EXAMPLE 1.—To find the day of the week for July 4th, 1881. Opposite Century 19, New Style, and over year 81, is *Saturday*. Under July, Saturday falls in the vertical line under 2, and the second day to the right following, under 4, is *Monday*, July 4th.

EXAMPLE 2.—To find the day of the week on which Columbus discovered America, October 12th, 1492, Old Style. Opposite Century 15, Old Style, and over 92 in black letter (it being leap year,) is *Monday*. Therefore, October 8th was *Monday*; and the line of week-days in which *Monday* falls under October (which is the sixth,) with the days of the month above, constitute the entire Calendar for October, 1492, Old Style, and the 12th, as seen, falls on *Friday*.

EXAMPLE 3.—To find the 1st *Tuesday* after the 1st *Monday* in November, (Election Day,) 1882. Find 82 in "Years of the Century;" follow up the column to the day on a line with the figure 19 of the "Centuries, New Style;" this will be found to be *Sunday*. Under November, *Sunday* is found in the vertical line under 5, of the calendar above, *Monday* to the right of it under 6, and *Tuesday* under 7. So the *Tuesday* after the first *Monday*, is the 7th.

EXAMPLE.—To ascertain at what hour it will be high tide at Baltimore on the 1st of August, find the time of high water at New York under August 1st, which is 4.24 A.M., then add 10 hours 53 minutes, as found in the table of Tide Constants under Baltimore, and we have 3.16 P.M. as the hour of high water at Baltimore August 1st, 1890.

NOTE.—The hours of high water in the calendar pages are the morning hours—from midnight to noon—throughout the year, as computed for the U. S. Coast Survey. To find the time of next high water, or the afternoon tide—from noon to midnight—add 12 h. 25 m. in each day. The result will be the proximate hour of evening tide. For low water, add 6 h. 12 m., approximately, to the time of high water.

Explanation of the Calendar.

The two natural divisions of time are the day, of 24 hours, representing one revolution of the earth on its axis, and the year, 365 days, approximately representing one revolution of the earth around the sun. The month represents (nearly) the period of the moon's revolution round the earth (about 29½ days), while the week is approximately one-fourth of this.

By the Julian Calendar, established by Julius Cæsar, 46 B.C., the months were reconstructed; the Roman year, which began March 1, and had but ten months, being changed to Jan. 1, and two months added. Thirty-one days were given to the 1st, 3d, 5th, 7th, 8th, 10th, and 12th months, and 30 days each to the rest, except February, which on every fourth year received an intercalary day, made by the *sesto Calendas Martius*, whence "leap year" came to be called *Bis-sextile*. As the Julian year had 365¼ days, its length exceeded the true solar year by 11m. 14 sec., so that the equinox in the course of centuries fell back several days. To correct this error, Pope Gregory XIII. in 1582 reformed the calendar by suppressing ten days, restoring the equinox to March 21. The Gregorian Calendar also made every year which is divisible by four without a remainder a leap year, except the centesimal years, which are only leap years when the first two figures are divisible by four: thus 1600 was a leap year, 1700, 1800, and 1900 common years, 2000 a leap year, etc. The length of the mean year is 365 d. 5h. 49m. 12sec., exceeding the true solar year nearly 26 sec., which error amounts only to 1 day in 8,325 years.

The Gregorian Calendar was adopted by Germany in 1700, and by English law in 1753, when the Julian Calendar, or *old style*, gave place to the *new style*, by dropping eleven days from the month of September, 1752.

The festival of Easter, commemorating the resurrection of Christ, used to be observed on the 14th day of the moon, i.e., near the full moon—the same as the Jewish Passover. But the Council of Nice, A.D. 325, ordered Easter to be celebrated on the Sunday next succeeding the full moon that comes on or next after the vernal equinox—March 21st; thus making Easter and the related feast and fast days movable holidays.

To find the time of high tide at fifty places in the United States, see page 5.

JANUARY is so named from the Roman *Janus*, who was the porter of heaven, having the surname of *Patulcus*, the opener. He presided over the beginning or opening of everything, hence the first month of the year was called after him, when the Roman year was altered by *Numa Pompilius* (in the 7th century B. C.) from ten months beginning in March, to twelve months by adding *January* and *February*. In his original character *Janus* was the god of the sun, and worshipped as such by the *Etruscans* and the *Romans*. The temple of *Janus*, (which was really a covered passage or gate at *Rome*) was left open in war as a symbol that the god had gone out to assist the Roman arms, while it was continually shut in time of peace.

On *New Year's day*, which was the festival of the god *Janus*, the *Romans* gave presents to one another. Thus ancient was the origin of the modern custom of *New Year's presents* and first of *January festivities*.

FEBRUARY, according to some, derives its name from the Latin *februare*, signifying to expiate or purify, as the Romans had a custom of general lustrations and purifications in the latter part of that month. More generally, February is traced to the Roman divinity, *Februus*, afterward identified with the god Pluto, of the lower world. Still another origin is found in the goddess *Februa*, supposed to be the same as Juno; and Dr. Foster says: "The evident relation between the *Februata* Juno and the *Purificata* Virg. Maria is one of the most striking instances of the connection between pagan and Christian rites and festivities as to the period of their occurrence."

The festival of the dead (*Feralia*) was celebrated by the Romans in the month of February.

The month of MARCH was named from Mars, (Lat. *Martius*.) the Roman god of war. This divinity was known as Father Mars, and next to Jupiter, he enjoyed the highest honors at Rome, of which city Jupiter, Mars and Quirinus were the three tutelary divinities. March was the first month in the early Roman calendar, and the legal year began with March 25 even in England, until the change from Old Style to New Style in 1752. (See Explanation of the calendar, p. 5.) The custom of reckoning the year according to the old style is still retained in Russia, and even the financial year of Great Britain is reckoned from the 31st of March. In historical works, dates are frequently written thus, Feb. 1. 1732, the upper figures representing old style reckoning, and the lower, new style.

We also see dates between Jan. 1 and March 25 expressed thus, Jan. 30, 1643, meaning that the year was legally 1643, (O. S.) but by modern reckoning, 1649, (N. S.)

APRIL (Lat. *Aprilis*) derived probably from *Aperire*, to open, because spring and the buds generally open in this month. Another derivation has been found in the dedication of this month by the Romans to Venus, goddess of buds and beauty, whose name in Greek was *Aphrodite*, whence *Aphritis* or *Aprilis*. This is more fanciful than the first-named derivation, but the word-mongers are never daunted by difficulty, any more than by distance, in their etymologies.

In the French revolutionary calendar, April included most of their new season of *Germinai*, and the beginning of *Floreal*.

On the ancient monuments, *Aprilis* appears as a dancing youth with a rattle in his hand, thus symbolizing the gay and jocund spirit of spring.

All Fool's Day (April 1) is traced through every country of Europe to the Hindoos, and even farther back, to the mistake of Noah in sending the dove out of the ark before the water had abated, on the Hebrew first day of the month.

MAY (Lat. *Maius*) was consecrated to Apollo among the Romans, and is derived from *Maiia*, a feminine divinity worshipped at Rome, to whom sacrifices were offered on the first of May. Some philologists, however, hold that *Maius* is a contraction of *Magius*, derived from the Sanskrit root *mag* or *mah*, to grow.

The custom of observing May-day, or the first of May, with floral and festive ceremonies, is older than the Middle Ages, and is probably the lineal descendant of the Roman *Floralia*, or festival in honor of *Flora*, celebrated from April 28 to May 2.

In England the custom of going out a-Maying is mentioned in Chaucer and Shakespeare. Before sunrise young people went to the groves to gather flowers and branches of foliage to adorn the village May-pole, around which the dancing was kept up. A queen of the May, the most beautiful girl in the village, was elected for crowning.

JUNE, the month of roses, has been commonly traced to Juno, worshipped at Rome as the queen of heaven. The connection is found in the fact that the month of June (said to have been called originally *Junonius*,) was considered the most favorable period for marrying; and Juno was the great protector of the feminine sex, and believed especially to preside over marriage. Another origin is found by some in the Latin *Juniores*, the young men, to whom Romulus is said to have assigned it; and still another in *junco*, to join, (as in marriage.)

The Anglo-Saxons called June "midsummer month."

In the northern United States June is the most delightful month of the year, when the flowers put on their richest bloom, and the birds warble their most musical songs, while the earth, the air, and the water teem with vigorous life, and the hours of the day far outnumber those of the night.

JULY. This month derives its name from *Julius Caesar*, who was born on the 12th of the month, originally called *Quintilis*, it having been the fifth month in the original Latin year, which began with March. The change of name was proposed by Mark Antony, and easily carried in the days of the great Julius.

This is the month of "Dog-days," usually reckoned as beginning on the 3rd of July and ending about the 11th of August. These days were so called from the star Sirius, or the dog star, in the constellation of *Canis Major*, to which the extreme heat of mid-summer was superstitiously attributed. During these oppressively hot days it was also supposed that dogs are more likely to run mad than at other seasons,

AUGUST, like July, owes its name to the Roman Cæsars, the Emperor *Augustus* having followed in the footsteps of his illustrious predecessor by appropriating a month to him self. Formerly called *Sextilis*, or the sixth month, when Julius Cæsar changed the calendar it still continued *Sextilis* and had thirty days, while February had twenty-nine, and in leap-year thirty days. To gratify the vanity of Augustus, one day was taken by the obsequious Senate from February and added to August, so as to make his month equal in extent and dignity to July.

August is associated, at least in this country, with intense heat and welcome vacations; schools and colleges shut up, the cities pour themselves into the country, and seaside and mountain resorts are thronged.

SEPTEMBER is so called from the Latin *septem*, seven, because it was the seventh month of the Roman year, which began with March, until the change of the calendar under the second King of Rome. Though September became then the ninth month, and October, November and December, the 10th, 11th and 12th, respectively, instead of the 8th, 9th and 10th, the ancient designations are still retained, in spite of their total inaccuracy; an instance of conservatism enduring through ages, and still perpetuated.

September is the month of harvest through large areas of the globe, and in Switzerland it is still called *Herbstmonat*, (harvest month.)

