive. When mixed with other grasses and clover it makes excellent pasture and a fair grade of hay. We have two grades of Red Top, but recommend the Fancy Red Top, as it is solid seed and on ten to twelve pounds is required to sow an acre. The Choice Red Top is good seed, but it contains the hulls, and nearly twice as much seed is required.

Fancy Red Top, Choice Red Top: Price subject to change; see supplement following page 48

Canadian Blue Grass

(*Poa compressa*)

Canadian Blue Grass, although not so popular as Kentucky Blue Grass for lawns, is more hardy, easier to get started, makes a very tough turf and is of fine texture. It is also a splendid grass in pasture mixtures. Sow one pound to four hundred square feet of lawn, or fifteen to twenty pounds per acre for pasture if used alone.

Price subject to change. See supplement following page 48.

Brome Grass

(*Bromus inermis*)

Brome Grass is valuable in the semi-arid regions where less hardy grasses cannot be grown. It has creeping root-stalks which form a thick turf, and will stand a great deal of drought. It is not especially high in food value, and there are other grasses more valuable for the country west of the Cascade Mountains. It is most valuable as a pasture grass, but grows tall enough for hay. When used alone, sow fifteen to twenty pounds per acre.

Price subject to change. See supplement following page 48.

Creeping Bent, or Fiorin

(*Agrostis stolonifera*)

A splendid grass in lawn or pasture mixtures. Its creeping, rooting stems form a tough, compact turf that is improved by tramping.

Price subject to change. See supplement following page 48.

Lilly's Timothy

Lilly's Red Top

Lilly's Canadian Blue Grass

Unless otherwise specified, prices quoted are f.o.b. Seattle or Portland

Prices subject to change. Unless otherwise quoted are f.o.b. Seattle or Portland

Orchard Grass

JILLY'S English Rye Grass

(*Lolium perenne*)

One of the Most Valuable Hay and Pasture Grasses for the Northwest

English, or Perennial, Rye Grass is especially adapted to the country west of the Cascade Mountains, where it is quite popular, but should be even more generally grown, for it is one of the most valuable grasses. It has a high feeding value, is relished by all stock, and is good in both hay and pasture mixture. It does well on almost any soil, although it prefers rich loam or clay. It makes a quick, strong growth, and when sown thickly is excellent in mixtures for lawns or golf links. When used alone for pasture or hay, the seed is sown at the rate of twenty-five to forty pounds per acre, or in the same proportion when mixed with other seeds.

Price subject to change. See supplement following page 48.

Italian Ryegrass

(*Lolium italicum*)

Italian Rye Grass is supposed to be a biennial, but on the Pacific Coast it lasts almost indefinitely, and is one of our most valuable pasture grasses, as it produces green feed late in the season after other grasses are past their prime. It makes a rapid growth, and will furnish more green pasture in midsummer than any other grass. On moist, rich soil and under irrigation the rapidity of growth and productivity of Italian Rye grass are really wonderful. Sow at the rate of twenty-five to forty pounds per acre when used alone.

Price subject to change. See supplement following page 48.

Orchard Grass

(*Dactylis glomerata*)

Orchard Grass, or Cocksfoot, is one of our most useful grasses. Though it looks coarse, it is one of the earliest, most productive, nutritious and valuable of the cultivated grasses. It comes very early in spring, furnishing pasture earlier than other grasses. It makes good hay if cut as soon as in bloom; later it becomes hard and woody. It is especially valuable, mixed with other grasses and clovers, for pastures and for sowing on logged-off land. It is very hardy, and thrives in shady places where other grasses will not grow, but is not suitable for lawns. It thrives in a great variety of soils and as its roots penetrate to a considerable depth, it withstands drought better than most other grasses on light, dry soils. Being a bunch grass, it is best mixed with other grasses. When used alone, sow twenty-five to forty pounds per acre.

Price subject to change. See supplement following page 48.

Crested Dog's Tail

(*Cynosurus cristatus*)

A perennial grass forming a smooth and lasting turf, excellent in mixtures for lawns, putting greens, and pastures. It thrives best on rich, moist land, but can accommodate itself to almost any soil, and, as the roots penetrate deeply into the ground, it can stand severe drought. Height one to two feet. Sow twenty to thirty pounds per acre when sown alone, or in that proportion when mixed with other seeds.

Price subject to change. See supplement following page 48.

Tall Oat Grass

(*Avena elatior*)

Valuable for pasture on account of its early and luxuriant growth. It also produces a large quantity and good quality of hay. It is deep rooting, hardy, withstands drought, and is grown successfully in Eastern Washington and California. It is best mixed with other grasses, and should not exceed one-fifth of the total amount of seed sown.

Price subject to change. See supplement following page 48.

Ask for Special Prices on Large Quantities

Velvet Grass or Mesquite

(*Holcus lanatus*)

Velvet Grass, also known as Mesquite, Meadow Soft Grass and Yorkshire Fog, is of little value except for pastures on light sandy, or marshy soils where other grasses will not grow. It has little food value, is not relished by stock, and on account of its spreading habit is rather difficult to eradicate.

Price subject to change. See supplement following page 48.

THE INESTIMABLE VALUE of Grasses for pasturage and hay crops is so generally known that anything we might add would hardly emphasize their great utility for feeding purposes. It is, however, of the utmost importance that Grass Seeds of the finest possible quality only be used. They cost practically the same as seeds of doubtful germination and uncleaned samples, while the results are vastly different.

Prices on this List are for mail orders or f. o. b. our Seattle Plant. Extra charge made for city deliveries.

While we (The Chas. H. Lilly Co.) exercise care to have all seeds pure and true to name, we do not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, we are to be at once advised, and money paid for same will be promptly refunded.

THE CHAS. H. LILLY CO. .. SEATTLE

Prices do not include transportation charges. If goods are to be shipped to a station at which there is no agent, or by parcel post, remittance must include a sufficient amount to prepay charges.

Meadow Fescue

(*Festuca pratensis*)

Also known as English Blue Grass. One of the best of permanent meadow and pasture grasses. It is very hardy, and succeeds in almost all soils, but does best on moist, rich land. It comes very early in spring and again in fall, and should form a part of all pasture and hay mixtures.

Price; subject to change; see supplement following page 48.

Sheep's Fescue

(*Festuca ovina*)

Of dwarf, thick growth, yielding a large amount of nutritious herbage, and is valuable in pasture mixtures. It prefers dry uplands and thrives in poor, shallow, gravelly soils.

Prices; subject to change; see supplement following page 48.

Hard Fescue

(*Festuca duriuscula*)

More dwarf than Sheep's Fescue, but useful in pasture mixtures for dry uplands and poor soils.

Price; subject to change; see supplement following page 48.

Red, or Creeping Fescue

(*Festuca rubra*)

A creeping rooted species, forming a close and lasting turf, resisting drought and thriving on inferior soils, gravelly banks and exposed hillsides.

Price; see supplement following page 48.

Sudan Grass

(*Andropogon Sorghum*)

A great drought resisting hay and forage crop, especially suitable for hot, dry sections, but it is not recommended and is not adapted to sections west of the Cascade Mountains. In appearance it resembles Johnson Grass but does not have the aggressive root-stalks, stools more freely, has more and broader leaves, is an annual, and will not become a weed. As it is an annual, it must be seeded each year, like Sorghum or Millet.

The seed should not be sown until the ground becomes thoroughly warmed in spring. It may be broadcasted or drilled at the rate of sixteen to twenty-four pounds per acre, in which case it grows three to five feet high; or it may be sown in rows and cultivated, at the rate of four to six pounds per acre, and sometimes grows six to nine feet high.

The following are good reasons why you should grow Sudan Grass:

1. It lacks entirely the underground root stocks which make some other grasses a pest.

2. Two or even three cuttings can be obtained from it under favorable conditions.

Price; subject to change; see supplement following page 48.

Fine Leaved Fescue

(*Festuca ovina tenuifolia*)

Similar to Sheep's Fescue, but with finer leaves. It has the same dwarf growth and drought resisting qualities, and is suitable in pasture mixtures for dry and inferior soils; also for dry slopes on lawns.

Price; see supplement following page 48.

JILLY'S Pasture and Hay Mixtures

The Most Suitable Combinations in Correct Proportions for Best Results

These Pasture Mixtures contain the correct early, medium and late grasses to supply pasture continuously during a long season; also bunch, deep rooting, and creeping grasses to form a tough and lasting turf. The Hay Mixture is composed of tall-growing grasses which will mature about the same time, and will produce the maximum amount of hay of the best quality.

No. 1 Pasture Mixture

Especially prepared for wet bottom-lands. It contains Meadow Fescue, Red Top, Alsike, English Rye Grass, Kentucky Blue Grass, Canadian Blue Grass, Red Clover, Italian Rye Grass, and Orchard Grass.

No. 2 Pasture Mixture

For dry up-lands, and especially useful for sowing on logged off land. It is composed of White Clover, English Rye Grass, Italian Rye Grass, Canadian Blue Grass, Meadow Fescue, and Kentucky Blue Grass.

Hay Mixture

A splendid mixture, producing hay of fine quality and maturing evenly. Composed of Timothy, English Rye Grass, Red Clover, Meadow Fescue, and Canadian Blue Grass.

Prices; subject to change; see supplement following page 48

Seed Wheat

www.libtool.com.cn

LILLY'S Sun

A New Winter Wheat Especially Adapted to the Northwest

After many years experimenting our tests have proven that Sun Wheat excels all others in yield and quality, for the country west of the Cascade Mountains. Sun Wheat is a remarkable new winter wheat imported from southern Sweden and is the heaviest yielder of them all. It ripens earlier than most other varieties. The grain is plump, of a reddish color, and the weight per measured bushel is above the average. It does well on rather light soil, and is resistant to rust and smut. The heads are compact, firm and uniform; very similar to Club wheat but much longer. Its stooing habit is especially good. The straw is of medium height, erect and very stiff. In a comparative test in adjoining fields and under identical conditions, Sun Wheat yielded 55 bushels and Club wheat 40 bushels per acre. The seed is grown for us on contract, from specially selected seed and is under the direct supervision of our grain expert from the time the land is plowed until the seed is threshed and cleaned.

Price; subject to change; see supplement following page 48.

LILLY'S Pedigreed Bluestem

Specially Selected Seed

Conceded to be one of the most valuable Spring varieties for the Northwest, Bluestem has long been the standard and is still unexcelled. East of the mountains it is very extensively grown. The Bluestem of the Pacific Coast has a white grain and smooth chaff quite unlike the velvet chaff and red grains of the States East of the Rockies. Although a Spring variety it can be sown as a Fall wheat in sections where winters are mild. Its popularity is due to its drought resistance, heavy yielding capacity, non-shattering character and high milling value. Our seed is of the finest quality, carefully selected and thoroughly re-cleaned.

Price; subject to change; see supplement following page 48.

LILLY'S Marquis

The "Thousand Dollar Prize" Wheat

Unquestionably one of the best all round Spring wheats grown, yielding as high as 50 bushels to the acre. Extremely early and productive as well as hardy. Grows stiff, strong straw of medium height and matures its plump, round, dark red kernels two weeks earlier than the Blue Stem. Easy to handle at harvest because free from beards. Unexcelled in both milling and baking qualities. Sow in early Spring.

M. E. McCollam, Agronomist, Washington Agricultural Experiment Station, says of it:

"Some desirable characteristics of Marquis Wheat as grown under Western Washington conditions are early maturity, high bushel weight, non-lodging and non-shattering qualities. Marquis Wheat should be cut when it is not too green. The milling quality of this wheat is distinctly better than the soft Red Winter types. As grown in Western Washington most Marquis will probably class as Red Spring under Federal grain standards."

Price; subject to change; see supplement following page 48.

Red Russian

A great favorite in Eastern Washington being grown very extensively in the Palouse country where it seems particularly suited to. It is a late maturing wheat with very vigorous growth and its abnormal yields of grain have undoubtedly attributed to its popularity. It grows a luxuriant plant very close in habit which makes it doubly valuable for choking out weeds. The stock we offer has been thoroughly re-cleaned—is true to type and we confidently recommend it.

Price; subject to change; see supplement following page 48.

OBSERVATIONS BY PROF. E. P. GAINES, CEREALIST, WASHINGTON AGRICULTURAL EXPERIMENT STATION

Wheat is the standard grain crop of the Northwest. It is grown under wide variation of temperature, elevation and rainfall. Fall wheat should be drilled in at the rate of from three to six pecks (45 to 90 lbs.) per acre on a rather loose cloddy seed bed. Spring wheat does better drilled in early on a seed bed that is rather firm below the first two or three inches. Harrowing wheat is of doubtful value unless the ground is badly crusted or foul with mustard or other weeds.

The country seems to be in a transition stage just now as is shown by sudden popularity of several new strains. As a rule, winter wheat yields more than spring wheat. For silage or hay wheat should be cut in the dough stage, out for grain it should be well matured.

Seed Barley

www.libtool.com.cn

LILLY'S White Hulless—Beardless

Threshes Out Like Wheat, Making It a Valuable Stock and Poultry Food

Barley is one of the very best stock foods, either as grain or hay. It is also splendid as a nurse crop for grasses and clover and as a support for vetch and peas. It is a shallow feeder, and requires a mellow, rich soil with fertility near the surface. It is not a crop for poor, sandy, or worn out land, neither does it do well on newly cleared land, but no other crop responds more readily to good soil and thorough cultivation, and the careful farmer who gives a little extra attention to thorough preparation of the soil will be amply repaid for his trouble. The only objections to barley have been the long, stiff beards which are objectionable in grain hay, and the hulls, which make the grain less valuable for feeding purposes. These objections are entirely overcome in White Hulless Barley, for it is entirely beardless, as shown in accompanying half-tone, and when threshed hulless, like wheat, to which the large, plump, hard grain is very similar. The hay is superior to any of the other grain hays, and the grain, especially when rolled or ground, is unexcelled as a grain food for horses, hogs, cattle, or poultry.

White Hulless Barley is more productive than wheat, and matures about two weeks earlier. It may be sown as late as July, provided sufficient moisture may be depended upon, making it a valuable catch crop. West of the Cascade Mountains it is sometimes sown in fall. It is sown the same as wheat, at the rate of about one hundred pounds per acre. Culture the same as Common Barley.

Price; subject to change; see supplement following page 48.

Vermont Beardless—Entirely Beardless

This is a highly improved strain of Beardless Barley, entirely free from bearded heads, making it very much superior to the bearded varieties for hay. It is also preferable for grain, as it is as easy to handle and thrash as oats. Vermont Beardless Barley is very early, and as it is hardy, may be sown early in spring, or it may be sown as late as the first of July. The straw is good, stands up well, and is a splendid variety to sow with vetch or peas. It is very productive. Price; subject to change; see supplement following page 48.

Wisconsin Pedigreed

The world's greatest prize winner; yields nearly twice as much to the acre as common barley and has made millions of dollars for the farmers of America's barley growing districts. This barley was introduced by the Wisconsin Agricultural Experiment Station, the originators of the well known Oderbrucker Barley, to which they claim that this is much superior. It has very nearly replaced all other varieties of bearded barley. The heads are exceedingly long and are uniformly well filled; the straw is strong; the grain is large, plump, and heavy, and the experiment station claims that it outyields all other bearded varieties five to six per cent. Our seed is the genuine Wisconsin Pedigreed of extra fine quality—sure to please.

Price; subject to change; see supplement following page 48.

Beardless

The ordinary strain of beardless barley, which until recently has been the best obtainable. On account of not being thoroughly perfected by selection, it may produce some bearded heads. Will stand up on any land. Sow as early as possible for frost does not hurt it.

Prices; subject to change; see supplement following page 48.

Six Row White (Extra Selected)

Specially selected re-cleaned seed of the common, white, six-rowed, bearded barley which has been most generally grown. It is sometimes sown in the fall west of the Cascade Mountains.

Price; subject to change; see supplement following page 48.

Barley Pointers

Barley may be planted either in fall or spring. It winter kills more easily than wheat, however. The straw is somewhat weaker than that of wheat or oats and for that reason it is liable to lodge when seeded on moist rich bottom lands. On the average it yields three hundred pounds more per acre than wheat and two hundred and sixty-four pounds more than oats. The counties of greatest barley production in Washington are Columbia, Garfield, Whitman, Lincoln and Walla Walla, ranking in the order named.

Shadeland Climax—Tree Oat

The Shadeland Climax is an excellent medium maturing variety of Tree Oats. According to a statement made by Mr. C. P. Nairn of Amity, Oregon, who developed this excellent variety, it is a selection of Swedish Select and is now considered one of the standard varieties for Western Oregon where it has given very consistent and abnormally large yields.

Where quick growth and early maturity are essentials, Climax will give a bountiful crop of the finest quality Oats you have ever seen. The white grains are plump, uniformly large, with a very thin hull and are often borne three in a spikelet, which doubtless accounts for its wonderful yield. So far as our own tests show it does not appear to be injured by early freezing and later drought.

It is considered an ideal variety for planting West of the Cascades and can be sown in either Fall or Spring—in fact, any time the ground is in right shape. In other sections where the climate is more severe it is preferable to plant in Spring. It has yielded over 100 bushels per acre when other Oat crops in the same section suffered severely with drought.

The stock we offer has been grown under our personal supervision and can be recommended with every confidence.

Prices; subject to change; see supplement following page 48.

LILLY'S Victory

Excels Others in Yield on Light Soil

Our tests show Victory Oats to be way ahead of all others in yield on light soils, although Abundance Oats yield about the same on heavier soil, and they are not of such extremely fine quality as Regenerated Swedish Select. However, the quality is good, and as productiveness is the most important point with most growers, we highly recommend this variety. Victory is a head oat; the straw is of medium height and is particularly firm and elastic, making it resistant to lodging. The grain is white with a slight reddish shade, and is smaller than Regenerated Swedish Select. Our seed is pure, and is grown with special care, in Western Washington, from seed stock imported from Sweden.

Price; subject to change; see supplement following page 48.

LILLY'S Black Alaska

A Very Superior, Hardy Black Oat

A hardy black oat, with spreading head, thick, black hull, and large, plump, dark colored kernels. The straw is large and strong, not liable to lodge, stools freely, is a heavy yielder, and is splendid to sow with vetch or field peas to support the vines. It is sometimes sown in fall, but is not so hardy as Gray Winter Oats, and is more liable to freeze out during the winter. Our seed is very superior.

Price; subject to change; see supplement following page 48.

