### LETTER OF TRANSMITTAL.

MANILA, September 19, 1913.

SIR: The Municipal Board has the honor to submit herewith its annual report covering the fiscal year 1913, from July 1, 1912, to June 30, 1913, inclusive.

Very respectfully,

FELIX M. ROXAS, President.
A. W. HASTINGS, Member.
WM. H. ROBINSON, Member.
RAMON R. PAPA, Member.
ISABELO DE LOS REYES, Member.
CLARENCE W. HUBBEL, Acting Member.

His Excellency,

The GOVERNOR-GENERAL OF THE PHILIPPINE ISLANDS,

Manila, P. I.

### www.libtool.com.cn

### ANNUAL REPORT OF THE MUNICIPAL BOARD WWOFITHE GITY OF MANILA

### OFFICE OF THE SECRETARY.

During the year there were the following changes in the membership of the Municipal Board: Messrs. Isabelo de los Reves and Ramon R. Papa, elected at the general election for the city of Manila, held on June 4, 1912, took their seats on October 16, 1912, as members of the Municipal Board vice Messrs. Timoteo Paez and Tomas Alfonso whose terms of office expired on that date. Mr. P. G. McDonnell resigned on December 1, 1912, and his position was filled by the Governor-General by the appointment of Mr. John C. Mehan, formerly chief, department of sanitation and transportation. Member Mehan held office during the remainder of the year, resigning June 30, Mr. Fisher H. Nesmith was appointed acting member for a short period in March, 1913, covering the absence of Member Mehan on vacation leave. Mr. William H. Robinson, city engineer, ex officio member of the Municipal Board was absent on leave for a period of one month, January 15 to February 15, during which time the acting city engineer, Mr. Fred. L. Patstone, occupied his seat on the Board.

The secretary of the Board was granted leave of absence with permission to visit the United States on October 15, 1912, and the chief clerk was designated as acting secretary during his absence. While in the United States, the secretary was commissioned to investigate laws and ordinances in force in various principal cities pertaining to special assessments, and to make report as to the result of his investigations.

The following reassignment of the committees was made on December 2, 1912, at the solicitation of the elective members, which continued in force until the close of the year:

Commitees.	Members.	Commitees.	Members.
Law Engineering and public works. Police Education Fire Electricity		Finance and taxation. Sewer and waterworks. Markets and mataderos. Expropriation. Sanitation and transportation. Licenses.	Roxas and Reyes. Mehan and Reyes. Robinson and Papa.

The Board held 299 regular sessions and 29 special sessions and acted upon 4,910 items of business, an increase of 409 items over that of last year. The number of communications received during the year was 9,506 as against 10,527 for 1912 and 8,942 for 1911. The number of communications sent was 11,667 as against 12,937 for 1912 and 8,265 for 1911. The slight decrease in last year's correspondence as compared with the preceding year was due to expropriation cases not being so numerous, no large fires having occurred requiring alterations in general street systems.

By reason of the provisions of Act No. 2200 of the Philippine Legislature, the Municipal Board ceased to perform the functions of the board of tax appeals, a new board, to be appointed by the Governor-General, having been created by this act.

Nine new leases were executed and 13 leases renewed, of which 18 were for property leased by the city and 4 for property leased from the city. The majority of the buildings leased by the city were for school purposes.

Seventeen contracts were entered into entailing a money liability for the year of approximately \$\mathbb{P}\$270,291. The most important of these contracts was for the collection and disposal of garbage, etc., in the city, awarded to Mr. Edwin Burke for a period of ten years. This contract was later assigned to the Philippine Manufacturing Company.

Twenty-three ordinances were enacted, of which a list follows:

No. Object. 173. Amending section 470 of the Revised Ordinances re	Ena	ate of ctment.
lating to permits and fees for billiard and poo		
tables		8, 1912

Manila Electric Railroad and Light Company	Jan.	13, 1913
187. Amending sections 8 and 10 of Ordinance 106, relating		
to permits for slaughtering and killing animals	Mar.	10, 1913
188. Amending chapter 36 of the Revised Ordinances		
relating to detective agencies	Mar.	26, 1913
189. Pertaining to regulation of dance halls	Apr.	14, 1913
190. Appropriation for the payment of interest due on		
loans	Apr.	18, 1913
191. Amending sections 374 and 375 of the Revised Ordi-		
nances relating to rates and charges for electric		
service	Apr.	25, 1913
192. Amending ordinance 167 relating to the extension of		
railway system on certain streets	Apr.	29, 1913
193. Amending ordinance 191 relating to rates and system		
charges for electric service	Apr.	29, 1913
194. Additional appropriation for Law Department, and	_	
Public Works and Permanent Improvements	June	4, 1913
195. Additional appropriation for the Government of the		
city of Manila	June	27, 1913

There were 266 deeds executed during the year which was 18 less than for 1912 and 80 per cent more than 1911. Of these, 215 covered the acquisition of real estate by the city and 51 the sale of city property to private individuals.

The city of Manila expended the sum of ₱381,893.10 in connection with the acquisition of land and improvements for the opening, widening, and extension of streets and for park and market purposes. Over ₱185,000 of this amount was expended on the projects for the opening of a new street parallel with the Escolta, to extend from Plaza Santa Cruz to Calle Rosario, and the widening of Calle Juan Luna.

The value of city property sold during the year approximated \$\mathbb{P}58,500.

As during the two preceding years, indigent sick and injured persons were cared for and given free treatment at the Philippine General Hospital at the expense of the city under agreement with that institution; the cost of this service amounted to \$\mathbb{P}\$50,000.

The cost of maintaining the juvenile offenders at the Hospicio de San Jose during the year shows an increase of \$\mathbb{P}7,441.70\$, or approximately 27 per cent over the preceding year.

	Males.	Females.
Persons in reformatory on June 30, 1912 Persons admitted during the year Persons discharged during the year Persons in reformatory on June 30, 1918 OM, CH	178 160 154 184	38 32 35 35

Total cost for the year, \$34,300.10.