Harvest moon is the full moon nearest the autumnal equinox, (Sept. 21,) so called because it enables farmers to prolong the day's work during the autumnal harvest. In England and northern Europe the harvest moon rises near sunset several evenings successively; but this phenomenon is less marked in the United States because of our lower latitude. The recurrence of what was called an equinoctial storm at or about the time the sun crosses the equator, has ceased to be (if in fact it ever was) a thing to be depended on.

OCTOBER (Lat. *octo*, eight,) was the eighth month of the Roman calendar, before its reformation. This has given rise to the following quatrain :

"October has its name from *octo*, eight ;
 Though 'tis the truth, perhaps 'tis well to state,
 Such sixes and such sevens the months were knocked to,
 That ten became translated into *octo*."

The splendor of October in the country, when the air is crisp and full of electric energy, and the green forests change to the gorgeous and many-colored hues of autumn, has been celebrated by many writers.

NOVEMBER (Lat. *Novem*, nine,) is now the 11th month, instead of the ninth, as before the change of the Roman calendar.

Though frequently cold and blustering, November is redeemed almost every year, throughout a large region of the United States, by the delightful weather known as Indian summer, when for days or weeks the sun pours its rays mildly through a haze, and the soft and genial air invites us abroad to enjoy, as it were, a second edition of summer before winter closes in.

November is also notable in the northern parts of the United States for its time-honored festival of Thanksgiving, which originated with the Pilgrim fathers at Plymouth. Formerly celebrated on different Thursdays, as fixed by proclamation by the various State governors, Thanksgiving has now come to be generally observed on the last Thursday in November, as announced by Presidential proclamation.

DECEMBER, (Lat. *decem*, ten,) the tenth month of the early Romans, has become the twelfth, rounding out the year.

This is the month of the longest nights and the shortest days, as the winter solstice falls on the 21st of December.

When the French revolutionized the calendar in 1792, and gave the months new and significant names, December was cut in two, the first part of it becoming *Frimaire*, (frosty,) and the last, *Nivose*, (snowy.)

As the month of the Christmas holidays, which continue, were fully celebrated, from Dec. 24 to Jan. 2, or even longer, December's cold and gloom are enlivened with the joyousness, generosity and charity of the greatest festival in the calendar.

IMMIGRATION INTO THE UNITED STATES, 1820-1881.

PRIOR to the year 1820, no statistics of immigration were officially kept. By the Act of Congress, of March 2nd, 1819, Collectors of Customs were required to keep a record and make a quarterly return to the Treasury, of all passengers arriving in their respective districts from foreign ports; and these reports, published from time to time by the Treasury Department, constitute the sources of information as to the progress of immigration. The total number of foreign-born passengers arriving at the ports of the United States, from 1820 to 1880 inclusive, is given below. Prior to 1856, the figures show the whole number of aliens arriving, but from 1856 to 1880 inclusive, the number of immigrants only, i. e., of foreign passengers settling in the United States.

It has been estimated that the whole number of aliens coming to the United States from 1789 to 1820, was about 250,000.

STATISTICS OF AMERICAN AGRICULTURE.

THE following statistics of the agricultural products of the United States represent the leading crops for a series of years since 1870. For the year 1869 we have the figures of the census of 1870, which are the result of a detailed enumeration taken by the United States marshals and their deputies, as to the amount of land under tillage, and the quantity of each crop produced during the agricultural year 1869. The figures here given for each year since do not represent a census of agriculture, but the estimates made up by the Department of Agriculture from the returns received through its correspondents in all parts of the country. These correspondents estimate the area in specific crops, and from their own experience and judgment form an opinion of the condition of the plant of each crop from month to month, and ultimately of the quantities produced. These returns are recorded, and the records prepared by counties are summed up and averaged at the Agricultural Department, and the averages corrected by a duplicate record, in which the difference in the productive value of the counties is considered. To cite the language of the Report of the Commissioner of Agriculture, "the corrected result stands as an average, not inevitably of the whole State, but of such portion, half or two-thirds, or whatever area is reported of the entire State." While the results cannot possess the authority of an accurate census, they are all that we have since 1870, except in a few States where agricultural statistics are collected by law.

It is believed that the table given above will fairly represent the question of profit and loss in the cultivation of tobacco in 1879 in the various states of the Union. It will be observed that Tennessee stands lowest in the column which indicates profit. This is due to the peculiar condition of the tobacco market at the time the census was taken. Stocks of tobacco had accumulated, until prices coincided very nearly with the cost of production. All other states growing tobacco for exportation produced also some types peculiarly suited to the requirements of the domestic manufacturer, which brought good prices and elevated the general average of prices for such states. The profits in growing tobacco in Kentucky came from the production of the White Burley and yellow wrapper; in Illinois, from the production of the seed-leaf; in Missouri, from the production of sweet fillers and White Burley; and in Virginia from the production of yellow wrappers, bright "smokers," and sun-, air-, and fire-cured fillers. In consequence of the low scale of prices for shipping-leaf, and the margin for profit being reduced to such a low point, Tennessee, Missouri, Illinois, Indiana, Maryland, and other states growing tobacco mainly for exportation, show relatively a diminished production. On the other hand, all those states which have grown types suitable for domestic consumption, have generally ascended rapidly in the rank of production. Pennsylvania, which was tenth in rank in 1870, takes the third rank in 1880. Ohio passes from the fifth to the fourth, while Maryland and Tennessee descend from the fifth and third rank respectively to the seventh and fifth, and Missouri passes from the seventh to the ninth rank.

Profits in the culture of tobacco have been in direct proportion, first to its suitability to domestic consumption; and, secondly, to the amount of fertilization practiced by the growers in its cultivation. Ninety-four per cent. of all the product grown for market in 1879, north of the parallel of 39° 44', was classed as seed-leaf tobacco; and eighty-four per cent. of the whole product of that class was grown north of the same line. The amount of seed-leaf grown in the United States reached nearly twenty per cent. of the entire product.

NOTE.—No comprehensive figures of the business of the railways of the United States are attainable prior to the above. And even these tables are the fruit of private enterprise, in compiling from the official annual reports of each road the results of the traffic as shown above; and including for the year 1880 the operations of companies running 84,225 miles of railway out of a total of 93,671 miles. No department of the Federal Government has been invested with authority to require returns of railway operations, nor are there State officers charged with such duties except in a very few of the States.

*Other estimates make the coal fields of the United States, reckoning the Permian and tertiary coals, to embrace an area of over 600,000 square miles. But all estimates of their extent are as yet conjectural, and a very large portion of their actual area contains no workable coal.

The greatly increased mileage since 1880 is principally due to the fact, that in 1881, the Western Union Telegraph Company absorbed by purchase, all the lines of the American Union and the Atlantic and Pacific Telegraph Company, the former having previously in operation over 12,000 miles of line, and the latter 8,706 miles.

THE DOMINION TELEGRAPH COMPANY, operating almost wholly in Canada, had 5,000 miles of line in 1881, owned and operated by the Western Union Telegraph Company, (not included in above mileage.)

Besides the above, there are many new lines of Telegraph, which have complied with the United States Telegraph Act of 1866, and are operating wires with or without connection with Railway Companies.

THE MUTUAL UNION TELEGRAPH COMPANY, of the United States, established in 1881, has about 1,800 miles of line, and 50,000 miles of wire, and is extending its lines North and South, operating already from Boston to Chicago, St. Louis, Washington, etc.

THE BALTIMORE AND OHIO RAILROAD TELEGRAPH, has lines co-extensive with its railway system and branches, constituting in 1881, over 2,500 miles of line, 16,000 miles of wire, and 200 offices.

THE AMERICAN RAPID TELEGRAPH COMPANY, New York to Boston, Philadelphia, Baltimore and Washington, has over 500 miles of line, 1,500 miles of wire, and 60 offices.

THE INTERNATIONAL OCEAN TELEGRAPH COMPANY, of New York, (Inland Line,) has 502 miles of line, and 574 miles of wire.

The aggregate mileage of Telegraph Lines in the United States open for public business, exceeds 120,000 miles, besides Railway, Government, private and telephonic lines, length not ascertainable.

TELEPHONES.

THE AMERICAN BELL TELEPHONE COMPANY, (Boston,) had in use by its licensees, January 1, 1881, about 138,500 Telephones, and 393 Telephone Exchanges, in various Cities of the United States. The aggregate mileage of Telephone wires operated by these, was 28,336.

The aggregate number of Telephones in use in all the cities of the country, including those of competing companies, is much greater than the above.

The extent in mileage of telegraph wires put up for Telephone use in the United States, is estimated at 60,000 miles.

The number of communications by Telephone, has been roughly estimated at about 80,000,000 per annum in the Exchanges of the United States.

NOTE.—These statistics are not in most cases based upon a census of illiteracy, which few nations have provided for in systematic form. They are to be regarded rather as an attempt to approximate the proportions ignorant of the arts of reading and writing, from such data as exist concerning soldiers, the signing of marriage registers, etc., than as exact statistics of illiteracy.

OUR PUBLIC LAND SYSTEM.

The public lands of the United States which are still undisposed of and open to settlement lie in nineteen States and eight Territories. In each case, except Ohio, Indiana, Illinois, the Indian Territory and Alaska, land offices are established, in charge of an officer known as Register of the Land Office, where the records of all surveyed lands are kept, and all applications concerning lands in each district are filed and inquiries answered. The public lands are divided into two great classes. The one class have a dollar and a quarter an acre designated as the minimum price and the other two dollars and a half an acre, the latter being the alternate sections, reserved by the United States in land grants to railroads, etc. Titles to these lands may be acquired by private entry or location under the homestead, preemption and timber-culture laws; or, as to some classes, by purchase for cash, in the case of lands which may be purchased at private sale, or such as have not been reserved under any law. Such tracts are sold on application to the Land Register, who issues a certificate of purchase, the receiver giving a receipt for the money paid, subject to the issue of a patent, or complete title, if the proceedings are found regular, by the Commissioner of the General Land Office, at Washington.

Entries under land warrants (given mostly for military services under acts of Congress), have fallen off very largely by the absorption of such warrants, there having been no military bounty land warrants provided for on account of services in the late war.

Entries under the preemption law are restricted to heads of families, or citizens over twenty-one, who may settle upon any quarter section (or 160 acres), and have the right of prior claim to purchase on complying with certain regulations.