LILLY'S Banner

A Popular and Productive Variety

A very popular white oat, with spreading head, introduced from Scotland. The straw is of medium height, and stands up well. The grain is white, with a comparatively small percentage of hull, and is heavier than the average. Experiment Station tests show it to be among the best in yield and quality.

Price; subject to change; see supplement following page 48.

LILLY'S Gray Winter

Especially Valuable for Fall Sowing

Gray Winter Oats are very hardy, and are generally used for fall sowing, and are especially useful for sowing with vetch. The straw grows very long, is stiff and not liable to lodge. It is a side oat with very compact head. The grain is dark gray, large and plump, and it yields well.

Price; subject to change; see supplement following page 48.

CROP Insurance

The ONLY WAY to protect or insure your crop in the first instance is by sowing dependable seeds of highest germination—WE HAVE THEM. Mail your order early

SEED OATS

LILLY'S Black Side Oats

LILLY'S Regenerated Swedish Select

Swedish Select has long been popular. Our seed is grown in Washington, thoroughly acclimated, from regenerated stock obtained direct from Gartons, Ltd., the well known plant breeders of England.

It makes a very sturdy growth; the straw is of medium height and is extra large, making it less liable to lodge than any other variety. It yields very heavy crops. It has a large spreading head, and the grain is large, plump, and very heavy, weighing forty-eight pounds to the measured bushel. It is one of the very earliest varieties, and on account of its exceptionally fine quality and heavy yield is one of the most valuable varieties grown.

Price, subject to change; see supplement following page 48.

LILLY'S Abundance

This is a variety introduced from Scotland, and has made a splendid showing in our seed fields, yielding equal to Victory Oats on heavy soil. It also ranks with the best in trials at the Washington Agricultural Experiment Station. The straw is of medium height, sturdy, and stands erect. It is medium early; has a spreading head; the grain is white and of medium size and weight.

Price, subject to change; see supplement following page 48.

Write for SPECIAL PRICES on Large Quantities

Our prediction of last year as to abnormal cropping qualities of this excellent selection has been realized. Our contract crops in 1920 were the talk of the district and everyone who saw them growing was enthused with their exceptionally fine appearance and yielding properties.

At the time of going to press with our catalog we had not received deliveries of all our crops, but John Oakland of Mt. Vernon, Wash., raised OVER 90 BUSH. PER ACRE of this variety and other growers' crops will undoubtedly equal this.

Those of our customers who have hitherto grown the Old Black Tartarian will appreciate this special selection. These Oats were originally picked out from our trials and grown in comparison with others three years ago when they at once outyielded all others. During growth they showed marked characteristics of head and stiff large straw. While it is true that Side Oats do not generally yield as heavily as head oats this selection has proved an exception for two successive seasons. The kernels are larger than other varieties of this type but have a slightly thicker hull.

We have a generous stock, but in view of the exceptionally fine qualities of this Oat there is sure to be a heavy demand. Mail your order early to avoid disappointment, as you cannot obtain Black Side Oats of equal quality elsewhere. Price subject to change; see supplement following page 48.

LILLY'S Black Side Oats grown on Oscar Kamb Ranch, Skagit County.

Lilly's Selected Field Corn

Tested for Germination
Varieties Most Suitable for the Northwest

PLAIN FACTS ABOUT OUR FIELD CORN

Corn can be grown successfully in the Northwest but the soil and cultivation must be right to ensure satisfactory crops. It is especially valuable as a fodder crop and is unequalled for silage.

WE SELECT OUR SEED FROM THE BEST SOURCES OF SUPPLY, AND IT'S GROWN IN THE RIGHT LATITUDES TO GIVE THE NEXT YEAR'S CROP EVERY CHANCE TO RIPEN PROPERLY.

Our seed corn is grown for us under the best possible conditions. Consequently it is unusually strong in vitality. It is carefully graded, too, which insures a bumper crop of high grade ears, not nubbins. It is repeatedly tested for germination, so we know that it is right when it leaves our shipping room. A test, to satisfy us, must show a sufficient number of root sprouts to secure a strong stand and big yield.

Remember, it costs as much to plant poor, indifferent seed and to cultivate the ensuing crop as it does to plant LILLY'S SELECTED SEED CORN, which is the best the market affords.

To make sure of getting the right sort of corn for next season's planting, mail your order and remittance at once, stating your planting and soil conditions—we'll hold the corn until you want it shipped—and send you corn tested right up to date.

Lilly's Silver King

Silver King is one of the most useful varieties ever introduced. It has been the means of extending the corn growing industry over a greater amount of new territory than has ever been done by any other single variety. It is particularly adapted for growing in those latitudes where other varieties of corn do not mature satisfactorily. The stalks generally grow 7 to 8 feet in height with ears 2½ feet from the ground. The ears are 7 to 9 inches long, smooth, straight roved, and of perfect shape. Kernels are large, pure white and dented.

Lilly's Golden Nugget

The best yellow dent corn for the Northwest. The stalks grow to a good height, producing one or two good ears each. The ears are ten to eleven inches long, fourteen to sixteen rowed, and well filled. The cobs are small and the kernels deep, flinty, slightly dented and of a beautiful golden yellow color. Grown from thoroughbred seed, and is tested for germination.

Lilly's Pride of the North

This excellent variety has long been the standard corn recommended by the Agricultural Stations as the best yellow dent for Washington and Oregon. The grain is very long, sets close on the cob. It is extremely rich in oil and sugar, goes further in flesh production than ordinary sorts. It matures early and yields heavily. Is especially recommended for silo.

Lilly's North Western Dent

This is in a class by itself both as to appearance and earliness and its merits are not sufficiently known and appreciated in the Northwest. It is a cross between a Red Flint corn and a White Dent corn and has red kernels with white caps and shading. It is extremely early and productive. Under ordinary circumstances it will mature in 85 to 90 days and yields from 60 to 80 bushels of corn per acre. As a silo corn Northwestern Dent is very desirable for it produces an unusually big amount of good fodder.

Lilly's Silver King

Other Popular Sorts

LEAMING IMPROVED

Early Yellow dent; long, narrow kernels.

IOWA GOLD MINE

A medium early golden yellow dent corn.

MINNESOTA NO. 23

One of the earliest yellow dent varieties. Sometimes called White Cap Yellow Dent.

CHAMPION WHITE PEARL

A large, late, white dent corn.

EARLY CANADA

An early yellow flint variety.

KING PHILIP

An early red flint corn adapted to the Northwest.

SANFORD WHITE FLINT

A reliable, early, large, white flint corn.

MINNESOTA NO. 13

A good, new, large, early, yellow dent corn.

SWEET FODDER CORN

Sweet corn; producing nutritious fodder.

RED COB ENSILAGE CORN

A red corn for fodder and ensilage.

Prices subject to change—See supplement following page 48.

Vetch

A Valuable Hay, Ensilage, Pasture, Soiling and Fertilizing Crop

The vetches are among the most valuable leguminous crops that can be grown in the Northwest for hay, ensilage, pasture, soiling, green manure, and for cover crop for orchards. In food value they are about the same as alfalfa, are consumed with less waste and are relished by stock. They are of the greatest value as fertilizers. Like alfalfa, clover, peas and other legumes, vetch has the power of drawing nitrogen from the air and distributing it in the soil. Even though the crop is removed from the land, the soil will be improved; when plowed under the benefit will be much greater.

The names **Spring Vetch** and **Winter Vetch** are misleading. **Spring Vetch** is the variety used almost exclusively west of the Cascade Mountains, and in other mild, cool, moist climates, for either spring or fall sowing. **Winter Vetch** is used east of the Cascades and in climates where the winters are severe and the summers hot and dry, for fall sowing generally and sometimes for spring sowing.

Purple Vetch (*Vicia atropurpurea*)

There are so many excellent characteristics and its proven suitability to our climatic and soil conditions after several years trial that we confidently recommend Purple Vetch to a place on every farm. For Spring sowing it undoubtedly is a strong rival to the Common Vetch and we predict it will ultimately supersede that old variety.

E. B. Stookey, Agronomist, Western Washington Experimental Station, wrote to us July 12, 1920.

"The citrus growers of California find that this is much better adapted under their conditions for green manuring than anything else they have tried. We have grown Purple Vetch here for many years and our average yield per acre is 22 bushels. It is very well adapted to upland and can be depended on to yield about this rate. On the lowlands it has a tendency to grow too late in the season, it being much like peas in this respect. A characteristic about this that makes it very desirable for green manuring is the fact that when there is sufficient moisture it will make a much better growth at high temperature than any other Vetch."

The seed we offer is produce of our own contract crops grown in Washington and the quality is excellent. As there is certain to be a heavy demand please mail order early as stock of the quality we offer is not large.

For price see supplement following page 48.

Winter or Hairy (*Vicia villosa*)

For Fall or Spring East of the Cascades

Winter, Sand, or Hairy Vetch is another legume, similar to Common Vetch, and valuable for the same purposes, but it is suitable for climates where the winters are more severe and the summers hotter and drier for fall sowing but it may also be sown in spring.

It makes splendid hay, ensilage, pasture, green feed, and is of special value as a fertilizer. Used as a cover crop for orchards, it prevents washing of the soil during the winter, and when plowed under in spring it makes one of the very best fertilizers, furnishing nitrogen and humus, both of which are needed by the soils in that section. Nitrogen is the most expensive fertilizing element, and is the element most lacking.

The seed of Hairy Vetch is smaller than Common Vetch, and thirty pounds is sufficient to sow an acre. With it should be sown about thirty pounds of wheat or rye to keep the plants off the ground.

Price subject to change; see supplement following page 48.

Common, or Spring (*Vicia sativa*)

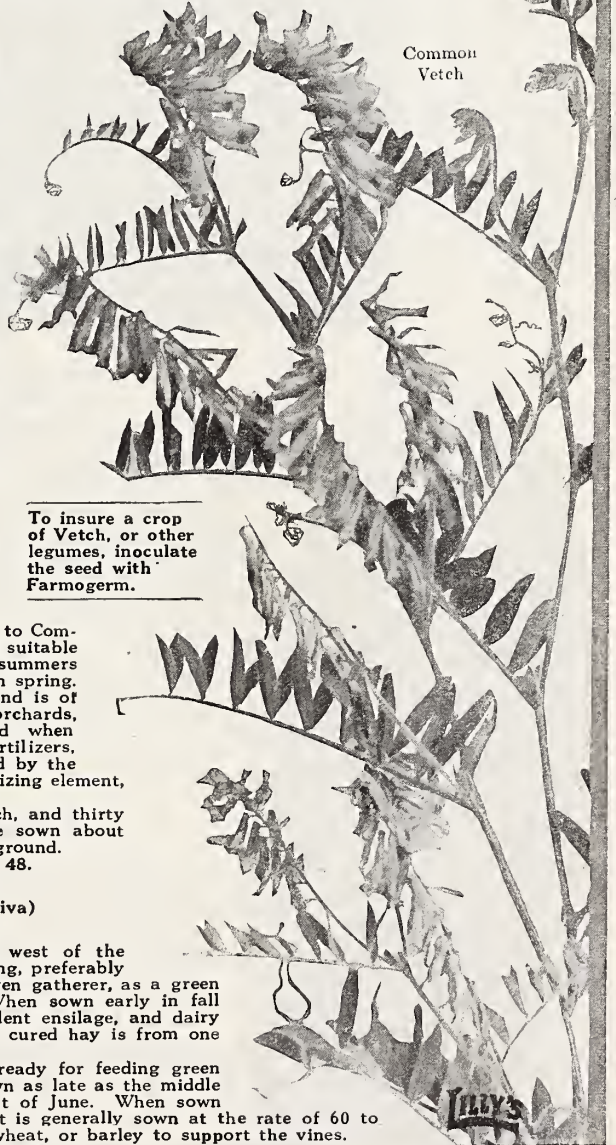

For Spring or Fall West of the Cascades

Common Vetch is perfectly adapted to conditions west of the Cascade Mountains, where it is sown either in fall or spring, preferably in fall. It is an annual legume, of great value as a nitrogen gatherer, as a green manure, and as a pasture, ensilage and soiling crop. When sown early in fall it is a splendid cover crop for orchards. It makes excellent ensilage, and dairy cattle prefer the hay to that of red clover. The yield of cured hay is from one and one-half to four tons per acre.

Common Vetch sown early in September should be ready for feeding green about the middle of April or first of May. It may be sown as late as the middle of November and should be ready for feeding by the first of June. When sown early in spring it should be ready for feeding in June. It is generally sown at the rate of 60 to 100 pounds per acre, with about 50 pounds of oats, rye, wheat, or barley to support the vines.

Price subject to change; see supplement following page 48.

Common
Vetch

To insure a crop of Vetch, or other legumes, inoculate the seed with Farmogerm.

GROW MORE RYE

Rye has been called the "Grain of Poverty" because it is better adapted to poor soil than any other cereal.

The illustration below shows our contract crop of Rosen Rye grown by Dunlap & Gallacher, Mount Vernon, which yielded

18,249
pounds of grain off 10 acres.

www.libtool.com.cn

E. B. Stookey, County Agent for Thurston County, writes us:

"It is by far the best variety of rye which has been grown at the Experiment Station, at Puyallup, and should rapidly replace other varieties."

We recommend farmers to sow Rye in 1921. It is a reliable cropper and yielder. ORDER EARLY

JILLY'S Rosen Rye

Rosen is a high yielding, heavy stooling, stiff-strawed, hardy winter rye of wide adaptation. Developed from a Russian importation, it was first grown at the Michigan Agricultural College in 1908. The heads of Rosen are large and full bodied with beards of medium length. The kernels are exceptionally large and plump and of light greenish color. As compared to Common varieties of rye, Rosen heads stands at a more uniform level in the field at harvest, resembling wheat in this respect. Common rye has many sterile glumes, resulting in partially filled heads. Rosen has few vacant places in the head but tends to develop a large plump kernel wherever there is room for one.

Rosen Rye produces yields greatly superior to the Common varieties. In 1908 the first Rosen Rye occupied 20 square feet of ground at the Michigan Agricultural College. The 1920 area of Rosen Rye is estimated at 1,000,000 acres. Only a very small per cent is pure. Growers should demand pure Rosen, grown under conditions which prevent crossing by Common Rye.

The stock we offer is excellent pure Rosen. We recommend early ordering as the demand is sure to be heavy and seed of equal quality will be hard to replace.

Price subject to change; see supplement following page 48.

Petkuser

Our original seed stock was imported from Sweden. From that seed we have grown splendid crops and now have a good stock of seed which is thoroughly acclimated to the Northwest. The heads are long, four rowed and the kernels are larger than the common rye. The straw is strong and will not lodge under ordinary weather conditions. Price subject to change; see supplement following page 48.

Common Seed Rye

Our seed is specially re-cleaned, and only the largest and heaviest kernels are retained. Rye is a valuable and hardy crop, providing green foliage in late Fall and early Spring. It matures more quickly than most other crops and can be made to yield a good crop on soil that is too poor for other cereals.

Price subject to change; see supplement following page 48.

Heads of Rosen Rye

JILLY'S
Rosen
Rye

JILLY'S

LILLY'S Field Peas

A valuable Grain, Hay, Ensilage and Fertilizing Crop for the Northwest. Takes the Place of Corn for Hog Raising

Soil and weather conditions in the Northwest, especially west of the Cascade Mountains, are ideal for growing peas, and field peas are one of our most valuable crops for either grain, ensilage, or soiling. The grain is a splendid food for hogs, and makes hog-raising possible in this section where it is difficult to mature corn properly. Pea-fed pork is unexcelled. Peas are also the most satisfactory crops for "hogging down."

Peas do best when sown very early in Spring. They are sometimes sown in fall west of the Cascades. When sown early they will mature in July, in time to plant the ground to some other crop. They are usually drilled or sown broadcast at the rate of one hundred pounds per acre, together with about one hundred pounds of oats, wheat, rye, or barley to support the vines. They produce twenty-five to thirty bushels of grain, or two to four tons of hay per acre.

Like clover, alfalfa and vetch, peas are legumes and valuable as a fertilizer. When peas are grown on land for the first time, the seed should be inoculated with Farmogerm to insure presence of nitrogen gathering bacteria.

Yellow Canadian

These small, round, smooth, yellow peas are the most generally grown field peas for stock food, and great quantities are also used for human consumption.

For prices see supplement following page 48.

Green, or Bluebell

The seed is larger than the Yellow Canadian, and it has a bluish color, but is very similar in all other respects.

For prices see supplement following page 48.

Bangalia

A comparatively new variety which has become quite popular east of the Cascades, as it does better than other varieties on dry land. The seed is rather small, slightly dented or wrinkled, and is of a brownish-green color.

For prices see supplement following page 48.

Whip-Poor-Will Cow Peas

Cow Peas are grown extensively in the south for fodder and to plow under for fertilizer. They may be grown in Eastern Washington and Eastern Oregon, but should not be sown until the ground becomes thoroughly warmed in spring. They cannot be grown successfully west of the Cascade Mountains.

For prices see supplement following page 48.

Field Peas

LILLY'S Emmer, or Speltz

Produces Good Crops Where Other Grains Fail

It is a species of wheat, resembling two-rowed barley in appearance, and is extremely hardy and drought resisting, making it especially valuable for stock food, either as grain, hay or forage, in dry regions or on poor soils.

It will produce fair crops under almost any condition of soil or climate, but its greatest value lies in its ability to produce a crop in hot, dry localities and on poor soil, where other grains would fail. Under such adverse conditions it will produce more and better stock food than any other grain. In feeding value it equals barley or rye. When threshed it retains the hulls like barley, but the beards are very short, as shown by accompanying cut. It is generally sown in spring in the same manner as wheat or barley at the rate of about 100 lbs. to the acre.

For prices see supplement following page 48.

GROW

Sunflowers for Silage

Although the sunflower (*Helianthus annuus*) is a native of North America and has grown in nearly every garden in this country, it is only in recent years that it has been recognized as a forage plant. The earliest record of sunflower cultivation is found in Spain about 350 years ago.

In Oregon and Washington some sunflowers were grown in an experimental way in 1918. The results were such as to stimulate interest, and in 1919 a considerable acreage was planted for silage purposes. The yields were in general very satisfactory, varying from 10 tons per acre, under dry land conditions, to 50 tons per acre. In the higher altitudes and under dry farming conditions, the average yields per acre were greater than with any other crop.