The number of insane persons committed to the Hospicio de San Jose during the year shows an increase of approximately 26 per cent over the preceding year, 196 persons having been admitted during the present year as against 144 for 1912.

The cost of maintaining these insane persons during the year shows an increase of  $\clubsuit6,275.35$ , or approximately 25 per cent over the preceding year.

	Males.	Females.
Persons in insane asylum on June 30, 1912 Persons admitted during the year Persons discharged during the year Persons in asylum on June 30, 1913	•114 88 58 144	96 88 65 119

Total cost for the year, \$30,898.85.

The secretary's office collected for certified copies of municipal records the sum of \$\mathbb{P}\$135.

### DEPARTMENT OF ENGINEERING AND PUBLIC WORKS.

This department is in charge of the construction and maintenance of streets, bridges, and surface drains; maintenance and repair of municipal buildings; and inspection of buildings, plumbing, boilers, and gas supply; has partial charge of sanitary inspection, prepares all plans and estimates, constructs and supervises all municipal public works (except sewers and waterworks), including so-called sanitary barrios or districts, and makes all surveys of streets and city property.

### FUNDS.

Funds available for the work of the department during the fiscal year and with balances remaining at the end of the year may be found in the report of the disbursing officer.

### PERSONNEL.

The personnel of the department consisted on an average of 44 classified employees, 59 unclassified, and 1,347 skilled and unskilled laborers, making a total of 1,450 employees, of whom 32 were Americans.

### ORGANIZATION.

This department is organized under the following heads: General office, streets and bridges, quarries and water transportation, drafting and surveys, inspection and design, and miscellaneous inspection.

### GENERAL OFFICE.

This division records the daily progress and cost of construction and repair work; cost, disposition, and location of all expendable and nonexpendable property; prepares vouchers, pay rolls and bills; and records all communications.

The correspondence of the department during the fiscal year in communications received and sent amounted to 7,936.

During the year a system was initiated of taking into account all land owned by the city and acquired from time to time.

### STREET CONSTRUCTION AND BRIDGES.

During the year there were 436,800 square meters of street gone over and patched and 80,586 square meters resurfaced. Twenty-five thousand five hundred and forty-five square meters of stone macadam and 26,253 square meters of tar macadam were laid and 12,266 square meters of tar macadam resurfaced. The department built 6,337 square meters of sidewalk and 10,734 lineal meters of curb.

Reimbursable street work amounted to something over #406,782, the various work performed including work on the San Lazaro estate, new port district, as well as other smaller jobs. The various steel bridges in the city received the usual attention.

There were issued during the year 1,226 permits for partial use of the streets and sidewalks for painters' scaffolding, fencing, repairing sidewalks, and miscellaneous work.

Work of a sanitary nature performed by this division consisted of street, gutter, and general drainage work in various districts of the city, principally in Tondo and San Lazaro. The total value of such work was approximately ₱100,000.

The growing need for good and durable roads has led to an increased demand for modern road construction, such as will do away with the dust and mud nuisance and give best results. considering initial cost and cost of maintenance. roads, under the combined motor-car and iron-tired traffic, have shown an excessive maintenance cost. This led to an investigation of conditions with the object of finding out how such roads could be made more durable. The results have shown that up to the present tar macadam has given the best results. The first piece of tar macadam constructed was on Calle Vidal, from Bagumbayan to Plaza Lawton, in July, 1910, covering an area of 900 square meters (one coat only). This pavement was not repaired until the latter part of June, 1911, when a thin coating of asphaltic mixture was put on at a cost of \$\P\$0.20 per square Up to the present time, July, 1913, no other repairs have been made. The pavement is in excellent condition after two years' service of heavy traffic, and no maintenance cost other than sweeping.

The bulk of the street maintenance appropriation is spent on the important thoroughfares such as Juan Luna, Sande, Reina Regente, Azcarraga, Avenida Rizal, Alix, Santa Mesa, Aviles, General Solano, San Sebastian, Taft Avenue, Arroceros, Concepcion, Marques de Comillas, Herran, Nozaleda, Real, Nueva, Aduana, etc. In other words, these streets are not local, but main arteries leading to different parts of the city that must be followed to get from any part of the city to another.

With the present equipment, which is very crude, the first cost of tar macadam is only about 80 per cent greater than ordinary macadam, while the maintenance is at least 80 per cent less. Considering that this class of pavement requires less sprinkling, that there is no mud to be hauled off the road, that the light repairs do not annoy the public, and that the consumption of crushed stone will decrease every year, it is believed that for a cheap pavement this class of construction is superior to any that has been tried to date.

There are in the city approximately 1,600,000 square meters of road surface to be maintained. Of this amount about 520,000 square meters, or 90 kilometers of streets, have been placed under a caminero system, a small portion only of which has been so cared for during the entire fiscal year. As far as can be observed at present, the results will be more than satisfactory. Outlying streets under this system are in better condition than ever before.

### DRAFTING AND SURVEYS.

During the year there were 2,001 jobs of various kinds undertaken by this office, of which 1,962 were completed.

The number of expropriation plans made was 182, having a total area of 286,646.75 square meters.

The number of plans made of city properties was 37, having an area of 101, 550.57 square meters.

The properties ordered expropriated by the city on plans prepared by this office have a combined area of 199,656.35 square meters. The city properties exchanged and sold to private parties have a combined area of 27,720.49 square meters.

The total number of new plans filed in the office vault is 264.

An index plan showing all properties expropriated by the city was completed, and same is found to be a great help in checking Court of Land Registration plans.

The 1:400 plan in 148 sheets, showing the proposed locations of gas mains, was completed at the beginning of the year.

Plans of street system were prepared, approved, and established for three sections of the city, and also building lines for three single streets, and the cross-section for four streets.

### QUARRIES AND WATER TRANSPORTATION.

During the year rock for street purposes was secured partially from the city quarry at Talim and partially from the Rizal Quarry Company by contract. The average cost of the rock received from the city quarry was \$\mathbb{P}1.19\$ at the quarry, and under contract \$\mathbb{P}1.48\$, per cubic meter. Transportation from the quarries to Manila averaged \$\mathbb{P}1.56\$ per cubic meter.