The homestead laws give the right to one hundred and sixty acres of a dollar-and-a-quarter lands, or to eighty acres of two-dollar-and-a-half lands, to any citizen or applicant for citizenship over twenty-one who will actually settle upon and cultivate the land. This privilege extends only to the surveyed lands, and the title is perfected by the issue of a patent after five years of actual settlement. The only charges in the case of homestead entries are fees and commissions, varying from a minimum of \$7 to a maximum of \$34 for the whole tract entered, according to the size, value or place of record.

Another large class of free entries of public lands is that provided for under the timber-culture acts of 1873-78. The purpose of these laws is to promote the growth of forest trees on the public lands. They give the right to any settler who has cultivated for two years as much as five acres in trees to an eighty-acre homestead, or, if ten acres, to a homestead of one hundred and sixty acres, and a free patent for his land is given him at the end of three years instead of five. The limitation of the homestead laws to one hundred and sixty acres for each settler is extended in the case of timber-culture so as to grant as many quarter sections of one hundred and sixty acres each as have been improved by the culture for ten years of forty acres of timber thereon, but the quarter sections must not lie immediately contiguous. The fees and commissions in timber-culture entries vary from \$13 to \$18 for the tract.

THE COPYRIGHT LAW OF THE UNITED STATES.

EVERY applicant for a copyright must state distinctly the name and residence of the claimant, and whether right is claimed as author, designer, or proprietor. No affidavit or formal application is required.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph, or a description of the painting, drawing, chromo, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be sent by mail or otherwise, prepaid, addressed, "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." This must be done before publication of the book or other article.

A fee of 50 cents, for recording the title of each book or other article, must be inclosed with the title as above, and 50 cents in addition (or one dollar in all) for each certificate of copyright under seal of the Librarian of Congress, which will be transmitted by early mail.

Within ten days after publication of each book or other article, two complete copies must be sent prepaid, or under free labels, furnished by the Librarian, to perfect the copyright, with the address, "LIBRARIAN OF CONGRESS, WASHINGTON, D. C."

Without the deposit of copies above required the copyright is void, and a penalty of \$25 is incurred.

No copyright is valid unless notice is given by inserting in every copy published,

"Entered according to act of Congress, in the year —, by —, in the office of the Librarian of Congress, at Washington," or, at the option of the person entering the copyright, the words: "Copyright, 18—, by —."

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice "Entered according to act of Congress," or "Copyright," or words of the same import, in or upon any book or other article.

Each copyright secures the exclusive right of publishing the book or article copyrighted for the term of twenty-eight years. Six months before the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all.

Any copyright is assignable in law by any instrument of writing, but such assignment must be recorded in the office of the Librarian of Congress within sixty days from its date. The fee for this record and certificate is one dollar.

A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal, at the rate of fifty cents.

Copyrights cannot be granted upon Trade-marks, nor upon Labels intended to be used with any article of manufacture. If protection for such prints or labels is desired, application must be made to the Patent Office, where they are registered at a fee of \$6 for labels and \$25 for trade-marks.

NOTE 1.—The one and two-year notes of 1863, and the compound-interest notes, though having a legal-tender quality for their face-values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and, since maturity, these presented have been converted into other interest-bearing bonds, or paid for in cash, interest included.

NOTE 2.—The amount of fractional silver in circulation in 1860, 1861, and 1862, cannot be stated. The amounts stated for 1876, 1877, 1878, and 1879, are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

NOTE.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

2.—The statement of population for 1860, 1870, and 1880 is by enumeration, and for other years from estimates by E. B. Elliott, of this department.

3.—The slight increase of the interest charge for 1878 is owing to the interest charge on bonds sold for resumption, less the amount saved by refunding at lower rates.

4.—The Temporary Loan, per Act of July 11, 1862, is included in the 4 per cents. from 1862 to 1868 inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten days' notice after thirty days', but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

NOTE.—The rule observed in the above table, of including only specific articles, which pay as much as \$100,000 revenue into the Treasury, of course omits a great many minor articles of commerce, yielding little revenue. To print the whole in detail would occupy too great space, but the scheme followed sums up the aggregate of each great class of imported commodities, with the duties collected, and the average per centage of duty thereon.

As to the much-controverted question of the amount of the precious metals mined which is to be deducted from the circulation on the account of use in the arts, the Director of the Mint, after careful and extended inquiries, in 1879, and 1880, came to the conclusion that the annual consumption of gold and silver, in all forms, in the United States, is not less than \$10,000,000 of gold and \$5,000,000 of silver.

The balance of exchanges in the precious metals, which had been steadily against the United States ever since 1861, has been changed during 1879-81. The imports of gold and silver coin and bullion from July 1st, 1879, to July 1st, 1881 amounted to the sum of \$187,060,041.

Brief History of the Standard Silver Dollar.

Authorized to be coined, Act of April 2, 1792. Weight, 416 grains, standard silver; Fineness, 892.4: equivalent to 371 1/4 grains of fine silver, with 44 1/2 grains alloy of pure copper.

Weight changed, Act of January 18, 1837, to 412 1/2 grains, and fineness changed to 900, preserving the same amount of pure silver = 371 1/4 grains, with 1-10 alloy. Coinage discontinued, Act of February 12, 1873.

Total amount coined, from 1792 to 1873, \$8,045,838.

Coinage revived, two million dollars per month required to be coined, and issue made legal-tender for all debts, public and private, Act of Feb'y 28, 1873.

Total amount coined, February 28, 1873, to Nov. 1, 1881, \$100,672,705.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS—1825-1880.

(Compiled from the Reports of the Secretary of the Treasury for 1863 and 1873, the Commercial and Financial Chronicle, Reports of the N. Y. Chamber of Commerce, and the N. Y. Shipping List and Price Current.)

NOTE.—In the American Almanac and Treasury of Facts for 1878, pp. 278-9, appeared a table of prices compiled on the basis of the average price of each article in New York, the 1st of January of each year. Such a table, however useful, fails to give the data which are important in forming a judgment of the whole range of prices for each year. The following table, carefully compiled from the sources indicated, takes the prices of the twelve months in each year, selecting the highest and lowest quotation for each article. It is to be understood, where no mention of quality is made, that the price quoted is for the cheapest grade of each commodity.
The prices are those of the New York market.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS—1825-1880.

These tables of prices have been compiled upon the basis of selecting the leading articles entering into general consumption, whether as semi-luxuries or the necessities of life. The prices quoted being those of the New York market, still wider variations would in some cases have been exhibited if other markets, near the centres of production of some leading staples, had been collated with these. The tables exhibit the violent fluctuations of the civil war period in the United States—1861-65—and the years of expansion immediately succeeding, in contrast with the general decline of the past few years, which has not yet reached, however, save in a few articles, the minimum prices which prevailed before the war.

LOWEST AND HIGHEST PRICES OF COMMODITIES FOR FIFTY-SIX YEARS—1825-1880.

(Compiled from the Reports of the Secretary of the Treasury for 1868 and 1873, the Commercial and Financial Chronicle, Reports of the N. Y. Chamber of Commerce, and the N. Y. Shipping List and Price Current.)

NOTE.—In the American Almanac and Treasury of Facts for 1878, pp. 278-9, appeared a table of prices compiled on the basis of the average price of each article in New York, the 1st of January of each year. Such a table, however useful, fails to give the data which are important in forming a judgment of the whole range of prices for each year. The following table, carefully compiled from the sources indicated, takes the prices of the twelve months in each year, selecting the highest and lowest quotation for each article. It is to be understood, where no mention of quality is made, that the price quoted is for the cheapest grade of each commodity.

¹ In Indiana, a constitutional amendment, changing election day from October to November, was adopted, March, 1881, by popular majority.

² In Ohio and a few other States, where the Legislative sessions are biennial, the Legislature holds "Adjourned Sessions," practically amounting to annual meetings.

³ The Rhode Island Legislature is required to meet annually the last Tuesday in May, at Newport, and an adjourned session to be holden annually in Providence.

⁴ Wisconsin has changed the sessions of the Legislature from annual to biennial, to commence after the session of 1882.

By Act of Congress, March 1, 1792, amended in 1845, a uniform day of election for Electors of President and Vice-President is fixed for all the States—being the Tuesday after the first Monday in November, every fourth year after a President has been elected.

FOREIGN COUNTRIES.

NOTE.—For the rulers or heads of principal nations, see page 10A.

Argentine Republic.

THIS country has an area as great as all Central and Western Europe combined (about 1,619,500 sq. miles), and a population of 1,768,681 by census of 1869, now estimated at 2,500,000. It abounds in remarkably fertile plains, called pampas, with rich alluvial soil four or five feet thick, formed by decay of luxurious vegetation.

It consists of 14 provinces: the province of Buenos Ayres is the most populous, having over half a million population, with a capital city—Buenos Ayres—of 200,000, estimated for 1878. The vast extent of Indian country is very sparsely populated. The population of Buenos Ayres and the riverine provinces is largely European, and immigration has increased enormously of late years, attracted by the fertility of the soil and the prosperity and free institutions of the Republic. By the last census there were 212,000 people of foreign birth, occupying 2,000,000 acres of land, in the province of Buenos Ayres alone, and owning 35 million sheep, besides multitudes of horned cattle, buildings, etc., acquired in a few years by men who, on arrival, did not own a dollar.

Eminently a pastoral country, with about 18 million horned cattle, and 100 million sheep, the exports are largely of wool, hides, and tallow. The premium on gold varied from 30 to 33 per cent. in 1878. The exports in 1880 were \$66,497,423, and the imports \$44,660,204. Twelve lines of steamers run to Europe, the passage occupying 29 days. The Republic has nearly 1500 miles of railway, and 10,000 miles of telegraph, besides an Atlantic cable communicating with London.

The revenue for 1880 was \$19,594,305, derived almost wholly from import and export duties. The expenditure in 1880 was \$17,193,284, and the total national debt \$57,068,979.

The government is a Federal Republic, modelled on the Constitution of the United States, except that the ministry is responsible to Congress, an adverse vote in the Senate and House leading to the formation of a new Cabinet. The laws are the same for all, native or foreign; immigrants are free to naturalize themselves as Argentines or to maintain their foreign nationality.

