INTRODUCTION

www.libtool.com.cn

This is a supplement to Staphylococcal Infection, a Bibliography Covering Literature of 1952 through May 1958. It incorporates references listed in the earlier supplement dated September 1958.

Selected for inclusion are references to literature in French, German, Italian, and Spanish, as well as in English. The grouping is by broad subject arrangement as shown in the table of contents below, with additional coverage indicated by the initial letters of other subjects.