Our illustration shows a crop grown, from seed supplied by us, on Grant & Reids Farm, Wynooche Valley, on rich, sandy clay loam. Seed sown the middle of May in rows 3 feet apart—plants 6 to 8 inches apart in rows. The crop was cultivated twice during the summer and yielded

31 tons per acre →

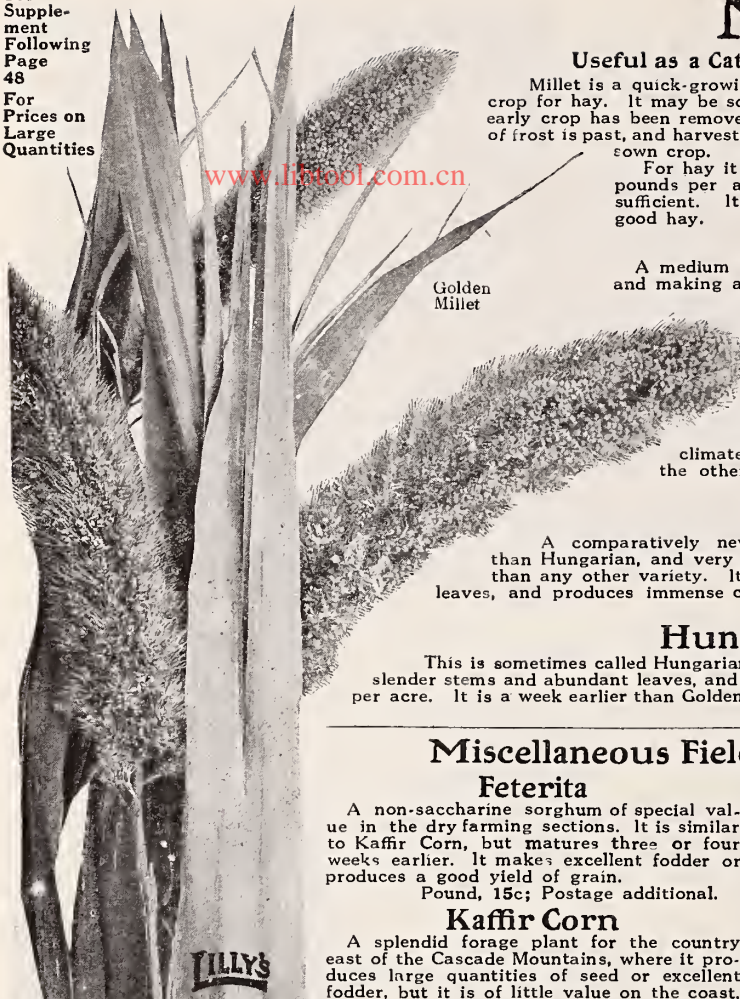

The variety we offer is

Mammoth Russian, or Giant

For prices see supplement following page 48.

See Supplement Following Page 48 For Prices on Large Quantities

www.lillys.com.cn

Golden Millet

Millet

Useful as a Catch Crop for Hay and Forage

Millet is a quick-growing annual, and is mostly useful as a catch crop for hay. It may be sown as late as the last of July, after some early crop has been removed, or it may be sown in spring, after danger of frost is past, and harvested before the land will be required for a full sown crop.

For hay it should be sown at the rate of about twenty pounds per acre; for seed to twelve to fifteen pounds is sufficient. It produces two to five tons per acre of very good hay.

Golden

A medium early variety, growing four to five feet high, and making a very good quality of hay or forage. It will thrive in almost any soil or climate, and sometimes produces as much as five tons of hay and seventy bushels of seed per acre. Pound, 10c; Postage additional.

Japanese

Grows six feet or more in height and produces immense crops of splendid hay forage, or ensilage. It does well in most all climates and soils. Less seed is required than of the other varieties.

Pound, 10c; Postage additional.

Siberian

A comparatively new variety, imported from Russia; earlier than Hungarian, and very hardy, withstanding more heat and drought than any other variety. It makes a rank growth, with abundance of leaves, and produces immense crops of excellent hay.

Pound, 10c; Postage additional.

Hungarian

This is sometimes called Hungarian Grass. It grows about three feet high, with slender stems and abundant leaves, and produces two or three tons of excellent hay per acre. It is a week earlier than Golden Millet, and requires less moisture.

Pound, 10c; Postage additional.

Miscellaneous Field and Forage Seeds

Feterita

A non-saccharine sorghum of special value in the dry farming sections. It is similar to Kaffir Corn, but matures three or four weeks earlier. It makes excellent fodder or produces a good yield of grain.

Pound, 15c; Postage additional.

Kaffir Corn

A splendid forage plant for the country east of the Cascade Mountains, where it produces large quantities of seed or excellent fodder, but it is of little value on the coast.

Pound, 10c; Postage additional.

Broom Corn

Another non-saccharine cane, grown for seed, fodder, and for manufacturing brooms. Not grown successfully on the coast, but may be grown east of the mountains. Grown the same as Kaffir Corn.

Pound, 10c; Postage additional.

Japanese Buckwheat

Excels all other varieties. The grain is large, it yields heavy, ripens early, stands up well, and the flower is fairly equal to any other. It remains a long time in bloom and is excellent for bee pasture.

Pound, 15c; Postage additional.

Sunflower

The seed is excellent poultry food, when mixed with grains, and should be more generally grown by poultrymen.

Pound, 15c; Postage additional.

Flax Seed

Sow seed in spring on moist land, at the rate of thirty pounds per acre if grown for seed, or twice that amount if grown for fiber.

Pound, 15c; Postage additional.

Early Amber Sorghum

The sugar cane used for making sorghum syrup, also a splendid summer forage crop for cows; very sweet, rich and succulent. Should not be planted until the weather is thoroughly warm in spring.

Pound, 15c; Postage additional.

Soja, or Soy Bean

The beans are valuable for both human and stock food, also for the oil which they contain. They are not yet grown extensively in this country, but great quantities are imported from Asia. The plants are also grown for forage and green manure, similar to Cow Peas.

Pound, 15c; Postage additional.

Annual

Farmer Freeman Says

GROW MORE ROOTS

Rotate
Your
Crops
—Grow
Roots
This
Year

It is a regrettable fact that Farmers and Stock raisers in this Western country do not fully appreciate the great value of Mangels for feeding Cattle, Sheep and Hogs. There is no question whatever as to the desirability for their more general use. In Great Britain and in fact all other European countries Root crops are grown on a large scale on every farm. Mangels are considered indispensable where stock of any kind is kept. From an economical point of view the Mangel crop is one of the most profitable on the farm as is amply demonstrated by the immense yields which are produced from an acre at very little outlay either in material or labor. 18 to 20 tons of roots per acre is not unusual, some of the roots weighing from 20 to 30 lbs. each. We earnestly recommend every farmer to put in an acre or two of Mangels this season as we are confident the results will more than justify the outlay.

Ruta Baga, or Swedish Turnip

LILLY'S King of Swedes

A Splendid Variety for Stock Food or Table Use

Ruta Bagas are grown and used similar to turnips, but require a longer season for growth and are even more valuable for stock food; they are also preferred by many for table use. Lilly's King of Swedes is an ideal, yellow fleshed rutabaga. The flesh is sweet, fine grained, juicy, tender, solid, and the color is bright yellow, very attractive, making it especially desirable for table use. Its large size, productiveness, hardiness and splendid keeping qualities make it the most valuable variety for winter feed for stock.

Pkt., 10c, Oz., 20c, ¼ lb., 45c lb., \$1.25, 10 lbs., \$12.00, Postage extra.

American Purple-Top Improved

An excellent variety for either table use or stock. The flesh is yellow, solid and sweet. It is of nearly globular shape, very large, immensely productive, and a good keeper.

Pkt., 5c, Oz., 15c, ¼ lb., 40c, lb., \$1.20, 10 lbs., \$11.50, Postage extra.

Monarch, or

Tankard Ruta Baga

The roots are very large and are tankard shaped, with small neck and tops. The color is purplish-red above ground, yellow below. The flesh is yellow, fine grained and sweet. Very productive and a good keeper.

Pkt., 5c, Oz., 15c, ¼ lb., 40c, 1 lb., \$1.25, 10 lbs., \$11.50, Postage extra.

Garden Helps

The planting and cultivation of root crops, as well as garden vegetables, is made easy and pleasant, and the expense is reduced, by the use of the Hudson Garden Implements listed elsewhere in this catalog. They do away with the back-breaking labor, do the work more quickly, and do it better. They will do more than pay for themselves the first season.

King of Swedes

LILLY'S Mastodon Carrot

The Best Variety for Stock Feeding

Lilly's Select Stock Mastodon Carrot is undoubtedly the best variety for stock feeding. It is immensely productive, and on account of being half-long is much easier to harvest than the long varieties. The roots are seven to nine inches long, reasonably smooth, very heavy at the shoulder, tapering regularly to a point. The color is creamy white. The flesh is white, solid, crisp, and of excellent quality for stock feeding. Not recommended for table use. Carrots require rich, well tilled soil, and under favorable conditions often yield as much as twenty-five to thirty tons per acre. They are a splendid stock food, and should be more generally grown for that purpose.

Mangel

The stocks we offer are grown by ourselves on Puget Sound, therefore we know they are true to name and type. We have found that the Puget Sound country produces very high grade root seeds, quite equal, and in many respects superior, to those formerly imported from Europe. There is no need for you to plant imported seeds from other sources when you can get home grown stock of such excellent quality as we offer in this catalog. Help us encourage local industry.

www.libtool.com.cn

JILLY'S Danish Sludstrup

Stock Beets are Valuable Winter Feed for Stock and Poultry

Mangels, or Stock Beets, yield immense crops of nutritious, succulent winter food for stock and poultry, and our cool, moist climate on the Pacific Coast is especially adapted to their growth. Danish Sludstrup is a splendid variety, and is undoubtedly the best variety grown. Our original seed stock was procured from Denmark, where the variety has been awarded a first-class certificate by the Danish Government. Sludstrup is a long mangel, smoother than others, uniform in shape, of immense size, and the yield is remarkable. It is of a reddish yellow color, grows well above ground and is easy to harvest, and chemical analysis shows it to excel all other varieties in food value.

Pkt., **10c**, ½ lb., **30c**, 1 lb., **45c**, 10 lbs., **\$4.20**, 25 lbs., **\$9.50** 100 lbs., **\$35.00**, Postage or freight additional.

Giant Intermediate, or Gate Post

In shape it is intermediate between the long and globe-shaped varieties. The roots are large; neck small and short; flesh nearly white, sweet and tender. A big cropper.

Pkt., **10c**, ½ lb., **33c**, 1 lb., **50c**, 10 lbs., **\$4.25**, 25 lbs., **\$10.00**, 100 lbs., **\$38.00**, Postage or freight additional.

Half Sugar Mangel

Combines the size of mangel with the great food value of the sugar beet. The flesh is white, firm, crisp and is greedily eaten by stock.

Pkt., **10c**, ½ lb., **35c**, 1 lb., **55c**, 10 lbs., **\$5.00**, Postage additional.

Long Red

A large, red mangel, producing immense crops. The flesh is white shaded with red. Grows much above ground, and is easy to harvest.

Pkt., **10c**, ½ lb., **35c**, 1 lb., **55c**, 10 lbs., **\$5.00**, Postage additional.

Golden Tankard

A popular, tankard shaped, stock beet. Large size; flesh yellow; nutritious and well liked by stock. Will grow in shallow soil.

Pkt., **10c**, ½ lb., **35c**, 1 lb., **55c**, 10 lbs., **\$5.00**, Postage additional.

Golden Giant

An excellent variety, of immense size, uniform shape, and very productive. The flesh is light yellow, fine grained and very rich. It is half-long, easily pulled, and a good keeper.

Pkt., **10c**, ½ lb., **35c**, 1 lb., **55c**, 10 lbs., **\$5.00**, Postage additional.

Royal Red

The roots are very large, uniformly straight, well formed and solid; tops small; color deep red. It produces immense tonnage, roots weighing twelve pounds being not uncommon.

Pkt., **10c**, ½ lb., **35c**, 1 lb., **55c**, 10 lbs., **\$5.00**, Postage additional.

Klein Wanzleben Sugar Beet

The variety most generally grown for sugar. Very rich in food values, but not so productive as the mangels. Splendid food for dairy cows.

Pkt., **10c**, ½ lb., **38c**, 1 lb., **60c**, 10 lbs., **\$5.50**, Postage additional.

YELLOW GLOBE Noted for its small top and as it almost sits on the soil lifting the crop involves the minimum of expense. The skin is an attractive golden yellow. The flesh is fine grained and nutritious.

Pkt., **10c**, ½ lb., **35c**, 1 lb., **55c**, 10 lbs., **\$5.00**, Postage additional.

A crop of **JILLY'S** Danish Sludstrup Mangel showing roots ready for selection

FORAGE CROP SEEDS

Lilly's Dwarf Essex Rape

You can't grow a crop that will pay you better profits than Rape. As a forage crop, this great annual is in a class by itself. Hogs and sheep take to it eagerly and put on big gains rapidly. It is usually ready for feeding seven weeks after planting and will produce first-class pasture long after all other green forage has been destroyed by frost. It is particularly useful when other green food is scarce during the dry season in summer and early fall. Rape is easily grown and thrives in almost all soils in the United States and Canada. It can be sown at any time from early spring until August. Planted in cornfields at the last cultivation, it grows to a height of 18 or 28 inches and furnishes splendid fall feed. It thrives best in cool weather and is especially adapted to our climate on the Pacific Coast. It is also frequently sown with oats and other small grain and does not interfere with either the yield or harvesting the grain, but produces a splendid rape crop afterwards; 3 to 5 lbs. of seed is usually sown to the acre. Sow some of it this year and get big yields of succulent forage for your live stock.

1 lb., **15c**, 10 lbs., **\$1.35**, 25 lbs., **\$3.25**, 100 lbs., **\$12.00**,
Postage or freight extra.

A fine crop of
Thousand
Headed
Kale

Lilly's Thousand Headed Kale

Supplies Green Food for Cows, Sheep, Hogs, and Poultry During Winter

Thousand Headed Kale or Cow Kale as it is sometimes called is one of the most useful crops for the Pacific Coast. It belongs to the cabbage family, is succulent and nutritious and is unequalled as green food for stock, especially poultry and cows. West of the Cascade Mountains it is left in the ground all winter and cut as required for feeding.

It is not only an economical food but by supplying succulent green food will keep stock in perfect health. No poultryman can afford to be without his patch of Kale; it answers the question of green food for fall and winter. Feeding this plant by stripping off the lower leaves is not recommended as regular practice, as it is extremely laborious, especially during wet weather, puddles the soil badly and causes the stripped plants to suffer from frost.

Oz., **10c**, ¼ lb., **25c**, 1 lb., **80c**, 10 lbs., **\$7.50**, Postage extra.

Lilly's Marrow Cabbage

(Chou moellier)
White Stemmed

Marrow Cabbage is a valuable dairy and poultry food, very similar to Thousand Headed Kale, but even more prolific. The plants average four to six feet in height, with stalks five to six inches in diameter and weight fourteen to twenty pounds. The stalks are edible and relished by cows. The lower leaves are broken off and fed as they mature.

The plant is not so hardy as Thousand Headed Kale, but is most valuable for green feed in fall and early winter. The culture is the same as for Kale and Cabbage. One pound of seed will produce plants for one acre. Oz., **20c**, ¼ lb., **60c**, 1 lb., **\$2.25**, Postage extra.

OUR YAKIMA STORE is better equipped than ever to serve you. A generous stock of all leading varieties of seeds is available for immediate supply throughout the sowing season.

FEED THE SOIL THAT
FEEDS YOU

Fertilizers

THEY HELP GROW
BIGGER, BETTER CROPS

WHAT ARE COMMERCIAL FERTILIZERS

There are ten essential plant food elements. No plant will thrive unless all of these are present in the soil. They are: CARBON, HYDROGEN, OXYGEN, IRON, MAGNESIUM, SULPHUR, CALCIUM, NITROGEN, PHOSPHORIC ACID and POTASH. Of these Carbon, Hydrogen and Oxygen are obtained freely by the plants from the air and water in the soil. Iron and Magnesium are found abundantly in all soils, while Nitrogen, Phosphoric Acid and Potash are generally not very plentiful in available form in either water or soil. From this we see that we are really little concerned with the first five elements, that the sixth and seventh are only occasionally of importance, but that the last three NITROGEN, PHOSPHORIC ACID and POTASH should have our constant attention. It is these three elements that you are interested in when you buy Commercial Fertilizers.

WHY USE THEM?

FIRST:

Because it costs no more to plant, cultivate and harvest a full crop than it does a half crop and COMMERCIAL FERTILIZER properly used insures bumper crops.

SECOND:

Because if a crop is healthy and makes a vigorous growth it is not nearly so likely to be hampered by attacks of insects and other pests.

THIRD:

Because where COMMERCIAL FERTILIZER is used the yield is not only greater in volume but also invariably of much better quality and therefore of higher market value.

FOURTH:

Because COMMERCIAL FERTILIZER releases and makes available much plant food that is already in the soil thru its chemical action.

FIFTH:

Because every crop takes from the soil a certain amount of each element of plant food. If this is replaced by applying COMMERCIAL FERTILIZERS the soil will be improved each year instead of deteriorating.

Chemical Fertilizers

Chemical Fertilizers contain only the one element and are consequently not complete fertilizers. They produce wonderful results when properly used, but you should experiment and study the matter carefully before investing in large quantities. Many persons know only of SUPERPHOSPHATE as a commercial fertilizer and apply it promiscuously on any soil or crop and if it does not produce the desired results they condemn commercial fertilizers in general. Most soils contain sufficient quantities of one or two of the three elements necessary and by experimenting you can ascertain which is lacking and add only that one.

Nitrate of Soda

Guaranteed Analysis: Nitrogen, 13%

is a very valuable fertilizer when correctly used. It is quick in action; the effect will be noticeable within a few days, and for that reason it is best used as a top dressing after the plants are up. Best results are obtained by two or three light applications, about 150 lbs. per acre each, early in the growing season.

If applied too late in the season it is liable to cause excessive growth of tops and foliage at the expense of vegetables, fruit or grain. Its great benefit is as a stimulant to give the plants a vigorous start early in the season. It is especially valuable on garden crops, such as lettuce, radishes, celery, etc., the quality of which depends upon being grown quickly. An article on the use of Nitrate of Soda is contained in our crop book, a copy of which will be furnished with any order if requested. Packed in 200-lb. bags.