Austria.

Called, since 1867, the Austro-Hungarian Monarchy (240,000 square miles; population in 1880, 37,741,413), comprises five countries, each bearing the name of kingdom. Its largest city and capital, Vienna, had 726,105 inhabitants in 1880.

The population of Austria embraces several distinct races, the most numerous being the German, numbering 9 millions, or 25 per cent. of the whole.

The various Slavonic races number about 16½ millions, or 46 per cent., Poles, Croats, Serbians, Czechs, Moravians, etc. The Magyars, or Hungarians, number 5½ millions, or 16 per cent.; the Wallachians, nearly 3 millions; the Jews, 1,100,000; the Italians 515,000; and Gypsies, 140,000.

About two-thirds of the people profess the Roman Catholic religion. Education receives great attention, and is open to all at small cost, or even gratuitously. In Austria, all children from six to twelve are bound to attend the common schools, and 76 per cent. actually do so. There are 92 gymnasia, or higher schools, and 6 universities, while Hungary has 142 gymnasia, and one university.

The majority of the people pursue agriculture. About 80 per cent. are engaged in trade or manufactures. The productive land of Austria is estimated at 89 per cent. of its area; Hungary 84 per cent. The great crop is grain, an annual yield of over 400 million bushels. For commerce, Austria is not favorably situated, being an inland country. The principal sea-port is Trieste, on the Adriatic. Total imports about 308 million dollars, and exports 340 million dollars.

The legislative body, or Reichsrath, consists of a House of Lords nominated by the Emperor, consisting partly of life members and partly of hereditary nobles; and a House of Representatives, 353 members, elected by all citizens who possess a small property qualification.

Hungary has a Reichstag, consisting of a House of Magnates for high officers and peers of the kingdom, and a House of Representatives elected for three years. The sovereign (the Austro-Hungarian Emperor) is styled king in Hungary.

In the imperial finances Austria pays 70 per cent. and Hungary 30 per cent. toward the expenses of the empire. The budget of 1881 summed up: receipts, 58 million dollars; expenditures, about the same. The budget of Austria proper amounted to 205 million dollars in 1881; the expenditures to \$179,500,000. The Hungarian budget for 1881, including receipts, \$132,000,000; and expenditures, \$143,500,000. The public debt of the empire was \$1,589,600,000.

The army, on a peace footing, consisted in 1881 of 289,190 men and 16,635 officers. Military service is compulsory for ten years.

The navy in 1881 consisted of 68 vessels, 11 of which were ironclads, and 30 steam vessels, with 320 guns.

Belgium.

Belgium is a kingdom of Western Europe; area, 11,378 square miles; population, 1878, 5,476,668; capital, Brussels, 164,598. Most of the people are Roman Catholics, there being about 15,000 Protestants and 3,000 Jews. Revenue, 1880, \$54,501,284; expenditures, \$55,763,710.

The public debt in 1880 was \$351,967,293. Imports in 1880, 452,265,000; exports, \$428,149,065. Army, peace footing, 46,383 men.

Railways in operation, 1879, 2672 miles, two-thirds of which were owned and managed by the government. Miles of telegraph, 1878, 3144; postoffices, 585; letters carried, 53,641,094; postal cards, 11,671,296; journals, 77,938,000. The great interests are agriculture and manufactures, Belgium being one great workshop. Education is zealously promoted by the government, but, notwithstanding abundant primary school provisions, only 58 per cent. of the population above 7 years of age were able to read and write in 1886.

Bolivia.

Bolivia, a republic of South America, named in honor of Bolívar, (536,200 square miles; population 1878, estimated, 2,080,000, to which should be added about 245,000 wild Indians), is divided into 9 departments, each having a distinct governor. The government is popular in form, three legislative chambers being elected for four years, eight years, and for life. The president is elected for life by a majority of the collective legislature. The administration belongs wholly to the ministry, which is responsible to the Senate. Religion is free, the Roman Catholic being the prevailing form.

The public debt in 1879 was \$30,000,000. The revenue was \$2,929,574 in 1879, one-fifth of which was derived from customs, about as much from Indian tribute, and half as much from the sale of guano; expenditure, \$4,565,504. Imports in 1879, \$6,000,000; exports, \$5,600,000.

Bolivia abounds in high plateaus, constituting granaries of wheat production, has much valuable timber, and the lowlands are the seat of tropical forests and swamps, with every variety of climate, and two or more zones of production. It produces coffee, cotton, sugar-canes, garden vegetables and fruits in surprising luxuriance and abundance. Western Bolivia contains the highest mountains of the two Americas, with frequent volcanoes. The great Cordillera range, reaching up into the region of eternal ice and snow, culminating in the peak of Sorata, 24,800 feet high. The silver-mines of Potosí, world-famous for richness of production, have yielded over \$1,600,000,000 since 1545. Bolivia is poorly supplied with roads, and railroads are as yet almost unknown, great natural difficulties being presented to their construction.

Brazil.

Brazil, the only kingdom in America, (area, 3,287,964 square miles; population, 1872, 10,108,291,) is the largest of the South American countries. First occupied by the French in 1558, the country early fell into Portuguese possession, afterwards passing under the Spanish rule, but reverting to Portugal in 1640.

The legislative power is vested in a Senate of 58 members elected for life, and a Chamber of Deputies, 122 members, chosen for four years by indirect suffrage, involving a property qualification.

The executive power is vested in the emperor, and his ministers and secretaries of state. For administrative purposes, the Brazilian empire is divided into twenty provinces, comprising 642 municipalities, each having a council chosen directly by citizens possessed of an annual income of \$112.

The public debt of Brazil is about \$407,000,000, of which \$85,000,000 consists of paper money issues. The revenue for 1880 was \$57,423,412, more than one-half of which was customs duties, and one-sixth from export duties, the taxes in both these forms on commodities being very heavy. The expenditure in 1880, was \$59,762,289.

The army consists of 15,304 men, raised to 32,000 on a war footing.

The naval force embraces 41 steam vessels, with 230 guns, and 4,136 seamen.

Free public schools supported by the state exist throughout the empire, and in some of the provinces instruction is compulsory.

Brazil has about 200 newspapers, of which six dailies are published at the capital, Rio de Janeiro.

The Roman Catholic religion is established, other forms being tolerated, though they may only be practised privately, and dissenters enjoy civil rights, except that of election to the General Assembly.

Brazilian commerce is flourishing, and there are 18 lines of steam vessels, receiving annual subsidy from the state to the amount of \$750,000; besides this, the North American steamship line, running between Brazil and New York, enjoyed a Brazilian subsidy of \$100,000 annually. The imports in 1880 aggregated \$61,752,000, and the exports, chiefly of coffee, hides, and sugar, \$102,029,250. By a decree of 1867, the great river Amazon was opened to the trading ships of all nations. In 1874, a submarine telegraph cable was completed from Europe. The roads of Brazil are wretched, but railroads have been constructed to the number of over twenty, and are being rapidly extended by the state, as well as by private enterprise.

THE DOMINION OF CANADA.

Compiled from the Sessional Papers of the Dominion of Canada for 1881, and other official sources.

The Dominion of Canada forms (since 1867) a confederate government, embracing the British North American Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, Manitoba, British Columbia, North-west Territory, Vancouver's Island, and Prince Edward Island. It has a representative parliament meeting annually at Ottawa, the capital. The members of the Senate, 77 in number, are nominated for life by the summons of the Governor-General. The House of Commons, with 206 members, is elected by the people for five years, the right of suffrage being subject to a property qualification. The Governor-General (appointed in 1878) is the Marquis of Lorne, salary \$50,000. The funded debt in 1880 was \$199,125,323, drawing interest at an average of 4.37 per cent., having increased to this amount from 93 millions in 1867. The revenue for the fiscal year ending June 30, 1880, was \$23,307,406, derived from the following principal sources: customs, \$14,071,343; excise, \$4,232,427; public works, including railways and canals, \$2,167,401; post office, \$1,282,498. The expenditure for 1880 was \$24,850,634.

The chief items of export were in 1880:

Agricultural products.....	\$32,000,000	Fisheries.....	\$6,500,000
Animals, and produce of.....	18,500,000	Manufactured articles.....	5,000,000
Wood, timber, lumber, etc.....	17,000,000	Products of the mines.....	3,000,000

Of the exports, \$45,846,062 went to Great Britain, 33 millions to the United States, and 9 millions to all other countries. The Canadian lumber trade is of great extent and value, and from 94 to 96 per cent. of its aggregate exports go the United States.

The merchant shipping of the Dominion, Jan. 1, 1880, numbered 7,377 vessels, measuring 1,311,218 tons, and is steadily increasing. The canals of Canada are extensive and profitable, and are managed by the Government. The Welland canal charges 20 cents per ton on grain and other bulky freights, and 2½ cents a ton on each vessel.

The Canadian banks held \$67,000,000 in deposits, with a note issue of \$17,500,000, coin, \$5,500,000, and bills discounted, \$135,000,000.

The total money value of the fisheries within the Dominion of Canada has been as follows, for the past ten years:

The Census of the Dominion in 1881 showed a population of 4,352,080, against 3,686,596 in 1871, a gain of 18 per cent.

The Indian population of Canada, as reported by the Superintendent of Indian Affairs in 1877, was 99,650.

The average of duty on all imported commodities (dutiable and free) was 16.34 per cent. in 1880.

Chili.

Chili, a republic of South America, area 124,084 square miles, population, 1878, 2,403,396, to which should be added omissions, 10 per cent, and about 50,000 Indians, is a mountainous country subject to frequent earthquakes. It has almost every variety of climate, its long narrow territory extending from the hot deserts near the equator to the cold and wet region within twelve degrees of the Antarctic Circle. One-quarter of the country is near the level of the sea, while the great Andes range of mountains rise far above the line of perpetual snow, their mean elevation being 11,830 feet, and the highest peak (Aconcagua) 22,427 feet.

Chili, originally a Spanish settlement, became independent in 1810-17. By the constitution of 1833 the Legislative power is in a National Congress composed of 37 members, elected for six years, and a Chamber of Deputies, 109 members, for three years. Suffrage is universal to citizens able to read and write and paying a small annual tax.