### INSPECTION AND DESIGN.

This office checks plans, issues building permits, inspects private building operations, sees that building ordinances are being complied with, and is also charged with the design of bridges, culverts, miscellaneous structures, and buildings other than those which are designed by the Consulting Architect. This office is also directly in charge of the public works of the city.

For the construction and repair of private buildings 7,576 permits were issued for construction of an estimated value of \$\mathbb{P}3,711,500\$. For miscellaneous purposes 1,235 permits were issued, 67 being issued gratis. Of the above, strong-material buildings of new construction were valued at \$\mathbb{P}2,938,310\$ and concrete buildings at \$\mathbb{P}617,000\$, or 20.9 per cent of the total value of the strong-material buildings. Notwithstanding the slump

in building operations which occurred in November, December, and January, the total in construction values during the year compares very favorably with the preceding year, as is shown by the following table:

www.libtool.com.cn

		Permit	s issued.	
Year.	Building con- struction.	Miscel- laneous.	Total.	Construc- tion value.
1912 1913	6, 804 7, 576	1, 196 1, 235	8,000 8,811	P4, 010, 060 3, 711, 500

A model public laundry, bath, and toilet building and four new midden sheds were constructed during the year.

The following are the more important projects completed or started during the year under the supervision of this division:

Constr	uction—	How con-	<b>a</b> .	Pomonles

a Not finished.

The Malate school is a 20-room, 1-story, reënforced concrete building with cement tile roof, located on Calle San Andres, between Calles Georgia and Wright. The cost includes preparation of plans, engineering, inspection, etc., and is approximately \$\mathbb{P}56.70\$ per square meter of floor area.

The city electrician's office and laboratory is a 2-story reënforced concrete building with galvanized-iron roof and is located on Calle Arroceros, near the city shops. The cost includes preparation of plans, engineering, etc., and is approximately \$\frac{1}{2}\$57.30 per square meter of floor area (area of one floor only).

The Tondo market was rebuilt from the material taken from the old Herran Market at a cost of approximately \$\mathbb{P}\$10.04 per square meter of floor, exclusive of concrete floor and benches.

This market is located on the Vitas Estero, near the Pretil Bridge, Tondo. It contains 387 market bench units and has a daily rental value of #77.40 when fully occupied.

### BOILER INSPECTION.

Thirty-five new boilers were installed during the year, having a horsepower of 1,858; 6 new internal-combustion motors were installed, having a horsepower of 191.

Nineteen boilers were condemned or removed to the provinces, and 2 internal-combustion motors were condemned.

There were also 2 new passengers elevators installed during the year, making a total of 5 passenger and 2 freight elevators in Manila.

One hundred and sixty-one annual boiler inspections were made and licenses issued during the year, 25 annual gas-motors inspections, and 7 annual elevator inspections were made.

The total horsepower of boilers now installed in the city of Manila is 10,936, and gas motors 419. The increase in horsepower of boilers and gas motors over that of last year was 496.

### GAS INSPECTION.

This division was organized in October, 1912, and has supervised the work of installing gas mains and connections throughout the city.

Work was started by the Manila Gas Company on its distribution system on October 7, and since that time has continued steadily at an average rate of from 6,000 to 10,000 meters per month, so that now there are in place approximately 66,000 meters of pipe of various sizes, leaving only 9,000 meters yet to be laid to fufill the terms of the franchise. The distribution system in the various parts of the city is thus nearly completed.

An ordinance regulating the supply of gas to the city of Manila has been prepared and is now under consideration. The ordinance has been prepared after a careful study of American and British practice as recommended by the United States Bureau of Standards in their model ordinance (Circular 32) and the model gas bill passed by the British House of Parliament in 1912 (Gas World Yearbook, 1913).

The gas plant is about 80 per cent completed and will be able to deliver gas to the city by October 15, 1913.

### PLUMBING INSPECTION.

There were 781 plumbing jobs inspected during the year, of which 285 were for new buildings, the estimated cost of all plumbing work being \$\mathbb{P}1,006,777.60.

The number of licensed plumbers in the city is 26.

### POLICE DEPARTMENT.

### STRENGTH OF DEPARTMENT.

One chief of police, 1 assistant chief of police, 6 captains, 22 first-class sergeants, 128 first-class patrolmen, 16 second and third class sergeants, 21 second-class patrolmen, 266 third-class patrolmen. First class is composed of Americans, second and third classes of natives.

Office force: Americans, 4; Filipinos, 9; Chinese, 1.

### PRISONERS APPREHENDED.

There were 18,970 arrests during the year, which is an increase of 1,237 over the previous year. The offenses for which the greater number of arrests were made are as follows:

Crime.			1910	1911	1912	1913
Gambling and conducting gambling Disorderly conduct Cruelty to animals Violation of opium law Blocking the highway Theft Volation of license regulations Vagrancy Larceny Assault "Estafa"			4, 755 671 1, 533 729 188 644 175 231 150 275 159	4, 228 488 1, 570 588 170 1, 053 322 286 114 309 216	4, 332 587 2, 006 1, 229 110 1, 483 340 402 96 425 304	5, 135 1, 009 1, 778 722 130 1, 196 288 415 103 336 309

### FIRE DEPARTMENT.

## PERSONNEL.

The personnel during the year was as follows: one chief; 1 deputy chief; 1 chief of construction and repair; 1 mechanic; 8 captains; 13 lieutenants; 7 engineers, first-class; 7 engineers, second-class; 46 firemen, first-class; 50 firemen, second-class; and 3 clerks.

Electrical division.—One city electrician, 1 superintendent of fire and police alarm system, 1 electrical inspector, 1 foreman of outside construction, and 4 clerks.