For price see supplement following page 48.

Sulphate of Ammonia

Guaranteed Analysis: Nitrogen, 20%

Slower in action than nitrate of soda but more suitable for application during wet weather. Should be used only on soils that contain plenty of lime. Packed in 200-lb. bags.

For price see supplement following page 48.

Lime in Soils

The application of lime to soil brings about beneficial results in several ways, it stimulates the proper decomposition of the organic matter in the soil, neutralizes acids, supplies growing plants with calcium, improves the physical conditions of heavy soils by its chemical action, and makes dormant plant food available.

Ground Lime Rock

This is the best form of lime for sweetening sour soil. It is fully as effective as air-slacked lime, does not burn the humus in the soil, is more convenient and less expensive. A large proportion of the land west of the Cascade Mountains is sour, and until the acid is neutralized with lime, fertilizers will be of little benefit. For ordinary cases a ton of ground lime rock per acre will be sufficient. In case of extreme acidity larger quantities will be required. Packed in 100-lb. bags only.

For price see supplement following page 48.

Superphosphate

Guaranteed Analysis: Phosphoric Acid, 17%

This is what is known as acid phosphate, being phosphate rock treated with acid to make the phosphoric acid available. While the Phosphoric Acid in this is not so valuable as that in Bone Meal, it is more quickly available and in some cases more useful. Superphosphate is recommended as a top dressing for grass lands and grains. It is generally used at the rate of 300 to 600 lbs. per acre. Packed in 125-lb. bags.

For price see supplement following page 48.

Muriate of Potash

Potash Salts are especially valuable in Western Washington and the Willamette Valley, where most of the soil is very deficient in potash. It is much used by fruit growers, especially for berries, and in addition to increasing the yield, makes a marked improvement in the quality and color of the fruit. As it makes the fruit more firm, it stands shipping better.

Stable manure contains only a small percentage of potash, and the efficiency is greatly increased by adding potash salts.

An average application for most purposes is about 200 lbs. per acre.

Contains 50% pure Potash. Packed in 200-lb. bags.

For price see supplement following page 48.

Land Plaster, or Gypsum

Land Plaster is not really a fertilizer, as it contains no plant food, but it causes a chemical change in the soil, releasing the potash which is already there in an unavailable form, and is very beneficial to clover, alfalfa, peas, beans, and other legumes, because of the sulphate it contains. It is sown broadcast at the rate of one hundred to five hundred pounds per acre. Packed in 100-lb. bags only.

For price see supplement following page 48.

Hydrated Lime

This is ordinary Lime stone that has been air-slacked. Packed in 50-lb. sacks only.

For price see supplement following page 48.

AN INVESTMENT
NOT AN EXPENSE

Fertilizers

INCREASE PROFITS
ALWAYS RELIABLE

Animal fertilizers, being made from animal matter, add warmth and life to the soil. Most of them contain both nitrogen and phosphoric acid, but do not contain potash, so that to make them complete it is necessary to add the proper proportion of chemical fertilizer. Many people think that any kind of commercial fertilizer will give the desired result but that is wrong. For instance, on certain soils and crops nitrogen and phosphoric acid as found in blood and bone is most valuable while under other conditions superphosphate and nitrate of soda are much better. To decide which to use requires study and experience.

www.libtool.com

Animal Fertilizers

Lilly's Sheep Guano

Guaranteed Analysis: Nitrogen, 2%; Phosphoric Acid, 2%

Pure sheep manure is the best and strongest natural fertilizer. It contains a high percentage of nitrogen and phosphoric acid, and a liberal supply of potash. To retain this high value, it must be properly handled, or the value will be lost. It is kiln dried and finely pulverized, making it very concentrated and convenient to use. Packed in odd weight bags. For price see supplement following page 48.

Bone Meal

Guaranteed Analysis: Nitrogen as Ammonia, 2½ to 3%; Phosphoric Acid, 18 to 22%

A splendid fertilizer and for many purposes is the best and cheapest form of nitrogen and phosphoric acid. It forms the base of all the best mixed fertilizers. It is slow in action and there is no waste, as the plant food is released only as fast as it can be taken up by the roots of the plants. It may be used in almost unlimited quantities without danger of burning the plants, neither is there any loss from leaching, and an ideal lawn or rosebed is made by mixing large quantities of bone meal with the soil. It is also an excellent top dressing for lawns, flower beds, etc., and is used extensively in greenhouses, hotbeds, nurseries and for forming soil for potted plants. The amount to apply depends upon the purpose for which it is used. Packed in 10-lb. cartons and 100-lb. bags.

For price see supplement following page 48.

Complete Fertilizers

Complete Fertilizers are those containing the correct proportions of the three essential plant food elements, Nitrogen, Phosphoric Acid, and Potash, required for the average crop on ordinary soil. Different crops require greater or lesser quantities per acre but the proportion usually remains the same. For best results and the convenience of our customers we mix different ANIMAL and CHEMICAL FERTILIZERS into a complete Fertilizer known as LILLY'S MORCROP FERTILIZER (described on inside back cover) which is strongly recommended for best results in general farm and garden uses. Then when experience proves that the crop we are growing draws excessively on one element or that the soil is deficient in one or more elements the required Chemical Fertilizer can be added as found necessary.

Government Experiments with Commercial Fertilizer

Experiments in the use of commercial fertilizer on vegetables by the Department of Agriculture brought out some remarkable comparisons. On one acre of cabbage without commercial fertilizer 910 prime heads were secured, and when commercial fertilizer was applied 7580 perfect heads were the result. The extra cost was \$7.00 per acre or \$54.00 profit for each dollar invested. The agricultural colleges and experiment stations are doing a great work along these lines, and you should provide yourself with the different bulletins as they are issued. Advance a step in your knowledge of commercial fertilizer this year, make use of a sack or a ton or more according to whether you feel you are experimenting or getting results.

Lilly's Fish Fertilizer

Guaranteed Analysis: Nitrogen, 10%; Phosphoric Acid, 8%

Made from salmon fish scraps, and will produce wonderful results on any crop where an abundance of surface growth is desired. It is splendid for lawns, though the odor is somewhat objectionable. Usually applied at the rate of 400 to 800 lbs. per acre. In 100-lb. bags only.

For price see supplement following page 48.

Blood and Bone

Guaranteed Analysis: Nitrogen as Ammonia, 4%; Phosphoric Acid, 11%

A quick fertilizer and for that reason more valuable than bone meal for some purposes, although the effect is not so lasting. It should not be applied a great length of time before the seed is planted, and is most useful as a top dressing. It is usually applied at the rate of 300 to 1000 lbs. per acre. Packed in 100-lb. bags only.

For price see supplement following page 48.

Dried Blood

Guaranteed Analysis: Nitrogen as Ammonia, 15%

A very effective and quick acting form of nitrogen, generally used as a top dressing. Like Nitrate of Soda it must be used with care, and is best used in several light applications, but when properly used it is a very valuable fertilizer. It is a pure slaughterhouse blood, dried and finely ground. Packed in 100-lb. bags only.

For price see supplement following page 48.

INSURE YOUR CROP

If you are going to plant legumes such as Alfalfa, Clover, Peas, Beans, Vetch, etc., you can insure a catch and vigorous growth by the use of nitrogen gathering bacteria of the right kind.

The Standard Inoculation

FARMOGERM

High-Bred Nitrogen Gathering Bacteria.

is a pure culture or growth of nitrogen fixing bacteria selected and bred up to transform large amounts of nitrogen from the air into a form where the growing plants can use it. Not only are the plants as they grow supplied with nitrogen but large quantities are left in the ground for the following crops.

We can furnish it for Alfalfa, Red Clover, Alsike, White Clover, Sweet or Bokhara Clover, Garden Peas, Field Peas, Sweet Peas, Cow Peas, Vetches and Beans.

When ordering be sure to mention which of these you intend using it on, this is important. Write for pamphlet of information.

Price: Garden size, 50c; Acre size, \$2.00; 5-Acre size, \$8.00. Postpaid.

Farmogerm is put up in glass bottles with patented stoppers which keep these cultures strong and virile indefinitely.

LILLY'S Dairy Feeds

Produce the Maximum Milk at the Minimum Cost

www.libtool.com.cn

It's the quality that determines the price

Investigators have been conducting tests for many years in order to learn the amount of digestible protein, carbohydrates and fat best suited to dairy cows under average conditions. The results from various foods and varying amounts have been studied in thousands of animals. Taking into consideration the findings of the experimenters, we have been able to put upon the market Dairy Feeds second to none. They are designed especially to increase the production of milk to the maximum by supplying the necessary amount of protein, carbohydrates and fat required to bring the average farm roughage to a balanced ration. They are palatable, nutritious, and are easily digested, and will keep cows in the best of condition, all during the lactation period.

"The Edelweis Dairy of Portland, Oregon, feed it exclusively to their entire herd of eighty-five milkers and won first prize for the state of Oregon, and second prize for the entire Northwest for milk production at the Northwest Live Stock Exposition in Portland last year while feeding it."

Until Lilly's Dairy Feeds have been used, it is impossible to estimate their value, and the price is so reasonable that they should always be used instead of plain mill feeds. They have from ten to twenty per cent greater food value than shorts or bran, and are manufactured from high grade products. They are uniform in quality and can be depended upon to give excellent results. Lilly's Dairy Feeds have found a ready sale among dairymen, and our trade has increased steadily ever since they were first put on the market.

For prices see supplement following page 48.

Lilly's Alfalfa Meal

Lilly's Alfalfa Meal is prepared especially for us from the best grade of Alfalfa kiln dried and ground to a coarse meal. It is very high in protein, about the same as mill feed, and is a splendid adjunct to the grain ration. It may be fed alone or mixed with other foods, either dry or moistened with water or steamed. Packed in 100-lb. sacks only.

For price see supplement following page 48.

Lilly's Steam Dried Beet Pulp

Beet pulp has become a staple food for stock and poultry. It is a great producer of milk and eggs, when judiciously fed in connection with other foods. It has a particular value in the fact that it may be quickly converted into a moist green food by simply soaking it. It has great digestive values, and feeders claim it will condition animals splendidly, especially when green food is not obtainable. It is best fed moist. In 100-lb. sacks only.

For price see supplement following page 48.

Lilly's Whole Feed Barley

Good Barley is recognized among feeders as equal to corn for the feeding of all kinds of live stock. Packed in 100-lb. sacks only.

For price see supplement following page 48.

Lilly's Rolled Barley

Good clean plump barley rolled to help mastication and make it more easily assimilated by the animals. Packed in 80-lb. sacks only.

For price see supplement following page 48.

Lilly's Ground Barley

Dairymen know the value of ground barley in the ration. It is high in milk producing elements, and is especially beneficial to cows fed heavily on roots or silage since it counteracts their laxative influence. Considered equal to corn for hog feeding. Being a heavy feed, it is best mixed with other less concentrated feeds. Packed in 100-lb. sacks only.

For price see supplement following page 48.

Lilly's Corn Feed Meal

Corn Meal is a heavy rich feed, and should always be mixed with other less concentrated feeds. It is a more economical fattening feed than whole corn, and is relished by live stock and poultry. Packed in 100-lb. sacks only.

For price see supplement following page 48.

Lilly's Alfalfa Molasses Feed

This is the best grade of Alfalfa Meal mixed with a high quality of feed molasses. In this manner both the palatability and the feeding value are increased to a remarkable degree.

Under the Washington State Feed Laws it is unlawful to sell Alfalfa Molasses Feed in the state, as it contains more than 10% crude fibre and is classed with the mixed feeds. Shipments from our Portland, Oregon, Branch only. Write them for prices.

Lilly's All Grain Chop Feed

Only the best oats, barley and corn go into our chop, for we know that it does not pay to economize by feeding poor chop. Packed in 80-lb. sacks only.

For price see supplement following page 48.

Lilly's Whole Feed Oats

Whole Oats show a higher percentage of digestible protein than does corn, and is usually preferred as horse feed. Packed in 100-lb. sacks only.

For price see supplement following page 48.

Lilly's Rolled Feed Oats

Is a better feed than whole oats for hogs and dairy cows. We roll only good plump oats. Packed in 70-lb. sacks only.

For price see supplement following page 48.

Lilly's Ground Oats

Has a very high value as a milk producing feed, and ten per cent greater fattening qualities than mill feed. It is better than whole oats for hogs and cows, and is best mixed with other feeds. Packed in 80-lb. sacks only.

For price see supplement following page 48.

Naturally we sell for less in large quantities. If you can use a ton or a carload of any kind of feed let us quote you a special quantity price. We grind and mix all our own feeds. WRITE US—IT PAYS.

Stock Feeds

LILLY'S CALF MEAL

Cheaper and Better Than Milk

Weaning time for calves often proves their undoing. This is not to be wondered at, when we consider the drastic change that usually takes place at that time from a diet of mother's milk to the food commonly supplied. Calves eat Lilly's Calf Meal with great relish, and thrive upon it even better than upon whole milk. If fed in a sanitary manner, they will not be troubled with scours or constipation. The use of Lilly's Calf Meal has become very general, and is increasing rapidly. We have never heard of a case where a farmer after using Lilly's Calf Meal has reverted to the old method of raising calves. Lilly's Calf Meal is made from the best materials, correctly blended, thoroughly cooked, and the food values and constituents are about the same as of whole milk, 25% protein, 50% carbohydrates. One pound of Lilly's Calf Meal makes one gallon of milk substitute fully equal to whole milk for raising calves. A valuable instruction sheet on raising calves without milk is enclosed in every sack or will be sent free upon application. Packed in 25-lb. and 100-lb. sacks.

For price see supplement following page 48

LILLY'S LAMB MEAL

Saves the Orphans

Ever since Lilly's Lamb Meal has been in use, it has become increasingly popular with sheep breeders. The use and benefits of Lamb Meal are quite similar to Calf Meal. The quantities fed and the number of meals per day vary according to whether the lambs are to be raised entirely on the meal or whether it is used only as an auxiliary feed. We number many large sheep men among the enthusiastic feeders of Lilly's Lamb Meal, and can point to some of the finest prize winners as Lilly's Lamb Meal Babies. Feeding instructions in each sack. Packed in 25-lb and 100-lb. sacks.

For price see supplement following page 48

LILLY'S PIG MEAL

Makes Weanlings Thrifty

Lilly's Pig Meal is a perfect substitute for sow's milk. It is appetizing, the pigs like it, and they will thrive upon it and continue to grow without any check. Produces rapid growth of bones, muscles and blood, and carries the pigs through the critical stages between weaning time and the time when they can thrive on the regular foods. One pound of Lilly's Pig Meal will make one gallon of milk substitute. Feed as much as the pigs will eat greedily, or enough to keep them in good growing condition, commence feeding a little before the sow is ready to wean the pigs and continue until they are able to thrive upon other foods, reducing the quantity gradually. Feeding instructions in each sack. Packed in 25-lb and 100-lb. sacks.

For price see supplement following page 48

LILLY'S MAKEMFAT HOG FEED

Makes Big Hogs of Little Pigs

Lilly's Makemfat is a high protein feed, contains abundance of mineral nutrients, more fat than in farm grown grain, and our tests have proven it superior to any other hog feed we have heretofore offered. It is palatable, has the proper laxativeness which is essential and prevents constipation usually resulting when wheat, barley, corn or other grains are fed alone. This feed is highly digestible, reasonable in price and contains well balanced proportions of digester tankage, oil meal, grain and cereal products. Many of the larger hog raisers use and boost LILLY'S Makemfat Hog Feed, which proves conclusively that the results obtained prove our claims for it. Packed in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S DIGESTER TANKAGE

Digester Tankage is very high in concentrates, and it takes but a very small amount to balance a ration up to the proper protein content. It is used to a great advantage at practically every age of the pig. If fed before and after farrowing, it will help the sow to produce a large milk flow and will keep her in good condition. Packed in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S GROUND FLAX SEED

Flax seed has been a favorite conditioner among horse and cattle men from time immemorial, and is without question one of the safest. Lilly's is pure flax seed ground without removing the oil. The amount to be used will vary according to the size of the animal, but generally four to eight ounces two or three times a week will keep the animal in excellent shape. Packed in 100-lb. sacks.

For price see supplement following page 48

LILLY'S COCOANUT MEAL

Used extensively by dairymen along the Pacific Coast. It may be used with advantage for swine and sheep, serving also as a part of the work horse ration. Packed in 100-lb. sacks only.

For price see supplement following page 48

THE BEST CALF MEAL
MADE—ALWAYS FIRST

LILLY'S OIL CAKE MEAL

Oil Cake Meal is another highly concentrated food, and is a valuable adjunct to any farm ration for cattle, horses, sheep and poultry. It should be fed with discretion for it is easy to overfeed any food that is high in protein. It makes a sleek coat and is slightly laxative. It should be mixed with other foods. Packed in 100-lb. sacks.

For price see supplement following page 48

LILLY'S SOY BEAN MEAL

Soy Bean Meal averages forty per cent protein, and should be a part of every ration fed to all live stock, on every farm in this section, for nothing we can offer will show a higher food value in proportion to its cost. It comes to us in the form of large cakes which we grind and grade into all sizes, from large nubbins for sheep feeding to a fine meal for mixing in mash. Sheep and poultry men should write us for prices on large quantities. Packed in 100-lb. sacks.

For price see supplement following page 48

PRICES OF LILLY'S FEEDS CHANGE

The prices of all Lilly's feeds change with the markets and those shown on our supplement may not prevail when your order reaches us. It is always best to get current prices before ordering. A postal brings them.