The executive power resides in a President elected for five years, a council of State, and five cabinet ministers, having salaries of \$6,000 each.

The national debt in 1879 amounted to \$79,452,490, mostly contracted in England for the construction of railways. The revenue for 1879 was \$27,693,087, one-half derived from customs and monopolies; and the expenditure \$24,777,360. The commerce of Chili is considerable, the exports being \$37,771,440 in 1878, and the imports \$22,740,000, nearly one-half the commerce being with Great Britain.

Agriculture flourishes, although about 82 per cent of the entire surface is desert, pasture, or forests, with only 18 per cent arable land. Wheat is the most important product, the crop averaging ten million bushels, two-thirds of which is exported.

Chili is rich in gold, silver, and especially in copper.

The army, reduced in 1875 to 3,500 men, was largely increased in 1879 on account of the Peruvian war.

The navy consists of 20 to 22 steam vessels, manned by 1,800 men.

Education is largely aided by government, which supports 810 schools through the country, besides lycœums and the University of Chili, an invaluable government institution, with 700 students, 37 professors, and free instruction.

The Roman Catholic religion is recognized by the constitution, but the public profession of other forms is tolerated.

China.

China, an immense empire in Asia, area 4,560,107 square miles, population 435,000,000 (estimated), has of late years opened diplomatic and commercial intercourse with other nations. It includes Tibet, Mongolia, and Manchuria, besides China proper; the country abounds in numerous rivers, forming the chief highways of the empire. The government is a patriarchal despotism, the Emperor being an autocrat, whose sway is limited only by the sacred right of rebellion. Its vast and productive territory is larger than that of any nation except Russia, and its civilization, the most ancient in the world, has peculiarities unknown to the civilizations of Europe or America. The exclusiveness which long made China a sealed book is slowly giving way, and the empire now sends its ministers to the United States, England, France, Germany, Russia, Spain, the West Indies, and Japan; but the Chinese government still refuses to open the empire to railroads and telegraphs, and destroyed in 1877 the first and only railway laid in the empire; and only 14 of its numerous ports are open to foreign trade. The imports in 1878 were \$70,804,027, and the exports \$67,172,179; about one-third of the commerce is with Great Britain; silk and tea make up three-fourths of the exports, while opium and cotton goods constitute two-thirds of the imports. No certain information regarding Chinese finances exists, but the revenues were estimated in 1878 at \$121,482,000; the public debt is of unknown amount, being wholly domestic, except one foreign loan of \$3,195,000 at 8 per cent, recently contracted, and guaranteed by the customs receipts.

The army of China has 270,000 men organized after the European custom, while on paper the military force is set down 800,000 Chinese and 271,000 Manchocs. The navy embraces 38 vessels.

Its present political organization dates from 1863. The largest city is Bogota, the capital, with 50,000 inhabitants, and Panama has about 20,000.

The legislative power resides in a Senate of 27 members, and a Representative Chamber of 61, elected by general suffrage. The executive power is exercised by a President chosen for two years by the people of the different States, and by four ministers. The revenue is very small, amounting in 1879 to only \$4,910,000, two-thirds of which was from customs. The expenditure was \$8,634,571 in 1879. Colombia has no navy, and the army in time of peace musters only 3,000 men. Education has been recently much improved, the law of 1870 transferring it from the hands of the clergy to the State, and requiring compulsory instruction, the general government subsidizing the States to maintain schools. Religious freedom prevails, there being no State church, though the predominant religion is Roman Catholic.

Denmark.

Denmark, (area 14,553 square miles; population, 1878, 1,969,454), is a constitutional kingdom, occupying an almost insular position between the North Sea and the Baltic. The climate is like that of Scotland in the same latitude, the mean temperature of the year being 47° at Copenhagen. The constitutional charter of 1849, vests the legislative power in the Rigsdag, consisting of a Folkething, 102 members, and a Landsting, 66 members (1850 charter amended in 1866). The Folkething are elected for three years by universal suffrage, and the Landsting for eight years by electoral districts, except 12 members who are nominated for life by the King. Ecuador.

Ecuador, a South American republic, traversed by the equator, from which it takes its name, area 248,312 square miles, population in 1878, 1,146,000, besides about 200,000 Indians; capital, Quito, has about 80,000 people; Guayaquil, the principal seaport, 26,000. The legislative power is vested in a *Corps Legislatif*, consisting of a Senate of 800 members, 225 of whom are chosen for 9 years by the Departments and the colonies, and 75 for life by the National Assembly; and a Chamber of Deputies, now 532 members, elected by universal suffrage, one deputy to each 100,000 inhabitants. Salary of Senators and Deputies, \$1,800. Every Frenchman of 21 years has the right to vote, and there were in 1876, 9,948,070 legal voters, a ratio of one voter to every four inhabitants nearly.

The executive power is vested in a President, elected for seven years by a joint assembly of the Senate and the Chamber of Deputies; salary, \$120,000, and \$32,480 for household expenses; he has power to dissolve the Chamber of Deputies upon the advice of the Senate. The ministry, or Secretaries of State, consisting of nine members, are responsible to the Chambers for the political conduct of the government, while the President is responsible only in case of high treason.

Besides these officers, there is a Council of State presided over by the Minister of Justice, whose function it is to advise on all subjects of law and administrative regulations submitted to it, its decision being final on causes or complaints against officers of the Government.

France is divided into 87 departments, which are subdivided into 362 "arrondissements," 2865 "cantons," and about 36,000 "communes." The President of the Republic appoints a prefect or administrative officer for each department, who is head of the police, issues local decrees, superintends tax collection, and, in a word, represents the government as general agent, assisted by a council elected by the people.

Public debt is divided into funded debt, which is not subject to re-imboursement, but only to interest payment, and floating debt or deposits with the treasury, and bills of exchange called "bons du trésor." The large revenues are derived chiefly from excise and stamp taxes, only the insignificant sum of \$54,000,000, or about 10 per cent. of the whole revenue, coming from customs; the land tax or "contribution foncière," is assessed on the net revenue of lands and houses; the poll-tax, the door and window tax, and the license tax bring in large sums; the income tax is 3 per cent. on income from public funds or any other dividends, besides which the stamp taxes amount to 3 or 4 per cent. on this class of property; the excise brings in the largest revenue of all, about \$200,000,000 per annum, and is levied on spirits, tobacco, salt, sugar, paper, matches, coaches, railways, bridges, receipts, etc.

The army, consisting of about 503,000 men in time of peace, and 19,057 officers, costs about \$115,000,000 per annum. Every Frenchman of 20 years owes to the country five years active service, with very slight exemptions.

The French navy has 258 vessels, 1758 officers, and about 50,000 marines.

The Roman Catholic Church is the most powerful in France, and the sums paid to the clergy of that faith by the government amount to about \$8,000,000 a year.

Systematic provision is made for public instruction, every commune having to maintain primary schools, though education is neither gratuitous nor compulsory. In 1873, out of a population of 23,294,554 above twenty years, 7,702,362 could neither read nor write.

The Bundesrath, or federal council, has 59 members appointed for each session by the governments of the several states. The Reichstag, or House of Representatives, has 397 members, elected for 3 years by universal suffrage—every German of 21 years being an elector. The sessions of the legislature are annual, and every law must receive a majority of the whole number of members of both Houses, and the sanction of the Emperor.

The revenue for fiscal year ending March 31, 1881, was \$148,239,138, derived one-half from customs, one-third excise on sugar, salt, tobacco, spirits and malt, and the remaining quota from various sources. The expenditure for ordinary purposes was \$147,695,846, of which no less than \$90,600,000 was for the army, and \$20,000,000 extraordinary expenses. The deficiency in revenue to meet expenditure was made up by contributions of the states, \$26,000,000, and loans \$12,000,000. In 1879, heavy additions were made to the tariff on imported goods, and Germany has returned to an extreme protective system.

The public debt is only about \$44,000,000 funded, and about \$40,000,000 floating debt, represented by Treasury notes bearing no interest.

Railway communication, formerly confined to a line from Vera Cruz to the City of Mexico, 263 miles, is becoming more general. There are about 7000 miles of telegraph. The chief communication is by the highways between principal cities, on which many lines of stages are constantly plying. The country is rich in agriculture and mineral wealth, vast table-lands, varying from 3000 to 5000 feet in elevation, producing almost every variety of grain and vegetables, while in the warmer regions oranges and other tropical fruits grow profusely. Coffee and cotton are largely cultivated. The northern states of Mexico are full of vast herds of cattle and sheep. Manufactures are poorly developed, but commerce, though much impeded by political turbulence and restrictive laws, is on the increase. The imports amount to a mean annual value of \$29,000,000; and the exports \$31,000,000, more than one-third of which go to Great Britain; but the large increase of commerce springs mainly from smuggling, which is directly fostered by exorbitant duties on imports, practically amounting to prohibition. The country being almost destitute of navigable rivers, the rates of carriage are enormous, and must so continue until the country can be traversed with competing lines of railway.

The revenue for the fiscal year 1880 was \$17,811,125, of which \$12,500,000 was from customs duties; the expenditure was \$23,128,218, more than one-third of which was for the army. The public debt is variously stated at from \$144,700,000 to \$395,500,000; but the Mexican Government claims that its European debt is annulled by the part taken by England, France and Spain in imposing the Maximilian dynasty upon the republic in 1861-62.

The army comprises 24,830 men, the navy only 4 insignificant gunboats.

Capital, Mexico, built in 1521, on Lake Tezcoco, 7435 feet above the sea level; population about 250,000.

Netherlands.

Netherlands, a kingdom of western Europe; area, 12,727 square miles; population 1860, 4,060,580 (by census,) nearly all natives of Holland. Revenue 1881, \$42,044,240; expenditure, 49,786,774; public debt 1879, \$376,908,500. Army in 1880, 65,113 men; navy 1880, 115 vessels, 503 guns, and 5197 men. Imports 1876, \$338,680,000; exports, \$232,680,000. Railways in 1879, 1390 miles, more than half managed by the State; telegraphs, 2196 miles. Postoffices, 1299; letters carried in 1877, 61,720,679; journals, 30,723,619.

Nicaragua.