### EQUIPMENT.

The apparatus and equipment of the department at the present time consists of the following:

In service.—Five steam fire engines, horse-drawn; 2 motor fire engines; 1 chemical engine, horse-drawn; 2 combination chemical and hose wagons, horse-drawn; 4 hose wagons, horse-drawn; 1 hook and ladder truck, horse-drawn; 1 fuel wagon,

horse-drawn; 1 motor supply wagon (in service as hose wagon); 1 chief's motor; and 1 deputy chief's motor.

In reserve.—One chemical engine, horse-drawn; 2 hose wagons, horse-drawn; and 2 chief's buggies.

Out of service. — One Waterous gasoline engine, horse-drawn (unserviceable); 1 hook and ladder truck, horse-drawn (unserviceable); 1 aërial hook and ladder truck, motor (new).

Betterments.—The sum of \$\mathbb{P}\$187,000 was appropriated for the purchase of motor fire apparatus and fire-boat equipment. Of this amount \$\mathbb{P}\$12,000 was allowed for fire-boat equipment and \$\mathbb{P}\$175,000 for the purchase of new motor apparatus to replace the horse-drawn apparatus.

In July, last, a tentative agreement was made with the Bureau of Navigation by which said Bureau agreed to keep several launches prepared for fire service at all hours. The city agreed to pay the cost of installing fire pumps on the launches and the Bureau agreed to maintain them without cost to the city. It is thought that when the new pumps are installed on the launches the efficiency of the fire department in fighting fires along the water front and among shipping in the Pasig River and Manila Bay will be greatly increased. The pumps for the launches have been ordered by the Bureau of Navigation and is expected that the new arrangement will be in force within the next few months.

An order was placed with manufacturers in the United States for 4 Webb motor combination pumping engines and hose wagons; 3 White motor combination chemical and hose wagons; 1 La France aërial hook and ladder truck; 1 Seagrave city service hook and ladder truck; and 1 chief's motor. One motor supply wagon and 1 deputy chief's motor were purchased in Manila.

Of the motor apparatus ordered in the United States only one piece has so far been received, the aërial hook and ladder truck, which was received on July 23, 1913. This truck has not yet been put in service as it is desired to familiarize the men with its workings before running it to fires.

### FIRES.

One hundred and fifty-four fires occurred in the city during the year, which is 1 less than the number for the fiscal year 1912 and 8 more than occurred during the fiscal year 1911. The department also responded to alarms for 3 fires beyond the city limits.

The fire loss during the year was \$\mathbb{P}1,609,439, which is nearly \$\mathbb{P}2,000,000\$ less than the loss during the fiscal year 1912. The

loss for this year has been exceeded in only two years since the organization of the fire department—in 1903 and 1912. (For fire loss in detail see Appendixes A and B.)

The number of large fires during this year was greater than the number for any year since the organization of the fire department, 26 second and special alarms being necessary as against 22 in 1912, which was the largest number heretofore.

### WATER SUPPLY.

Regular inspections of each district were made by the proper officer and fire hydrants were inspected monthly by opening of the plugs and flushing out the valves.

Forty new fire hydrants were installed during the year. This makes a total of 660 post fire hydrants in service, with a pressure at the hydrants of from 32 to 45 pounds.

## EXPLOSIVES AND COMBUSTIBLES.

One thousand four hundred and ninety-six inspections were made under the provisions of section 429 of the Revised Ordinances, and 28 violations of the ordinances relating to the storage of combustibles were discovered.

Four hundred and forty-four permits for the transportation of explosives and combustibles were issued.

On June 30, 1913, there were 508 licenses in force for conducting theaters, engaging in dangerous trades, and the storage of combustibles and explosives, all of which are under the supervision of this department.

#### ELECTRICAL DIVISION.

Alarm system.—There are now 180 fire-alarm boxes in service, 7 new boxes having been added during the year. All boxes have been thoroughly inspected, tested, and kept in perfect working order, and have transmitted all alarms properly.

The total number of police boxes in service is 155.

Inspection testing.—This work includes the inspection of all electrical wiring and equipment within the city of Manila, both inside of building as well as outside electrical construction.

There were 9,950 inspections of new electrical installations made during the year.

There were 67 condemned notices issued during the year to the owners or users of the old and hazardous installations, giving them sufficient time for the necessary repairs.

Eight hundred thirty-seven electric meters were tested in the

laboratory of this division during the year, in accordance with section 321, chapter 19, Revised Ordinances, city of Manila. Eight hundred twenty of these were found correct within 3 per cent, as provided by law, and 17 incorrect.

Street lighting. The following table shows the total number of street lights, including the installation of 8 ornamental standards, now in service, June 30, 1913:

Туре.	In service June 30, 1913.		Removed.
Arcs Incandescents Eight ornamental standards, 6-5 light and 2-3 lights each	479 853 36	4	2 1
Total	1, 368	4	3

The outages for the year amounted to 12,016.10 lamp hours, for which deductions were made from the monthly street lighting bills. These outages were taken from the police reports.

### FIRE ESCAPES.

There have been no fires involving large loss of life. There is in course of preparation an ordinance covering the installation of adequate fire escapes on all buildings and structures requiring them, and this work, when completed, will afford additional protection to factory buildings and others on which fire escapes are deemed necessary.

## DEPARTMENT OF ASSESSMENTS AND COLLECTIONS.

## REAL ESTATE TAX.

The total assessed value of taxable real estate in the city of Manila as shown by the 1913 tax rolls is \$\pm\$90,222,751, which is \$\pm\$4,378,830 more than the year 1912. Improvements valued at \$\pm\$4,632,720, completed during the calendar year 1912, were added to the tax rolls, but this addition was in a measure offset by the effects of various destructive fires and by the acquisition of land by the city of Manila for street and park purposes.