Poultry Feeds

LILLY'S HOLLY CHICK FOOD Results Have Proven Its Value

In selecting a ration for baby chicks, it must be borne in mind that they are infants, and that their digestive organs are extremely delicate. We cannot expect them to thrive upon foods that are unsuitable, unpalatable, and hard to digest. The food must be easily digested, must not contain anything that will be irritating, and must contain the correct elements to build bone, muscles, blood and feathers, without forcing of fattening. Wheat is the basis of our chick food—not corn and millet as many use. Lilly's Holly Chick Food is undoubtedly the most popular on the market today, it is the original dry grain chick food. The foundation of our success in manufacturing mixed poultry foods and the standard by which every other chick food is judged. Lilly's Holly Chick Food is composed of cracked grain graded to the proper size for baby chicks, and contains correct elements in the right proportion to form an ideal and complete ration when fed in connection with Lilly's Chick Mash. Full directions for caring for baby chicks are contained in bulletin number 100, which will be sent free upon request to any address. Packed in 10, 25 and 100-lb. sacks. For price see supplement following page 48

LILLY'S GROWING FOOD Keeps Growing Birds Active

Lilly's Growing Food is a mixed scratching ration composed of the proper grain feeds in the correct proportion. Can be converted into bone, muscle and flesh in the shortest possible time, and consequently with the least expense. Growing food should be begun about the fourth or fifth week, depending largely upon the size and vigor of the chicks. At that age, they have outgrown chick food, and it is no longer a profitable feed, but they are not old enough for an adult ration. It is for this stage that we have Lilly's growing food and Lilly's Growing Mash. These are to be fed together as the combination will produce broilers or laying pullets in the least possible time at a minimum expense. Practical poultry men know the value of this, and realize that their profits depend upon feeding growing food and growing mash at this stage of the chick's life. Bulletin No. 100, telling how to feed it, free upon request. Packed in 10, 25 and 100-lb. sacks. For price see supplement following page 48

LILLY'S SCRATCH FOOD The Standard Mixed Grain Food

The term "Scratch Food" as applied to poultry feeds was originated by Lilly's and our Scratch Food is composed of clean, whole grain properly proportioned to supply the necessary protein, carbohydrates and fat according to season. In summer when the weather is warm, we cut down on the corn and other heat and fat producing grains. In the winter time we increase these amounts. Attention is paid to the number of yolks and whites a ton of Lilly's Scratch Food will produce, and if scratch is varied in any manner, Lilly's Egg Mash is also changed accordingly so that the poultry men feeding our egg foods are assured of a real balanced ration. Care should be taken not to feed too heavily of scratch food, so that fowls will clean up every grain. If fowls are fed so heavily as to leave barley and kaffir corn untouched, it is because they are securing sufficient food in the way of corn and wheat. Do not let the fowl feed according to her own judgment, use yours, because under her own guidance, the hen originally laid 15 or 30 eggs per year—now under man's care on a forced ration, she can be made to produce up to 300 eggs or over per year. This ought to be sufficient reason for scientific feeding. Insist on Lilly's Scratch Food and Egg Mash, then be sure and feed it properly. There is no shell, grit or waste material in Lilly's Scratch Food, it is easily the cleanest scratch on the market. Packed in 10, 25 and 100-lb. sacks. For price see supplement following page 48

LILLY'S RECLEANED FEED WHEAT

Contains only bright, well ripened grain. Packed in 125-lb. sacks only.

For price see supplement following page 48

LILLY'S CLIPPED BARLEY

Recleaned whole barley with the beards closely clipped for poultry feeding. Packed in 110-lb. sacks only.

For price see supplement following page 48

LILLY'S POULTRY OATS

A special grade of short, plump, high germinating oats with thin hulls especially selected for sprouting and poultry feeding. Packed in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S KAFFIR CORN

Clean, ripe, kaffir for poultry feeding. Packed in odd weight sacks only.

For price see supplement following page 48

LILLY'S FEED BUCKWHEAT

A good grade of buckwheat re-cleaned for feeding purposes. Packed in odd weight sacks only.

For price see supplement following page 48

LILLY'S HOLLY PIGEON FOOD

is composed of various grains and feeds pigeons relish and thrive upon. This mixture contains no grit, shell, charcoal or salt. Packed in 10, 25 and 100-lb. sacks. For price see supplement following page 48

I have been using your Chick Food and I never saw anything like it. The best yet for chicks.
J. E. VAN HORN,
Mar. 16, 1920. Aberdeen, Wash.

LILLY'S WHOLE CORN

Good, heavy, yellow, Eastern grown corn. Packed in 110-lb. sacks only.

For price see supplement following page 48

LILLY'S CRACKED CORN

Crushed yellow, Eastern corn with all the fine particles cleaned out. Packed in 100-lb. sacks only.

For price see supplement following page 48

Poultry Mash

LILLY'S CHICK MASH

An Ideal Starting Mash for Chicks

No poultry man should attempt to raise chicks without the use of Lilly's Chick Mash. With modern methods of raising chicks in large numbers, comes the necessity of systematizing methods that labor and expense may be reduced, to accomplish this, the poultry men have generally adopted mash in connection with grain food. Lilly's Chick Mash is carefully prepared from suitable ground grain and animal matter for the requirements of tender chicks. This mash is designed to be fed dry in hoppers, but if preferred, a moist mash can be fed every day or so. Add just enough water or buttermilk to make it crumbly. (Ask for free bulletin number 100 on baby chicks, contains much valuable information.) Packed in 10, 25 and 100-lb. sacks.

For price see supplement following page 48

LILLY'S GROWING MASH

Makes a Quick, Healthy Growth

After the chicks are five to seven weeks old, they can assimilate a somewhat more fibrous food, and a change should gradually be made from Lilly's Chick Mash to Lilly's Growing Mash. Mash foods are easily assimilated by the growing chicks, and consequently maximum growth is secured in the quickest time by the feeding of mash. Packed in 10, 25 and 100-lb. sacks.

For price see supplement following page 48.

LILLY'S EGG MASH

For Maximum Egg Production

All authorities agree that in order to secure the maximum number of eggs from fowls, it is absolutely necessary that mashes high in protein constitute at least fifty per cent of their food. Composed as it is of clean, fresh, easily digested foods such as fish meal meal, soy bean meal, cocoanut meal, feed corn meal, pea meal and cereal products, no poultry man can get the maximum amount of eggs, unless he uses it. Fed with Lilly's Scratch Food, it is only necessary to supply green food, grit, shell, charcoal and water to complete the ration for maximum results. Packed in 10, 25 and 100-lb. sacks.

For price see supplement following page 48

LILLY'S MILK MASH

The Great Health Food

Will give you maximum results throughout the lifetime of your birds. For growing chicks and laying hens, it is unexcelled, because it insures health and vigor in the flock. The lactic acid in the buttermilk besides being easily digested and highly nutritious acts as an appetizer tonic and stimulant, and is an excellent conditioner. It is economical and safe to feed, as the buttermilk we use in preparing this mash, does not contain chemical preservatives, and is thoroughly wholesome. Put up in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S MOLTING MASH

A great need has been felt for years for some prepared food that would aid chickens in growing feathers after the annual molt. We have prepared a molting mash that will assist materially in bringing hens through the molting period easily and quickly. Packed in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S BLOOD MEAL

Blood Meal is richer in protein content than any other food used for poultry, therefore it is necessary to use great care in feeding it. Packed in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S FATTENING MASH

Lilly's Fattening Mash consists of the correct materials in the right proportion to produce the greatest amount of flesh in the shortest possible time, and at the same time keeps the birds in perfect health. It is to be fed in the form of a soft mash. Packed in 100-lb. sacks only.

For price see supplement following page 48

Darling's HIGH PROTEIN MEAT SCRAPS

These were the first high grade meat scraps manufactured and among the few to be maintained at their standard of excellence. The protein content is guaranteed by us not to be less than fifty per cent. Packed in 100-lb. sacks only.

For price see supplement following page 48

LILLY'S MEAT SCRAPS

The Quality Meat Food

When confined, birds must be provided with animal matter in some form. The most convenient and usually the cheapest form is a good grade of meat scrap. Lilly's Meat Scrap is the best grade of Western commercial scrap that it is possible to get. Packed in 10, 25 and 100-lb. sacks.

For price see supplement following page 48

LILLY'S FISH MEAT MEAL

High in Protein, Low in Cost

Fish Meat Meal is an excellent and economical meat food for poultry. It is used by most of the prominent poultry men, and is endorsed by the experiment stations. Lilly's Fish Meat Meal is a clean, wholesome product, very high in protein, considerable higher than most meat scraps, and all the protein that it contains is in available form. Packed in 10 and 100-lb. sacks.

For price see supplement following page 48

LILLY'S ALFALFA LEAVES AND BLOSSOMS

As the name implies, these are the leaves and blossoms of Alfalfa stripped from the stems, dried and finely cut for poultry feeding. 50-lb. sacks only.

For price see supplement following page 48

Grit, Shell, Bone and Charcoal

LILLY'S GRANULATED BONE

For Bone, Muscle and Feather Building

Lilly's Granulated Bone comes as near being green bone as can be kept without becoming moldy. It is made from fresh, clean slaughter house bones, steam cured, ground and screened to the correct sizes for poultry. The moisture is extracted, leaving the phosphates, lime, protein and fats. It will keep indefinitely if stored in a dry place. Scratch food size. Put up in 10 and 100-lb. bags.

For price see supplement following page 48.

LILLY'S GRANULATED CHARCOAL

For Poultry, Hogs and Other Stock

Charcoal is valuable as a regulator, blood purifier, aid to digestion, and a preventative of bowel trouble. It is equally valuable for hogs and other stock. Made from soft wood. It is screened to two sizes: Coarse Granulated Charcoal for hens, hogs, etc., and fine Granulated Charcoal for chicks and other young poultry, and for mixing with mash foods. Please state which is wanted. Put up in Cartons (about 4 lbs.), and 50-lb. bags.

For price see supplement following page 48.

LILLY'S CRYSTAL GRIT Aids Mastication

Lilly's Crystal Grit is as hard as flint, clean and of uniform size. It is pure granite rock, ground and screened to the proper size and being inlaid with mica the edges remain sharp as long as a particle remains in the gizzard. Grit should be kept before the birds at all times and it is best served in grit and shell boxes. It is made in two sizes, fine for chicks and ducks; coarse for mature fowls. Put up in 10 and 100-lb. bags.

For price see supplement following page 48.

LILLY'S EASTERN OYSTER SHELL

Lime In Its Best Form

Shell is valuable in proportion to the amount of lime it contains. Our Eastern Oyster Shell carries a very high percentage of pure lime and to those poultry men who believe the best is none too good, this very fine grade of shell will appeal. Free from dirt and fine particles. Put up in 10, 25 and 100-lb. bags.

For price see supplement following page 48.

LILLY'S BLUE POINT OYSTER SHELL

This is the very best grade of clean Western oyster shell obtainable and is claimed by some poultry men to be equal to the Eastern shell. It is more reasonable in price and in every way a satisfactory shell. Put up in 100-lb. bags only.

For price see supplement following page 48.

LILLY'S STAR SHELL

A Dependable Source of Lime

A combination of Oyster, Clam and Sea Shells, rich in lime and much cheaper than straight oyster shells. Poultry size. Put up in 100-lb. bags only.

For price see supplement following page 48.

LILLY'S PEARL CLAM SHELL

For Mastication and Egg Shells

This is pure hard clam shell crushed and graded to poultry size, rich in lime materials for egg shells. Put up in 100-lb. bags only, fine or coarse; please state which is wanted.

For price see supplement following page 48.

LILLY'S

Poultry Remedies

Satisfaction Guaranteed

Prices Quoted
are F.O.B. Seattle
or Portland

LILLY'S LICE AND MITE LIQUID

It is ready for use and does not require diluting. It is best applied with a small spray pump and should be sprayed on roosts, dropping boards, nests, and all places where mites can hide, giving special attention to cracks and corners. It must not be applied directly on the birds. It should be applied at frequent intervals, to kill the young as fast as they hatch. It should be used as a preventive; don't wait until the insects get a start. Qt., 60c; ½ gal., 90c; gal., \$1.70; 5 gal., \$5.00.

LILLY'S LICE OINTMENT

Effectually Destroys Head Lice on Young Chicks

Young chicks are very subject to head lice. These parasites attach themselves to the young and tender birds at the base of the skull, and are responsible for much mortality among chicks. Lice Powder is useless to dislodge them for they sink their heads deep into the birds. Per can, 25c.

LILLY'S LICE POWDER

Powder is best. Before a hen is set, she should be dusted thoroughly. The nest should also be dusted. This will avoid three weeks' torture for the hen, she will not desert her nest, and the chicks will not inherit lice. Brooders and houses where chicks are kept should be dusted frequently.

Carton (about 1 lb.), 30c

LILLY'S INTESTINAL AND LIVER REMEDY

For White Diarrhoea, Worms, Liver and Intestinal Trouble

Prevents and cures the ailments of the liver and intestinal tract of Baby Chicks. Before offering LILLY'S Intestinal and Liver Remedy we convinced ourselves positively that it would do the work. There are directions on each bottle. It is a liquid and cannot be mailed.

Price, 7-oz. bottles, each, 25c

LILLY'S ROUP REMEDY

Roup is the most common and most easily contracted of all diseases among poultry. It is a germ disease and the source is usually a cold. If colds are attended to promptly they can be easily cured, but if neglected they are liable to develop into roup. The symptoms of roup are froth and bubbles in the corners of the eyes, sneezing, and a watery discharge from the eyes and nose. When the head swells, eyes bulge out, cheesy masses form in the throat, mouth and beneath the eyelids, and there is a bad odor, the disease is known as diphtheric roup. It is highly contagious. Lilly's Roup Remedy prevents and cures Roup, Black-head, White Comb, Canker, Sore Head, and other bacteria diseases.

Price, 25c.

LILLY'S POULTRY PEPPER

In cold, wet weather it gives tone to the system, puts vim and snap into the birds, and is a great help to egg production.

Price: Carton (about ¼ lb.), 25c

LILLY'S SODIUM FLUORIDE

is recommended by the U. S. Government as the best all around cure for lice on poultry. Only a very small quantity is required for each fowl if used dry. It is also soluble in water and is probably more generally used as a dip on large chicken ranches. Directions on each package.

4-oz. pkg., 25c; 8-oz. pkg., 50c

PRE-EGG-SERVER—WATERGLASS

Waterglass is recommended by the U. S. Agricultural Department and by that of foreign countries as the best method of keeping eggs. The package shown in this cut contains sufficient material to keep about 15 dozen eggs in a five gallon crock.

With eggs as high as they have been for the past several years, no one is overlooking the opportunity of putting up a few dozen or more during the spring when the price is at its lowest point.

Price, 20c

LILLY'S Fly Liquid

Comfort for Stock, Profit for the Owner

If dairymen could only realize the enormous losses caused by flies they would quickly exert every effort to exterminate the pests. Nothing is more loathsome and filthy than the common fly; nothing is saced to his germ-laden feet and antennae. Even the most tender-hearted will have no regrets for the destruction of the fly, for no one has been able to discover any service that it has rendered mankind. He unmercifully robs the dairyman and stockman of great amounts of money, for cows cannot secrete milk, and beef stock cannot put on flesh while fighting flies. Horses and other stock are less efficient and it costs more to keep them in condition when annoyed by flies. They are a nuisance to the housewife, and much sickness must be traced directly to them.

Most of the fly troubles can be overcome by the use of Lilly's Fly Liquid. If sprayed on cows or other stock once or twice a day, flies will not annoy them. By spraying screens, stable doors, manure piles, garbage cans, and other places where flies congregate, they will be eliminated and breeding curtailed.

Unless you protect your stock you are spending money for feed to fight flies and mosquitoes. It is impossible to get away from this fact. Part of it the flies get by sucking the blood and the rest with the energy they spend fighting pests. Therefore, these same flies keep milk out of your pail, keep your stock scrawny, discontented and make it unpleasant for all concerned. Price F.O.B. Seattle or Portland.

Qts., 60c; ½ gal., 90c; gal., \$1.70; 5 gal., \$5.00

Pratts Poultry and Animal Regulators and Remedies

FIFTY YEARS THE STANDARD

PRATT'S ANIMAL REGULATOR

This is the original and pioneer Stock Regulator of America. It keeps horses well and strong, improves their wind, and makes their coat sleek and glossy.

Cows give more and richer milk, and their calves are strong and healthy. Steers fatten in half the time.

Hogs are raised and fattened quickly and kept free from disease. Sheep are kept healthy, and their meat and wool improved by its use. Test it on our guarantee to do the work or money refunded.

Pkgs., 30c, 60c, \$1.20; 12-lb. pails, \$3.00; 25-lb. pails, \$4.25; 100-lb. bags, \$12.00.

Write for Pratt's Poultry Book—free.

PRATT'S HEAVE, COUGH AND COLD REMEDY

It cures by strengthening the digestive and respiratory organs, and counteracts the inflammation and irritation.

Per pkg., 70c

PRATT'S DISTEMPER AND PINK EYE REMEDY

It goes direct to the cause of the disease. Per pkg 75c.

Pratt's POULTRY DISINFECTANT

A good disinfectant is almost as much of a necessity on the poultry plant as poultry feed. Used regularly it keeps the buildings and equipment in sanitary condition, it maintains the health of the flock and prevents disease loss—it saves worry and trouble. All this at ridiculously low cost.

Qt., 70c; ½ gal., \$1.35; gal., \$2.50

PRATT'S HEALING OINTMENT

A splendid antiseptic ointment for man or beast. Keep a box on hand for cuts, burns, sores, galls, scratches, eczema, etc.

Per pkg., 35c

PRATT'S HEALING POWDER

A guaranteed remedy for harness galls, sores, grease heel, bleeding ulcers, etc. It will arrest hemorrhage and check blood flow. Dirt and dust cannot get into wounds, as the Powder forms a coating over them.

Per pkg., 30c

PRATT'S ROUP REMEDY

A sure preventive and guaranteed cure for roup, colds, canker, catarrh and similar diseases. (Tablets or Powder) Per pkg., 30c

PRATT'S LINIMENT

For man or beast. The best thing in the world for lameness, sprains, bruises, thrush, kicks, shoe boils, etc.

Bottle, 35c

PRATT'S BAG OINTMENT

Especially valuable for healing "caked udder" in cows. Per box, 40c

PRATT'S DIP AND DISINFECTANT

An all-year round necessity on every farm and in every home. Prevents contagious diseases, killing the germs. Destroys insects and vermin on livestock, in barns, poultry houses, etc.

Qts., 70c; ½ gal., \$1.35; gal., \$2.50

PRATT'S WORM POWDER

Is a special preparation for destruction of all kinds of worms in horses, cows, hogs and sheep. Per pkg., 60c

PRATT'S COW REMEDY

Nature's unrivalled assistant to make and keep cows well, to increase the flow of milk and to prevent Abortion, Barrenness, Garget, Milk Fever, Scours, Indigestion, Liver and Kidney Complications.

Per can, 65c, \$1.30 and \$3.00

PRATT'S POULTRY REGULATOR

A positive tonic and conditioner for poultry of all kinds and ages. A health-builder and health-preserver. Not a food. Pratt's Poultry Regulator makes and keeps poultry healthy, vigorous and productive. It shortens the molt, sharpens the appetite, improves digestion and circulation, hastens growth and increases egg-production. It saves feed by preventing waste due to poor digestion. It prevents disease by keeping the birds in condition to resist the common ailments.