Nicaragua, one of the five republics of Central America—area, 58,000 square miles; population, 300,000 (estimated), one-half of whom are Indians—is in large part covered with great forests, furnishing the finest mahogany, rosewood, and dye-woods. The

country has long been distracted by internal dissensions: it is governed by a president elected for 4 years, a cabinet of 4 ministers, a senate of 10 members, and an assembly of 11 representatives. The revenue amounted in 1880 to \$2,436,894, and the expenditure rather more, chiefly for the army and public debt of \$1,633,000. The exports amounted to \$2,057,822, and the imports to \$1,473,114. The principal exports were coffee, elastic gum, and gold and silver bullion.

Paraguay.

Paraguay, an inland republic of South America—area 91,981 square miles, population in 1876, 291,844—is a country without cities and almost without civilization. The language spoken is chiefly that of the Indians mixed with a little Spanish. The country achieved independence in 1811, and was ruled by the dictator, Dr. Francia, for 29 years, during which no foreigners were allowed to enter or leave Paraguay. Since 1870 the government, though nominally republican, has been under the control of Brazil. The country is hopelessly insolvent, owing \$236,000,000 to Brazil and the other allies as a legacy of the war, \$9,000,000 to Great Britain, and \$2,100,000 domestic debt, amounting altogether to more than the total value of the country, real and personal. Revenue in 1876, \$215,567; expenses, \$224,630, besides interest and army. The imports in 1880, \$1,030,000, and the exports \$1,164,900. The army embraces 2,000 men, mostly now discharged to relieve the treasury of expense. The only railway in Paraguay is one of 45 miles, and the only telegraph is of the same length.

Peru.

Peru, a republic on the western coast of South America, (area 432,297 square miles; population in 1876, 3,050,000) is governed, under a constitution adopted in 1838, by a President chosen for 4 years, a Senate of 44, and a House of Representatives of 110 members. The revenue for 1873 was \$38,900,000, about one-ninth of which was from customs, the expenditures \$54,600,000; the public debt was \$281,540,684, the interest on the foreign debt being in default. The revenue is chiefly derived from the sale of guano and nitrate of soda. The importations of 1879 were \$27,000,000, and the exports \$45,000,000. The premium on specie is 62 per cent., and the domestic debt sells at 60 cents on the dollar.

The army consists of 4,670 men, besides 1,000 gendarmes and 1,200 vigilantes; during the war with Chili, lasting from 1879 to 1881, Peru put about 16,000 men in the field; the navy consisted of 18 steam vessels, well armed and equipped, of 3,396 horse power, and 17 guns, among which were seven ironclads and rams which were captured by the Chileans. The merchant marine in 1876 had 147 sailing ships and 8 steamers. In 1879 there were 1,750 completed miles of railway and 600 more in construction, Peru having gone into the most extensive railroad building in proportion to its inhabitants of any country. Silver is largely mined, the annual product being from 3 to 4 million dollars, and coinage is free and unlimited. Peru has a fertile soil, producing cotton, sugar, grapes, and olives, while the forests abound in the cinchona-tree, which yields the precious Peruvian bark, or quinine.

The soil is of extraordinary fertility, the climate soft and inviting, and much more salubrious than any other part of the West Indies. Civilization is extremely backward, and public education neglected. There are literally no good roads on the island, transportation being almost wholly on the backs of horses and mules. The army consists of 4,000 men, and the navy of 5 small vessels, with 4 guns. The capital, Santo Domingo, has about 6,000 inhabitants.

NOTE.—To determine the years covered by a given Congress, double the number of the Congress, and add the product to 1789; the result will be the year in which the Congress closed. Thus, the 25th Congress = 70 + 1789 = 1859, that being the year which terminated the 25th Congress, on the 4th of March. To find the number of a Congress sitting in any given year, subtract 1789 from the year; if the result is an even number, half that number will give the Congress, of which the year in question will be the closing year. If the result is an odd number, add one to it, and half the result will give the Congress, of which the year in question will be the first year.

PRODUCTION AND CONSUMPTION OF BEER.

The following table, (from the British Trade Journal, except as to the United States,) gives the quantity of beer, (including ale,) brewed in various countries in 1880, with the consumption *per capita* of population. As no account is taken of the quantity imported into or exported from each country in these figures, it is to be presumed that this element would modify the result as to certain countries.

NOTE.—The salaries of Internal Revenue Collectors are graduated annually in proportion to the amount of revenue collected by each—the maximum salary being limited to \$4,500 by law.

The numbers of the collection districts are those retained when the districts in various States were consolidated by law, and those bearing the intervening numbers were abolished.

COLLECTORS OF CUSTOMS.

NOTE.—While some collectors have fixed salaries, other officers are paid, in whole or in part, by fees or commissions, to which the law fixes a maximum limit.

UNITED STATES CONSULAR SERVICE.

The following table includes all consuls, consuls-general, and commercial agents of the United States, the amount of whose compensation reaches \$1,000, or upwards, annually. By the act of June 1st, 1874, the salaried consulates are divided into seven classes, besides other subdivisions, with specific fixed salaries for each, as follows:

Five consulates at.....	\$6,000	Twenty-one consulates at.....	\$3,000
Two " at.....	5,000	Sixteen " at.....	2,500
One consulate at.....	4,500	Thirty-seven " at.....	2,000
Six consulates at.....	4,000	Forty-seven " at.....	1,500
Eight " at.....	3,500	Twenty " at.....	1,000

By law, all consuls receiving a fixed salary are required to pay into the Treasury, without reduction, all fees received by virtue of their offices. At other consulates and consular agencies the fees collected form the sole compensation of the incumbent, which, however, is limited in the case of consular agents to a maximum of \$1,000, and such agents are usually allowed to transact business. The compensation of the feed consuls is limited to \$2,500. If the fees exceed that sum, such consuls can pay clerk-hire from the fees received at the consulate when specially authorized, but not otherwise. The column of fees shows the amount of fees received at each consulate and agency from which returns have been made for the fiscal year ending June 30, 1880.

Corrected at the Department of State, January, 1882.

*The maximum pay of colonels is limited to \$4,500, and lieutenant-colonels to \$4,000.

The law provides for the retirement from active service of any commissioned officer who has served 30 years as such, on his own application, at the discretion of the President; or for placing on the retired list, unconditionally, after 40 years service, any officer applying to be retired: or, if 45 years of actual service, or 62 years of age is reached, an officer may be retired at the discretion of the President.

The number of officers on the retired list is limited to 400 by law. The pay is fixed at 75 per cent. of the pay allotted to the rank of officers in active service at the time of retirement.

QUARTERS, FUEL AND FORAGE ALLOWED TO ARMY OFFICERS.

By Act of June 18, 1878, all allowance or commutation for fuel was prohibited, but wood is furnished at \$3 per cord, out of the pay of officers. Forage is furnished only in kind, and only to officers actually in the field or west of the Mississippi, on the basis of five horses for the General of the Army, four for the Lieutenant-General, three each for a major or a brigadier-general, and two each for a colonel, lieutenant-colonel, major, mounted captain or lieutenant, adjutant and regimental quartermaster. Quarters are furnished on the following basis: General, (commutation for quarters,) \$125 per month; Lieutenant-General, \$100 per month; major-general, six rooms; brigadier-general or colonel, five rooms; lieutenant-colonel or major, four rooms; captain or chaplain, three rooms; and first or second lieutenant, two rooms—all of which may be commuted at \$10 per room per month.

NOTE.—The law provides that no allowances shall be made to officers in addition to their pay, except quarters and forage furnished in kind.

Mileage at the rate of eight cents per mile is allowed for travel under orders.

The pay of cadets at the U. S. Military Academy, West Point, was fixed at \$540 per annum, by Act of Aug. 7th, 1876, instead of \$500 and one ration *per diem*, (equivalent to \$609.50) by former laws.

The pay of private soldiers runs from \$156, (\$13 a month and rations,) for first two years, to \$21 a month and rations, after twenty years service.

UNITED STATES MILITARY ACADEMY.

The United States Military Academy at West Point was founded by act of March 16, 1802, constituting the corps of engineers of the army a military academy with fifty students or cadets, who were to receive instruction under the senior engineer officer as superintendent. Later acts established professorships of mathematics, engineering, philosophy, etc., and made the academy a military body, subject to the rules and articles of war. In 1815, a permanent superintendent was appointed, and a year later an annual board of visitors was provided for, to be named by the President, the Speaker of the House, and the President of the Senate. In 1843 the present system of the appointment of cadets was instituted, which assigns one cadet to each Congressional district and Territory in the Union, to be named by the Representative in Congress for the time being, and ten appointments at large, specially conferred by the President of the United States. The number of students is thus limited to 312. A large proportion of those appointed fail to pass the examination, and many others to complete the course, the proportion being stated at fully one-half hitherto. The course of instruction requires four years, and is largely mathematical and professional. The discipline is very strict, even more so than in the army, and the enforcement of penalties for offences is inflexible rather than severe. The whole number of graduates from 1802 to 1877 was about 2,700, of whom 1,200 are deceased and about 1,500 living. Of those surviving, 800 are still in the army, and about 700 out of service.

Appointees to the Military Academy must be between 17 and 23 years of age, at least five feet in height, and free from infirmity, and able to pass a careful examination in various branches of knowledge. Each cadet admitted must bind himself to serve the United States eight years from the time of admission to the academy. The pay of cadets, formerly fifty dollars per month and rations, was fixed at \$540 per year, with no allowance for rations, by the act of 1876. The aggregate amount of money appropriated by the United States for the Military Academy from 1802 to 1877 inclusive, was \$11,396,128, being an average of about \$149,949 annually. The number of actual members of the academy, by the official register of June, 1881, was 192.