The following table shows the assessed value of all taxable and exempt real estate in the city:

Total values.

www.iibtool.com.cn	Land.	Improve- ments.	Total.
Taxable propertyExempt property	P45, 446, 075 31, 631, 927	P44, 776, 676 27, 438, 949	P90, 222, 751 59, 070, 876
Grand total	77, 078, 002	72, 215, 625	149, 293, 627

## Classification of exempt property.

Owner.	Land.	Improve- ments.	Total.	Per cent.
Insular Government United States Army City government	P15, 007, 001 2, 666, 131 9, 909, 934	P9, 101, 192 1, 881, 300 2, 644, 534	•24, 108, 193 4, 547, 431 12, 554, 468	16. 2 3. 0 8. 4
Total Government ownership	27, 583, 066	13, 627, 026	41, 210, 092	
Roman Catholic Church and orders	3, 041, 320 300, 506 5, 879	12, 441, 398 722, 400 27, 000	15, 482, 718 1, 022, 906 32, 879	10.4
Total churches and religious orders	3, 347, 705	13, 190, 798	16, 538, 503	
Schools, hospitals, etc	701, 156	621, 125	1, 322, 281	.9
Total exempt	31, 631, 927	27, 438, 949	59, 070, 876	39. 6

From the above it will be noted that practically 40 per cent of the real property in the city is exempt from taxation.

Real-estate taxes to the amount of \$\mathbb{P}\$1,365,871.91 were collected during the fiscal year as compared with \$\mathbb{P}\$1,299,436.79 collected during the fiscal year 1912, an increase of \$\mathbb{P}\$66,435.12.

The amount of delinquent taxes outstanding at the close of the fiscal year 1913 is  $$\mathbb{P}22,500.33$ .

The following comparative statement shows the value, by districts, of new buildings assessed during each calendar year from 1909 to 1912, inclusive:

District.	1909.	1910.	1911.	1912.
Intramuros	₽360	P28, 640	P8, 680	P32, 765
Binondo		112, 760	306, 030	853, 341
San Nicolas	. 69, 910	92, 230	113, 406	221,050
Santa Cruz	41,710	68, 780	175, 500	289, 770
Quiapo		67,710	166, 200	106, 465
San Miguel	51,000	72,480	106, 530	95, 100
Sampaloc		365, 080	337, 390	294, 795
San Lazaro		115, 470	184, 265	143, 200
Tondo	146, 191	139, 600	121, 340	191, 020
Ermita	302, 315	193, 025	307, 090	1, 232, 592
Malate	87, 715	135, 253	429, 530	460, 802
Paco	47, 836	61, 480	128, 910	319, 660
Pandacan	17,680	9,960	25, 530	160, 920
Santa Ana	32, 240	21, 712	27, 130	41, 240
Port				190, 000
Total	1, 009, 757	1, 484, 180	2, 437, 531	4,632,720

Attention is invited to the fact that the value of the new buildings erected during the calendar year 1912 is almost equal to the value of those erected during the three preceding years.

The following is a comparative statement of the net tax assessed for each calendar year, 1909 to 1912 inclusive, by districts:

<b>-</b>	Net tax assessed December 31—						
District.	1909.	1910.	1911.	1912.

#### MATADERO.

The collections from this source during the fiscal year amounted to ₱99,145.38, as compared with ₱113,204.01 during the fiscal year 1912, a decrease of 14,058.63.

There were slaughtered and removed for consumption during the fiscal year 70,640 animals, weighing, dressed, 3,304,846 kilos, as compared with 76,807 animals weighing, dressed, 3,773,467 kilos slaughtered and removed during the fiscal year 1912.

This falling off in the receipts of the Manila matadero is accounted for by the fact that all cattle imported from Australian ports during the whole of the fiscal year of 1913 and during approximately eleven months of the fiscal year 1912 were landed at the Sisiman matadero for slaughter and the fees derived from this source are credited to the Bureau of Agriculture.

The following comparative statement shows the number and kind of animals slaughtered and removed for consumption, the weight of dressed meat, and the fees collected at the rate of 3 centavos per kilo on dressed meat, during the fiscal years 1910 to 1913 inclusive:

	C	attle.	Hogs.		Sheep.		Total.		
Fiscal year—	Num- ber.	Weight.	Num- ber.	Weight.	Num- ber.	Weight	Num- ber.	Weight.	Fees collected.
1910	25, 729 26, 999 5, 070 1, 590	Kilos. 3, 430, 814 3, 621, 573 672, 074 136, 957	63, 177 65, 501 70, 213 67, 700	Kilos. 2, 903, 038 3, 027, 317 3, 090, 815 3, 156, 004	1, 032 1, 047 1, 224 1, 350	Kilos. 8, 062 9, 056 10, 578 11, 885	89, 938 93, 574 76. 507 70, 640	Kilos. 6, 341, 914 6, 657, 946 3, 773, 467 3, 304, 846	P190, 257. 42 199, 738. 38 113, 204. 01 99, 145. 38

### PUBLIC MARKETS.

There were collected as market-stall rentals during the fiscal year \$\mathbb{7}358,711.65\$, as compared with \$\mathbb{7}319,666.05\$ collected during the fiscal year 1912, an increase of \$\mathbb{7}39,045.60\$, or over 12 per cent.

There was a small increase in each of the older markets except those in the outlying districts—Pandacan and Gagalangin. The large increase was due to the new market in Paco, which was open for only a few months during last year, and the opening of the new Tondo market on Juan Luna. The receipts of the Paco market were far in excess of any collection ever made in the former Herran market, which the Paco market superseded. The new Tondo market was opened on April 15, 1913, and up to the end of the fiscal year the collections averaged over \$\mathbb{P}36\$ per day. The revenues of this market will show a decided increase when the selling of fish on the Tondo beach is prohibited.

The following comparative statement shows the amount of stall rents collected in each of the city markets during the fiscal years 1910 to 1913, inclusive:

	Total, year ended June 30—					
Market.	1910	1911	1912	1913

## MUNICIPAL LICENSES.

The following comparative statement shows the receipts from the issue and transfer of the various classes of municipal licenses and permits and sale of public-vehicles equipment (number plates, etc.) during the fiscal years from 1910 to 1913, inclusive:

1911	1912	1010
		1918
33, 824, 67 10, 217, 71 8, 045, 50 3, 250, 50 19, 219, 68 3, 255, 60	P140, 121. 70 37, 285. 76 8, 864. 74 7, 648. 00 2, 933. 50 20, 579. 02 4, 109. 44	P125, 354. 21 40, 504. 33 14, 699. 40 7, 948. 00 3, 038. 50 23, 674. 89 7, 130. 67
		3, 255. 60 4, 109. 44

The receipts from liquor licenses have decreased steadily during the past eight years, with the exception of a slight increase during the fiscal year 1909 over the preceding year.