Per pkg., 30c, 60c, \$1.20; 12-lb. bags, \$1.75; 25-lb. bags, \$3.25; 50-lb. bags, \$5.25; 100-lb. bags, \$9.50.

Write for Pratt's Almanac—free.

PRATT'S LICE SALVE

One application is effective for a considerable time.

Tubes, 30c

PRATT'S HEAD LICE OINTMENT

A mild, but efficient, ointment for use on young chicks.

Per can, 35c

PRATT'S RED MITE SPECIAL

A sure-death liquid for exterminating the blood-sucking mites.

Qt. cans, 65c

PRATT'S POWDERED LICE KILLER

A fine powder for dusting old and young stock.

Per pkg., 30c and 60c

PRATT'S SCALY LEG REMEDY

This disease not only impairs the vitality of the birds but, also, ruins their appearance. Pratt's remedy will keep the legs clean and healthy.

Per pkg., 35c

PRATT'S CONDITION TABLETS

An easy and effective remedy for "run-down" birds. Keeps show birds in condition and prevents colds, roup and liver trouble.

Per pkg., 30c

PRATT'S BRONCHITIS REMEDY

A quick and effective remedy, fully guaranteed.

Per pkg., 30c

Pratt's WHITE DIARRHOEA REMEDY

Guaranteed to save the chicks and to cure completely when used promptly. A valuable help in preventing the heavy chick losses usually experienced.

Per pkg., 30c

PRATT'S CHOLERA SPECIAL

A sure remedy for cholera, indigestion, sour crop, dysentery, diarrhoea and bowel trouble. Guaranteed to satisfy or money refunded.

Per pkg., 30c

PRATT'S CHICKEN-POX REMEDY

Don't risk having your entire flock ruined.

Per pkg., 35c

PRATT'S GAPE REMEDY

Guaranteed to bring prompt relief.

Per pkg., 35c

PRATT'S HOG TONIC

For steady growth and quick fattening.

Its use insures more weight and in a shorter period of time with corresponding saving in feed, etc. These results are guaranteed. Test it at our risk.

Per pkg., \$1.20; 25-lb. bags, \$2.50; 100-lb. bags, \$9.50.

Incubators

THE QUEEN LINE

The construction is of California Redwood which is conceded by authorities to be less effected by moisture and heat than either pine or cypress. It is double walled throughout and heavily insulated between the walls.

The Hot Water Heating Tank is of heavy copper "not copperized tin" and has the center crosspipe to insure even distribution of heat and eliminate cold spots so troublesome in some makes of machines.

The Regulator is simple in construction, accurate to the fraction of a degree and easily adjusted by anyone.

The Thermostat Wafer, which is the heart of the regulator, is of the double type, four-inch size, and is extremely sensitive which is very important.

The Lamp, which is the best type of incubator lamp on the market. is suspended in a heavy galvanized iron jacket which eliminates any danger of fire and helps greatly to conserve heat and keep a uniform temperature.

Queen Incubators are Made in Eight Sizes:

No. 1—	85 Egg	—The Baby Queen, weight 80 lbs.....	\$ 32.00
No. 2—	135 Egg	—The Beginner's Queen, weight 95 lbs.....	45.00
No. 3—	180 Egg	—The Farmer's Favorite, weight 105 lbs.....	55.00
No. 4—	275 Egg	—The Duck Queen, weight 142 lbs.....	67.50
No. 5—	400 Egg	—The Money Maker, weight 185 lbs.....	81.00
No. 25—	600 Egg	—The Hatchery Favorite, weight 248 lbs.....	120.00
No. 35—	800 Egg	—The Jumbo Queen, weight 325 lbs.....	155.00
No. 45—	1000 Egg	—The Mammoth Queen, weight 450 lbs.....	190.00

THE FARMER'S FAVORITE BABY CHICKS

If you wish to buy baby chicks let us know. We have purchased the output of a number of hatcheries in and around Seattle and will be able to give you baby chicks from the very best of stock.

Baby chicks are very likely to be quite scarce when spring comes. As this catalog goes to press a great many of the large hatcheries are booked up for the major portion of their output. This applies especially to March and April deliveries as most people prefer to have their chicks at that time. Get in touch with us early and avoid disappointment. A postal brings our prices.

THE IDEAL INCUBATOR

Is a Hot Water machine with copper tank and coil built especially for Pacific Coast conditions and is designed to meet the requirements of the small poultry man who wishes to hatch only a few chicks but wants them all at one time and does not care to wait for hens to become broody. It is also used a good deal by hatchers having larger machines to set at the same time and who transfer the eggs to the larger machines after the unfertile eggs have been candled out. Capacity, 60 eggs. Shipping weight, 65 lbs.

F.O.B. Seattle or Portland, \$15.00

TYCO'S INCUBATOR HYGROMETER

The importance of a correct percentage of moisture during incubation, has made the Tyco Incubator Hygrometer, as necessary as the Tyco Incubator Thermometer. Neither takes the place of the other, but together they give the practical poultry man all the facts required for successfully regulating the heat and moisture of an incubator. Stands 3 1/4 inches high and 4 1/2 inches wide over all.

Packed each in a box.
Price each..... \$1.75

UPRIGHT INCUBATOR THERMOMETER

It is preferred by many poultrymen because the bulb is at the same level as the egg, and the scale is plainly visible from the door.

No. 1065—Price, each.....75c

ELECTRIC INCUBATOR THERMOMETER

It is a great convenience, to be able to read the thermometer at night, or where the lighting is poor. It can be used in any make of incubator. Complete with battery.

No. 1006—Price, each.....\$3.50

THE STYLE K QUEEN

The Style K line of Incubators, while made by the Queen Incubator Co., is not of the same high standard as the regular Queen line, though they embody all the principles that have made the Queen line so successful and famous. However, they are built to sell at a lower price to people to whom price is an important consideration.

They are built only in the three sizes generally in demand in this type of construction.

No. 20—	70 Egg Capacity, Weight 46 lbs.....	\$22.50
No. 21—	130 Egg Capacity, Weight 85 lbs.....	35.00
No. 22—	220 Egg Capacity, Weight 120 lbs.....	45.00

EGG TESTER

Simple, convenient, practical, and cheap. Used to test the fertility of eggs after a week's incubation. It may be used on any lamp with a No. 2 burner, or over an electric light or candle.

No. 1248—Weight, 1/2 lb.....35c

CERTIFIED INCUBATOR THERMOMETER

We handle the famous and reliable Tyco brand of thermometers. Guaranteed for accuracy. Can be suspended on a wire or used with a stand.

Four-inch black oxidized brass scale, with engraved mercury filled tube. Packed one in a box with certificate.

No. 1007—Price, each.....\$1.00

STANDARD INCUBATOR THERMOMETER

A thoroughly tested and dependable instrument, and of the type most universally used. Four-inch black oxidized brass scale. White filled figures and graduated mercury filled tube. Packed one in a box.

No. 1064—Price, each.....85c

METAL-BACK BROODER THERMOMETER

Four and one-half inch silvered brass scale, black filled figures and graduation, plain mercury filled tubes. Approximate scale range 10 degrees to 100 degrees. Packed each in a box.

THE KRESKY BROODER STOVE or PRIDE OF PETALUMA

The stove that gets results from the South Sea Islands to Alaska's frigid shores. Burns coal oil, gasoline or any kind of fuel oil. Is equipped with patented Automatic Oil Regulator. The heat is released from the ventilating cone center of the stove between two radiators and applied by the action of Fresh Air as a means of heat conveyance. Will successfully brood up to 1500 chicks without any danger of crowding or piling up. If interested write for special booklet. Shipping weight, 80 pounds.

No. 4B—orthwest Model, new cone ventilating type.....\$65.00
No. 2B—Pride of Petaluma..... 62.50

PRIDE OF PETALUMA

INCUBATOR AND BROODER LAMPS

Number One Lamp. Consists of metal chimney with mica window, galvanized oil fount and sun hinge burner and 5/8-inch wick. Diameter of fount, 6 inches; depth, 2 3/4 inches; height over all 9 inches; weight, one pound.

No 1300—Lamp complete as described.....\$1.50

Never-smoke or Chimneyless Brooder Lamp. So constructed that it does not require a chimney. There is an open reservoir on top of the oil fount that can be filled with water as a precaution against fire. Diameter of fount, 6 inches; height, including burner, 8 inches. Size No 2 only takes 1-inch (No. 1341) wicks.

No 1305—Lamps complete, as rescribed.....\$1.80
No. 1315—Fount only 1.00
No. 1325—Burner only80

ECONOMY HOVER

Convenient—Safe—Economical

Metal portable hovers are superior to the old wooden brooders for the reason that they raise a larger percentage of healthy chicks, are more

sanitary, safer, more economical and more convenient. The Economy Brooder Hover is complete in itself and can be used in any room or building. No platform, false floor, or other preparation is necessary. Made in two sizes.

No. 1—Economy Brooder Hover—75 chicks, 14 lbs.\$9.50

No. 2—Economy Brooder Hover—150 chicks, 32 lbs.\$13.00

OAKES ELECTRIC HOVER

Where electricity is available this is the safest, simplest, most convenient and economical hover. The current consumption is very low and cuts off entirely when the desired degree of heat is attained. It is made entirely of metal except the insulation and curtain and will last for many years. Diameter, 22 inches; capacity 125 to 150 chicks.

Price (shipping weight, 30 lbs.).....\$22.00

RELIABLE BLUE FLAME COLONY BROODER

Burns Coal Oil, is self-regulated, economical, simple and convenient to operate. Has a visible oil feed, is wickless, therefore does not smoke or cause trouble; it has an automatic ventilator at the top of the canopy which always insures pure air for the chicks.

Size 00—Diameter, 18 in.; Weight, 12 lbs.; Capacity 150 chicks....\$11.00
Size 0—Diameter, 30 in.; Weight, 40 lbs.; Capacity, 350 chicks.... 21.50
Size 1—Diameter, 42 in.; Weight, 45 lbs.; Capacity, 500 chicks... 23.50
Size 2—Diameter, 52 in.; Weight, 55 lbs.; Capacity, 1000 chicks.. 27.50

QUEEN COLONY BROODER

The Queen Colony Brooder is a new and improved design of coal burning brooder stove. It is self-regulating by thermostat and once adjusted needs very little attention. The check draft rests on top of the stove and opens outward when fire is too warm, thus giving a gentle inflow of air to retard the heat. While the opening of the draft to increase the fire is located at the top of the stove, it opens into the fire at the base through an opening extending down the side to the bottom. This feeds the draft into the fire from underneath with no opening below the hover.

No. 1—Diameter, 42 in.; Shipping Weight, 75 lbs.; Capacity, 600 chicks....\$27.00

No. 2—Diameter, 52 in.; Shipping Weight, 90 lbs.; Capacity, 1200 chicks.. 33.00
4-inch Stove Pipe, per 24-in. length, each.....50c

MARVEL COLONY BROODER

Burns Coal, Coke or Gas

The Marvel we believe to be the best stove made for this purpose. It is made of heavy cast iron, stands 27 inches high and the fire pot holds enough coal to keep a fire all through a very cold night. The regulator is easily adjusted and very reliable. A special style of building is not necessary, any room or building may be used. Diameter, 52 inches; Weight, 85 lbs.; Capacity, 1000 chicks; Price, each\$26.50
3-inch stove pipe per 24-inch length, each.....50c

This damper regulates your check draft and the direct draft to your fire.

Poultry Feeders

STAR JAR FOUNTAIN AND FEEDER

Will fit pint, quart or one-half gallon Mason jar. Manufactured of one piece of non-rusting metal. No parts to come unsoldered. Leaking impossible. Convenient, cheap and sanitary. Provides greater drinking surface than the round fountain. Little chicks can't get drowned. Can be used for feed as well as water. Manufactured in one size only. If by mail 5 cents each extra for postage and packing.

No. 1232—o jar; Weight, doz., 4 lbs.; Price, each, 15c; Doz. \$1.50

SANITARY FEEDING TROUGHS

Can be used for feed, mash or water. Barrel top prevents wasting of feed and if used for water, does away with the little chicks drowning. The feed saved by using this trough will more than pay for itself in a few weeks. Made of the best grade galvanized iron in three sizes:

No. 1221—Size, 12 in. long; Weight, 1 lb.; Price, each...\$.70
No. 1222—Size, 18 in. long; Weight, 2 lbs.; Price, each... .95
No. 1223—Size, 24 in. long; Weight, 3 lbs.; Price, each... 1.25

AUTOMATIC FEEDER AND EXERCISER

Increases egg production and fertility of the eggs. Automatic Feeders save more time and more feed than any other appliances in the poultry yard. The chickens scratch and exercise in order to get it; therefore, you can rest assured that you will get the maximum efficiency out of your hens at a minimum expense. Manufactured in two sizes, as follows:

No. 1252—Size, 8-qt.; Weight, 8 lbs.; Price, each...\$1.85
No. 1253—Size, 1/2-bu.; Weight, 6 lbs.; Price, each... 2.50

GRIT AND SHELL BOXES

Grit, shell and charcoal have now become a recognized essential part of the diet insuring healthy fowls. They cannot be more economically supplied than in one of our inexpensive compartment boxes. Can also be used as a feed hopper for little chicks. Made of heavy galvanized iron in three sizes:

No. 1245—For Baby Chicks, square bottom, two compartment; Wt., 1 lb. ea.; Price, each...55c
No. 1299—For Grown Birds, round bottom, three compartment; Wt., 3 lbs. ea.; Price, each...\$1.45
No. 1290—For Grown Birds, round bottom, four compartment; Wt., 4 lbs. ea.; Price, each...\$1.80

ROUND BABY CHICK FEEDER

Pure food for the baby chicks. A great feed saver, as the little chicks cannot get into it and contaminate the feed. Cannot be upset. Can also be used for dry or moist mash. This is a practical, well-made feeding device that will last for years. Manufactured of galvanized iron in two sizes.

If by mail 5 cents each extra for postage and packing.

No. 1211—Size, 6-in. diameter; Wt., doz., 5 lbs.; Price, each, 30c; Doz., \$3.00.

No. 1212—Size, 8 1/4 in. in diameter; Wt., doz., 10 lbs.; Price, each, 45c; Doz., \$4.50

FEED AND WATER DISH

Made of galvanized iron. Rolled-in top prevents wasting. Dish held to the floor by simple locking device easy to remove for cleaning. Impossible to tip over.

No. 1246—Weight, doz., 7 lbs.; Price each, 40c; Doz., \$4.50.

SCRAPER AND CLEANER

Manufactured of one piece galvanized iron. Just the thing for cleaning out brood coops, nests, and dropping boards. You can get in the corners which are most always overlooked. A very useful tool around every poultry house.

No. 1247—Size, 10 in. long; Weight, 1 lb.; Price...\$0.30

WATER AND FEED CUPS

Holds about one pint and hangs straight when applied to the coop. Can be attached to any exhibition or shipping coop. One size only. No. 1261—Weight, doz., 8 lbs.; Price, each, 25c; Doz...\$2.75

POULTRY VEGETABLE RACK

Manufactured from galvanized iron and wire. For feeding roots, beets, cabbage, sprouted oats, etc. A big time and feed saver. Every breeder needs one or more. No. 1244—Weight, 1 lb.; Price, each...95c

DRY MASH HOPPER

The curved bottom of the Hopper keeps the feed within easy reach of the birds. The gradual enlargement from the top to base prevents clogging. The wire grid and wires running from the flange through the wire grid prevent any chance of the fowls throwing out or wasting the feed. The sloping cover prevents the birds from roosting on the Hopper, and when both covers are closed, it is rat and mouse proof. A trial will convince you that it is a Hopper of the greatest merit. Manufactured of heavy galvanized iron in three sizes:

No. 1235—Size, 8 1/2 in. wide; Wt., 4 lbs.; Price, each...\$2.10

No. 1236—Size, 12 in. wide; Wt., 5 lbs.; Price, each...\$2.75

No. 1237—Size, 24 in. wide; Wt., 12 lbs.; Price, each...\$4.20

Prices are all F. O. B. Seattle or Portland

Poultry Fountains

WALL FOUNTAIN

A convenient style of fountain. Very popular with some breeders. Can be hung upon the walls of the poultry house, out of the litter.

Made with removable bottoms so that all parts can be easily cleansed, greatly adding to their sanitation and durability. Easily filled. Manufactured of galvanized iron.

No.	Size	Weight	Price ea.
1226	About 1 gal.	2 lbs.	95c

This style made with permanent bottoms. Lay down to fill. A strong, substantial wall fountain at a low price. This fountain appeals to many breeders and is especially adapted for watering pigeons. Manufactured of galvanized iron.

No.	Size	Weight	Price ea.
1274	5-gal.	6 lbs.	\$2.50

SQUARE BROOD COOPS

A complete home for the hen and her brood. Manufactured with removable bottoms for sanitation. A combination door for ventilation, to keep the hen inside, give the little chicks their liberty, for absolute protection against animals and weather. Collapsible. Manufactured of heavy galvanized iron, in one size only.

No. 1249—Weight, 12 lbs., each.....\$4.00

BOTTOM-FILL FOUNTAIN

Made in two pieces. Easily cleaned and owing to its shape it will not burst from freezing. This fountain fills the breeders needs for an inexpensive fountain. Made of the best grade of galvanized iron, in three sizes:

No.	Size	Weight	Price ea.
1219	1 quart	1 1/2 lbs.	\$0.45
1220	1/2 gal.	2 lbs.	.55
1224	1 gal.	2 1/2 lbs.	.95

AUTOMATIC FAUCET FOUNTAIN

An automatic faucet attaching directly to the supply pipe. Adjustable to work on any size water pan or trough furnishing a constant supply of fresh water. Thousands used by large poultrymen. Send for circular if interested.

No. 1280—Shipping weight, 1 lb. Price.....\$2.00

Leg Bands

NUMBERED ADJUSTABLE BANDS

Made of aluminum. Have large raised figures. Numbered from 1 to 999, adjustable to fit any breed of chickens. Packed 100 to the box. Price per 100, 85c; per 1,000, \$7.50.

SPIRAL CELLULOID BANDS

Six colors. Blue, Red, Green, White, Orange and Black. Any color, postpaid:

For Pigeons and Baby Chicks—100 for 75c; 1,000 for \$6.50.