THE UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The United States Naval Academy was opened October 10, 1845, and the credit of its foundation is attributed to Hon. George Bancroft, then Secretary of the Navy under President Polk. The course of instruction, designed to train midshipmen for the navy, at first occupied five years, of which three were passed at sea. Various changes have been made in the course of instruction, which was made seven years in 1850, four years in 1851, and six years (the two last of which are spent at sea) March 3, 1873, where it now remains. The Naval Academy, first located at Annapolis, Maryland, was removed to Newport, R. I., in May, 1861, but reestablished at Annapolis in September, 1865, where it now is, occupying lands formerly known as Fort Severn. The academy is under the direct care and supervision of the Navy Department. There are to be allowed in the academy one cadet-midshipman for every member or delegate in the House of Representatives, appointed at his nomination, one for the District of Columbia, and ten appointed at large by the President. The number of appointments which can be made is limited by law to twenty-five each year, named by the Secretary of the Navy after competitive examinations, the cadets being from fourteen to eighteen years of age. The successful candidates become students of the academy, and receive the pay of cadet-midshipmen, \$500 per annum. Besides the cadet-midshipmen, 25 cadet-engineers may be appointed each year, from 16 to 20 years of age, on competitive examination involving a higher standard of knowledge. The course for cadet-engineers is 4 years at the academy and 2 additional years at sea. All cadets who graduate are appointed assistant engineers in the navy as fast as vacancies occur. The course of instruction is thorough, involving a close pursuit of mathematics, steam engineering, physics, mechanics, seamanship, ordnance, history, law, etc. The whole number of students in 1881 was: Cadet-midshipmen, 161; cadet-engineers, 100; total, 261. The graduating classes of 1881 numbered 72 cadet-midshipmen, and 24 cadet-engineers.

NOTE.—The above is exclusive of \$1,986,773 Levee Bonds, \$5,350,000 Railroad Aid Bonds, and of \$3,694,644 other disputed debt. The Supreme Court of Arkansas in 1878 decided that all the Levee bonds are unconstitutional and invalid. All of the Railroad Aid bonds have been declared by the Supreme Court to have been illegally issued. Amendment to the State Constitution, virtually repudiating a large part of the State debt, was defeated at the election of Nov. 2, 1880, by vote of 64,497 in its favor, to 41,049 against it. As it required a full majority of all votes cast at an election to amend the Constitution, and there were 132,985 votes cast, it lacked 3,991 votes of a majority.

The State has further laid the foundation for an ample school fund, by devoting to that object all the alternate sections of land reserved out of its heavy railroad grants, and also one-half the public domain of the State, with all money that may come to the State from the sale of such moiety.

The public domain of Texas, (which alone of all the States retained control and ownership of its public lands upon admission to the Union,) still embraces more than 67,000,000 acres, or a territory larger than the entire surface of any State in the Union, except California and Nevada. The annual immigration into Texas is reckoned at 200,000 in the Governor's message for 1879. The aggregate vote at the State election of 1880 was 264,345.

West Virginia has no debt (unless the share of that State in the *ante-bellum* State debt of Virginia is reckoned such), the State Constitution having prohibited the creation of any debt by the Legislature, except in an emergency, like rebellion or invasion. After the admission of the State, in 1863, Virginia claimed that one-third of her State debt of \$45,000,000 should be paid by West Virginia, and left out \$15,239,371 in the adjustment of her debt. West Virginia claims that a very much smaller sum is her share, and the matter remains unadjusted.

NOTE.—At the election of 1880, the State issue, represented in the above vote on Governor, was the payment of the State debt. The Democrats divided on two candidates, Wright, Debt-paying, in favor of payment in full, and Wilson, "Low tax" Democrat, in favor of scaling or indefinitely postponing the payment of the debt. The Republican candidate for Governor was elected through this division.

NOTE.—Numerous variations in the Presidential vote are found in the different tables published. One principal source of discrepancy is in taking the vote for different Electors, of either party, as representing the vote for President. As the votes for Electors vary greatly, some tables take the highest vote cast for any one Elector; others, the highest cast for any Elector-at-large; and others still, the average vote cast for all the Electors of that party.

1. In Louisiana, two Republican Electoral tickets were voted for: the regular Republican, and the Beattie, or Grant Republican. The latter received about 9,740 votes, not returned in the first table published.

2. In Maine, the Hancock Electoral ticket was styled "Fusion," containing 3 Democratic and 4 Greenback Electors. Besides this, a "Straight" Greenback Electoral ticket was voted for, with Weaver's name at the head.

3. The above vote in Nevada and Tennessee is from the State Officers. Other statements vary largely in the vote of both parties.

4. The footings in Texas are correct, as rendered to the Secretary of State, but three Counties made no return of votes for President, (Denton, Galveston and McMullen.) If these cast as many votes for Electors as for Governor, it would increase Hancock's vote in the State, 5,820, and Garfield's 1,746, and Weaver's 593.

5. These figures are the finally corrected returns in the Office of the Secretary of State. Earlier statements gave Garfield 45,567 votes, and Hancock 18,316 votes.

6. Two Democratic Electoral tickets were voted for in Virginia, the Regular or Debt-paying Hancock Ticket, and the Re-adjuster, or Mahone Hancock Ticket. Both are added together in the table.

7. Of the scattering votes, 10,305 were cast for Neal Dow, "Prohibition" candidate for President, and 767 votes for John W. Phelps, "American" or Anti-Secret-Society candidate.

8. The Electoral vote of Georgia was cast irregularly, on the 3d Wednesday of December, instead of the first Wednesday, as required by Act of Congress. In the count of the Electoral vote, Feb. 9, 1861, Congress declared Hancock to have received 155 votes, if Georgia were counted, and 144 votes, if not counted; that in either case, Garfield had received a majority of the votes, and was duly elected.

NOTE.—The inhabitants of Alaska and the Indian Territory (both unorganized as yet) are not included in the above total. The census of Alaska in 1880 showed: White, 392; Creoles (issue of intermarriages between the whites and natives), 1,683; Aleuts, 1,960; Innuits, 17,488; Indians, 8,653; total, 30,178.

The Indian Territory is estimated to contain 60,000 to 75,000 inhabitants.

The Indians included in the census in each State and Territory are those reckoned as civilized, or outside of tribal organizations. Indians not taxed are by law excluded from the census. Estimates of their numbers vary widely—from 200,000 to 350,000 (the latter as estimated in the census of 1870), while the latest census or estimate of the Indian agencies, as reported in 1881 to the Commissioner of Indian Affairs, gives 246,417 Indians, excluding Alaska. The whole population of the United States exceeds 50,600,000, including Indians and Alaska.

In the Chinese column (from want of space elsewhere) have been reckoned 143 Japanese.

POPULATION OF THE UNITED STATES IN 1870 AND 1880.

From the Official Returns of the Tenth Census, 1880.

NOTE.—In cases where counties are left blank, they have usually been consolidated with other counties, or have been organized since the date of the former census.

THE METRIC OR DECIMAL SYSTEM.

As applied to weights and measures, the metric system has been adopted by France, Germany, Italy, Spain, Portugal, Belgium, Netherlands, Greece, Mexico, Brazil, Peru, Chili, etc. Switzerland, Denmark, and Austria have partially adopted it, and it is legalized or permissive (not compulsory) in the United States and in Great Britain. As applied to measures of length, the standard unit is the metre, ascertained with mathematical exactness to be one ten-millionth part of a terrestrial meridian. The unit of volume (or litre) is the capacity of a cubical vessel measuring one tenth of a metre on its edges; and the unit of weight is the actual weight of distilled water which will fill such a vessel. The following tables exhibit the various designations of weights and measures under the metric system, and their equivalents in existing American or English weights and measures, as legalized by act of Congress, July 27, 1866.

* The whole quantity liable to be issued under the act of July 2, 1862, is 9,600,000 acres.

NOTE.—Under an act of Congress approved Sept. 4, 1841, each State thereafter admitted to the Union was granted 500,000 acres of land for purposes of internal improvement; 46,080 acres (72 sections) for a State University; 32,000 acres (50 sections) for the purpose of erecting public buildings at the Capital; and 32,000 acres for a penitentiary or State prison. The same grant of 500,000 acres was extended to the States of Alabama, Arkansas, Illinois, Indiana, Louisiana, Michigan, Mississippi, and Missouri. The quantity of land thus granted is estimated at 9,000,000 acres.

By act of July 2, 1862, each State, old or new, was granted 30,000 acres of the public domain for each Senator and Representative in Congress (or land scrip to that amount) for the purpose of endowing a College of Agriculture and the Mechanic Arts in each State. Of the 9,600,000 acres estimated to be due the States under this munificent land-grant, about 8,200,000 acres have already been located.

NUMBER OF ELECTORS IN FRANCE.

In the French Republic, suffrage is practically universal, there having been inscribed on the registers of the Ministry of the Interior by an official report dated April 1, 1876, 9,948,070 legal voters, out of a population the same year of 36,905,738 in France. This gives 1 voter to every 4 inhabitants, nearly. In the United States, by the census of 1870, the ratio of legal voters to population was 1 to 4½, nearly. In Great Britain, where suffrage is restricted, the proportion is 1 voter to every 11 inhabitants.

BUSINESS OF THE SUEZ CANAL FROM ITS OPENING.

This great ship canal, one hundred miles in length, connects Suez on the Red Sea with Port Said on the Mediterranean. It was commenced by a company, aided by large subscriptions of the governments of Egypt, France, and England, in 1858, and opened November 17, 1869. It is 72 feet wide at the bottom, about 300 feet at the surface, and 26 feet in depth, easily passing the largest vessels. The controlling interest in the canal was purchased for £4,000,000, in 1875, by the British government, which now holds it. The following table exhibits the prodigious increase of business on this great work :

TABLE FOR INVESTORS.

THE following table shows the rate per cent of annual income to be realized from stocks or bonds bearing any given rate of yearly dividends or interest, from 1 to 15 per cent, when purchased at various prices from 10 to 300 per cent. This table applies equally well to both stocks and bonds, and has nothing to do with the length of time which a bond has to run to maturity.

For example: To ascertain what rate of annual interest will be realized on a bond or stock which bears 7 per cent per annum and can be purchased at 92 (i.e., at 92 per cent of its par value, whatever the par may be), find 92 in the column of "purchase price" and follow that line across to the column headed "7 per cent," which will show the correct figures—in the present instance, 7 7/8 per cent.

Purchase Price.	3 per cent.	3.65 per cent.	4 per cent.	4 1/2 per cent.	5 per cent.	6 per cent.	7 per cent.	7 1/2 per cent.	8 per cent.	9 per cent.	10 per cent.	12 per cent.	15 per cent.