The following statement shows the number of each kind of public vehicle in the city licensed on June 30 of the years 1909 to 1913, inclusive:

		Year ending June 30—			
·	1909	1910	1911	1912	1913

### CATTLE REGISTRATION.

Municipal Ordinance No. 106, "The Cattle Registration Ordinance" provides for two kinds of registration, one to be covered by certificates of ownership and one to be covered by certificates of registration.

During the fiscal year 6,905 certificates of ownership and 1,961 certificates of registration were issued at a uniform fee of  $\mathbb{P}1$ . The total collection for the year was  $\mathbb{P}8,903$ , a decrease of  $\mathbb{P}3,271$ , as compared with the collections during the fiscal year 1912.

Act No. 2101, effective April 1, 1912, requires a payment of \$\mathbb{P}2\$ a year for each docked horse owned or possessed. This produced a revenue of \$\mathbb{P}348\$ during the fiscal year 1913.

### RENTALS OF CITY PROPERTY.

During the period covered by this report there was collected as rentals for the use of city property the sum of \$\mathbb{P}21,610.92\$, as compared with a collection of \$\mathbb{P}23,793.29\$ during the fiscal year 1912, a decrease of \$\mathbb{P}2,162.37\$, which is due principally to property being vacated and not rerented and to certain refunds made.

There was collected during the year the sum of \$\mathbb{P}3,502.38\$ as rent for the use of the city telephone poles, as compared with \$\mathbb{P}2,691.26\$ from the same source during the fiscal year 1912, an increase of \$\mathbb{P}811.12\$.

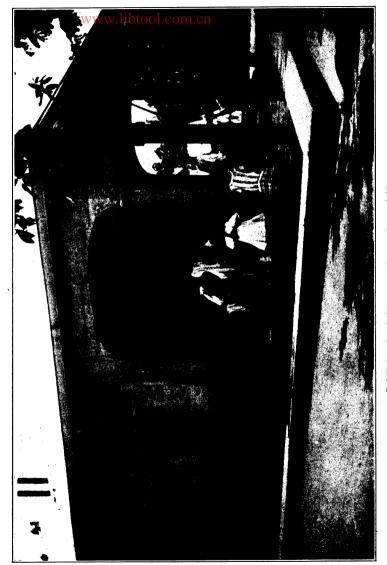

## SALES OF CITY PROPERTY.

During the fiscal year 48 sales of city property were made, all for cash. Including deferred payments made on properties sold during the prior fiscal years, the total collection under this head during the year amounted to \$\P\$58,404.19.

### DEPARTMENT OF SANITATION AND TRANSPORTATION.

The following are the principle functions of this department; Street sprinkling and flushing; street cleaning; gutter cleaning; canal and sewer flushing; garbage and refuse collection and disposal; beach refuse collection and disposal; dead animal collection and disposal; filling low land with refuse collected by the department; care of public midden sheds; collection and disposal of night soil by pail conservancy and odorless excavator systems; labor and transportation furnished the Bureau of Health used in its work of mosquito and rat extermination; care of city pound: care and operation of the city slaughterhouse; the transportation of fresh meat from slaughterhouse and meat boat to the public markets; the care and operation of the public markets; the care and operation of the city cemeteries; the care, upkeep, and extension of public parks and playgrounds; the care and operation of the city plant and tree nursery; planting, trimming, and care of trees on streets and avenues; the care and upkeep of the animals and quarters of the zoölogical exhibit in the Botanical Gardens; the care and improvement, at contract rates or cost, of park areas not controlled by the city of Manila; the care, upkeep, and operation of the land-transportation equipment used by this department, by other city departments, and by Insular Bureaus.

The total recepits of the department from all sources was \$\mathbb{P}1,022,762.55\$, and the total expenditures \$\mathbb{P}988,765.87\$, all as shown in detail in the financial report of the Board.

The first model building for public use for the combined purposes of a laundry, bathhouse, and cenvenience station was erected in the district of Sampaloc and opened the latter part of the month of June. A study is being made of the conditions under which this building is being operated and used, and if it proves the success hoped for, it is the purpose of the Board to construct others of a similar type.

In response to advertisements for bids, the Manila Refining Company made a proposal to take over the work of collecting and disposing of garbage, refuse, and dead animals for ₱127,500 per annum, agreeing to use motor trucks for collecting and a reduction plant for disposal. This was the only proposal received and a contract was made on the above basis for ten years beginning September 1, 1913. The reduction plant is now in course of construction.

### CITY SCHOOLS.

The school year opened in June, 1912, with a full attendance. Within a few days after opening, the number of pupils enrolled

was sufficient to fill all of the available space and occupy the attention of all the available teaching personnel.

The units comprised within the department of schools were as follows: twenty primary schools, grouped into four supervising districts; 3 intermediate schools; 1 high school for Filipinos; 1 primary-intermediate high school for the children of strictly English-speaking parentage; 1 school of commerce; 1 school for the deaf and blind; 1 class of orphan girls at the Hospicio de San José; 1 class of reform girls at the Hospicio.

The Philippine School of Commerce and the School for the Deaf and the Blind are maintained entirely by the Bureau of Education, although for pedagogical purposes they are under the administration of the superintendent of city schools.

### PUPILS.

The total enrollment for the year was 17,236; the current enrollment for March, 1913, was 13,500; and the average daily attendance for March was 12,917.

The total enrollment for 1912–13 was 513 pupils fewer than for the preceding year, whereas the current enrollment for March, 1913, was 583 more than for the preceding year. This fact is gratifying in that it indicates that approximately 1,000 pupils who, in the previous year had observed a sort of in-and-out attendance, had now settled down to a reasonable regularity remaining throughout the year and thereby securing some real benefit from the instruction.