For Light Breeds—100 for 85c; 1,000 for \$7.50.

For Heavy Breeds—100 for \$1.00; 1,000 for \$9.00.

TOP-FILL FOUNTAINS

Fill in the morning and your chickens have an all day's supply of pure water at just the right temperature.

The double wall keeps water cool in summer and retards freezing in winter. No valves to get out of order. Thoroughly sanitary and as easily cleaned as an ordinary pail. Fills from the top. Does away with slopping over when being filled. Can be hung up out of the litter. The square pan also affords drinking facilities for two pens at the same time. The most popular fountain on the market.

Manufactured of heavy galvanized iron in three sizes, and packed in individual containers.

No.	Size	Weight	Price ea.
1201	1 gal.	4 lbs.	\$2.20
1202	2 gal.	5 lbs.	3.10
1204	4 gal.	8 lbs.	4.15

BROODER FOUNTAINS

Sets in corner of brooder. Takes up little room. Can't be upset. Absolutely sanitary, as you can get at any part of it to clean.

No. 1200—1 quart capacity, each.....\$0.55

DROP BOTTOM WALL FOUNTAIN

Manufactured from Galvanized Iron. May be hung up on the wall out of the dirt and litter. Nothing to get out of order. Easy to fill and easy to clean. When filled, two, back to back, may be carried in each hand.

No.	Size	Weight	Price ea.
1240	2 quart	1 1/2 lbs.	\$1.10
1241	1 gal.	2 1/2 lbs.	1.35
1242	2 gal.	3 1/2 lbs.	1.65

Garden Hose

The Garden Hose we offer is all guaranteed for one year from date of purchase.

No. 1025—Special Caponizing Set.....5.00

Prices are all F.O.B. Seattle or Portland.

Beehives and Apiarian Equipment

LEWIS BEEWARE

Is manufactured at Watertown, Wisconsin, and is guaranteed to be the finest quality and workmanship made anywhere, and has been recognized as such for 47 years.

The line is a complete one and we carry an ample stock of the full line at all our Stores and Branch Houses.

To fully illustrate and describe the complete line would take too much room from the other subjects in this catalog so we issue a "SPECIAL BEE SUPPLY CATALOG" of forty pages which we are glad to send free to any bee keeper or interested person.

This special Bee Supply Catalog is a complete beekeepers' guide and should be in the hands of every beekeeper. Every article is illustrated, described and priced and the average Western beekeeper can glean a priceless fund of knowledge and information from its pages. Write for your copy today.

WESTERN MADE BEE HIVES

For those of our customers who must have low priced equipment we have added a line of Hives, Supers, Brood and Extracting Frames, etc., that are locally manufactured from Western pine.

The material and workmanship is not as high quality as our Lewis Beeware, but when the saving, due to lessened material and transportation costs, is figured it makes very low priced equipment.

Write for Special Western Bee Hive Price List.

BROOD AND COMB FOUNDATION

We are carload dealers in pure wax Comb-Foundation, and would be pleased to quote you prices on your requirements anytime, and positively know that we can save you money. Naturally we handle only the very best "WEED PROCESS" FOUNDATION, and will be glad to send you a sample on request. Buy your Foundation early this year and make use of your spare time now getting ready for the busy season. We strongly urge the use of full sheets of Foundation "wired in" for all brood and extracting frames, because it insures straight, uniform combs and does away entirely with surplus "DRONE COMB."

Ask for a copy of our Spray Chart. Helps solve spray questions

Spray Pumps

THE IDEAL OUTFIT

A strong, durable wheelbarrow-sprayer. The Ideal is well designed and will develop a higher pressure than any other wheelbarrow-sprayer. Particularly desirable for whitewashing and very practicable for spraying medium size orchards or vineyards.

PUMP—Seamless Brass Cylinder 1 1/4 in. diameter, 7 in. long. Air chamber 2 in. diameter, 30 in. long, made of steel tubing. Handle of correct length and well balanced in weight for easy operation.

Pump is fastened to top of tank by spider casting and can be removed by loosening one thumb screw.

TANK—Heavy galvanized steel, reinforced top and bottom with heavy channel iron hoops, malleable castings for attaching to frame. Capacity, 15 gal.

WHEEL—20 in. diameter, 2 1/2 in. tire; strong, light and rigid.

VALVE—Bronze balls, inlet and outlet, both mounted in one cage.

AGITATOR—Heavy swinging type, very efficient.

FRAME—Heavy steel tubing with channel iron braces. Tank hung on trunnions.

DISCHARGE EQUIPMENT—15 ft. 1/2 in. Ideal Spray Hose; 8 ft. 1/4 in. Iron Pipe Extension, Fog Nozzle and leakless shut-off. (Two lines of hose can be used if desired.)

SHIPPING WEIGHT—Crated, 130 pounds.

Ideal Outfit as above, price each, \$32.00 F. O. B. Seattle or Portland.

All Prices are F.O.B. Seattle or Portland

NO. 6 BUCKET PUMP

This is the best and most powerful pump of the kind on the market. It is made entirely of brass except the handle and stirrup, which are malleable iron. The cylinder is extra large and is made of seamless brass tubing. The plunger is hollow, forming an air chamber. The valves are bronze balls. It is equipped with 3 ft. of 1/2 in. spray hose and interchangeable nozzle which, when reversed, will spray whitewash or Bordeaux mixture. Weight, 7 lbs. Price, F. O. B. Seattle or Portland \$5.50

VERMOREL NOZZLE

They are made of brass and are fitted a steel disc and a disorganizer with which they are easily cleaned.

No. 26—1 Point Vermorel Nozzle, each \$1.50

BORDEAUX NOZZLE

The best nozzle for spraying Bordeaux mixture or whitewash. Makes a flat spray or a solid round stream.

No. 965—Price, each \$1.10

FOG NOZZLE

Produces a perfect mist covering a wide area. It is made of brass and aluminum, with removable steel discs. Two steel discs are furnished with each nozzle, one for coarse and one for fine spray. Furnished with either straight or angle neck.

No. 107—Fog Nozzle, Straight.....\$1.10
No. 108—Fog Nozzle, Angle.....\$1.10

NO. 4 BARREL PUMP

A pump will meet every requirement of a perpendicular Barrel Pump. It is powerful, light and durable, and will develop better than 250 pounds pressure with ease. Can be used with either one or two lines of hose by attaching a 3/4 in. brass wye to the discharge outlet.

PUMP CYLINDERS—Of seamless brass, 1 1/4 in. diameter, 7 in. long, 6 in. stroke.

AIR CHAMBER—Of high carbon steel, 2 in. diameter, 30 in. long, light and strong.

VALVES—Are bronze balls, mounted in one cage, fitted with brass intake screen, and are easily removed.

PUMP—Is regularly furnished with chime attachment, but extra fittings can be furnished for mounting on head or side of barrel at slight additional cost.

No. 4 Pump, without discharge equipment, Price, each \$18.25 F. O. B. Seattle or Portland.

Order discharge equipment separately.

PRESSURE GAUGE

No. 100—Pressure Gauge for spray outfits register up to 200 pounds pressure. Can also be used on air tanks. Price each \$3.00

NOZZLE COUPLING

No. 76—Brass nozzle connection for attaching spray nozzle to garden hose coupling. Price, each 40c

LEAKLESS SHUTOFF

No. 80—Made of brass with 1/4 in. iron pipe thread, fits any of our nozzles or extensions. Price, each 85c

HOSE AND NOZZLE CONNECTION

No. 74—Made of brass; fits any of our nozzles. Specify if for 1/2 in. or 3/8 in. hose. Price, each 50c

EXTENSION PIPE ELBOW

No. 86—Brass Elbow, 45 degree 1/4 in. iron pipe thread; fits any of our extensions and nozzles. Used to incline the nozzle toward the work. Price, each, 50c

EXTENSION PIPE

No. 175—Galvanized Iron Pipe Extensions in 2 ft. lengths, with couplings; will fit any of our pumps and nozzles. Price, each 60c

Spray Pumps

JUNIOR SPRAY PUMP

This pump is to be used with a bucket or barrel, and may be inserted through the bung hole in a barrel. It requires no foot-rest, clamps or fastening of any kind. The upward stroke is made by a spring. The brass suction working within a brass cylinder, with brass valves, does away entirely with packing. All parts except handles and hose are brass. Will throw solid continuous stream and fine round spray. Weight, 4 lbs. Price, F. O. B. Seattle or Portland.....\$4.50

HUDSON BELLOWS GUN

This Dust Sprayer is a popular favorite, and is used for dusting all insecticides in their dry state. Made of the best materials obtainable. Has hard-wood handles and genuine leather bellows. Weight 2 pounds. Price, each.....\$2.50

YANKEE BARREL PUMP

A powerful spray pump for spraying orchards, vineyards, small fruits, vegetables and for whitewashing. The cylinder is made of heavy brass and all the valves and valve seats are brass, fit absolutely tight, and will not corrode or rust. Two leads of hose may be used by attaching a Y. Fits into any upright barrel, being bolted onto the staves. Weight, crated for shipment, 36 pounds. Price, F. O. B. Seattle or Portland.....\$13.50

MIDGET SPRAYER

For Household Uses

A small, well made sprayer for general purposes, and especially adapted for use in and about the home. Will handle all kinds of liquids satisfactorily; carefully tested and packed, and will give entire satisfaction.

PUMP—1 1/4 in. diameter, 10 in. long. Leakless plunger leather and heavy rod.

TANK—3 in. diameter, 3 in. long; capacity about 3/4 pint. Length over all, 14 in. Shipping weight, each 1 lb. Price, each, F. O. B. Seattle or Portland, 45c.

AUTO SPRAY NO. 5

Knapsack Sprayer or Bucket Pump for General Spraying. This is a splendid outfit for general spraying. It may be used either as a bucket pump, barrel pump, or in connection with tank, as shown in above cut, as a knapsack sprayer. It is furnished either with or without the tank. With the tank it is especially useful for small orchard or garden spraying, as there is no bucket to move around.

The pump is made entirely of brass. It has two ball valves so arranged that they may be instantly cleaned. The pump is double acting and will generate a pressure of 180 lbs. It is equipped with 3 1/2 ft. of 3/8 in. suction hose and a heavy strainer.

A curved extension is furnished extra when desired. The knapsack tank is also extra, and is essential where the sprayer has to be continually moved about. Auto Spray No. 5, pump, hose, nozzle and strainer, shipping weight 4 lbs. Price, \$5.50.

Galvanized Iron 5-gal. Knapsack. Wt. 7 1/2 lbs. Price...\$3.25

Curved 14-in. brass extension. Wt. 1 lb. Price......75

PERFECTION COMPRESSED AIR SPRAYER

Have you ever considered just why certain features are necessary in the high pressure compressed air sprayer?

For handling high pressure safely, a strong tank must be provided, one which will not leak or blow out. The riveted and soldered head, side and bottom seams of the Perfection take care of this point. A good strong pump is needed to develop high pressure. In our Perfection we use an all-brass pump 1 1/4 inches diameter and 15 inches long, with which the operator can quickly and easily pump up the amount of pressure he desires. To handle spray solutions successfully under high pressure, an automatic shut-off nozzle which is sure and safe must be used. The Perfection Automatic Shut-off Nozzle is built for high pressure work. It is equipped with a heavy spring which will close the nozzle tight under all pressures. With it there is no loss of solution and consequent damage to surroundings.

It is just the thing for general work around the house, in gardens and small farms. Used for potato spraying, whitewashing, spraying disinfectants, cold water paints, etc. Seams are all riveted and soldered, giving the great strength necessary for the high pressure it develops, and which is necessary for good results.

TANK—7 1/2 in. diameter, 20 in. long; capacity 4 gallons. PACKAGE—One in a heavy carton. Shipping weight 10 lbs. Galvanized Steel Tank, 4 gallon. Price, each.....\$7.50 Brass Tank, 4 gallon. Price, each.....\$10.50

HOLLY SPRAYER

Our Old Standby. The best selling quart size sprayer. Made of good stock and carefully tested. The pump passing through the top of the can makes it very strong. By using this construction the air nozzle and spray tube are always in line. Every sprayer a good one.

PUMP—1 3/4 inches diameter, 14 inches long. With point-end nose. Leakless plunger leather. Heavy rod. TA K—4 inches diameter, 4 1/2 inches long. Lock seamed. Capacity 1 full quart. Length over all, 21 inches. Shipping weight, 2 lbs. each. Price each, F. O. B. Seattle or Portland.....60c

CONTINUOUS SPRAYER

General Purpose

Most practical Continuous Sprayer made. All working parts are of brass—2 nozzle tips, 1 straight and 1 upshoot. The syphon tube and ball check valve are removable for cleaning, repairing, etc. The whole is carefully tested Every Sprayer is guaranteed perfect.

PUMP—1 3/4 inches diameter, 14 inches long. TANK—1 inch diameter, 4 1/2 inches long. Holds 1 quart. Length over all 18 inches. Shipping weight, each, 2 lbs. Price each, F. O. B. Seattle or Portland ..\$1.00

Prices are all F.O.B. Seattle or Portland.

Insecticides

ARSENATE OF LEAD

Forest City Dry Powdered Arsenate of Lead is very finely divided and fluffy, making it practical for use either as a wet spray or for dry dusting. As the result of a new process in manufacture, it has greater bulk per given weight than ordinary Arsenate of Lead. **www.lillymixes.com** readily with water, stays in suspension almost indefinitely and will adhere to foliage for the longest possible time. This material will not clog the spray nozzle and insures a most uniform distribution of the poison.

Forest City Arsenate of Lead contains from 31% to 33% Arsenic Oxide, thoroughly combined with Lead. This gives maximum killing power and quick action in the control of leaf-eating insects, while absolutely preventing any danger of burning the foliage or injuring the fruits or vegetables in any way. Growers can use it with every assurance of safety and results in fighting such pests as Caterpillar, Curculio, Leaf Skeletonizer, Gouger, Slug, Canker Worm, Codling Moth, Leaf Roller, Currant Worm, Berry Moth, Vine Flea Beetle, Cabbage Worm, Potato Bug, Crown Borer, Root Worm and many other similar pests on Fruits, Vegetables and Shrubbery.

BLUESTONE

Blue Vitriol used in making Bordeaux Mixture, treating seed grain for smut, etc. If wanted in large quantities, ask for price. Per lb., 15c.

TREE TANGLEFOOT

Tree Tanglefoot is a sticky compound similar to that used in making Tanglefoot Fly Paper. It is easily applied and is the most effective and economical protection for fruit, shade and ornamental trees against all crawling insects.

On matured fruit trees and all shade trees it is applied directly to tree trunks: on young fruit trees over strips of manila paper.

One pound makes about 10 lineal feet of band, remains

sticky three months and longer, effective rain or shine. Won't soften, won't run or melt, yet always elastic, expanding with growth of tree. Applied with a wooden paddle. Will not injure trees.

For tree surgery, Tree Tanglefoot is superior to anything on the market.

NIAGARA SOLUBLE SULPHUR COMPOUND (In Powder Form)

An efficient, economical, practical and convenient insecticide and fungicide for spraying all kinds of trees, shrubs and bushes. Assures clean "top-of-the-market" fruit; makes the orchard produce real money profit.

We believe it absolutely the best and most economical spray material on the market for the control of San Jose Scale, Peach Leaf Curl and many other orchard troubles. It has been in general use among thousands of the best fruit growers in America for eight years.

Considering the convenience of its use it is 25 per cent cheaper than Lime and Sulphur Solution. It does not deteriorate with age, is not mussy, leaky and cumbersome to handle, is not harmed by freezing, weighs only one-sixth as much as the same quantity of Solution and comes packed in 1, 5, 10, 25 and 100-pound, air-tight cans. Easily dissolved in hot or cold water and contains absolutely no sediment or grit to clog and wear out spray pumps and nozzles, which is so troublesome in most other sprays. For DORMANT SPRAYS to control San Jose Scale, Oyster Shell Back Louse, use 1 1/2 lbs. to 50 gallons of water. For Leaf Curl use 10 lbs. to 50 gallons of water, etc. For Summer Spray less is required and the amount used is governed by local conditions which vary a good deal. Write for Spray Calendar.

1-lb. can, 25c; 5-lb. can, \$1.10; 10-lb. can, \$1.85; 25-lb. drum, \$3.25; 100-lb. drum, \$12.00.

PERMANITE The Proven Answer to Your Glazing Problem

When thousands of people will buy the same thing year after year—when the great majority of buyers insist on having one particular material to the exclusion of all other brands—that product has proven its worth. You can never go wrong when you buy it.

There are many such products to be found in various lines of trade. In the greenhouse field the material of undisputed merit—the one that never goes wrong is Permanite.

Permanite Never Hardens
Permanite films over on top when exposed to the air, but below the film you will always find it soft and pliable, for Permanite is elastic.

Permanite Will Never Run No Matter How Intense the Heat
While Permanite is elastic and does not become hard, nevertheless it will never run from the surface.

Permanite is thoroughly fabricated with long, staple asbestos. Every particle of gum is so completely reinforced that it can never separate even when exposed to the most intense heat.

Permanite Is Easily Applied
We have perfected a new, one handed glazing machine that will apply Permanite easily, quickly and with the smallest possible consumption of material. Many of our customers have no difficulty in glazing 350 feet of glass with one gallon of Permanite.

AGRICULTURAL SULPHUR

From Bulletin No. 163, Oregon Agricultural College: "It has been known for many years that sulphur is one of the elements absolutely necessary for plant growth. Chemists have found by carefully conducted experiments that no plant can be grown to maturity without this element."

Experiment plot of Alfalfa 2 x 8 rods. gave these results:

1st Year—(per acre)—2nd Year
No fertilizer 2,990 lbs. Alfalfa 960 lbs. Alfalfa
300 lbs. Sulphur 10,020 lbs. Alfalfa 10,760 lbs. Alfalfa

"Plots which received the various sulphur fertilizers produced enormous increases in yield, amounting to more than 1000 per cent in some of the plots during some seasons."

"By actual weight the hay from the unfertilized plots contained 61 per cent of weeds, while the plots fertilized with sulphur were almost entirely free from weeds."

Apply 300 lbs. per acre on Alfalfa every 2 or 3 years. Packed in 100 lb. bags. Price, each.....\$3.00

STANDARD SINGLE WHEEL GARDEN CULTIVATOR

This is a handy and most efficient cultivator. It runs easy, steady and in perfect balance on the light, strong 24-inch steel wheel. Has bent oak handles and is adjustable to suit the height of the operator or to regulate the depth of cultivation and due to the special shape of the shank the attachments always set at the proper angle regardless of the depth it is run.