SUCCESSION TO THE CHIEF MAGISTRACY

RECENT events in the United States have forcibly drawn public attention to the constitutional and legal provisions for the Presidential succession. In view of the great amount of strife, anarchy and civil war with which the pages of history are filled, growing out of disputed successions and contending dynasties, a wise foresight and regard for public order demand that ample safeguards should be provided to assure a Presidential succession concerning which there could be no dispute. The power vested by the Constitution in Congress to provide for the case of the removal, death, resignation and inability, both of the President and Vice-President has been exercised only in the statute of 1792, (Revised Statutes, Sec. 146,) which provides that the President of the Senate, or, if there is none, the Speaker of the House of Representatives, shall act as President. The Forty-Sixth Congress adjourned March 4, 1881, at the expiration of its term of office, leaving no President of the Senate and no Speaker of the House of Representatives in existence. The assassination of the President and his long continued disability created the most anxious solicitude in the public mind, regarding the discharge of the duties of the Presidential office.

Pending some additional legislation regarding the succession to the presidency, and defining the conditions under which the continued disability of the President may entitle the Vice-President to assume the functions of Chief Magistrate, the provisions of the several State constitutions as to succession to the chief magistracy of the State, possess interest. The following is a summary of these various provisions.

It will be noted that 11 States have no Lieutenant-Governor; but that provision is made in all, for a constitutional successor who shall discharge the office of Governor in case of any disability of the Governor-elect.

Alabama. No Lieut.-Governor. In case of the impeachment of the Governor, his removal from office, death, refusal to qualify, resignation, absence from the State or other disability, the power of the office of governor until the time appointed for the election of governor arrives, or until the disability is removed, is to be exercised by the President of the Senate; or in case of his removal or disability, the Speaker of the House of Representatives, shall administer the government.

Arkansas. No Lieut.-Governor. The office devolves upon the President of the Senate or Speaker of the House of Representatives successively.

California. The succession to the office of Governor falls (1) to the Lieut.-Governor; (2) to the President *pro tempore* of the Senate, and in case of his removal or disability (3) to the Speaker of the House.

Colorado. Vacancy or disability in the office of Governor devolves his duties upon (1) the Lieut.-Governor; (2) the President of the Senate *pro tempore*; (3) the Speaker of the House.

Connecticut. The constitution provides for no disability of the Governor except through death, resignation, refusal to serve, removal from office, impeachment or absence from the State. In either of these contingencies the Lieutenant-Governor succeeds, or in case of his disability from any of the above causes, the President of the Senate *pro tempore*. If the Lieut.-Governor while administering the government, dies or resigns, the Secretary must convene the Senate for the purpose of choosing a President *pro tempore*.

Delaware. No Lieut.-Governor. In case of any vacancy in the office of Governor, by death, removal, resignation, or inability, the office is to be exercised (1) by the Speaker of the Senate; (2) by the Speaker of the House; (3) by the Secretary of State, until the next meeting of the General Assembly, who must elect a person to exercise the office until a governor elected by the people is duly qualified.

Florida. Vacancy or inability in the office of Governor devolves its duties (1) on the Lieut.-Governor; (2) on the President *pro tempore* of the Senate for the residue of the term or until the disability shall cease.

Georgia. No Lieut.-Governor. Vacancy or disability in the office of Governor devolves the executive power (1) on the President of the Senate; (2) on the Speaker of the House.

Illinois. Vacancy or disability in the office of Governor devolves its powers on (1) the Lieut.-Governor (2) the President of the Senate; (3) the Speaker of the House.

Indiana. Vacancy or disability in the office of Governor devolves it on the Lieut.-Governor. The constitution empowers the General Assembly to provide by law what officer shall act as Governor in case both of these offices become vacant, through inability or otherwise.

Iowa. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate; (3) the Speaker of the House of Representatives.

Kansas. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate; (3) the Speaker of the House of Representatives.

Kentucky. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) upon the President *pro tempore* of the Senate.

Louisiana. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate.

Succession to the Chief Magistracy.—Continued.

Maine. No Lieut.-Governor. Vacancy or disqualification in the office of Governor, devolves it upon (1) the President of the Senate; (2) the Speaker of the House. If the three offices in succession become vacant, the Secretary of State must convene the Senate, that a President may be chosen to exercise the office of Governor.

Maryland. No Lieut.-Governor. In case of vacancy or disqualification in the office of Governor, the General Assembly must elect a Governor; or if not in session, the President of the Senate or (2) the Speaker of the House is to exercise the office of Governor.

Massachusetts. Vacancy by reason of death, absence or otherwise devolves the office of Governor upon the Lieut.-Governor. Whenever the office of Governor and Lieut.-Governor shall be vacant by death or otherwise, the office devolves upon the Council (a body of nine officers appointed by the Governor.)

Michigan. Vacancy or inability in the office of Governor devolves it upon (1) the Lieut.-Governor (2) the President *pro tempore* of the Senate.

Minnesota. Vacancy from any cause whatever in the office of Governor devolves it upon the Lieut.-Governor in case of vacancy. The Senate must elect a President *pro tempore* to be Lieut.-Governor.

Mississippi. Vacancy by death or otherwise in the office of Governor, or his inability from protracted illness, devolves his duties upon (1) the Lieut.-Governor; (2) the President of the Senate *pro tempore*; (3) the Speaker of the House. In case of the inability of the foregoing officers, the Secretary of State must convene the Senate to elect a President *pro tempore*.

Missouri. Vacancy or disability in the office of Governor devolves it upon (1) the Lieut.-Governor (2) the President of the Senate; (3) the Speaker of the House.

Nebraska. Same as the preceding.

Nevada. Vacancy or inability in the office of Governor devolves it (1) on the Lieut.-Governor; (2) on the President *pro tempore* of the Senate.

New Hampshire. No Lieut.-Governor. Vacancy by death or otherwise devolves the governorship upon the President of the Senate.

New Jersey. No Lieut.-Governor. Vacancy or inability in the office of Governor, devolves it upon (1) President of the Senate; (2) the Speaker of the House.

New York. Vacancy or inability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President of the Senate.

North Carolina. Vacancy or inability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President of the Senate *pro tempore*. If the latter becomes Governor, the Secretary of State must convene the Senate to elect a President.

Ohio. Vacancy or disability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President of the Senate; (3) the Speaker of the House.

Oregon. No Lieut.-Governor. Vacancy or inability in the office of Governor, devolves it on (1) the Secretary of State; (2) the President of the Senate.

Pennsylvania. Vacancy or disability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the President *pro tempore* of the Senate.

Rhode Island. Vacancy or inability in the office of Governor, devolves it upon (1) the Lieut.-Governor; (2) the person entitled to preside over the Senate for the time being.

South Carolina. Vacancy or inability in the office of Governor, devolves it on the Lieut.-Governor. The Legislature must provide what officer shall act as Governor, in case of a double vacancy or inability.

Tennessee. No Lieut.-Governor. Vacancy in the office of Governor, devolves the office on (1) the Speaker of the Senate; (2) the Speaker of the House. No provision for the case of disability.

Texas. Vacancy or disability in the office of Governor, devolves it on (1) the Lieut.-Governor; (2) the President of the Senate, for the time being.

Vermont. Vacancy or disability in the office of Governor, devolves its powers upon the Lieut.-Governor. The Legislature must provide for further vacancy or disability.

Virginia. Vacancy or inability in the office of Governor, devolves it upon the Lieut.-Governor, the General Assembly must provide by law for the discharge of the executive functions, in other necessary cases.

West Virginia. No Lieut.-Governor. Vacancy or disability in the office of Governor, devolves it upon (1) the President of the Senate; (2) the Speaker of the House. In all other cases where there is no one to act as Governor, one shall be chosen by joint vote of the Legislature. Whenever a vacancy occurs in the office of Governor, before the first three years of the term [of four years] have expired, a new election for Governor must take place to fill the vacancy.

Wisconsin. Vacancy or inability from mental or physical disease devolves the office upon (1) the Lieut.-Governor; (2) the Secretary of State.

THE following statement will exhibit the amount of the precious metals estimated to have been obtained from the surface and mines of the earth from the earliest times to the close of 1879 :

[Estimate based, in part, upon a work on "Gold and Silver," by the Russian Councillor Otreschkoff, published in 1856.]

NOTE.—Regarding this and all other estimates of the aggregate amount of the precious metals existing in the world at any period, it is only candid to state that they cannot rise above the domain of conjecture. Statistical science, even now in its infancy, was not born before the present century; and where no census even of the numbers of mankind existed, nothing could possibly be known regarding the amount of the precious metals.—EDITOR OF AMERICAN ALMANAC.

4. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, publications required to be mailed to the Librarian of Congress by the copyright law, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

All communications to Government officers, and to or from members of Congress, are required to be prepaid by stamps.

THE ATLANTIC MONTHLY.

THE first number of THE ATLANTIC MONTHLY appeared in November, 1857. Since that time there has not been a single issue which has not more or less successfully realized the wish of Mr. Phillips, its first publisher, "that the magazine should represent what is best in American thought and letters." It has not aimed to secure popularity by sensational articles, or by superficial treatment of subjects in which the people are interested. On the other hand, it has not sought merely to reach the persons of highest cultivation, but rather, by representing what is best in American thought and letters in the departments of Fiction, of Essays, of Poetry, of Travel, and Discussion of Current Topics, it has endeavored to command the attention and reward the careful reading of all intelligent American citizens.

FICTION.

The Serial and Short Stories of THE ATLANTIC have been of a very high order. The catalogue of those who have contributed to this department embraces numerous writers of distinction, and a list of the stories they have written for the magazine includes many of the best Novels and Short Stories in modern literature.

ESSAYS AND SKETCHES.

In this delightful field of letters THE ATLANTIC has been peculiarly fruitful. Many volumes of rare interest have been made up from this part of THE ATLANTIC'S contents.

POETRY AND CRITICISM

Have received from THE ATLANTIC a kind and amount of attention which have given it especial preëminence as a literary magazine.

TIMELY TOPICS.

THE ATLANTIC profoundly believes in the discussion of subjects in which the public is or should be interested. It enlists the aid of writers who, by ability, education, experience, and impartiality, can speak with authority on topics which belong to the immediate hour, but which involve principles and consequences that give them permanent importance.