In October, 1912, at the request of Hon. Manuel Camus, judge of the municipal court, a teacher was assigned to the Hospicio de San José to take charge of the academic and industrial training of girls committed to that institution for reform. The industrial work of the class includes cooking, washing, ironing, housecleaning, plain sewing, garmentmaking, darning, embroidery, lace work, and the care of the aged infirm women of the institution.

The medical inspection of school children, begun early in school year 1911–12, was continued throughout 1912–13 by the same physician. The total number of examinations made was 24,665. Seven thousand six hundred and nineteen examinations resulted in the physician's declaring that the pupil needed medical attendance, and 3,108 pupils were referred to the dispensaries or to family physicians for treatment. During the year 1,649 cases reported for treatment, with the following results:

Cured	398
No improvement	68
Improved	418
Results unknown	765

The growth of the interest in music instruction all through the city schools has been such as to warrant the assignment of two Filipino teachers as assistants to the supervisor of music.

By way of a general word on the subject of vocational training, it may be said that gardening, slipper making, basketry with abacá fiber, lace making, embroidery, Irish crochet, and the special course in housekeeping are features to which the city schools may justly point with pride. Of the various lines of hand weaving tried out, it would seem as if slipper making has been the most productive of satisfactory results.

The work of the School for the Deaf and the Blind has been such as to fully justify the comparatively inordinate expense attaching to its maintenance.

#### GRADUATES.

Of the 322 boys and girls who graduated from Manila High School prior to March, 1913, 76 were students in the University of the Philippines, 51 were in the employ of the Government, 9 were studying at personal expense in the United States, 9 were enrolled for the one-year course in stenography in the Philippine School of Commerce, 9 were teaching, 3 were clerks in business houses, 2 were in the Constabulary, 2 were municipal officials, 1 was a farmer, and 1 a merchant. Three reported themselves as unemployed and no data are available for 128.

#### ATHLETICS.

Athletics had a place in the program of every school in the city and by that is meant not only competitive athletics, but group schedules as well.

An interesting development in connection with athletics was the opening on January 11, 1913, of the Tondo equipped public playground. The establishing of a series of these playgrounds in the city has warranted the establishment of the position of supervisor of public playgrounds.

#### EXPENDITURES.

The total amount expended for the current work of the department of schools for the fiscal year 1913 was ₱323,612.89.

#### SCHOOL BUILDINGS.

Plans are under way for the construction of a 3-story concrete structure at the corner of Taft Avenue and Padre Faura, the building to cost approximately \$\mathbb{P}\$100,000.

The city recently purchased a 9,000-meter tract of land at Nos. 2207-2211 Calle Juan Luna with two substantial framework buildings thereon, the premises to be used for school

purposes. The amount involved in this transaction is ₱28,000, and the site is one of the most desirable in the city.

## DEPARTMENT OF SEWER AND WATERWORKS CONSTRUCTION.

## ORGANIZATION.

On July 1, 1912, the office of water supply and sewers was transferred to the department of sewer and waterworks construction, thus consolidating all of the work in connection with water supply, sewers, and drains.

The force consists of the chief engineer, 3 assistant engineers, 3 inspectors, 4 clerks, and 7 meter readers, all in the classified service, in addition to the construction forces in the field.

#### WATERSHED.

Conditions on the watershed were satisfactory. Comparatively few people crossed the watershed, although the system of permits remained the same as during the previous year. The system of watershed guards was changed this year, resulting in improvement to the service and some economy to the city.

A topographical survey was made of a large part of the watershed by the military engineers by order of the chief engineer of the Philippine Division. This map will help considerably to locate additional storage reservoirs on the watershed if at any time the city decides so to do.

The rainfall on the watershed, although not as great as the average for a number of years past, yet was so well distributed throughout the dry months that there was very little danger of a shortage of water due to lack of storage during the year. The minimum run-off recorded during the months of April and May was about 11,000,000 gallons per day. Frequent rains during the dry season, however, filled up the reservoir several times so that no water shortage was experienced this year.

## HEADWORKS.

Due to the more or less extensive repair work carried on during the fiscal year 1912, the leakage of the Montalban reservoir was reduced from approximately 28,000,000 gallons to 14,000,000 gallons per day. The Santolan pumping station was examined and made ready so that it could be started on a day's notice. Account was kept of the amounts of water flowing through the river and used in the city of Manila and as soon as it was evident that the normal minimum flow of the river would not meet the season's requirements, the water behind the dam was deliberately lowered and the construction of the flume pushed forward with as much speed as possible with the result that in about two weeks

the flume was in service and whatever water was flowing through the river was caught at the head of the flume and delivered through the lowest intake of the gatehouse to the city.

The flume was built of concrete of horseshoe shape, open on top, and is readily accessible for repairing, cleaning, or any other purpose.

WWW.libtool.com.cn

### TIGHTENING THE RIVER BOTTOM.

To reduce the leakage around the dam the work of tightening up the river bottom was again resumed this year and several methods were used to carry out this work.

## PIPE LINE AND OTHER STRUCTURES.

The pipe line and other structures were examined several times during the year and so far they are in good condition. At a point about one-half mile below the Mariquina River pipe line crossing it was discovered that the river was encroaching dangerously near to the pipe line due to the tendency of the river to ox-bend formations, a characteristic of rivers flowing through alluvial soils. Surveys were made for the purpose of making studies to prevent any further encroachment of the river, but due to the lateness of the season and the inadequacy of funds, temporary measures were used instead, with very good results.

### NEW RESERVOIR.

The new reservoir was in service throughout the year with the exception of a few days during the month of November, when the reservoir was cleaned.

The reservoir grounds were kept in first-class condition and did not involve any extensive expenditures during the year.

## DEPOSITO.

The deposito building is in fair condition as, beyond a few timbers which have been repaired, no repairs are necessary.