No. 20—With one double-end steel shovel, one moldboard plow with landside, one combined rake and bevel-pointed hoe, and wrench. Weight, packed for shipment, 20 pounds.

Price, complete.....\$ 6.25

No. 21—With Midget Seeder, as illustrated. 11.20

Hudson Drills and Cultivators

COMBINATION GARDEN SEEDERS

In the No. 201 Combination Machine we have practically a 100% perfect seeder. This is due to the fact that the seed regulator is made entirely of brass. The openings are die cut instead of being cast or moulded. As a result it can be regulated perfectly. The seed flow adjustment is the heart and soul of a seeder, for if the seed is not dropped uniformly, the crop is irregular and poor. It will sow any seed, large or small, and is a practical combination which can be changed in a moment from sowing in rows to dropping in hills, spacing the hills from 4 inches to 24 inches apart.

A brush force feed of selected bristles is used, and is guaranteed not to injure the most delicate seeds. The seed flow is always in plain sight so that the operator can tell instantly when the hopper is empty. The seeding parts can be detached by removing two bolts, and the seeder then becomes a single or double wheel cultivator, rake, plow or hoe as desired.

The handles have a plow handle grip and are adjustable to the height of the operator. Wheel is 16 inches in diameter, light and strong. Hoes, shovels and plow are of special high grade steel, all shanks are of malleable iron. Frame is of malleable iron with tubular arch.

The No. 201 Combination Seeder consists of Hill and Drill Seeder with the following cultivating attachments:

2 hoes, 2 rakes, 2 plows, 2 vine lifters, 4 cultivator teeth, 2 short axes, and 1 extra wheel to make double wheeled cultivator, and a "fit all" wrench. All packed in wood box, handles bundled separately. Weight, 60 pounds.

No. 201—Combination Seeder.
Price, each\$20.60

No. 203—Same as No. 201, but has only one wheel. Weight, 55 pounds.
Price, each\$19.30

No. 205—This machine is the seeder only, as shown in cut 201. No cultivating tools are furnished, but they can be added any time they are wanted. Weight, 45 pounds.
Price, each\$17.20

We can supply all the repairs and extras for the machines listed in this book; also for the Iron Age which we have sold in years past.

No. 201

SINGLE WHEEL CULTIVATORS

No. 216—Combination Cultivator

A single wheel cultivator, Hoe, Plow and Pulverizer. This tool is designed for use where the operator desires a machine complete at a lower cost than the double wheel outfit; but can at any time be converted into a double wheel cultivator or Hill and Drill Seeder by adding the different attachments shown with our No. 201.

Consists of 2 hoes 2 rakes, 4 cultivator teeth, landside plow, vine lifter and wrench.

No. 216—Weight, 35 lbs.
Price, each\$10.00

No. 218—Same as 216 except there are no rakes. Weight, 32 pounds.
Price, each\$9.25

No. 220—Same as 216 with hoes only. Weight, 27 lbs.
Price, each\$8.50

No. 216

DOUBLE WHEEL CULTIVATORS

No. 210—COMBINATION CULTIVATOR

A double wheel cultivator, hoe, plow, pulverizer, hillier, etc. This tool is designed especially for use when the plants are small to work astride the row, thereby getting closer and obtaining correspondingly better results.

By removing one wheel it becomes a single wheel tool for use between rows after the plants have become too large to straddle. By adding the seed hopper it becomes a complete Hill and Drill combination outfit, the same as our No. 201.

No. 210 Combination Cultivator consists of 2 hoes, 2 rakes, 2 plows, 4 cultivator teeth, 2 vine lifters and "fit all" wrench. Weight, 40 lbs. Price, each\$11.95

No. 212—Combination Cultivator, same as No. 210, except no rakes are furnished. Weight, 40 pounds.
Price, each\$11.10

No. 214—Combination Cultivator, has hoes and vine lifters only. Weight, 29 pounds.
Price, each\$9.25

LILLY'S

MAGGOTBATE

For Use on Cabbage, Onion, Radish, Turnip,
and all Root Crops Subject to the
Ravages of Root Maggots

This article was made in response to a demand by the general public everywhere, and also as a protection on our own growing fields of Cabbage, Turnips, Onions, etc.

We grow every year, for seed purposes, between five hundred and one thousand acres of Cabbage, Turnip and other root crops, and the damage done by root maggots assumes serious proportions. In fighting this pest we obtained the best information we could from the experts of Federal and State governments, and the preparation that

we are putting out and offering for sale is prepared after exhaustive research work and from information furnished by the Experimental Station at Puyallup and the Insecticide Experts at Washington, D. C., and after being tried out in our own fields.

Lilly's Maggotbate acts externally for insects living beneath the soil on the roots of plants, including both sucking and biting insects, prominent among which are the white grubs, maggots in roots of cabbage, radishes, onions, etc., cutworms, wireworms, apple and peach

root-aphides, the grape phylloxera and many others.

2-lb. Carton, each.....\$0.25 25-lb. Bag, each\$2.25

F. O. B. Seattle or Portland

WHAT OTHERS SAY For the last three years we have been fighting pests in an endeavor to get a crop of turnip, beets, radishes, etc. Noting your advertisement about "MAGGOTBATE" we thought we would spend 25c and give it a trial. We have had absolutely no trouble with root maggots since using it.

Our first crop of radishes, turnips, etc., was already through the ground when maggots began to get busy and we simply sprinkled "MAGGOTBATE" over the top and it was effective. About two weeks later we repeated the dose.

On the last crop we used "MAGGOTBATE" at the time of sowing. Considering the small price and the effectiveness of "MAGGOTBATE" no one, whether a large or small gardener, can afford to be without it.

Nov. 4, 1920.

SEMI-SOLID BUTTERMILK

Thick Like Butter

Makes every chick a chicken and every pig a hog.

Semi-solid Buttermilk is fresh creamery buttermilk taken direct from the churn at the creamery and super-soured by the assistance of a Lactic Culture (*Bacillus Bulgaricus*), then condensed by a special vacuum system at a temperature of 150 degrees F. to the consistency of thick butter. It is absolutely pure, fresh, and sanitary and free from any foreign acids or preservatives. Besides containing all the food and tonic elements of fresh buttermilk it is pasteurized and the lactic acid is developed to a high degree.

Lactic acid is a great germicide which, by destroying the disease forming bacteria in the intestines, prevents the many diseases common to chickens, calves and hogs. It is positively the safest and cheapest health insurance for growing animals. To feed it simply mix with feed or water as desired. Full instructions with each shipment.

Put up in 10-gal. kegs and 52-gal. barrels only.

While we (The Chas. H. Lilly Co.) exercise care to have all seeds pure and true to name, we do not give any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, we are to be at once advised, and money paid for same will be promptly refunded.

Practical Poultry Books

EVERY POULTRY KEEPER SEEKING COMPLETE AND RELIABLE INFORMATION should have one or more of the up-to-date books listed and described in this circular. They are truly practical and helpful, providing just the information needed to insure the largest possible success with fowls—either breeding stock or commercial flocks. These books are attractive in appearance, beautifully illustrated and REASONABLE IN PRICE. Take advantage of the opportunity to secure these big-value books TODAY.

PROFITABLE CULLING AND SELECTIVE FLOCK BREEDING

By HOMER W. JACKSON and GRANT M. CURTIS

First complete book on this highly important subject. By following its plain and easily understood directions, fully illustrated with dozens of black-and-white and three-color photographic reproductions of live, plucked and dissected layers, nonlayers and poor producers, any poultry keeper can readily eliminate the slacker hens and keep his flock up to maximum production at any period of the year. Protect your feed bin and bank account by getting rid of the nonproducers.

College workers pronounce it, "A most valuable piece of work"; "Should receive wide distribution." Practical poultry keepers say, "Subject is treated completely, fairly and clearly"; "Invaluable to any breeder of poultry"; "Stands preeminent and is in a class by itself."

Compiled at a cost of over \$4,000. Size of book, 8½ by 12 inches; 120 pages, printed on supercalendered book paper, 18 color plates, 150 special illustrations. Price \$1.50, postpaid.

USE OF ARTIFICIAL LIGHT TO INCREASE WINTER EGG PRODUCTION

By GRANT M. CURTIS

This book gives full information in regard to the most remarkable and revolutionary discovery in the history of the poultry industry. By the use of artificial lights during winter months the egg yield of hens and pullets can positively be doubled, or more than doubled. Book gives every essential detail, including what lights to use, how to use them, what to feed, when and how to feed, etc., etc. Lectures and articles were contributed by foremost investigators, including Professor Jas. E. Rice, Cornell University; Luther E. Banta, Mass. Agr. College; Geo. R. Shoup, West. Wash. Exp. Station. Contains numerous illustrations showing poultry houses in which lights are being used, tables of egg production, and ten three-color charts.

Size of book, 8½ by 12 inches; contains 112 pages, with attractive Sewell art cover; cost of preparation, including pictures, over \$3,500. Printed on supercalendered book paper and attractively illustrated. Price per copy \$1.50, postpaid.

HOW TO FEED POULTRY FOR ANY PURPOSE WITH PROFIT By JOHN H. ROBINSON

SAMPLE COVER PAGE

COMPLETE AND INSTRUCTIVE POPULAR-PRICED BOOK ON THE SUBJECT.
Size of book, 8½ by 12 inches, 112 pages, with handsome Sewell art cover, and nearly 100 illustrations. Printed on supercalendered book paper. Price per copy, \$1.25, postpaid.

POULTRY HOUSES AND FIXTURES

Complete, New, Down to Date

This book goes right to the bottom of the subject of poultry house construction. It tells how to plan houses in order to save lumber. What grades to buy and how to buy to good advantage. There is not an important detail, from locating the house to painting the completed building, that is not fully and clearly treated. Plans and bills of materials are given for houses to meet every practical need. Also tells how to equip the house with labor-saving conveniences. Professor Rice of Cornell University says: "It is the most complete, authoritative and practical book on this subject that has come to my attention."

Size of book, 8½ by 12 inches, 112 pages, printed on supercalendered book paper, with 235 helpful illustrations. Price \$1.00, postpaid.

ARTIFICIAL INCUBATING AND BROODING

By HOMER W. JACKSON

Artificial hatching and rearing of chicks is EASY if the right equipment is used and if up-to-date methods are adopted. "Artificial Incubating and Brooding" is a COMPLETE GUIDE TO SUCCESS. It tells how to buy incubators and how to operate them, it describes all kinds of brooding equipment, tells which are best adapted for use under special conditions and gives full information in regard to all practical details of their management. There is hardly a question that can come up in the experience of anyone that is not anticipated and correctly answered in this new and thoroughly up-to-date book. If you want to get good hatches, avoid losses, and raise strong, vigorous chicks, you NEED THIS BOOK.

"Artificial Incubating and Brooding" contains 112 pages, size 8½ by 12 inches, is printed on good paper and contains 180 helpful illustrations. The price is only \$1.00, postpaid.

THE CHICK BOOK

A Complete Low-Cost Guide to the Raising of Chicks

This is a BOOK OF EXPERIENCES. Practical chick raisers give in detail the methods by which they hatch strong, vigorous chicks, how they coop and feed them, how they bring them to market size or maturity with little loss, and how they make them a source of profit. Not a book of theories or dry rules, but alive with right-from-the-shoulder experiences of men and women who depend upon their poultry flocks for their livelihood, in whole or in part. They tell the whys and wherefores for every step, and by following their suggestions the beginner can avoid serious and expensive mistakes, and the most experienced can find in its pages numerous suggestions for the improvement or simplifying of their methods. "The Chick Book" was written by persons with THEIR SLEEVES ROLLED UP—men and women who HAD to succeed, and who tell here the methods by which their success was won. If you raise as many as a dozen chicks, this book is worth its price to you—and more. The poultry keeper's profits depend largely upon his success in hatching and rearing his chicks. No amount of hard work later on will make up for poor hatches, inferior chicks or too few of them. GET THE CHICK BOOK and learn how to raise them with the smallest percentage of loss, and at the lowest cost.

Contains 80 pages, 9 by 12 inches; is printed on enameled book paper, is well illustrated, with a Sewell art cover. The price is only 50c, postpaid to any address.

NINE VALUABLE BREED BOOKS

LEARN MORE ABOUT YOUR BREED. The more information you have about your breed or variety, the more successful you will be. These Breed Books give the origin and history and description of breeds and varieties, and tell how successfully to select, mate, rear and exhibit them. They contain articles by many well-known and successful breeders who here give the priceless information that they have gained through years of experience. PROFIT BY THE EXPERIENCE OF OTHERS.

THE PLYMOUTH ROCKS

By WILLIAM C. DENNY

This complete breed book explains Standard requirements and tells how to select, mate and exhibit winners in all varieties. Subjects of special importance to Plymouth Rock breeders, such as how to get correct barring in Banded Rocks, "stay-white" plumage in White Rocks, correct uniform color in Buffs, double mating, line breeding, strain building, etc., all are plainly and fully treated. Neither time nor expense was spared in securing for this book the best information available. There are special articles by America's foremost breeders and judges, and the book is profusely illustrated by Franklane L. Sewell and Arthur O. Schilling.

Well illustrated, including three color plates, 144 pages, 9 by 12 inches. Price \$1.00, postpaid.

THE WYANDOTTES

By J. H. DREVENSTEDT

The standard qualities of all varieties of Wyandottes are fully described and complete information given on how to mate and breed, how to exhibit and judge them. Thousands of dollars were spent in research work, copy making, oil paintings, etc. No matter what variety of Wyandottes you breed you will find in this book just the information you need to bring success.

Attractively illustrated, three color plates, 160 pages, 9 by 12 inches. Price \$1.00, postpaid.

RHODE ISLAND REDS

By D. E. HALE

Experienced breeders and beginners alike will find the information contained in this instructive and beautifully illustrated book worth many times its price. Learn from it how to select and mate birds for the breeding pen, how to feed, judge and exhibit successfully.

Fully illustrated, including a fine color plate by Sewell, 88 pages, 9 by 12 inches. Price 75c, postpaid.

SAMPLE COVER PAGE

THE LEGHORNS

By J. H. DREVENSTEDT

This is the most complete book ever written about Leghorns. This breed has been brought to a wonderful state of perfection as regards shape, color and laying qualities, and this book tells how this result has been accomplished. Contributors include some of the best known Leghorn breeders in this country. Special chapters on egg farming.

Numerous illustrations, three color plates, 144 pages, 9x12 inches. Price, \$1.00, postpaid

THE ORPINGTONS

By J. H. DREVENSTEDT

This book meets the need for authentic information regarding the breeding of these birds. It gives full instructions on selecting breeders, mating for best results, general care, feeding and management. There are special

articles on each of the different varieties. Indispensable to all Orpington breeders who want to produce the best.

Well illustrated, 80 pages, 9 by 12 inches. Price 75c, postpaid.

THE ASIATICS

Only Book On This Subject

The largest and best illustrated book issued to date on mating, breeding, selecting and exhibiting Light and Dark Brahmas, Buff, Partridge, Black and White Cochins, and White and Black Langshans. Special articles by foremost breeders, whose accumulated experience and knowledge is thus made available at nominal cost.

Two color plates and numerous black-and-white illustrations. 96 pages, 9 by 12 inches. Price 50c, postpaid.

THE CAMPINES

By FRANK L. PLATT

The largest, most complete and most profusely illustrated book on this breed. The contributors to this book include many of the leading Campinists of this and other countries. It contains the most practical, down-to-the-minute information about Campines that can be obtained anywhere. Here in quickly accessible form is the experience and knowledge of the most expert breeders and judges of these beautiful and highly attractive fowls.

Color plate, well illustrated, 88 pages, 9x12 inches. Price 75c, postpaid.

DUCKS AND GEESE

This book gives reliable information and advice on breeding ducks and geese for market, for breeders and for exhibition. It is full of practical reliable information. With this book anyone can be successful, almost regardless of location. Many well-known authorities have contributed special articles.

Well illustrated, 104 pages, 9 by 12 inches. Price 75c, postpaid.

TURKEYS: THEIR CARE AND MANAGEMENT

Some of the most successful breeders and commercial growers in the country tell of the methods by which they have accomplished their successes, and what they have done others also can do. If you raise turkeys in any number, this book will be worth many times its price to you.

Beautifully illustrated, one color plate, 96 pages, 9 by 12 inches. Price 75c, postpaid.

For The Garden
Use 5 lbs. per 100 sq. feet.

MORCROP FERTILIZER

The importance of maintaining soil fertility by replacing those elements removed from the soil by similar elements or plant foods found in manure or commercial fertilizers cannot be over-emphasized. Since on most farms the amount of manure available is not sufficient to maintain the fertility of the soil, it is necessary to employ a commercial fertilizer. The number of soil constituents or plant foods liable to rapid exhaustion by the annual removal of crops is limited in most cases to three elements: namely, nitrogen, phosphorus, and potassium. The more common terminology for these plant foods is nitrogen, phosphoric acid, and potash respectively. Each year the growing crop takes from the soil hundreds of pounds of these elements, and it is obvious that ultimately the quantity contained in the soil will become so low as to make profitable cropping impossible.

For General Purposes

Lilly's Morcrop Fertilizer is the direct result of many years experience with fertilizers. To manufacture a general purpose well balanced fertilizer which we could strongly recommend to our customers has been an ambition we have realized in Morcrop. The use of a commercial fertilizer is becoming so common now that it is only a question of which fertilizer will be suited best for certain conditions and not as to whether one should be used. In Morcrop we have combined the elements necessary to make it a fertilizer suitable for all ordinary purposes.

Lawn Dressing

Apply to the lawn at the rate of one hundred pounds to each 2,000 square feet. For new lawns use 100 lbs. to each 1,000 square feet. Morcrop is nearly odorless and easy to handle. Two or three applications of lesser quantities at intervals throughout the year are more effective than applying above quantity all at one time.

Root Crops

Beets, Mangels, Turnips, Carrots and other root crops require a fertilizer which will give a good start in the earlier stages of growth, but must not be too effective in advanced stages, for it would tend to grow tops at the expense of roots. Morcrop will remain in the soil to feed the root gradually without forcing a growth of tops.

Analysis

Potash	2%	3%
Nitrogen as ammonia..	2%	3%
Phosphoric Acid	10%	12%