## ROADS AND TELEPHONES.

All the roads and telephones under the jurisdiction of this department were kept in good condition, the telephones being maintained by the pipe line guards.

### DISTRIBUTION SYSTEM.

The pipe lines throughout the city were maintained in good condition so that the leakage and waste were kept down to a minimum. The pipes being in shallow trenches the leaks are generally discovered in time to avoid any serious loss by waste.

The trouble with shell, fish, and other foreign matter in the water mains does not seem to abate. About 36 flushes were made

on the water mains every night in the year except during the very dry season at which time the water could not be spared for this purpose.

## PUBLIC HYDRANTS.

There are 243 public hydrants in the city of Manila, 18 of which were added during the year. Several others were shifted in location so as to make them more accessible to the poorer class of people who generally use these hydrants. No restrictions are made as to the amount of water that may be used, and it is free to everybody.

## FIRE HYDRANTS.

There are 660 modern post fire hydrants, Matthews type, installed at the present time in the city of Manila, 40 of which were installed during this year.

#### VALVES.

There are 516 water valves recorded on the maps of this department, 19 of which were installed during this year. The distribution system is so arranged that by proper management of the valves not more than a few blocks need be cut off at any one time. During the entire year there was not a single district of the city that had the water cut off from it for more than an hour or so.

## SERVICES.

The private services were maintained in good order throughout the year, but they are more or less difficult to keep in repair, as they belong to private parties and lengthy negotiations are sometimes necessary before they can be repaired. However, the waste due to leakage is not considered serious.

The total number of services June 30, 1913, was 6,314. There were 576 services installed during the year and 96 services discontinued, thus making a net increase of 480 services, or 8.4 per cent, for the year. The increase of revenue over last year was 18 per cent, showing that each one of the services was using more water than previously.

#### METERS.

The presence of shell, fish, and other foreign matter occasionally obstructs the screens in front of the meter, thus causing a shortage of water and occasionally disagreeable smells from the water passing into the house. In December, 1912, all the meters in the city were cleaned free of charge to the consumers. Altogether there were 5,236 meters and 4,885 pipe lines cleaned at a cost of \$\frac{1}{2}874.42\$ since this work was started.

### WATER CONSUMPTION.

Since the installation of the Venturi meter it is possible to measure the total amount of water used in the city to a certainty. The following table will show the consumption:

WWW.libtool.com.cn Total metered consumption Estimated consumption	
Total Estimated waste	3,742,357
Average daily consumption	40,730

One hundred and sixty-three liters per capita per day for a population of 250,000.

#### COLLECTIONS.

The collections for the year show very gratifying results, the increase in the collections for water being ₱56,228.37 and for sewer charges ₱41,452.61, making a total gain of ₱97,680.98.

### SANITARY SEWER SYSTEM.

The sanitary sewers were operated throughout the year without any serious mishap. Two breaks were found on the secondary mains and these were repaired at a total cost of about \$\mathbb{P}\$1,800.

#### PHMPS.

All the pumps are in first-class condition and run as smoothly as could be desired. The contract with the Manila Electric Railroad and Light Company for furnishing electric power to the stations terminates during the month of May, 1914, and it is expected that better terms can be arranged with the company.

#### HOUSE CONNECTIONS.

There were 2,796 connections in service at the end of the last fiscal year. During this fiscal year 358 services were connected up making a total at the present time of 3,154 connections. The total number of connections constructed were 477, leaving 119 services which have been constructed but are not yet in use.

## STORM WATER DRAINS.

Storm water drains were kept in good condition throughout the year. New drains built in the last eight or nine years have given little, if any trouble.

## WATER SUPPLY EXTENSIONS.

The preliminary surveys for the extension of the water supply from the Angat River started during the fiscal year 1912 and were discontinued early in the month of July, 1912. Surveys were started as soon as possible to determine the practicability of several locations for additional reservoirs both near the city of Manila and also above the Montalban dam. Two sites were surveyed below the Mariquina River in natural ravines, the mouths of which will have to be dammed, which will afford sufficient storage for many years to come, to tide the city over during the dry season.

A preliminary survey was also made of a possible very large storage reservoir above the Montalban dam near Boso-Boso, which reservoir if built will assure the city of Manila a sufficient supply of water for some time to come. No estimates have been made to date of the probable cost of two reservoirs, but a very rough estimate for the lower reservoir would be about \$\mathbb{P}750,000\$ and the upper one \$\mathbb{P}1,250,000\$, thus necessitating an expenditure of \$\mathbb{P}2,000,000\$ for storage purposes only.

## ULTRA VIOLET RAY APPARATUS.

The ultra-violet ray apparatus ordered some time ago arrived during the fiscal year and was duly delivered to the Bureau of Science, to carry on such experiments as may be determined upon. Inasmuch as a few parts of the plant have not yet arrived the machinery has not been set up.

## ELECTROLYSIS.

The committee on electrolysis met several times during the year or as often as occasion demanded. At one of the meetings it was agreed by all present that a certain sum of money should be contributed by each of the parties or companies interested for the purpose of obtaining available funds for the study of electrolysis. The Bureau of Science was entrusted with the scientific research for the cause of same. During the year the telephone company claimed to have experienced a great deal of trouble from this source; and some boilers were supposed to be likewise affected. While no definite action has been decided upon still the informal talks of the committee, and the resultant measures taken, seem to have considerably diminished the action of electrolysis in the city.

#### CONSTRUCTION.

A certain amount of new work was built during the year, the expense of which was paid mostly from the bond issue funds which are nearly exhausted. It is estimated that during the next fifteen or twenty years it will be necessary to expend about \$\mathbb{P}250,000\$ per annum for extensions to the water supply mains,

sanitary sewers, and storm water drains to meet the needs of the city. Some measures will need to be adopted to provide funds for these very necessary sanitary improvements, either by means of a special assessment law or a law permitting the issuance of additional sewer and water bondson

The total length of water mains, sewers, and drains to date is approximately as follows:

Water mainslinear	meters	148,000
Sanitary sewers	do	97,000
Storm drains	do	26,480
